Fairies Afield Mar 03 2021 *Fairies Afield* is a delightful children's book with kind and generous kids doing wonderfully lovely things, for which they receive magical prizes from fairies. It contains four charming stories. "Ask the Robin" deals with two orphaned sisters who need to survive on their own but may require help from fairies. "A Magic Table" is about three poor cousins who must earn the right to inherit their uncle's assets. "The Weather Maiden" revolves around a shy young girl having an awful time adapting to living with her aunt and uncle. "The Enchanted Trunks" deals with a girl who decides to travel with her cousin, but her main concern is being able to pack everything efficiently.

Violence and Mental Health Oct 30 2020 Violence is one of the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues as they affect states, communities and

families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international—and intranational—level before zeroing in on the nature of violence in communities such as villages or city districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of ‘undoing violence’ by detailing case studies of effective interventions and prevention occurring in countries, communities and families. These cases give us pause to reflect on the nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health.

Engaging Affects, Thinking Feelings Apr 04 2021 The thought-provoking essays brought together in *Engaging Affects, Thinking Feelings: Social, Political and Artistic Practices* balance critical thinking with creative opportunities to imagine new possibilities. With an international breadth that crosses continents and an interdisciplinary orientation that connects diverse scholarly fields, this collection is ambitious in its scope. At the same time, the essays focus on the small details, embodied traces, and intimate spaces of experience often overlooked or devalued within dominant discourses. Exploring diverse issues and methodologies, the contributions here share a willingness to pay close attention to vulnerable subjects that challenge readers to think beyond the rational and binary limits of academic knowledge. As such, the authors simultaneously engage readers’ intellects and emotions as they write passionately about subjects ranging from war, food, sexuality, geography, social media, poetry, photography, and philosophy. The result is a text that offers diverse ways of mobilizing an array of affect theories in relation to specific sites of interpretation, activism, and creativity.

A New Reference Grammar of Modern Spanish Dec 24 2022 (abridged and revised) This reference grammar offers intermediate and advanced students a reasonably comprehensive guide to the morphology and syntax of educated speech and plain prose in Spain and Latin America at the end of the twentieth century. Spanish is the main, usually the sole official language of twenty-one countries, and it is set fair to overtake English by the year 2000 in numbers of native speakers. This vast geographical and political diversity ensures that Spanish is a good deal less unified than French, German or even English, the latter more or less internationally standardized according to either American or British norms. Until the 1960s, the criteria of internationally correct Spanish were dictated by the Real Academia Espanola, but the prestige of this institution has now sunk so low that its most solemn decrees are hardly taken seriously - witness the fate of the spelling reforms listed in the *Nuevas normas de prosodia y ortografia*, which were supposed to come into force in all Spanish-speaking countries in 1959 and, nearly forty years later, are still selectively ignored by publishers and literate persons everywhere. The fact is that in Spanish 'correctness' is nowadays decided, as it is in all living languages, by the consensus of native speakers; but consensus about linguistic usage is obviously difficult to achieve between more than twenty independent, widely scattered and sometimes mutually hostile countries. Peninsular Spanish is itself in flux.

Manual on the Simple Linear Actuarial Model Apr 28 2023 This Simple Linear Actuarial Model (SLAM) manual is the accompanying publication to An Actuarial Model for Costing Universal Health Coverage in Armenia. It provides detailed guidelines in using the Microsoft Excel for SLAM. As an actuarial model, the SLAM calculates and presents the actuarial projections and key financial indicators to support the management of the health insurance programs nationwide and at local levels in assessing the overall costs and financial sustainability of health insurance programs. The goal is to have an actuarial model that they could update themselves without frequent intervention of actuarial experts and use for day-to-day management and assessment of alternative policy configurations of the health insurance schemes.

Cyber Victimology Jun 25 2020 Cyber Victimology provides a global socio-legal-victimological perspective on victimisation online, written in clear, non-technical terms, and presents practical solutions for the problem. Halder qualitatively analyzes the contemporary dimensions of cyber-crime victimisation, aiming to fill the gap in the existing literature on this topic. A literature review, along with case studies, allows the author to analyze the current situation concerning cyber-crime victimisation. A profile of victims of cyber-crime has been developed based on the characteristics of different groups of victims. As well, new policy guidelines on the basis of UN documents on cybercrimes and victim justice are proposed to prevent such victimisation and to explore avenues for restitution of justice for cases of cyber-crime victimisation. This book shows how the effects of cyber victimisation in one sector can affect others. This book also examines why perpetrators choose to attack their victim/s in specific ways, which then have a ripple effect, creating greater harm to other members of society in unexpected ways. This book is suitable for use as a textbook in cyber victimology courses and will also be of great interest to policy makers and activists working in this area.

Extracorporeal Life Support for Adults Mar 27 2023 This book presents a concise, evidence-based review of extracorporeal life support (ECLS) for adult diseases. It describes the use of ECLS with patients who are experiencing severe hypoxemic respiratory failure (ARDS and pneumonia), ventilatory failure (status asthmaticus and COPD), cardiogenic shock and circulatory or gas exchange failure following complications in cardiothoracic surgery, as well as its use as a bridge to lung transplant. Historically, clinicians have used ECLS as a last resort; however, this text details the technological improvements, evidence of improved outcomes and adverse consequences of alternative treatments that are causing this modality to be more commonly adopted. Topics include a description of the complex physiology and technology underlying ECLS; the evidence base for its use in specific

clinical conditions; vascular access techniques; daily management of the circuit and patient; guidance regarding the weaning and decannulation process and recommendations for crisis management and rehabilitation related to ECLS. Extracorporeal Life Support for Adults is ideal reading for practicing physicians, nurses, perfusion specialists, therapists and critical care trainees who are considering whether to refer their patients for ECLS or are already providing ECLS and are seeking a practical reference to best practices and updated information.

An International Perspective on Contemporary Developments in Victimology Oct 10 2021 This festschrift in honor of the work and legacy of Dr. Marc Groenhuijsen provides an international and holistic overview of recent developments in victimology, taking a global scope but grounded in everyday experiences of victims. Its multidisciplinary perspective reflects a range of approaches and practices in victimology, including contributions from the fields of social work, criminology, sociology, psychology, and law. Firstly, the volume introduces new perspectives in victimology, and then analyzes different forms of victimization in countries worldwide. It gives special attention to victims' rights and participation in the criminal justice system, detailing victim-centered approaches to justice through practices such as restorative justice and restitution. Highlighting the growth and development of victimology from a specialization in criminology to an academic discipline in its own right, this book reflects the range of approaches and depth of scholarship in the field. This will be an essential resource to students of victimology, researchers, policy makers, and victim's advocates.

Learning with Information Systems Jul 27 2020 In *Learning with Information Systems* the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

Rotary Blood Pumps Aug 20 2022 Rotary blood pumps increasingly are being used in open heart surgery and in assisted circulation for patients with heart disease. These rotary devices include vortex (centrifugal) and axial pumps, which can be utilized in conditions where the use of conventional pulsatile pumps would entail problems of cost and size. Rapid progress is now being made in developing new devices for controlling blood flow within the heart and great vessels as well as extracorporeally for use in coronary and intensive care units and, in the future, for long-term use. This book provides information on the physiology of nonpulsatile circulation, the development of rotary pump engineering, and the clinical application of rotary blood pumps. It also presents an overview of future developments in this important field.
