"Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement. A monthly register of the most important works published in North and South America, in India, China, and the British colonies: with occasional notes on German, Dutch, Danish, French, Italian, Spanish, Portuguese, and Russian books. Progress in Nucleic Acid Research and Molecular Biology Professor Rees here re-examines the evidence for the Pelagian controversy. The second part of the book consists of Pelagius' letters, which provide the clearest and most succinct statements of Pelagian theology, but few of which have ever been translated into English before. --from publisher description. Collection of the monthly climatological reports of the United States by state or region, with monthly and annual national summaries. With contributions by numerous experts Research in Health Care Settings provides: an abbreviated review of the step-by-step process of conducting research; a glimpse backstage at the way research is actually done; a discussion of the problems of collaboration; and help in building bridges to the health professional necessarily immersed in the day-to-day problems and emergencies of health care Applied Research is defined as requiring a completely different model from the textbook model traditionally presented. 'Research in the Real World' is shown to require good judgement, flexibility and creativity. The volume is thus essential reading for all social scientists. The Gunner Goggles Series is the first exam prep resource written by a high-scoring peer group of medical students, ensuring the most practical and efficient study guidance. It organizes topics around the USMLE and NBME content outlines for the required shelf exams and features state-of-the-art Augmented Reality (AR) mobile application to extend learning beyond the book. This innovative series features AR opportunities throughout the text for an integrated print-mobile experience that maximizes learning and test preparation. The Gunner Goggle function allows you to scan pages for integrated AR links, unlocking animations, visuals, and 3D models that clarify complex anatomy, conditions, and concepts in a remarkably effective and unique manner. Gunner Goggles Series: Medicine is one of seven authoritative exam preparation guides that use cutting-edge AR technology to fully prepare you for the NBME clinical shelf exams, the USMLE Step 2 Clinical Knowledge (CK) exam, and successful clinical rotations. Topics are organized around the USMLE and NBME content outlines for specific shelf exams, and information is presented in a highly templated, concise manner. The Augmented Reality application allows you to efficiently study and learn using an integrated print-mobile approach. In addition to unlocking animations and other visuals, AR app access also includes additional content, links to provide feedback to the authors, community pages, and more. All test topics are covered in just enough detail to help you hone in on key points you must know for exam success. Unique! Every disease is described by its stem clues (buzzwords that appear in question stems) and prophylactic measures (PPx), mechanism (MoD), diagnostic tests (Dx) and treatment/management principles (Tx/Mgmt) - the four "Physician Tasks" that the NBME requires students to know about each disease. You'll also get real-world tips for your clinical rotations from your peers - information that won't show up on the shelf exam but is ideal for maximum impact when on rounds (knowing the prognosis for a specific disease, for example). Plus ... effective study techniques, sample study schedules, tips and tricks to better retain information learned from review questions, and methods to self-generate mnemonics. Edited, written, and crowdsourced by high-performing medical students and residents and reviewed by experts in the field to ensure accuracy, relevancy, and accessibility. Many important thinkers in the philosophical tradition, like Aristotle or Hume, have used an explicit theory of action as the basis of their respective normative theories of practical rationality and morality. The idea behind this architecture of theories is that action theory can inform us about the origin, bonds, reach and limits of practical reason. The aim of this book is to revive this direct connection between action theory and practical philosophy, in particular to provide systematic action-theoretical underpinnings for the discussion about the normative structure of practical reason. This book brings together a collection of specially commissioned essays from internationally prestigious scholars in the field and represents the state of the art in contemporary philosophy of action. The book is divided into three parts: i. conceptual work about what actions, intentions and intentional actions are; ii. empirical theory of practical deliberation; and iii. theories about the action theoretic features of autonomy. The volume significantly advances these three lines of research and offers important new contributions to each of them. This textbook introduces the key concepts that underpin sustainable energy transitions. Starting with the basic biophysical principles, current sources and environmental consequences of existing energy resource use, the book takes readers through the key questions and topics needed to understand, prescribe, and advocate just and sustainable energy solutions. The interdisciplinary nature of the book aims to build bridges across the social and natural sciences and humanities, bringing together perspectives, ideas and concepts from engineering, economics, and life cycle assessment to sociology, political science, anthropology, policy studies, the humanities, arts, and some interdisciplinary thinkers that defy categories. This accessible approach fills the gap for a textbook that integrates sustainability science and engineering studies with strong empirical social science and it will be a useful tool to anyone interested in the socio-ecological dimensions of energy system transitions.
