The post-'68 psychoanalyst and philosopher visits a newly democratic Brazil in 1982 and meets future President Luis Ignacia Lula da Silva: a guide to the radical thought and optimism at the root of today's Brazil. Yes, I believe that there is a multiple people, a people of mutants, a people of potentialities that appears and disappears, that is embodied in social, literary, and musical events.... I think that we're in a period of productivity, proliferation, creation, utterly fabulous revolutions from the viewpoint of this emergence of a people. That's molecular revolution: it isn't a slogan or a program, it's something that I feel, that I live....—from *Molecular Revolution in Brazil* Following Brazil's first democratic election after two decades of military dictatorship, French philosopher Félix Guattari traveled through Brazil in 1982 with Brazilian psychoanalyst Suely Rolnik and discovered an exciting, new political vitality. In the infancy of its new republic, Brazil was moving against traditional hierarchies of control and totalitarian regimes and founding a revolution of ideas and politics. *Molecular Revolution in Brazil* documents the conversations, discussions, and debates that arose during the trip, including a dialogue between Guattari and Brazil's future President Luis Ignacia Lula da Silva, then a young gubernatorial candidate. Through these exchanges, Guattari cuts through to the shadowy practices of globalization gone awry and boldly charts a revolution in practice. Assembled and edited by Rolnik, *Molecular Revolution in Brazil* is organized thematically; aphoristic at times, it presents a lesser-known, more overtly political aspect of Guattari's work. Originally published in Brazil in 1986 as *Micropolitica: Cartografias do desejo*, the book became a crucial reference for political movements in Brazil in the 1980s and 1990s. It now provides English-speaking readers with an invaluable picture of the radical thought and optimism that lies at the root of Lula's Brazil. *Contextos: Curso Intermediário de Português* is an engaging and motivating course that takes learners from the intermediate to advanced level. The course allows students to systematically practise all four language skills as well as develop intercultural awareness. Each unit contains clear learning objectives linked to recognised standards as well as self-assessment checklists and review plans. This supports students to become autonomous learners by tracking their own progress and focusing on specific areas of difficulty. A companion website provides an interactive workbook with additional grammar and vocabulary practice to reinforce those within the book, as well as the audio to accompany the course. The course takes learners from the intermediate-low to advanced-low according to the ACTFL proficiency guidelines and from A2 to B2 according to the CEFR. This thought-provoking book describes the ever-expanding "toolbox" of methods now available to reduce, refine, or replace animal usage in toxicity testing. The book's main argument is that global social injustice is by and large epistemological injustice. It maintains that there can be no global social justice without global cognitive justice. A reflection on everyday existence in the 'sphere of consumption of late Capitalism', this work is Adorno's literary and philosophical masterpiece. For a long time, the term 'ideology' was in disrepute, having become associated with such unfashionable notions as fundamental truth and the eternal verities. The tide has turned, and recent years have seen a revival of interest in the questions that ideology poses to social and cultural theory, and to political practice. *Mapping Ideology* is a comprehensive reader covering the most important contemporary writing on the subject. Including Slavoj Žižek's study of the development of the concept from Marx to the present, assessments of the contributions of Lukács and the Frankfurt School by Terry Eagleton, Peter Dews and Seyla Benhabib, and essays by Adorno, Lacan and Althusser, *Mapping Ideology* is an invaluable guide to the most dynamic field in cultural theory. Emboldened by anonymity, individuals and organizations from both left and right are freely spewing hateful vitriol on the Internet without worrying about repercussions. Lies, bullying, conspiracy theories, bigoted and racist rants, and calls for violence targeting the most vulnerable circulate openly on the web. And thanks to the guarantees of the First Amendment and the borderless nature of the Internet, governing bodies are largely helpless to control this massive assault on human dignity and safety. Abe Foxman and Christopher Wolf expose the threat that this unregulated flow of bigotry poses to the world. They explore how social media companies like Facebook and YouTube, as well as search engine giant Google, are struggling to reconcile the demands of business with freedom of speech and the disturbing threat posed by today's purveyors of hate. And they explain the best tools available to citizens, parents, educators, law enforcement officers, and policy makers to protect the twin values of transparency and responsibility. As Foxman and Wolf show, only an aroused and engaged citizenry can stop the hate contagion before it spirals out of control - with potentially disastrous results.
