Handwritten Notes for INORGANIC CHEMISTRY (Volume 1) A Plan That Actually Works
Competition Science Vision

Written by a former All India Topper, this book has been touted by several iconic IITians as the most effective book on JEE planning ever written! Anagh argues that most IITians are neither born-geniuses nor unusually intense work-machines; they are smart planners instead. He takes you behind-the-scenes to reveal how smart planning works for JEE and lays out a clear framework for goal-oriented thinking. The step by step approach outlined across 11 chapters covers everything from daily routine to efficient practice to long term motivation, all explained through real life examples and presented with time-tested proofs. It talks about achieving one's goals while not missing out on a balanced life and questions people's deepest beliefs about achieving a large and meaningful goal like IIT-JEE. After finishing the book, readers will take away not just a concrete plan to prepare for JEE, but in the words of an early reviewer, a "life-altering" change in perspective towards success. "Edifying and thought-provoking! Reading this book will help you succeed not only in JEE but also in life." - Chitraang Murdia, AIR-1 in JEE Adv, 2014 "Covers a lot of important topics and explains goal setting well" - Aman Bansal, AIR-1 in JEE Adv, 2016 "Develops a holistic strategy to ace the JEE" - Ananye Agarwal, AIR-3 in JEE Adv, 2017 "Informative and Inspirational! It unravels the inner workings of a topper's mind" - Amey Gupta, AIR-8 in JEE Adv, 2014 "It will enable students to follow tested winning strategies rather than reinvent the wheel" - Kartikeya Gupta, AIR-4 in JEE Adv, 2013 "It iterates on the timeless wisdom of BhagvadGita to excel not only in JEE but any goal in life" - Vishwajeet Agarwal, AIR-5 in JEE Main, 2017. Most business owners started their company because they wanted more freedom—to work on their own schedules, make the kind of money they deserve, and eventually retire on the fruits of their labor.

Unfortunately, according to John Warrillow, most owners find that stepping out of the picture is extremely difficult because their business relies too heavily on their personal involvement. Without them, their company—no matter how big or profitable—is essentially worthless. But the good news is that entrepreneurs can take specific steps—no matter what stage a business is in—to create a

valuable, sellable company. Warrillow shows exactly what it takes to create a solid business that can thrive long into the future. The varied and colorful career of Charles Wesley Allen (1851-1942) took him throughout the northern Plains during an exceptionally turbulent era in its history. He was at the Red Cloud Agency when Red Cloud attempted to prevent the raising of the American flag and the Lakota nearly took over the agency. Allen also visited Deadwood at the height of the Black Hills gold rush, helped build the first government agency on the Pine Ridge reservation, and reported on the Lakota Ghost Dance. Allen happened to be walking through the Indian camp at Wounded Knee when shots rang out on December 29, 1890, and his is arguably the best of all the eyewitness accounts of that tragedy. ø This is Allen's previously unpublished vivid account of the years he described as "the most exciting chapter of my life." As much the chronicle of the passing of an era as a personal narrative, its simple, direct, and often moving prose captures the injustices, gritty details, and relentless energy of a period of dramatic change in the West.

Inorganic Chemistry Hydrocarbons and their transformations play major roles in chemistry as raw materials and sources of energy. Diminishing petroleum supplies, regulatory problems, and environmental concerns constantly challenge chemists to rethink and redesign the industrial applications of hydrocarbons. Hydrocarbons are ubiquitous ingredients of the chemical composition of the troposphere. While present as trace components, they make a major contribution toward the production of ozone and other oxidants such as peroxyacetyl nitrate (PAN) and hydrogen peroxide (H₂O₂). Hydrocarbon Chemistry begins by discussing the general aspects of hydrocarbons, the separation of hydrocarbons from natural sources, and the synthesis from C₁ precursors with recent developments for possible future applications. Carbon and Hydrogen: the two basic building units can be combined in a million different ways to give a plethora of fascinating organic compounds.
