Registries for Evaluating Patient Outcomes Jul 16 2021 This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DECIDE (Developing Evidence to Inform Decisions About Effectiveness) program. The Collaborator Jul 04 2020 A friend's death drives an Italian woman to collaborate against her criminal family in this "propulsive, neatly structured thriller" (Guardian (UK)). She is an Italian accountancy student in London, and her boyfriend Eddie teaches at a language school. But the prime reason Immacolata Borelli came to Britain was to look after her gangster brother, wanted for multiple murders back home in Naples. For the Borelli clan are major players in the Camorra, a crime network more close-knit and ruthless than the Sicilian Mafia. Mario Castrolami is a senior Carabinieri investigator of the Camorra, his career dedicated to destroying the corruption and violence of the clans. When Immacolata calls from London to say she is prepared to collaborate with justice—to betray her own family—he knows she is setting in motion a terrifying and unpredictable series of events. The Borellis will not lose their criminal empire without a vicious fight. They will use anything and anyone to prevent her from giving evidence against them. Even Eddie, and Eddie's life. Praise for *The Collaborator* "A dense, intensely satisfying thriller from one of the modern masters of the craft." —Daily Mail (UK) "No summary can suggest its depth and texture. Seymour is not one to cut corners. He does his research, thinks hard about his story and gives us richly imagined novels that bristle with authenticity. Very few thriller writers tell us as much about their characters." —Patrick Anderson, *The Washington Post* "Seymour's twenty-sixth novel builds relentlessly to a fever-pitch conclusion in which a Camorra killer, a hostage rescuer, and a kidnapped victim—characters developed with consummate skill—are all one step from death. Highly recommended for thriller readers." —Library Journal starred review

Harmonising Demographic and Socio-Economic Variables for Cross-National Comparative Survey Research Aug 29 2022 This book explains harmonisation techniques that can be used in survey research to align national systems of categories and definitions in such a way that comparison is possible across countries and cultures. It provides an introduction to instruments for collecting

internationally comparable data of interest to survey researchers. It shows how seven key demographic and socio-economic variables can be harmonised and employed in European comparative surveys. The seven key variables discussed in detail are: education, occupation, income, activity status, private household, ethnicity, and family. These demographic and socio-economic variables are background variables that no survey can do without. They frequently have the greatest explanatory capacity to analyse social structures, and are a mirror image of the way societies are organised nationally. This becomes readily apparent when one attempts, for example, to compare national education systems. Moreover, a comparison of the national definitions of concepts such as "private household" reveals several different historically and culturally shaped underlying concepts. Indeed, some European countries do not even have a word for "private household". Hence such national definitions and categories cannot simply be translated from one culture to another. They must be harmonised. ?

A Quest of Heroes (Book #1 in the Sorcerer's Ring) Jun 02 2020 "A breathtaking new epic fantasy series. Morgan Rice does it again! This magical saga reminds me of the best of J.K. Rowling, George R.R. Martin, Rick Riordan, Christopher Paolini and J.R.R. Tolkien. I couldn't put it down!" --Allegra Skye, Bestselling author of *SAVED* From #1 Bestselling author Morgan Rice comes the debut of a dazzling new fantasy series. **A QUEST OF HEROES (BOOK #1 IN THE SORCERER'S RING)** revolves around the epic coming of age story of one special boy, a 14 year old from a small village on the outskirts of the Kingdom of the Ring. The youngest of four, the least favorite of his father, hated by his brothers, Thorgrin senses he is different from the others. He dreams of becoming a great warrior, of joining the King's men and protecting the Ring from the hordes of creatures on the other side of the Canyon. When he comes of age and is forbidden by his father to try out for the King's Legion, he refuses to take no for an answer: he journeys out on his own, determined to force his way into King's Court and be taken seriously. But King's Court is rife with its own family dramas, power struggles, ambitions, jealousy, violence and betrayal. King MacGil must choose an heir from amongst his children, and the ancient Dynasty Sword, the source of all their power, still sits untouched, waiting for the chosen one to arrive. Thorgrin arrives as an outsider and battles to be accepted, and to join the King's Legion. Thorgrin comes to learn he has mysterious powers he does not understand, that he has a special gift, and a special destiny. Against all odds he falls in love with the king's daughter, and as their forbidden relationship blossoms, he discovers he has powerful rivals. As he struggles to make sense of his powers, the king's sorcerer takes him under his wing and tells him of a mother he never knew, in a land far away, beyond the Canyon, beyond even the land of the Dragons. Before Thorgrin can venture out and become the warrior he yearns to be, he must complete his training. But this may be cut short, as he finds himself propelled into the center of royal plots and counterplots, ones that may threaten his love and bring him down—and the entire kingdom with him. With its sophisticated world-building and characterization, **A QUEST OF HEROES** is an epic tale of friends and lovers, of rivals and suitors, of knights and dragons, of intrigues and political machinations, of coming of age,

of broken hearts, of deception, ambition and betrayal. It is a tale of honor and courage, of fate and destiny, of sorcery. It is a fantasy that brings us into a world we will never forget, and which will appeal to all ages and genders. It is 82,000 words. Neuropsychotherapy Feb 29 2020 Neuropsychotherapy is intended to inspire further development and continual empirical updating of consistency theory. It is essential for psychotherapists, psychotherapy researchers, clinical psychologists, psychiatrists, neuroscientists, and mental-health professionals. Profoundly important and innovative, this volume provides necessary know-how for professionals as it connects the findings of modern neuroscience to the insights of psychotherapy. Throughout the book, a new picture unfolds of the empirical grounds of effective psychotherapeutic work. Author Klaus Grawe articulates a comprehensive model of psychological functioning-consistency theory-and bridges the gap between the neurosciences and the understanding of psychological disorders and their treatment. Neuropsychotherapy illustrates that psychotherapy can be even more effective when it is grounded in a neuroscientific approach. Cutting across disciplines that are characteristically disparate, the book identifies the neural foundations of various disorders, suggests specific psychotherapeutic conclusions, and makes neuroscientific knowledge more accessible to psychotherapists. The book's discussion of consistency theory reveals the model is firmly connected to other psychological theoretical approaches, from control theory to cognitive-behavioral models to basic need theories.

Theories of Sustainable Development May 26 2022 While sustainability has become a buzzword in discussions about the environment and development, work on theories of sustainable development has received much less attention. However, theory is vital as understanding the origins and development of the concept is the key to achieving successful implementation of sustainability. This book offers an interdisciplinary collection of research articles on the theories of sustainable development, drawing on a wide range of subjects including history, politics, governance, complex systems, economics and philosophy. It advocates viewing sustainable development not only as the establishment of a permanent, globally practicable and future-capable mode of life and economics, but as a complex array of problems involving a wide range of social-scientific and humanistic disciplines. This innovative approach means that the book is oriented toward current problems, not toward the established academic boundaries, and it draws out lessons that are relevant for those studying and working in sustainability across the world. This book will be of great interest to researchers and students of sustainable development and environmental politics, as well as practitioners working with sustainable development in politics, business, administration, and civil society organizations.

The Final Silence Dec 21 2021 Stuart Neville, “the current master of neo-noir detective fiction” (Boston Globe), is back with a chilling new thriller Belfast, Northern Ireland: Rea Carlisle has inherited a house from an uncle she never knew. It doesn't take her long to clear out the dead man's remaining possessions, but one room remains stubbornly locked. When Rea finally forces it open, she discovers inside a chair, a table—and a leather-bound book, its pages filled with locks of hair, fingernails: a catalogue of victims. Horrified, Rea wants to go straight to the police but her family intervenes, fearing that scandal will mar her politician father's public image. Rea turns to the only person she can think of: disgraced police inspector Jack Lennon. He is facing suspension from the force and his new supervisor, DCI Serena Flanagan, is the toughest cop he's ever met. But a gruesome murder brings the dead man's terrifying journal to the top of the Belfast police's priority list.
