***Select diagnosis codes accurately with Carol J. Buck's 2018 ICD-10-CM for Physicians: Professional Edition. Designed by coders for coders, this practical manual includes all the ICD-10 codes needed for basic outpatient and physician office coding. As coders need more extensive knowledge to code with ICD-10-CM — and to choose from the thousands of possible codes —***

***this edition provides an essential background in A&P, pathology, and medical terminology, along with colorful Netter's Anatomy illustrations and clear instructions for using the book. Together, these features make diagnosis coding faster and easier. Also included is a companion website with the latest coding news and updates! Convenient Guide to the Updates in the front of the book lists all new, revised, and deleted codes, providing at-a-glance lookup of the coding changes. Official Guidelines for Coding and Reporting (OGCRs) are listed in full in the Introduction, at the beginning of each chapter, and integrated within the code set, providing easier reference to coding rules when they are needed most. UNIQUE! Full-color Netter's Anatomy art is included in a separate section for easy reference and cross-referenced within the Tabular List of Diseases and Injuries, to help users understand anatomy and how it may affect choosing codes. Full-color design includes consistent color-coded symbols and text, providing easier access to codes and coding information. American Hospital Association's Coding Clinic® citations include official ICD-10-CM coding advice relating to specific codes and their usage. 175 illustrations provide visual orientation and enhance understanding of specific coding situations. Items are included throughout the Tabular List to ensure accurate coding, providing additional information on common diseases and conditions. Additional elements within specific codes define terms and add coding instructions relating to***

***difficult terminology, diseases and conditions, or coding in a specific category. Symbols and highlights draw attention to codes that may require special consideration before coding, including: New, Revised, and Deleted Codes that call for the use of additional character(s) Includes, Excludes 1 and Excludes 2 Use Additional Unspecified Code First and Code Also Placeholder X symbol reminds users to assign placeholder X for codes less than 6 characters that require a 7th character. Manifestation code identifies conditions for which it is important to record both the etiology and the symptom of the disease. Age and Sex edits from the Definition of Medicare Code Edits help to ensure accuracy by denoting codes that are used only with patients of a specific age or sex. The ICD-10-CM Expert for Physicians with our hallmark features and format makes facing the challenge of accurate diagnosis coding easier. Developed specifically to meet the needs of physicians, the Optum360 code book contains the complete ICD-10-CM code set which is the cornerstone for establishing medical necessity, determining coverage, and ensuring appropriate reimbursement. Now with a new symbol in the tabular to identify codes associated with hierarchical condition categories (HCC). Supplementary appendixes available only in the expert edition include: 2018 deleted code list, pharmacology listings, Z-codes for long term use of drugs and associated drug names; and Z-codes used only as primary diagnosis. These revised and up-to-date***

***diagnosis coding. NEW! Key terms are highlighted making code selection faster and easier. These guidelines are a set of rules that have been developed to accompany and complement the official conventions and instructions provided within the ICD-10-CM itself. The instructions and conventions of the classification take precedence over guidelines. These guidelines are based on the coding and sequencing instructions in the Tabular List and Alphabetic Index of ICD-10-CM, but provide additional instruction. Adherence to these guidelines when assigning ICD-10-CM diagnosis codes is required under the Health Insurance Portability and Accountability Act (HIPAA). The diagnosis codes (Tabular List and Alphabetic Index) have been adopted under HIPAA for all healthcare settings. A joint effort between the healthcare provider and the coder is essential to achieve complete and accurate documentation, code assignment, and reporting of diagnoses and procedures. These guidelines have been developed to assist both the healthcare provider and the coder in identifying those diagnoses that are to be reported. These revised and up-to-date coding cards offer a snapshot of the ICD-10-CM codebook, providing commonly reported diagnostic codes and the associated guidelines for major specialties. These easy-to-use reference cards allow health care providers and staff members to quickly locate a desired code. This series contains 24 specialty-specific Snapshot cards updated to reflect the final 2018 code set. Diagnostic coding is a snap when using the ICD-10-CM Snapshot coding cards. Features and Benefits \* Guidelines and tips -- make coding more accurate and complete \* Alphabetical layout -- makes locating a code quick and easy to accurately reflect a patient's condition \* Tailor-made content for a particular specialty -- reflects the uniqueness of the specialty's frequently used codes \* Instant portability -- fits easily into the codebook \* Durable lamination -- creates a sturdy, tear-resistant resource that can withstand daily use \* Convenience and a competitive price -- means needed Snapshot cards can be***

***ICD-10-CM 2018: The Complete Official Codebook provides the entire updated code set for diagnostic***

***coding. This codebook is the cornerstone for establishing medical necessity, determining coverage and ensuring appropriate reimbursement. The Coders' Desk Reference for Diagnoses provides thousands of clinical descriptions of diseases, disease processes, injuries, poisonings, and other conditions to help both novices and seasoned coders attain the knowledge and skill necessary to accurately identify and assign the most specific ICD-10-CM diagnosis code for each documented condition. With these clinical definitions and focus points, you can reduce coding errors and improve coding confidence by gaining a better understanding of the clinical meanings behind the codes. These revised and up-to-date coding cards offer a snapshot of the ICD-10-CM codebook, providing commonly reported diagnostic codes and the associated guidelines for major specialties. The cards detail the specificity required to improve documentation. Pushpin icons help Snapshot card users connect coding tips back to specific codes. These easy-to-use reference cards allow health care providers and staff members to quickly locate a desired code. This series contains 24 specialty-specific Snapshot cards updated to reflect the final 2018 code set. Diagnostic coding is a snap when using the ICD-10-CM Snapshot coding cards. **specialty -- reflects the uniqueness of the specialty's frequently used codes \* Instant portability -- fits easily into the codebook \* Durable lamination -- creates a sturdy, tear-resistant resource that can withstand daily use \* Convenience and a competitive price -- means needed Snapshot cards can be Ideal for radiology residents and medical students, as well as anyone who reads or orders radiology imaging studies, this user-friendly reference covers the basics of how to approach, read, and interpret radiological images. Using concise, step-by-step explanations and an enjoyable writing style, expert radiologist Dr. Fred A Mettler, Jr., walks you through a sequential thought process for all common indications for radiologic studies and their interpretation. Featuring thorough updates from cover to cover, this resource covers the fundamental information you need to know, as well as recent advances in the field. These guidelines have been approved by the four organizations that make up the Cooperating Parties for the ICD-10-CM: the American Hospital Association (AHA), the American Health Information Management Association (AHIMA), CMS, and NCHS. These guidelines are a set of rules that have been developed to accompany and complement the official conventions and instructions provided within the ICD-10-CM itself. The instructions and conventions of the classification take precedence over guidelines. These guidelines are based on the coding and sequencing instructions in the Tabular List and Alphabetic Index of ICD-10-CM, but provide**

***additional instruction. Adherence to these guidelines when assigning ICD-10-CM diagnosis codes is required under the Health Insurance Portability and Accountability Act (HIPAA). The diagnosis codes (Tabular List and Alphabetic Index) have been adopted under HIPAA for all healthcare settings. A joint effort between the healthcare provider and the coder is essential to achieve complete and accurate documentation, code assignment, and reporting of diagnoses and procedures. These guidelines have been developed to assist both the healthcare provider and the coder in identifying those diagnoses that are to be reported. The importance of consistent, complete documentation in the medical record cannot be overemphasized. Without such documentation accurate coding cannot be achieved. The entire record should be reviewed to determine the specific reason for the encounter and the conditions treated. The term encounter is used for all settings, including hospital admissions. In the context of these guidelines, the term provider is used throughout the guidelines to mean physician or any qualified health care practitioner who is legally accountable for establishing the patient's diagnosis. Only this set of guidelines, approved by the Cooperating Parties, is official. The guidelines are organized into sections. Section I includes the structure and conventions of the classification and general guidelines that apply to the entire classification, and chapter-specific guidelines that correspond to the chapters as they are arranged***

***in the classification. Section II includes guidelines for selection of principal diagnosis for non-outpatient settings. Section III includes guidelines for reporting additional diagnoses in non-outpatient settings. Section IV is for ICD-10-CM Official Guidelines for Coding and Reporting FY 2018. outpatient coding and reporting. It is necessary to review all sections of the guidelines to fully understand all of the rules and instructions needed to code properly.***
