Ever since its first publication in 1992, *The End of History and the Last Man* has provoked controversy and debate. Francis Fukuyama's prescient analysis of religious fundamentalism, politics, scientific progress, ethical codes, and war is as essential for a world fighting fundamentalist terrorists as it was for the end of the

Cold War. Now updated with a new afterword, *The End of History and the Last Man* is a modern classic. Argues that America has an unjustified sense of entitlement and examines the economic, political, and military crises the author believes are a product of it. Readers learn how the effects of free-market ideology and corporate power have helped to undermine civic obligation, democratic participation, and popular decision making - at a time when mounting social and ecological crisis demand far-reaching and creative political solutions."--BOOK JACKET. For thirteen years, during a time of Democratic congressional dominance in Washington, Dan Rostenkowski became one of the most influential American legislators of the twentieth century. As chairman of the powerful House Ways and Means Committee, the representative from Illinois influenced the nation's tax laws, international trade, Social Security, health care, welfare, and a good many other areas—policies that affected most Americans. Richard Cohen's scrupulous political biography of Rostenkowski follows his rise to power from modest origins in the Democratic ward politics of Chicago's Polish northwest side, to his legislative triumphs, and ultimately to his criminal conviction and imprisonment for abuses of House practice. Because Rostenkowski served so many years in Congress (1959-1995), his career offers a prism into the changing nature of the institution and of the Democratic party, a change that gradually brought a new bitterness to Washington politics. Even when the congressman gained national influence, he remained close to Chicago politics and his boss, Richard J. Daley; but as he lost touch with local voters, opposed to political reforms, and clung to his personal stubbornness, he greased the skids for his downfall. Mr. Cohen has written a compelling, eye-opening story of American politics at work, portrayed through his career of one of its most fascinating practitioners. With 8 pages of photographs. This book addresses the fundamental issues underlying the debate over electric power regulation and deregulation. After decades of the presumption that the electric power industry was a natural monopoly, recent times have seen a trend of deregulation followed by panicked re-regulation. Solve typical toddler challenges with eight key

mindshifts that will help you parent with clarity, calmness and self-control. Through stories from her practice, Claire Lerner shows parents how making critical mindshifts—seeing their children’s behaviors through a new lens —empowers parents to solve their most vexing childrearing challenges. This process puts parents back in the driver’s seat, where they belong and where their children need them to be. These real life stories provide a roadmap for how to tune into the root causes of children’s behavior and how to create and implement strategies that are tailored to the unique needs of each child and family. Through these stories, Claire provides a treasure trove of practical solutions that are based in science and which work in real life. Why Is My Child In Charge? picks up where other books have left parents hanging. Most parenting books offer solutions that sound good on paper but don’t work in practice. They are aspirational rather than achievable, or they offer one-size-fits-all approaches that don’t meet the needs of an individual child. They can compound parents’ feelings of frustration and thus, can be counterproductive. Case by case, Claire unpacks the individualized process she guides parents through to solve the most common challenges such as throwing tantrums in public; delaying bedtime for hours; refusing to participate in family mealtimes; and resisting potty training. Employing a relatable story-telling approach, Claire elucidates: The faulty mindsets that pose obstacles to parents seeing the situation more objectively The essential mindshifts that enable parents to quickly identify the root causes of the problem The development of an action plan tailored to each unique child and family Why is My Child in Charge? is like having a child development specialist in your home. It shows how you can develop “win-win” strategies that translate into adaptable, happy kids and calm, connected and in-control parents. It will help you be the parent you want to be. All over the world, women are discovering they have the power. There's Roxy, a white British teenager and the daughter of a gangster. There's Allie, a mixed-race girl who runs away after years of abuse and finds herself at a convent, revered as a goddess. There's Margot, an American mayor and one of the few older women to develop the power. And

then Tunde, a young Nigerian man and aspiring journalist who captures early footage of the power in action. With a flick of their fingers, these women can inflict terrible pain - even death. Every man on the planet finds he's lost control. The day of the girls has arrived - but where will it end? The authors were originally brought together to share research and applications through the international Danfoss Professor Programme at Aalborg University in Denmark. Personal computers would be unwieldy and inefficient without power electronic dc supplies. Portable communication devices and computers would also be impractical. High-performance lighting systems, motor controls, and a wide range of industrial controls depend on power electronics. In the near future we can expect strong growth in automotive applications, dc power supplies for communication systems, portable applications, and high-end converters. We are approaching a time when all electrical energy will be processed and controlled through power electronics somewhere in the path from generation to end use. Written by a world renowned leader in the field JACKSON/THIEF AT THE END OF THE WOR What really sets the best managers above the rest? It's their power to build a cadre of employees who have great inner work lives—consistently positive emotions; strong motivation; and favorable perceptions of the organization, their work, and their colleagues. The worst managers undermine inner work life, often unwittingly. As Teresa Amabile and Steven Kramer explain in *The Progress Principle*, seemingly mundane workday events can make or break employees' inner work lives. But it's forward momentum in meaningful work—progress—that creates the best inner work lives. Through rigorous analysis of nearly 12,000 diary entries provided by 238 employees in 7 companies, the authors explain how managers can foster progress and enhance inner work life every day. The book shows how to remove obstacles to progress, including meaningless tasks and toxic relationships. It also explains how to activate two forces that enable progress: (1) catalysts—events that directly facilitate project work, such as clear goals and autonomy—and (2)

nourishers—interpersonal events that uplift workers, including encouragement and demonstrations of respect and collegiality. Brimming with honest examples from the companies studied, *The Progress Principle* equips aspiring and seasoned leaders alike with the insights they need to maximize their people's performance. Few decades have given rise to such potent mythologies as the 1930s. Popular impressions of those years prior to the Second World War were shaped by the single outstanding personality of that conflict, Winston Spencer Churchill. Churchill depicted himself as a political prophet, exiled into the wilderness prior to 1939 by those who did not want to hear of the growing threats to peace in Europe. Although it is a familiar story, it is one we need to unlearn as the truth is somewhat murkier. *The End is Nigh* is a tale of relentless intrigue, burning ambition, and the bitter rivalry in British politics during the years preceding the Second World War. Journeying from the corridors of Whitehall to the smoking rooms of Parliament, and from aircraft factories to summit meetings with Hitler, the book offers a fresh and provocative interpretation of one of the most crucial moments of British history. It assembles a cast of iconic characters--Churchill, Neville Chamberlain, Stanley Baldwin, Clement Attlee, Anthony Eden, Ernest Bevin, and more--to explore the dangerous interaction between high politics at Westminster and the formulation of national strategy in a world primed to explode. In the twenty-first century we are accustomed to being cynical about politicians, mistrusting what they say and wondering about their real motives, but Robert Crowcroft argues that this was always the character of democratic politics. In *The End is Nigh* he challenges some of the most resilient public myths of recent decades--myths that, even now, remain an important component of Britain's self-image. As Congress prepares articles of impeachment of President Trump, read the definitive book on presidential impeachment and how it should be used today. Impeachment is our ultimate constitutional check against an out-of-control executive. But it is also a perilous and traumatic undertaking for the nation. In this authoritative examination, Laurence Tribe and Joshua Matz rise above the daily clamor to illuminate impeachment's proper role in our

age of broken politics. Now revised with a new epilogue, *To End a Presidency* is an essential book for anyone seeking to understand how this fearsome power should be deployed. **THE MOST INFLUENTIAL BOOK ON MODERN ECONOMICS** *The Wealth of Nations* is an economics book like no other. First published in 1776, Adam Smith's groundbreaking theories provide a recipe for national prosperity that has not been bettered since. It assumes no prior knowledge of its subject, and over 200 years on, still provides valuable lessons on the fundamentals of economics. This keepsake edition is a selected abridgement of all five books, and includes an Introduction by Tom Butler-Bowdon, drawing out lessons for the contemporary reader, a Foreword from Eamonn Butler, Director of the Adam Smith Institute, and a Preface from Dr. Razeen Sally of the London School of Economics. George Orwell's famous satire of the Soviet Union, in which "all animals are equal but some animals are more equal than others." What if, starting today, we stop thinking in terms of lack and imperfection? What if we stop trying to change reality with the power of our thoughts and intentions? What if we no longer think everything needs to be 'fixed', 'healed' or 'improved'? Many people are unhappy with their lives and circumstances. The source of their unhappiness can lie with their relationship, job, family, or with their own well-being. They wait and hope that their lives will become pleasant, but in reality the changes they can make are within their reach. If we suffer it is because we are trying to change life as it is into life as we want it. The great Dutch sinologist and Taoist Kristofer Schipper once said: 'The fight against the natural course of things is perhaps the greatest evil of our time.' What is good for you is usually whatever is happening right now. To surrender to this reality is not 'giving up' - to surrender is a celebration of real freedom. Acceptance can bring us feelings of liberation, strength and healing. This is really a book for everyone - everyone who is curious and eager to learn, everyone who is interested in real personal growth. With her elegant and intelligent writing - with fascinating contributions from world-renowned spiritual writers such as William Tiller and Lynne McTaggart - Annemarie shows us

how acceptance is the path to enlightenment. If someone told you that you have low self-esteem, would it cause you to bristle? For many, the very concept of self-esteem has negative connotations, because it calls to mind the comparisons we make between ourselves and others. So how do you build real self-confidence? In *The Power of Self-Compassion*, you will learn that focusing on self-compassion, rather than self-esteem, is actually the best way to build true, lasting self-confidence. For too long self-esteem has been based on the idea that if you achieve certain goals you are doing okay. This can lead to comparing yourself with others as a way to build confidence. The skills and behavioral techniques outlined in this book are drawn from the groundbreaking compassion-focused therapy (CFT), which holds that being compassionate to yourself—even when things are not going well—is central to building real self-confidence. With compassion-focused therapy, you will adopt an accepting attitude about your strengths and weaknesses, and a commitment to change that doesn't depend on being overly critical of yourself or comparing yourself with others. In addition, you will learn how the concept of self-confidence fits in the context of our evolution, biology, and life experiences. If you are looking to improve your self-confidence, the behavioral steps provided in this book can help you focus on the areas in your life that need improvement, so that you can build a stronger sense of self-worth and competence. Compassion is associated with feelings, emotions, expressions of care and comfort, derived from a place of love and relationship. However, as *The Power of Compassion* demonstrates, compassion is indeed based out of a position of power; a personal resource and strength to sustain people in complex and difficult times in their lives but also a concept which is meaningful at an organisational level and to society at large. Compassion has a growing scientific basis, notably within psychology and neuroscience but its application is increasingly evident across a range of health and social care systems. This book brings together the wisdom of compassionate science through the exposition of work by international experts on the development of evidence in the field of compassion research and training. Divided into four sections, readers

will find a comprehensive and contemporary review of current measures, opportunities for training into compassion and self-compassion and its application to different contexts (such as mental illness and end-of-life), as well as an understanding of compassion at a more global level. As a whole, it provides a comprehensive text for academics, researchers and scholars as well as students interested in this new and dynamic field of study. This new textbook, edited by Laura Galiana and Noemí Sansó, offers different facets of a complex concept and will no doubt lead to further debate and a better discourse on how compassion can be transformative. And that, is something truly powerful. #1 NEW YORK TIMES BESTSELLER • ONE OF TIME MAGAZINE'S 100 BEST YA BOOKS OF ALL TIME

The extraordinary, beloved novel about the ability of books to feed the soul even in the darkest of times. When Death has a story to tell, you listen. It is 1939. Nazi Germany. The country is holding its breath. Death has never been busier, and will become busier still. Liesel Meminger is a foster girl living outside of Munich, who scratches out a meager existence for herself by stealing when she encounters something she can't resist—books. With the help of her accordion-playing foster father, she learns to read and shares her stolen books with her neighbors during bombing raids as well as with the Jewish man hidden in her basement. In superbly crafted writing that burns with intensity, award-winning author Markus Zusak, author of *I Am the Messenger*, has given us one of the most enduring stories of our time. “The kind of book that can be life-changing.” —The New York Times “Deserves a place on the same shelf with *The Diary of a Young Girl* by Anne Frank.” —USA Today

**DON'T MISS BRIDGE OF CLAY, MARKUS ZUSAK'S FIRST NOVEL SINCE THE BOOK THIEF.** Using espionage as a test case, *The End of Intelligence* criticizes claims that the recent information revolution has weakened the state, revolutionized warfare, and changed the balance of power between states and non-state actors—and it assesses the potential for realizing any hopes we might have for reforming intelligence and espionage. Examining espionage, counterintelligence, and covert action, the book argues that, contrary to prevailing

views, the information revolution is increasing the power of states relative to non-state actors and threatening privacy more than secrecy. Arguing that intelligence organizations may be taken as the paradigmatic organizations of the information age, author David Tucker shows the limits of information gathering and analysis even in these organizations, where failures at self-knowledge point to broader limits on human knowledge—even in our supposed age of transparency. He argues that, in this complex context, both intuitive judgment and morality remain as important as ever and undervalued by those arguing for the transformative effects of information. This book will challenge what we think we know about the power of information and the state, and about the likely twenty-first century fate of secrecy and privacy.

Graham Greene's masterful novel of love and betrayal in World War II London is "undeniably a major work of art" (The New Yorker). Maurice Bendrix, a writer in Clapham during the Blitz, develops an acquaintance with Sarah Miles, the bored, beautiful wife of a dull civil servant named Henry. Maurice claims it's to divine a character for his novel-in-progress. That's the first deception. What he really wants is Sarah, and what Sarah needs is a man with passion. So begins a series of reckless trysts doomed by Maurice's increasing romantic demands and Sarah's tortured sense of guilt. Then, after Maurice miraculously survives a bombing, Sarah ends the affair—quickly, absolutely, and without explanation. It's only when Maurice crosses paths with Sarah's husband that he discovers the fallout of their duplicity—and it's more unexpected than Maurice, Henry, or Sarah herself could have imagined. Adapted for film in both 1956 and 1999, Greene's novel of all that inspires love—and all that poisons it—is "singularly moving and beautiful" (Evelyn Waugh). At nearly every pivotal moment in international politics over the past twenty-five years--from the Reagan-Gorbachev summits, to the Iran-Contra scandal, to the collapse of the Soviet Union, to the decision to go to war in Iraq--if you dug deeply you would find a figure just behind the scenes influencing the action: that of Richard Perle. Largely eschewing senior cabinet appointments and other high-profile roles, the passionate, zealous Perle has

been content to operate quietly--behavior which earned him the moniker of The Prince of Darkness. Nevertheless, his influence in Washington has helped to fuel an international disaster in Iraq and the growth of anti-Americanism worldwide. Alan Weisman, a former producer for 60 Minutes, CBS Sunday Morning, and the CBS Evening News, is now shining a light on this major political figure. While Perle has not authorized this biography, he has submitted to interviews with Weisman, encouraged his friends to do so, and provided non-classified material. Such access has granted Weisman a deep and critical insight into Perle's methods and mindset. Weisman explores how Perle derailed a nuclear arms agreement between the U.S. and the then Soviet Union; his controversial business dealings; Perle's tenure as Chairman of the Pentagon's Defense Policy Board during the present Bush Administration; and his role leading up to the Iraqi War, including his dealings with Iraqi exiles like Ahmed Chalabi. From the collapse of the Soviet Union to the current saber-rattling over Iran, Syria, and North Korea, Perle has put his stamp on almost every decisive event in international politics. This is an insightful and incisive study of the highest quality, and one that everyone--not just policy experts--should read.--Publisher description.

"An astonishingly revisionist biography of Alexander Graham Bell, telling the true-and troubling-story of the inventor of the telephone. We think of Alexander Graham Bell as the inventor of the telephone, but that's not how he saw his own career. Bell was an elocution teacher by profession. As the son of a deaf woman and, later, husband to another, his goal in life from adolescence was to teach the deaf to speak. Even his tinkering sprang from his teaching work; the telephone had its origins as a speech reading machine. And yet by the end of his life, despite his best efforts-or perhaps, more accurately, because of them-Bell had become the American Deaf community's most powerful enemy. The Invention of Miracles recounts an extraordinary piece of forgotten history. Weaving together a moving love story with a fascinating tale of innovation, it follows the complicated tragedy of a brilliant young man who set about stamping out what he saw as a dangerous

language: Sign. The book offers a heartbreaking look at how heroes can become villains and how good intentions are, unfortunately, nowhere near enough—as well as a powerful account of the dawn of a civil rights movement and the triumphant tale of how the Deaf community reclaimed their once-forbidden language. Katie Booth has been researching this story for over a decade, poring over Bell's papers, Library of Congress archives, and the records of deaf schools around America. But she's also lived with this story for her entire life. Witnessing the damaging impact of Bell's legacy on her family would set her on a path that upturned everything she thought she knew about language, power, deafness, and the telephone"— Using both Chinese and Western theoretical approaches, this book analyses the strategies implemented by China for reclaiming power in the international domain. Examining domestic measures taken by China to assure its economic and social development, it also considers the strengths and weaknesses of its major international opponent, the US, and analyses their competing approaches to developing power resources and leadership dominance. It studies the foreign policies of both China and the US, first by going back to the historical origins of their ideological foundations and secondly by analysing their power building from the nineteenth century to the Trump and Xi Jinping presidencies. Finally, this book focuses on the One Belt One Road Initiative as China's response to putting an end to the 'world America made' and debates the question of whether China will emerge as a new capitalist country embedded in the liberal capitalist world system, or as an authoritarian state with a socialist market economy, able to change the rules of the international order. Providing a comparison of the two major world powers and a comprehensive overview of their relationship, this book will be of great interest to students and scholars of Chinese politics and international relations, as well as Chinese Studies more generally. Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine

proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game. The final book of the Bible, Revelation prophesies the ultimate judgement of mankind in a series of allegorical visions, grisly images and numerological predictions. According to these, empires will fall, the "Beast" will be destroyed and Christ will rule a new Jerusalem. With an introduction by Will Self. \* Our summary is short, simple and pragmatic. It allows you to have the essential ideas of a big book in less than 30 minutes. \*In this summary, you will discover the reality and consequences of the erosion of power around the world. \*You will also discover that : the erosion of power severely limits the capacity for action of our leaders; this phenomenon manifests itself in all areas of society; it is caused by the profound changes in our way of life; it results in a more fragmented and complex world. \*The power attributed to a function is often far removed from the power it actually implies. Politicians and business leaders alike are seen as an omnipotent elite, exercising enormous control over their fields of action. From their point of view, however, the reality is quite different. Compared to the past, power today is very limited, diffuse and volatile. This global evolution has strong consequences on decision making, and it does not seem to be about to be reversed. \*Buy now the summary of this book for the modest price of a cup of coffee! We know that power is shifting: From West to East and North to South, from presidential palaces to public squares, from once formidable corporate behemoths to

nimble startups and, slowly but surely, from men to women. But power is not merely shifting and dispersing. It is also decaying. Those in power today are more constrained in what they can do with it and more at risk of losing it than ever before. In *The End of Power*, award-winning columnist and former Foreign Policy editor Moisés Naím illuminates the struggle between once-dominant megaplayers and the new micropowers challenging them in every field of human endeavor. Drawing on provocative, original research, Naím shows how the antiestablishment drive of micropowers can topple tyrants, dislodge monopolies, and open remarkable new opportunities, but it can also lead to chaos and paralysis. Naím deftly covers the seismic changes underway in business, religion, education, within families, and in all matters of war and peace. Examples abound in all walks of life: In 1977, eighty-nine countries were ruled by autocrats while today more than half the world's population lives in democracies. CEO's are more constrained and have shorter tenures than their predecessors. Modern tools of war, cheaper and more accessible, make it possible for groups like Hezbollah to afford their own drones. In the second half of 2010, the top ten hedge funds earned more than the world's largest six banks combined. Those in power retain it by erecting powerful barriers to keep challengers at bay. Today, insurgent forces dismantle those barriers more quickly and easily than ever, only to find that they themselves become vulnerable in the process. Accessible and captivating, Naím offers a revolutionary look at the inevitable end of power—and how it will change your world. The provocative bestseller explaining the decline of power in the twenty-first century -- in government, business, and beyond.

Microsoft's revolutionary Power BI is a tool that allows users to create and transform data into reports and dashboards in new and much more powerful ways. This book, written by a member of Microsoft's Power BI team, provides a practical step by step guide on creating a financial dashboard. The book covers in detail how to combine and shape the relevant data, build the dashboard in Power BI, providing layout and design tips and tricks, prepare the model to work with fiscal dates, and show values used in many financial reports, including year-to-date, variance-to-target, percentage-of-total, and running totals reports.

National hero, Javanese mystic, pious Muslim, and leader of the "holy war" against the Dutch between 1825 and 1830, the Yogyakarta prince Dipanagara is pre-eminent in the pantheon of modern Indonesian historical figures. This first biography based on Dutch and Javanese sources is concerned with the rise of Western colonial rule in Indonesia, the fate of indigenous cultures in an age of imperials, and the role of Javanese Islam in modern Indonesian history.

In September 2017, Hurricane Maria hit Puerto Rico, completely upending the energy grid of the small island. The nearly year-long power outage that followed vividly shows how the new climate reality intersects with race and access to energy. The island is home to brown and black US citizens who lack the political power of those living in the continental US. As the world continues to warm and storms like Maria become more commonplace, it is critical that we rethink our current energy system to enable reliable, locally produced, and locally controlled energy without replicating the current structures of power and control.

In *Revolutionary Power*, Shalanda Baker arms those made most vulnerable by our current energy system with the tools they need to remake the system in the service of their humanity. She argues that people of color, poor people, and indigenous people must engage in the creation of

the new energy system in order to upend the unequal power dynamics of the current system. *Revolutionary Power* is a playbook for the energy transformation complete with a step-by-step analysis of the key energy policy areas that are ripe for intervention. Baker tells the stories of those who have been left behind in our current system and those who are working to be architects of a more just system. She draws from her experience as an energy-justice advocate, a lawyer, and a queer woman of color to inspire activists working to build our new energy system. Climate change will force us to rethink the way we generate and distribute energy and regulate the system. But how much are we willing to change the system? This unique moment in history provides an unprecedented opening for a deeper transformation of the energy system, and thus, an opportunity to transform society. *Revolutionary Power* shows us how. Here is the courageous, groundbreaking story of Rosa Parks and Recy Taylor—a story that reinterprets the history of America's civil rights movement in terms of the sexual violence committed against Black women by white men. "An important step to finally facing the terrible legacies of race and gender in this country." —The Washington Post

Rosa Parks was often described as a sweet and reticent elderly woman whose tired feet caused her to defy segregation on Montgomery's city buses, and whose supposedly solitary, spontaneous act sparked the 1955 bus boycott that gave birth to the civil rights movement. The truth of who Rosa Parks was and what really lay beneath the 1955 boycott is far different from anything previously written. In this groundbreaking and important book, Danielle McGuire writes about the rape in 1944 of a twenty-four-year-old mother and sharecropper, Recy Taylor, who strolled toward home after an evening of singing and praying at the Rock Hill Holiness Church in Abbeville, Alabama. Seven white men, armed with knives and shotguns, ordered the young woman into their green Chevrolet, raped her, and left her for dead. The president of the local NAACP branch office sent his best investigator and organizer—Rosa Parks—to Abbeville. In taking on this case, Parks launched a movement that exposed a ritualized history of sexual assault against Black women and

added fire to the growing call for change. Releasing end time power, is a powerful book that highlights the key principles of attaining the power of the Holy Spirit of God. It encapsulates the fundamental steps on how to unlock God's power (Holy Spirit), and the necessity of having it come alive in our lives, if we are to successfully effect the changes that are "taking the world by storm," in these end times. The end times are most definitely upon us. There is no doubt in my mind, that the times are well ripe, perhaps even overdue to access and to release this power. For many years, I have found myself questioning the authenticity of the presence of the Spirit of God, in today's church. Over the many years, except for the time of the early church, people have claimed to have been filled with this power, but the evidence of this is yet to be seen. I have actually grown wary, to the point of total annoyance, when i see the performances that are on full display in the futile attempts to sell the idea that they too have been filled with power. It was at this point, that I decided to conduct a research on how to attain this power, and to prove that the church has become somewhat of a circus. There are key factors that must be taken into account, and carefully followed to successfully unlock the power of God. I can truly say now, with full authority, that the Holy Spirit is almost nonexistent in the church. This may come as a surprise, and may seem quite difficult to accept, considering the enormous amounts of claimants to having this power. But the facts that i have discovered prove to be quite the contrary, and are as accurate as the accounts of the bible itself, from the Genesis to the Revelation. Releasing end time power, serves as a clarion call for Christian believers everywhere, to wake up and realize that something is terribly wrong in our relationship with God. As a believer myself, I am in no way trying to upstage the church. But rather, I seek only to expose the many deceptions that have taken root in the sanctuary. And also, to bring the awareness of how far we have fallen from the true doctrine of our Lord and Savior, (Jesus the Christ), since the time of the early church. We have fallen victim to traditions and customs, rather than a genuine worship and service to God. During the time of the early church, there were but twelve men, (the

apostles) who were given the task to further the gospel. They taught everything that they saw and heard concerning the kingdom, having had the esteemed privilege of a personal walk with the Christ, and the honor to have studied under His divine tutelage. Because their ministries had such a huge impact in the world, and stands in complete contrast to what we can all see occurring in the church nowadays, it leaves me no choice but to conclude that the church is under siege by the evil forces in this world. We too (today's church), were commissioned to tell the truth concerning the gospel in the these end times. And just like the twelve, we too must be filled with the power of God that He has promised to freely give to us, if we would only obey Him. It is the most essential component in our ministries. Without it, our ministries will be "as dead as a door nail," as is the case with the church nowadays. This power is the truth of our redemptive process, and without it we will never attain the kingdom of God. I dare you to embark with me on this spiritual journey, to unlock and to release the power of God in your life. I am certain that the impact of reading this book, will touch your life in such a profound way, that you will never be the same again. The truth of the gospel comes alive, and stands out on the pages of this book, in a very fundamental but power way. You will be truly blessed, and well equipped with the knowledge of how to unlock and to release the end time power that is so greatly needed in times like these. Mining the rich Venetian archives, especially the unusually detailed records of Venice's own branch of the Roman Inquisition, Guido Ruggiero provides a strikingly new and provocative interpretation of the end of the Renaissance in Italy. In this boldly structured work, he develops five narrative accounts of individual encounters with the Inquisition that illustrate the double-edged metaphor of how passions were both bound by late Renaissance society and were seen in turn as binding people. In this way new perspectives are opened on magic, witchcraft, love, marriage, gender, and discipline at the level of the community and beyond. Witches, courtesans, prostitutes, women healers, nobles, Cardinals, and renegade priests and monks speak from these pages describing their lives, beliefs, hopes, fears, and lies. With an imaginative flair for

storytelling and impeccable scholarship, Ruggiero exposes the rich complexity of the culture and poetics of the everyday at the end of the Renaissance and illuminates a previously unexplored chapter in Italian history. Now a New York Times Bestseller. The creator of the wildly popular award-winning podcast Hardcore History looks at some of the apocalyptic moments from the past as a way to frame the challenges of the future. Do tough times create tougher people? Can humanity handle the power of its weapons without destroying itself? Will human technology or capabilities ever peak or regress? No one knows the answers to such questions, but no one asks them in a more interesting way than Dan Carlin. In *The End is Always Near*, Dan Carlin looks at questions and historical events that force us to consider what sounds like fantasy; that we might suffer the same fate that all previous eras did. Will our world ever become a ruin for future archaeologists to dig up and explore? The questions themselves are both philosophical and like something out of *The Twilight Zone*. Combining his trademark mix of storytelling, history and weirdness Dan Carlin connects the past and future in fascinating and colorful ways. At the same time the questions he asks us to consider involve the most important issue imaginable: human survival. From the collapse of the Bronze Age to the challenges of the nuclear era the issue has hung over humanity like a persistent Sword of Damocles. Inspired by his podcast, *The End is Always Near* challenges the way we look at the past and ourselves. In this absorbing compendium, Carlin embarks on a whole new set of stories and major cliffhangers that will keep readers enthralled. Idiosyncratic and erudite, offbeat yet profound, *The End is Always Near* examines issues that are rarely presented, and makes the past immediately relevant to our very turbulent present. Amid early twentieth-century China's epochal shifts, a vital and prolific commercial publishing industry emerged. Recruiting late Qing literati, foreign-trained academics, and recent graduates of the modernized school system to work as authors and editors, publishers produced textbooks, reference books, book series, and reprints of classical texts in large quantities at a significant profit. Work for major publishers provided a

living to many Chinese intellectuals and offered them a platform to transform Chinese cultural life. In *The Power of Print in Modern China*, Robert Culp explores the world of commercial publishing to offer a new perspective on modern China's cultural transformations. Culp examines China's largest and most influential publishing companies—Commercial Press, Zhonghua Book Company, and World Book Company—during the late Qing and Republican periods and into the early years of the People's Republic. He reconstructs editors' cultural activities and work lives as a lens onto the role of intellectuals in cultural change. Examining China's distinct modes of industrial publishing, Culp explains the emergence of the modern Chinese intellectual through commercial and industrial processes rather than solely through political revolution and social movements. An original account of Chinese intellectual and cultural history as well as global book history, *The Power of Print in Modern China* illuminates the production of new forms of knowledge and culture in the twentieth century. Rational self-interest is often seen as being at the heart of liberal economic theory. In *The Power at the End of the Economy* Brian Massumi provides an alternative explanation, arguing that neoliberalism is grounded in complex interactions between the rational and the emotional. Offering a new theory of political economy that refuses the liberal prioritization of individual choice, Massumi emphasizes the means through which an individual's affective tendencies resonate with those of others on infra-individual and transindividual levels. This nonconscious dimension of social and political events plays out in ways that defy the traditional equation between affect and the irrational. Massumi uses the Arab Spring and the Occupy Movement as examples to show how transformative action that exceeds self-interest takes place. Drawing from David Hume, Michel Foucault, Gilles Deleuze, Niklas Luhmann and the field of nonconsciousness studies, Massumi urges a rethinking of the relationship between rational choice and affect, arguing for a reassessment of the role of sympathy in political and economic affairs. Why do some people successfully overcome illness and others don't? Researcher and health advocate explores the healing power

of our thoughts, habits, and microbiome. Millions of people are struggling through the vicious cycle of chronic symptoms that are associated with internal inflammation and immune dysregulation. And yet, determining the root cause of inflammation can be so challenging...until now! Nutrition educator, researcher, and health advocate Kathleen DiChiara aims to answer the question of what truly conditions the body to overcome illness. She shares her passion for functional medicine, microbiology, and growth mind-set, and helps readers discover the key strategies that impact the three driving forces for optimal health: beliefs, behavior, and bacteria. In this book, readers will find a health-conscious and practical guide to build physical health and immunity. Fulvia is the first full-length biography focused solely on Fulvia, who is best known as the wife of Marcus Antonius (Mark Antony). Born into a less prestigious branch of an aristocratic Roman clan in the last decades of the Roman Republic, Fulvia first rose to prominence as the wife of P. Clodius Pulcher, scion of one of the city's most powerful families and one of its most infamous and scandalous politicians. In the aftermath of his murder, Fulvia refused to shrink from the glare of public scrutiny and helped to prosecute the man responsible. Later, as the wife of Antonius, she became the most powerful woman in Rome, at one point even taking an active role in the military conflict between Antonius's allies and Octavian, the future emperor Augustus. Her husbands' enemies painted her as domineering, vicious, greedy, and petty. This book peels away the invective to reveal a strong-willed, independent woman who was, by many traditional measures, an immensely successful Roman matron.
