Abandoned Italy. Ediz. Illustrata Jul 23 2022 Follow the trail of the abandoned Gandrange steelworks or the decommissioned Uckange blast furnaces in Lorraine, a spectacular marine graveyard in Brittany's Crozon peninsula, a forgotten chateau on the outskirts of Paris, a derelict sanatorium in the Alps, the remains of a magnificent Art Deco concert hall in the north, a disused hospital in the south-west, a military fort in the Pyrenees, now off-limits, a former wine storage cellar in Normandy ... Following the success of his first book, published in 2009, Sylvain Margaine still travels around France in search of these forbidden and often overlooked places. In this way he draws attention to the sometimes dramatic fate of the country's heritage, the preservation of which has become a matter for serious reflection. An exceptional photographic report.

Adrian Villar Rojas Feb 03 2021 The first book to explore the fascinating career and fantasy-driven worlds created by the acclaimed Argentinean artist Adrián Villar Rojas's works concoct imaginary realms. Usually made from clay, his colossal installations are transitory and so cannot be collected, as they disappear or decay over time. His practice confronts the public with ideas of obsolescence and extinction, but also with the possibilities of humankind and its endless imagination. This is the first book to include all of Villar Rojas' most significant projects, featured in international biennials such as Venice, Documenta, Shanghai, and others.

Palazzo Montecitorio Jun 09 2021 This first book about Palazzo di Montecitorio, examines the Baroque building through a photographic review of etchings and paintings featuring the palazzo, executed between the 17th and 19th centuries. The current building was commissioned by Pope Innocent X from Gian Lorenzo Bernini as a future residence for the Ludovisi family. Bernini, an interpreter of the true essence of Roman Baroque, designed a building which, in terms structure and decoration, was suited to the lie of the land. In fact, the facade of the palazzo, which is slightly curved, follows the line of the artificial hill, and the roughly-hewn stones, from which leaves and broken branches emerge, simulate a building constructed on bare rock.
