In , therapists John and Linda Friel gave parents an easy-to-understand guide to overcome the seven worst mistakes even good parents make while raising children. Now they've written a book for teens based on the same formula: it includes the seven worst things even smart—and outwardly successful—teens do, and shows teens how they can change these behaviors and assure their success in life as they grow towards adulthood. This book was written expressly for teenagers as a unique roadmap into adulthood. It was designed to stimulate the brain as well as the heart because teenagers who listen to both can eventually negotiate adolescence successfully. It will appeal to teenagers who like to think, wonder, question and challenge, as well as to teenagers who feel that they haven't quite figured out this "life" thing. The Friels show teens the seven things they need to do in order to overcome common roadblocks they face or will face. These are: Become competent—don't expect to have self-esteem without becoming competent Master your feelings—don't let your feelings run the show Break the silence—don't silently scream instead of making yourself known Get healthy power—don't avoid learning about power Face the serious stuff—don't hide the really important things you're experiencing Find an identity—don't avoid the struggle to find yourself Learn to stake out the extremes—don't live only in the extremes. Written in clear, straightforward language and including many interesting and colorful story interludes, this book is an easy-to-use, powerful tool for all teens. Practice makes perfect! This

large collection of fun and engaging practice pages is designed to help students master essential skills in reading, writing, vocabulary, math, and more. Praise for How Learning Works "How Learning Works is the

perfect title for this excellent book. Drawing upon new research in psychology, education, and cognitive science, the authors have demystified a complex topic into clear explanations of seven powerful learning principles. Full of great ideas and practical suggestions, all based on solid research evidence, this book is essential reading for instructors at all levels who wish to improve their students' learning." —Barbara Gross Davis, assistant vice chancellor for educational development, University of California, Berkeley, and author, *Tools for Teaching* "This book is a must-read for every instructor, new or experienced. Although I have been teaching for almost thirty years, as I read this book I found myself resonating with many of its ideas, and I discovered new ways of thinking about teaching." —Eugenia T. Paulus, professor of chemistry, North Hennepin Community College, and 2008 U.S. Community Colleges Professor of the Year from The Carnegie Foundation for the Advancement of Teaching and the Council for Advancement and Support of Education "Thank you Carnegie Mellon for making accessible what has previously been inaccessible to those of us who are not learning scientists. Your focus on the essence of learning combined with concrete examples of the daily challenges of teaching and clear tactical strategies for faculty to consider is a welcome work. I will recommend this book to all my colleagues." —Catherine M. Casserly, senior partner, The Carnegie Foundation for the Advancement of Teaching "As you read about each of the seven basic learning principles in this book, you will find advice that is grounded in learning theory, based on research evidence, relevant to college teaching, and easy to understand. The authors have extensive knowledge and experience in applying the science of learning to college teaching, and they graciously

share it with you in this organized and readable book." —From the Foreword by Richard E. Mayer, professor of psychology, University of California, Santa Barbara; coauthor, *e-Learning and the Science of Instruction*; and author, *Multimedia Learning*
