Covering everything cat owners need to know, this practical guide to looking after the most popular pet in the United States is the perfect reference for any cat lover. The Complete Cat Care Manual provides detailed information on the day-to-day care of kittens and adult cats, including feeding, training, handling, exercising, essential equipment, and grooming. Detailed chapters outline the reasons behind behavioral problems, such as eating houseplants and scratching furniture, and provide tips for changing unacceptable behavior. Health problems are completely detailed with anatomical diagrams, diagnostic charts, and illustrations that identify symptoms and treatments. Step-by-step instructions teach all the techniques needed to nurse a sick animal or administer emergency first aid. Hundreds of remarkable color photographs, specially commissioned for this book, detail

every aspect of a cat's life. The material is based on extensive research. Dr. Bruce Fogle, a leading specialist in pet behavior, has observed hundreds of cats during his years as a veterinary surgeon. He identifies how cats communicate through posture, body language, facial expressions, "speaking" (meowing and hissing), and rituals like rubbing, swatting, and grooming. He discusses the differences between learned behavior and instinctual action, the importance of a cat's sensory perceptions like smell, touch, and sound—and when a cat's eccentricities are due to genetics or are merely a matter of individual temperament. Endorsed by the American Society for the Prevention of Cruelty to Animals. The Reference Manual on Scientific Evidence, Third Edition, assists judges in managing cases involving complex scientific and technical evidence by describing the basic tenets of key scientific fields from which legal evidence is typically derived and by providing examples of cases in which that evidence has been used. First published in 1994 by the Federal Judicial Center, the Reference Manual on Scientific Evidence has been relied upon in the legal and academic communities and is often cited by various courts and others. Judges faced with disputes over the admissibility of scientific and technical evidence refer to the manual to help them better understand and evaluate the relevance, reliability and usefulness of the evidence being proffered. The manual is not intended to tell

judges what is good science and what is not. Instead, it serves to help judges identify issues on which experts are likely to differ and to guide the inquiry of the court in seeking an informed resolution of the conflict. The core of the manual consists of a series of chapters (reference guides) on various scientific topics, each authored by an expert in that field. The topics have been chosen by an oversight committee because of their complexity and frequency in litigation. Each chapter is intended to provide a general overview of the topic in lay terms, identifying issues that will be useful to judges and others in the legal profession. They are written for a non-technical audience and are not intended as exhaustive presentations of the topic. Rather, the chapters seek to provide judges with the basic information in an area of science, to allow them to have an informed conversation with the experts and attorneys.

PREFACE: THE purpose of this book is to give such instruction in dressmaking in the broadest meaning of the term- as to make a text-book for both teacher and student in colleges and schools above the elementary where sewing or dressmaking is taught. The Introduction considers the fundamental meaning of dressmaking. It traces the development of the art of dressmaking from its simple beginnings to its present elaborate expression from the time when clothing was represented by painting and tattooing to the present day, when numerous coverings conform to the various require- ments of custom, use, and fashion. Part I presents the development of costume from the standpoint of history and design. This material is neces- sarily given in an abbreviated form and serves merely as a suggestive outline for further study and research. Part II considers Textiles, the materials which are used in dressmaking, and discusses the economic value of vari- ous fibres and fabrics. The general processes of textile manufacture are given to serve as a basis for

consideration of the cost and wearing qualities of any fabric. A few suggestions are included for physical tests for fabrics such tests as do not require a knowledge of chemistry and are possible in the schoolroom or at home. Part III treats of design and technique in patternmaking and dressmaking. It presents various methods for cutting, fitting, and finishing a garment to meet the demands of art and of convention as affected by fashion-. A knowledge of all fundamental stitches and seams is pre-supposed and no instruction in elementary sewing is included.

Directions are given, however, for any sewing in which pertains strictly to dressmaking. In Part II, Textiles, the author is greatly indebted to the generous co-operation of Mr. Edgar H. Barker, chief of the Departments of Woolen and Worsted Yarns of the Lowell Textile School, not only for his valuable constructive criticism, but also for many opportunities for technical verification which his wide experience and vital interest in the subject have made possible. In Part III, Dressmaking, Miss Ruth Wilmot, of Teachers College, has rendered helpful criticism and general suggestions in the chapters dealing with the technique of dressmaking and the problem of design. To Miss Bessie White, of Teachers College, the author is also gratefully indebted for the outline of the chapter on Embroidery. For advice in the plan, scope, and organization of material the author wishes to express her thanks to Doctor Frederick Henry Sykes, president

of the Connecticut College for Women, at whose suggestion the book was first undertaken and whose kindly interest has continued throughout. Lastly, she wishes to record her thanks to Miss Edna its construction. Dingwall, through whose untiring and sympathetic assistance the labor of the completion of the book has been appreciably lightened. Content includes:
