Assessment of Changes in the Decision Making Environment in a Rochester, NY Hotel Jun 09 2021 "This is a fourth year case study on the detection of changes that have occurred in the structures and processes that support effective decision making within a hotel in Rochester, NY. The case study is considered to be a developmental research using a longitudinal approach. The data collected in this case study were compared to the results of Salaya Chermisrivattana who conducted the same study in 1996. The instrument used in this case study was the psychometric, critical incident questionnaire, "Organizational Team Survey", developed by Boone and Killmann in 1988. The purpose of this case study was to look at changes that occurred in 1996 and 1999. The survey was conducted in March in 1999 at The Marriott Thruway hotel. The questionnaires were administered to employees, currently working at the hotel. The employees were asked to complete a survey when they received their paychecks. Participation was done on a volunteer basis, and individual confidentiality is still maintained. In 1999, there were 64 participants compared to 83 in 1996. The data was analyzed using the Statistical Package for the Social Sciences (SPSS). Significant differences between 1996 and 1999 survey samples were determined using group t- Tests. T-tests and P-values between 0.10 and 0.01 were used to detect any significant changes. Consequently, seventeen comparisons between 1996 and 1999 were found to have statistically significant differences. The Organizational Team Survey is composed of four parts. Part I asked the respondent to briefly describe a work related decision in which he/she was recently involved. These decisions were classified as operational short-term decision or strategic long-term decision. Part II of the questionnaire displayed thirty-two randomly placed questions. The set of thirty questions was divided in six main factors: factor 1 -Multiple Inputs and Alternatives, factor 2- Problem Identification, factor 3- Rewards for good decision, factor 4- Use of group efforts, factor 5- Politics, and factor 6- Resource Adequacy. In 1999, part-time employees were detected significant difference in factor 1- Multiple Inputs and Alternatives and factor 2- Problem Identification. Factor 3- Rewards for good decision shows significant differences changes in many categories such as full time employees, male employees and employees who are 25 and under. Factor4- Team and use of group effort shows that the positive significant differences is among top management, while a negative is among department of engineer and security. Factor 5- Bureaucratic Block and Politics shows many significant differences in such categories as associates, part-time employees, and employees who have worked in the hotel surveyed less than one year. The last factor- Resource and Adequacy- shows significant differences in part time employees, employees who are 26 to 35years old, and employees who have worked at the current position 4 to 7 years. Part III of the questionnaire asked for ranking the top five problem areas in the hotel. Adequate training to do job was considered being the most problem area in 1999. Part IV of the survey includes the demographic information about of employees. The demographics that were used to analyzing the differences are: 1. Type of position, 2. Sex of employee, 3. Type of employment, 4. Age of employment, 5. Number of years working in the hotel, 6. Number of years working at the surveyed hotel, 7. Number of years working in current position, and 8. Department in hotel. This year, the ranking of the top five-problem area changed considerably from that of 1996 in certain factors and their categories, due to the lack of quality training in the hotel. It is noticed that the lack of quality training in hotel was discontinued in 1994. The factors are significant in the topic area of training due to an inadequate training. The hotel should run more tests to find the impact that the absence of training has on, the work environment of the hotel. These will then convince the management to reinstate the quality- training program. Besides, the future study and its outcome will help gain more knowledge in this

topic."--Abstract.

New Directions in Global Political Governance Jul 31 2020 Focused on politics and security, this volume extends the G8 and Global Governance series into the domain of international security in both its classic and newer forms. Going beyond the conventional focus on globalization, it takes up the central question of shaping international order, looking at the emergence of several important phenomena including: - The advent of human security - The global importance of once deeply domestic security issues - Enhanced demands for civil society participation Sections on Japan's perspective on the G8 and international order, critical issues in global security governance and the role of international institutions and American leadership therein, make this a distinctive account of international security in the 21st century.

Best. Movie. Year. Ever. May 01 2023 From a veteran culture writer and modern movie expert, a celebration and analysis of the movies of 1999—"a terrifically fun snapshot of American film culture on the brink of the Millennium....An absolute must for any movie-lover or pop-culture nut" (Gillian Flynn). In 1999, Hollywood as we know it exploded: *Fight Club*. *The Matrix*. *Office Space*. *Election*. *The Blair Witch Project*. *The Sixth Sense*. *Being John Malkovich*. *Star Wars: The Phantom Menace*. *American Beauty*. *The Virgin Suicides*. *Boys Don't Cry*. *The Best Man*. *Three Kings*. *Magnolia*. Those are just some of the landmark titles released in a dizzying movie year, one in which a group of daring filmmakers and performers pushed cinema to new limits—and took audiences along for the ride. Freed from the restraints of budget, technology, or even taste, they produced a slew of classics that took on every topic imaginable, from sex to violence to the end of the world. The result was a highly unruly, deeply influential set of films that would not only change filmmaking, but also give us our first glimpse of the coming twenty-first century. It was a watershed moment that also produced *The Sopranos*; Apple's *AirPort*; *Wi-Fi*; and Netflix's unlimited DVD rentals. "A spirited celebration of the year's movies" (Kirkus Reviews), *Best. Movie. Year. Ever.* is the story of not just how these movies were made, but how they re-made our own vision of the world. It features more than 130 new and exclusive interviews with such directors and actors as Reese Witherspoon, Edward Norton, Steven Soderbergh, Sofia Coppola, David Fincher, Nia Long, Matthew Broderick, Taye Diggs, M. Night Shyamalan, David O. Russell, James Van Der Beek, Kirsten Dunst, the *Blair Witch* kids, the *Office Space* dudes, the guy who played Jar-Jar Binks, and dozens more. It's "the complete portrait of what it was like to spend a year inside a movie theater at the best possible moment in time" (Chuck Klosterman).

Plainsong Jun 21 2022 National Book Award Finalist A heartstrong story of family and romance, tribulation and tenacity, set on the High Plains east of Denver. In the small town of Holt, Colorado, a high school teacher is confronted with raising his two boys alone after their mother retreats first to the bedroom, then altogether. A teenage girl—her father long since disappeared, her mother unwilling to have her in the house—is pregnant, alone herself, with nowhere to go. And out in the country, two brothers, elderly bachelors, work the family homestead, the only world they've ever known. From these unsettled lives emerges a vision of life, and of the town and landscape that bind them together—their fates somehow overcoming the powerful circumstances of place and station, their confusion, curiosity, dignity and humor intact and resonant. As the milieu widens to embrace fully four generations, Kent Haruf displays an emotional and aesthetic authority to rival the past masters of a classic American tradition.

Development as Freedom Dec 04 2020 By the winner of the 1988 Nobel Prize in Economics, an essential and paradigm-altering framework for understanding economic development--for both rich and poor--in the twenty-first century. Freedom, Sen argues, is both the end and most efficient means of sustaining economic life and the key to securing the general welfare of the world's entire population. Releasing the idea of individual freedom from association with any particular historical, intellectual, political, or religious tradition, Sen clearly demonstrates its current applicability and possibilities. In the new global economy, where, despite unprecedented increases in overall opulence, the contemporary world denies elementary freedoms to vast numbers--perhaps even the majority of people--he concludes, it is still possible to practically and optimistically restrain a sense of social accountability. *Development as Freedom* is essential reading.

Financial Strategies for the Manager Dec 24 2019 Part of Tsinghua University Texts, *Financial Strategies for the Manager* includes a range of financial management issues such as financial statement analysis, a systematic approach to financial performance appraisal, liquidity management and sales growth, working capital management, budgeting, foreign exchange and interest rate risk management, and a most useful tool not normally understood – EVA. The book is written in a concise and accessible style, minimizing the use of the technical jargon and complicated mathematical formulae. Included exercises enhance student learning and examples bolster ability to understand and use concepts in day-to-day situations. The material was originally developed for a large corporate client in the telecommunications business to assist non-financial managers in

understanding financial theories in a practical way. It was expanded and revised into a text for a post-graduate course of the Asia/Pacific Management Co-operative Program, Capilano University, BC, Canada. Charles Priester is a professor at Capilano University of Canada; Jincheng Wang is a professor at the International Business School of Tianjin Foreign Studies University of China.

Fair and Unfair Trials in the British Isles, 1800-1940 Aug 24 2022 Adopting a microhistory approach, *Fair and Unfair Trials in the British Isles, 1800-1940* provides an in-depth examination of the evolution of the modern justice system. Drawing upon criminal cases and trials from England, Scotland, and Ireland, the book examines the errors, procedural systems, and the ways in which adverse influences of social and cultural forces impacted upon individual instances of justice. The book investigates several case studies of both justice and injustice which prompted the development of forensic toxicology, the implementation of state propaganda and an increased interest in press sensationalism. One such case study considers the trial of William Sheen, who was prosecuted and later acquitted of the murder of his infant child at the Old Baily in 1827, an extraordinary miscarriage of justice that prompted outrage amongst the general public. Other case studies include trials for treason, theft, obscenity and blasphemy. Nash and Kilday root each of these cases within their relevant historical, cultural, and political contexts, highlighting changing attitudes to popular culture, public criticism, protest and activism as significant factors in the transformation of the criminal trial and the British judicial system as a whole. Drawing upon a wealth of primary sources, including legal records, newspaper articles and photographs, this book provides a unique insight into the evolution of modern criminal justice in Britain.

Travels in Paradox May 28 2020 This innovative volume focuses on tourism through the twin lenses of cultural theory and cultural geography. Presenting a set of innovative case studies on tourist places around the world, the contributors explore the paradoxes of the tourist experience and the implications of these paradoxes for our broader understanding of modern identity as simultaneously grounded and mobile. The book examines how tourism reveals the paradoxical ways that places are both mobile and rooted, real and fake, inhabited by those who are simultaneously insiders and outsiders, and both subjectively experienced and objectively viewed. This rich blend of empirical and theoretical analysis will be invaluable for cultural geographers, anthropologists, and sociologists of tourism.

To Err Is Human Aug 12 2021 Experts estimate that as many as 98,000 people die in any given year from medical errors that occur in hospitals. That's more than die from motor vehicle accidents, breast cancer, or AIDS—three causes that receive far more public attention. Indeed, more people die annually from medication errors than from workplace injuries. Add the financial cost to the human tragedy, and medical error easily rises to the top ranks of urgent, widespread public problems. *To Err Is Human* breaks the silence that has surrounded medical errors and their consequence—but not by pointing fingers at caring health care professionals who make honest mistakes. After all, to err is human. Instead, this book sets forth a national agenda—with state and local implications—for reducing medical errors and improving patient safety through the design of a safer health system. This volume reveals the often startling statistics of medical error and the disparity between the incidence of error and public perception of it, given many patients' expectations that the medical profession always performs perfectly. A careful examination is made of how the surrounding forces of legislation, regulation, and market activity influence the quality of care provided by health care organizations and then looks at their handling of medical mistakes. Using a detailed case study, the book reviews the current understanding of why these mistakes happen. A key theme is that legitimate liability concerns discourage reporting of errors—which begs the question, "How can we learn from our mistakes?" Balancing regulatory versus market-based initiatives and public versus private efforts, the Institute of Medicine presents wide-ranging recommendations for improving patient safety, in the areas of leadership, improved data collection and analysis, and development of effective systems at the level of direct patient care. *To Err Is Human* asserts that the problem is not bad people in health care—it is that good people are working in bad systems that need to be made safer. Comprehensive and straightforward, this book offers a clear prescription for raising the level of patient safety in American health care. It also explains how patients themselves can influence the quality of care that they receive once they check into the hospital. This book will be vitally important to federal, state, and local health policy makers and regulators, health professional licensing officials, hospital administrators, medical educators and

students, health caregivers, health journalists, patient advocates"as well as patients themselves. First in a series of publications from the Quality of Health Care in America, a project initiated by the Institute of Medicine

Ebony Jan 05 2021 EBONY is the flagship magazine of Johnson Publishing. Founded in 1945 by John H. Johnson, it still maintains the highest global circulation of any African American-focused magazine.

Genome Mapping and Genomics in Fishes and Aquatic Animals Mar 07 2021 Mapping of animal genomes has generated huge databases and several new concepts and strategies, which are useful to elucidate origin, evolution and phylogeny. Genetic and physical maps of genomes further provide precise details on chromosomal location, function, expression and regulation of academically and economically important genes. The series *Genome Mapping and Genomics in Animals* provides comprehensive and up-to-date reviews on genomic research on a large variety of selected animal systems, contributed by leading scientists from around the world. This volume summarizes the first era of genomic studies of aquaculture species, in which the tools and resources necessary to support whole-genome sequencing were developed. These tools will enhance efforts toward selective breeding of aquaculture species. Included in this volume are summaries of work on salmonids, cyprinids, catfish, tilapias, European sea bass, Japanese flounder, shrimps and oysters.

Thabo Mbeki's World Jul 11 2021 This book explores Thabo Mbeki from an ideological perspective. Is there a central strand of thinking that informs his politics and his policy-making? It is of great significance how Mbeki builds, fortifies and interacts with his core base and his most important constituencies, especially in and around the ANC-led ruling alliance. It argues that it is important to understand Mbeki in order to grasp how the South African government operates post-1999.
