Six groups of poems explore themes connected by the common thread of Chickamauga, a Civil War battle site "It takes only nineteen seconds to walk the distance of the first powered flight. But when I was there the wind was up and cold on my face, and I felt as if I'd entered the black-and-white photograph I'd been seeing all my life. The sand is light gray, there's a spill of surf in the distance. Wilbur, running at the right of the plane, and Orville, the pilot, are in dark suits. The propellers blur against the sky as the machine rises. . . ." So begins Noah Adams's adventure in search of Wilbur and Orville Wright, a journey that takes him across the country as he follows in the footsteps of the famous brothers in an attempt to know them more deeply, not just as inventors and pilots but as individuals as well. Adams, one of our most distinctive and talented storytellers, traveled thousands of miles and interviewed scores of experts and individuals to piece together his story. He finds a local boat captain to ferry him to Kitty Hawk, along the same route that Wilbur took in 1900, and spends several days talking with descendants of the families who first welcomed the Wright brothers a century ago and helped them conduct their gliding experiments. To experience first-hand the thrill of being in the air, Adams himself goes hang-gliding in the Outer Banks. To understand the aerodynamics of lift and drag and how the famous 1903 plane was constructed, he visits Ken Hyde, a Virginia pilot and vintage aircraft builder who is creating the world's most accurate reproduction of the 1903 Wright Flyer. Adams goes to the prop shop and handles the tools and materials that the Wrights used to build their gliders and planes, and later he visits the wind tunnel at Langley Air Force Base where Hyde's reproduction was tested for the first time. He also travels to France to visit the old racetrack at Le Mans where Wilbur startled the European aviation community with his demonstration flights in 1908, and he spends a few days at Wisconsin's Oshkosh Fly-in, where builders of experimental aircraft and owners of vintage planes gather every year to dazzle the crowds. Adams himself takes to the air in a restored Ford Tri-Motor, America's first airliner, which took its maiden flight seventy years ago. In Adams's book we encounter the Wright brothers in a way that no writer has introduced them before. Through the lens of his own experiences as well as original reporting, letters, diaries, and other primary source material, he helps us understand the talent and intensity of the brothers and their family, including the fascinating, deeply complex, and at times tragic bond between Orville and Katharine, his younger sister. The Flyers is a wonderfully rich narrative that brings an unprecedented spirit of immediacy to one of history's most dramatic stories. From the Hardcover edition. Wisconsin is the "Wright State," and its influence on the young Frank Lloyd Wright, both geographic and cultural, is carefully explored in this review of 50 of his Wisconsin projects. The book then uses those projects as case studies tracing the development of his remarkable career. Distributed for the Milwaukee Art Museum, Milwaukee, Wisconsin. "The notion of 'class interest' is a familiar one in sociological literature, as a set of social objectives. What is its relationship, however, to 'class capacity' -- the ability to realize these objectives? The complex tension between these two poles of definition of any given social class is one of the guiding themes of Erik Olin Wright's book. It is composed of three lucid and bracing essays, focused on a trio of the most unresolved and contentious problems of Marxist theory."--Jacket. Like its current citizens, the United States was born in debt-a debt so deep that it threatened to destroy the young nation. Thomas Jefferson considered the national debt a monstrous fraud on posterity, while Alexander Hamilton believed debt would help America prosper. Both, as it turns out, were right. One Nation Under Debt explores the untold history of America's first national debt, which arose from the immense sums needed to conduct the American Revolution. Noted economic historian Robert Wright, Ph.D. tells in riveting narrative how a subjugated but enlightened people cast off a great tyrant--"but their liberty, won with promises as well as with the blood of patriots, came at a high price." He brings to life the key events that shaped the U.S. financial system and explains how the actions of our forefathers laid the groundwork for the debt we still carry today. As an economically tenuous nation by Revolution's end, America's people struggled to get on their feet. Wright outlines how the formation of a new government originally reduced the nation's debt-but, as debt was critical to this government's survival, it resurfaced, to be beaten back once more. Wright then reveals how political leaders began accumulating massive new debts to ensure their popularity, setting the financial stage for decades to come. Wright traces critical evolutionary developments--from Alexander Hamilton's creation of the nation's first modern capital market, to the use of national bonds to further financial goals, to the drafting of state constitutions that created non-predatory governments. He shows how, by the end of Andrew Jackson's administration, America's financial system was contributing to national growth while at the same time new national and state debts were amassing, sealing the fate for future generations. Class Counts combines theoretical discussions of the concept of class with a wide range of comparative empirical investigations of class. Fiction. African American Studies. Originally published in 1966, THE WIG is the story of Lester Jefferson, a young man of great good will, whose repeated attempts to become a part of "The Great Society" are doomed in advance. Aided, thwarted, and confused by numerous, curious companions, Lester conducts his inevitable search for happiness in a series of absurdist misadventures that begin with the transformation of the hair on his head into burnished silken curls. "Charles Wright's Negro world explodes with the crazy laughter of a man past caring. His style, as mean and vicious a weapon as a rusty hacksaw, is the perfect vehicle for his zany pessimism.THE WIG is a brutal, exciting, and necessary book"--Conrad Knickerbocker for The New York Times. A biography of two bicycle mechanics from Ohio who stunned the world by inventing powered flight. The first full-scale biography of the author of Black Boy and Native Son -- written with the dramatic drive of a novel. "Writing," Richard Wright once said, "is my way of being a free man." In this authoritative and engaging biography, Hazel Rowley chronicles Wright's extraordinary journey from a sharecropper's shack in Mississippi to international renown as a writer, fiercely independent thinker, and outspoken critic of racism. The child of the fundamentalist South with an eighth-grade education, a self-taught intellectual in the working-class Communist Party of the 1930s, a black man married to a white woman, and an expatriate in France after World War II, Wright was always an outsider. Skillfully interweaving quotations from Wright's writings, Rowley portrays a man who transcended the times in which he lived and sought to reconcile opposing cultures in his work. She draws on recently discovered material to shed new light on Wright's relationships with Langston Hughes, Ralph Ellison, and others, and on his self-imposed exile in France (widely blamed for his so-called decline as a writer). In this lively, finely crafted narrative, Wright -- passionate, complex, courageous, and flawed -- comes vibrantly to life. Outsider Citizens examines a foundational moment in the writing of race, gender, and sexuality--the decade after 1945, when Richard Wright, Simone de Beauvoir, and others sought to adapt existentialism and psychoanalysis to the representation of newly emerging public identities. Relyea offers the first book-length study bringing together Wright and Beauvoir to reveal their common sources and concerns. Relyea's discussion begins with Native Son and then examines Wright's postwar exile in France and his engagement with existentialism and psychoanalysis in The Outsider. Beauvoir met Wright during her postwar tour of America, chronicled in America Day by Day. After returning to France, Beauvoir adapted American social constructionist concepts of race as one source for her philosophical investigation of gender in The Second Sex, while also rejecting 1940s psychoanalytic theories of femininity. Relyea examines later representations of race and gender in a discussion of James Baldwin's critique of postwar American liberalism and ideals of innocence and masculinity in Giovanni's Room, which represents the remaking of white American identity through the risks of exile and the return of the gaze. Almost thirty years ago, Charles Wright began a poetic project of astonishing scope -- a series of three trilogies. The first two were collected in Country Music and The World of the Ten Thousand Things, and the third began with Chickamauga and continued with Black Zodiac. Now Wright has completed the last book of the series -- Appalachia. If Country Music traced "Wright's journey from the soil to the stars" and The World of the Ten Thousand Things "lovingly detailed" our world and made "a visionary map of the world beyond" (The Nation), the final piece in this magnum opus shows us a master poet's confrontation with his own mortality and his stunning ability to find transcendence in the most beautifully ordinary landscapes. Is the consciousness of Americans in the midst of dramatic transformation? Or do people think and feel much the same as they have always thought and felt? Do most people enjoy their work, or hate it? Is the American family being replaced by new institutional forms, or is it much the same as it was in the 1950's? Have material values been replaced by a "postmaterial consciousness" in a postindustrial society? Are Americans becoming more conservative, less conservative, or staying about the same? "State of the Masses" asks the important questions. Originally published in 1986, this prescient study evaluate the views of social critics, neo-conservatives, neo-Marxists, post-industrialists, and the theorists of the little man, who puport to describe the nature, social conditions, outlooks, and motivations of the American populace. The claims of one group are often diametrically opposed to those of another. The authors make the case for which claims can be considered true and which false. Hamilton and Wright analyze the contradictory claims and compares their implications with the best social science research and data available at that time. They also explore the implications for theories in light of the conflicting portrait the evidence provides. The authors conclude with a new perspective for understanding continuities and changes in the United States. This is a prescient view of American society during turmoil, and a model for how social science research can be used predictively. "The manuscript is wonderfully devastating."--G. William Domhoff, "University of California, Santa Cruz" "I think this is a masterful and timely piece of work a the book's message is so powerful, so wide sweeping that it cannot be ignored."--William Form, "The Ohio State University" "Richard F. Hamilton" is emeritus professor of sociology and political science at The Ohio State University. He has written eleven books and seventy articles, mostly dealing with elite and mass politics and their interconnections, including "President McKinley, War and Empire" (two volume work) published by Transaction. "James D. Wright" is a professor in the department of sociology at the University of Central Florida. He has published seventeen books including "Armed and Considered Dangerous" and "Under the Gun" as well as many journal articles. His current research interests include violence, urban poverty and inequality, health and the homeless population, and the "divorce reform" movement. First published in 1927, Deluge is one of the most famous of the English catastrophe novels. Beautifully written and action packed--RKO Radio Pictures even filmed this story--the novel depicts a flood so severe that it destroys modern civilization, leaving the few survivors to adapt to the rigors of the natural world. Like other English writers responding to the trauma of World War I, Sydney Fowler Wright expresses a loathing of the worst aspects of industrialization. The flood, in his view, becomes an opportunity for the remaking of society. The protagonists soon realize that civilization and technology have divorced them from the knowledge and skills necessary for survival. Released from their over-reliance on social regulation, they struggle to overcome their own brutality to develop a new sense of community. For over 75 years readers have praised this book for its style and wisdom, and debated the meaning of its controversial ending. This Wesleyan edition is graced with an excellent introduction and annotations by leading science fiction scholar Brian Stableford. There are approximately 200 nations on Earth and the social sciences are being practiced in each one, yet too little of this global enterprise is known to Western, particularly American, social scientists. Drawing upon five years of experience as editor-in-chief of a major international encyclopedia of the social and behavioral sciences, James D. Wright provides social scientists a representative sampling of the work of their international colleagues. The volume includes investigations into a myriad of questions. How have Muslims accommodated to life in Western societies? What were the demographic consequences of World War I? What are the economic, social, and environmental costs and benefits of hosting a cruise ship terminal? Has the situation of Honduran street children improved in the past two decades? What is the state of public health in Africa? Wright shows how social scientists outside the United States have answered all of these questions and many more. From efforts at historical preservation in the Peoples Republic of China to the sexual abuse of children in New Zealand, and from earthquake research in Japan to network jihadi terrorism, The Global Enterprise includes research that will intrigue anyone interested in what social scientists contribute to our understanding of contemporary social trends and advances, both locally and globally. Key research is underway in social science around the world, and it is far past time that Western social scientists learned of and learned from these findings. A collection of poems that take on the aspects of "journals" includes "A Journal of English Days," "March Journal," "A Journal of the Year of the Ox," and "Chinese Journal" Publisher description The author of The Appalachian Book of the Dead presents a new collection of poems that resonate with humor, allure, and impatience in a world tormented by death and the dead. A new collection by a Pulitzer Prize-winning writer investigates the tenuous relationship between description and actuality while reaffirming humanity's attempt to capture the natural world and its residents. Because Charles Wright occupies a large space in contemporary American poetry, it is only natural that his readers over the years have wanted to engage him in conversation and discover more about his career and inspirations. In this collection of richly detailed interviews conducted between 1979 and 2006, Wright eloquently discusses a range of topics, including the beginning of his poetic career in Italy, his experiences at the University of Iowa, the American and European influences on his work, contemporary poets he admires, his place in Southern literature, the art of translating poetry, and such formal matters as his lineation and rhythmic phrasing, his use of syllabics, and the development of his characteristic style. An extensive bibliography of writings by and about Wright supplements the interviews. Paul Green and Richard Wright Adapted from the classic novel by Richard Wright Drama Characters: 15 male, 14 female (w/doubling) Multiple Sets The story of Bigger Thomas, a black youth seeking his identity in the white world. This adpatation was originally produced by Orson Welles and John Houseman. Winner of the Pfizer Award for Outstanding Book in the History of Science Margaret Rossiter's widely hailed Women Scientists in America: Struggles and Strategies to 1940 marked the beginning of a pioneering effort to interpret the history of American women scientists. That effort continues in this provocative sequel that covers the crucial years of World War II and beyond. Rossiter begins by showing how the acute labor shortage brought on by the war seemed to hold out new hope for women professionals, especially in the sciences. But the public posture of welcoming women into the scientific professions masked a deep-seated opposition to change. Rossiter proves that despite frustrating obstacles created by the patriarchal structure and values of universities, government, and industry, women scientists made genuine contributions to their fields, grew in professional stature, and laid the foundation for the breakthroughs that followed 1972. This work traces the evolution of a biblical figure whose legacy grew from that of a scribe who edited or wrote the Book of Jeremiah to a divine sage granted a tour of heaven itself. It charts the significance of a minor figure who gradually became a larger-than-life hero in the Jewish and Christian popular imagination. In addition to exploring biblical and postbiblical depictions, it also shows how the various portrayals reveal the leadership models and religious values of early Jewish and Christian communities. It suggests that these communities reinvented Baruch to meet the pressing issues of their day. The text examines the scribe as depicted in the Bible, noting his distinction as one of the few characters whose existence can be attested by archaeological evidence. A loyal friend of Jeremiah, Baruch is recorded to have received a mysterious oracle from God in the midst of Jerusalem's destruction by the Babylonians. The volume explores how beliefs about this message provided the postbiblical impetus for Baruch's transformation into an apocalyptic seer. The hardcover publication of this work resulted in a landmark case, Ellen Wright v. Warner Books Inc. and Margaret Walker. The court ruled in favor of Walker and Warner Books Inc. in a precedent setting opinion. The court's decision, as well as the opinion of the presiding judges is included in this volume. The 11thInternational Conference on Cyber Warfare and Security (ICCWS 2016) is being held at Boston University, Boston, USA on the 17-18th March 2016. The Conference Chair is Dr Tanya Zlateva and the Programme Chair is Professor Virginia Greiman, both from Boston University. ICCWS is a recognised Cyber Security event on the International research conferences calendar and provides a valuable platform for individuals to present their research findings, display their work in progress and discuss conceptual and empirical advances in the area of Cyber Warfare and Cyber Security. It provides an important opportunity for researchers and managers to come together with peers to share their experiences of using the varied and expanding range of Cyberwar and Cyber Security research available to them. The keynote speakers for the conference are Daryl Haegley from the Department of Defense (DoD), who will address the topic Control Systems Networks...What's in Your Building? and Neal Ziring from the National Security Agency who will be providing some insight to the issue of Is Security Achievable? A Practical Perspective. ICCWS received 125 abstract submissions this year. After the double blind, peer review process there are 43 Academic Research Papers 8 PhD papers Research papers, 7 Masters and 1 work-in-progress papers published in these Conference Proceedings. These papers represent work from around the world, including: Australia, Canada, China, Czech Republic, District of Columbia, Finland, France, Israel, Japan, Lebanon, Netherlands, Pakistan, Russian Federation, Saudi Arabia, South Africa, Turkey, United Arab Emirates, UK, USA. In a new anthology of poetry, the author of Chickamauga lyrically contemplates the themes of faith, religion, heritage, and morality. In The Poetry of James Wright the author traces Wright's formal evolution and concentrates on his consistent themes: the artist's role in society, the artist's search for poetic and personal identities, the power of poetry as fortification against the onslaughts of time, and the definition of a good and humane action. Charting the poet's evolution from his first book, The Green Wall, to the last collections, This Journey,

Elkins discusses one major book in each chapter, explicating the more important poems in detail and explaining how each volume is part of a progression from youthful imitator to mature innovator. Wright's individual struggle, taking place as it did in the last half of the 20th century in America, dramatizes the central problems of the creative individual in a late industrial society who is trying to turn a life into art. Wright worked in the great tradition of the adamant individualists in our literary heritage, and, like all of his formidable ancestors, he refused to trust the socialized self he found attached to his soul, refused to be diminished or circumscribed by any society's definition of himself. The effect of reading and studying his complete work is the recognition that Wright is a major 20th century American poet whose apparent simplicity and occasional sentimentality can obscure the complexity and maturity of his courageous confrontation with the problems of living and writhing in contemporary America. Gwendolyn Wright's *USA* is an engaging account of the evolution of American architecture, from the late nineteenth century to the twenty-first. Racine, Wisconsin, which celebrates its role as invention city, welcomed the architectural innovations of Frank Lloyd Wright and is now the site of many examples of Wright's designs of private homes and public structures. Hertzberg, photography director at the Racine Journal Times, has created a history of Wright's work in Racine using photographs. Throughout his career he remained a viable force in electoral politics at a time when the political fortunes of African Americans were sharply declining. Elected as alderman in Galveston in a predominantly white ward, he developed a political base chiefly composed of black male workers, specifically the longshoremen he helped to organize. Cuney held key positions within the state and national Republican organization and in 1889 was appointed by President Benjamin Harrison as the Collector of Customs at Galveston, the most important federal position held by a black Southerner. Frank Lloyd Wright (1867-1959) exercised a shaping influence on architectural history throughout the world as only very few other architects beside him have done. His structures - developed from landscape, program, material, and construction - are highly individual and independent of the stylistic developments of modern architecture. His constant attempts to invent new things gave rise to the idiosyncratic forms and constructions that are typical of his work. The author, Daniel Treiber, has produced a well-researched and thorough presentation that highlights the fundamental aspects of the American architect's work that are relevant from a contemporary perspective. He systematically investigates the forms, types, and strategies of Wright's oeuvre and accompanies his outstanding texts with a lavish offering of photographs and plans. Thanks to his many years of experience teaching design and architectural history at the cole d'architecture in Lille, France, and elsewhere, the author possesses a deep and comprehensive expert knowledge of his subject. Exiled from his life of power and privilege, Phaethon of Radamanthus House strives to recover his memory and position while embarking on a journey across the solar system in the company of humans and other life forms. Contains eighty-eight early poems selected from the American poet's first four books published between 1970 and 1977. Hendricks Chapel is one of Syracuse University's most recognizable landmarks and a beloved campus institution, standing both literally and figuratively at the heart of its campus. The chapel has been the site of some of the university's most significant events, from antiwar protests in the sixties to the vigil of nearly 3,000 people held on September 11, 2001. Its efforts to foster intellectual, cultural, and spiritual growth within the campus community have drawn distinguished speakers from all fields: the painter Grant Wood; poets Carl Sandberg and Robert Frost; novelists Paul Gallico and Ayn Rand; the arctic explorer Vilhjalmur Stefansson; politicians such as Franklin D. Roosevelt, Lyndon Johnson, and Hillary Clinton; and religious figures and social activists such as Paul Tillich, the Dalai Lama, Elie Wiesel, and James Baldwin; as well as scientists, economists, and other scholars. This book, with contributions from other deans and staff, traces the history and evolution of the chapel, from its construction in 1930 when it was dedicated to promoting the "moral and spiritual welfare of the generations of young men and women at Syracuse University," to its many current functions as an inclusive spiritual and social resource for the university and the community at large.
