Waveland Apr 01 2020 Sur la côte du golfe du Mississippi, Vaughn Williams, architecte sans emploi, s'efforce de parer à son désœuvrement : il regarde la télévision, surfe sur Internet et enseigne de temps à autre dans une université locale. Lorsque son ex-femme, rouée de coups par son petit ami, lui demande de venir s'installer chez elle avec sa compagne Greta, il accepte. S'ensuivent des complications rocambolesques au sein desquelles Frederick Barthelme distille réflexions philosophiques et politiques, entre autres digressions réjouissantes. Évoluant entre tristesse et drôlerie, les personnages de Barthelme s'efforcent de résoudre les problèmes qui les taraudent. Un an après le passage de l'ouragan Katrina, le paysage dévasté reflète parfaitement ces existences tranquillement déglinguées.

Gravitational Waves from Coalescing Binaries Mar 13 2021 This book is to help post-graduate students to get into gravitational wave astronomy. We assume the knowledge of General Relativity theory, though we will concentrate on the physics and often omit mathematically strict derivations. We provide references to already existing literature where possible, this helps us to see a broad picture, skipping the details. The uniqueness of this book is in that it covers three frequency bands and three major world-wide efforts to detect gravitational waves. The LIGO and Virgo scientific collaboration has detected first gravitational waves and the merger of black holes become now almost a routine. We do expect many discoveries yet to come, especially in the joined gravitational and electromagnetic observations. LISA, the space-based gravitational wave observatory, will be launched around 2034 and will be able to detect thousands of GW sources in the milli-Hz band. Pulsar timing array observations have accumulated 20-years' worth of data and we expected detection of GWs in the nano-Hz band within the next decade. We describe the gravitational wave sources and data analysis techniques in each frequency band.

Untangled May 07 2023 NEW YORK TIMES BESTSELLER • An award-winning guide to the sometimes erratic and confusing behavior of teenage girls that explains what's going on, prepares parents for what's to come, and lets them know when it's time to worry. Look for Under Pressure, the companion guide to coping with stress and anxiety among girls, available now. In this sane, highly engaging, and informed guide for parents of daughters, Dr. Damour draws on decades of experience and the latest research to reveal the seven distinct—and absolutely normal—developmental transitions that turn girls into grown-ups, including Parting with Childhood, Contending with Adult Authority, Entering the Romantic World, and Caring for Herself. Providing realistic scenarios and welcome advice on how to engage daughters in smart, constructive ways, *Untangled* gives parents a broad framework for

understanding their daughters while addressing their most common questions, including • My thirteen-year-old rolls her eyes when I try to talk to her, and only does it more when I get angry with her about it. How should I respond? • Do I tell my teen daughter that I'm checking her phone? • My daughter suffers from test anxiety. What can I do to help her? • Where's the line between healthy eating and having an eating disorder? • My teenage daughter wants to know why I'm against pot when it's legal in some states. What should I say? • My daughter's friend is cutting herself. Do I call the girl's mother to let her know? Perhaps most important, *Untangled* helps mothers and fathers understand, connect, and grow with their daughters. When parents know what makes their daughter tick, they can embrace and enjoy the challenge of raising a healthy, happy young woman. BOOKS FOR A BETTER LIFE AWARD WINNER "Finally, there's some good news for puzzled parents of adolescent girls, and psychologist Lisa Damour is the bearer of that happy news. [*Untangled*] is the most down-to-earth, readable parenting book I've come across in a long time."—The Washington Post "Anna Freud wrote in 1958, 'There are few situations in life which are more difficult to cope with than an adolescent son or daughter during the attempt to liberate themselves.' In the intervening decades, the transition doesn't appear to have gotten any easier which makes *Untangled* such a welcome new resource."—The Boston Globe **Summary of Lisa Damour's Untangled** Feb 04 2023 Please note: This is a companion version & not the original book. Sample Book Insights: #1 The first sign of adolescence is typically the sudden separation from parents that occurs at around age twelve. Girls start pulling away from their parents to begin their journey along one of the seven developmental strands of adolescence: parting with childhood. #2 When it comes to parting with childhood, girls have to get from point A, where they happily hold our hands and act like total goofballs in public, to point B, where they claim the independence and self-determination that come with being young women. #3 It can be extremely difficult to let go of your child, and many parents find that their relationship with them changes drastically during adolescence. #4 When your daughter begins to pull away from you, understand that she is doing it to practice being independent. She may not explain her feelings, but she will become increasingly annoying as a result.

Report on the Survey of the Historic Wreck Located Near the St. Marks Lighthouse Nov 08 2020 Florida State University's (FSU) BSC 4933 - Applications of Diving to Research class requires each student to plan, implement and run a small-scale research project or pilot study. This report is the result of such a project, approved under the auspices of a State of Florida 1A-32 Archaeological Research permit. Using students from the FSU Academic Diving Program (ADP) as well as BSC 4933 class members, a four-day mapping exercise on a local historic shipwreck was planned as a student project. The 20th century wreck of a supposed World War I subchaser was chosen for this survey. This vessel was later owned by the State of Florida, after its use during World War I, and is presently located near the St. Marks lighthouse in the St. Marks River channel The purpose of the research project was a preliminary assessment of the wreck, including mapping and photographic documentation. The shallow depth of the wreck, at a maximum of thirteen feet, allowed access from the support vessel anchored nearby. The wreck, with its relatively intact hull, was chosen as the site of investigation in order to conduct this small-scale archaeological survey. **Three Hundred Years of Gravitation** Apr 25 2022 A collection of reviews by prominent researchers in cosmology, relativity and particle physics commemorates the 300th anniversary of Newton's *Philosophiæ Naturalis Principia Mathematica*.

Parallel Implementation of the Kalman Filter for Noise and Blur Removal from Digital Images May 03 2020

Memoirs of Mr. Matthias D'Amour [By P. Rodgers] Dec 10 2020 This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of

America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

The Cosmology of Extra Dimensions and Varying Fundamental Constants

Oct 08 2020 The workshop on The Cosmology of Extra Dimensions and Varying Fundamental Constants, which was part of JENAM 2002, was held at the Physics Department of the University of Porto (FCUP) from the 3rd to the 5th of September 2002. It was regularly attended by about 110 participants, of which 65 were officially registered in the VFC workshop, while the others came from the rest of the JENAM workshops. There were also a few science correspondents from the national and international press. During the 3 days of the scientific programme, 8 Invited Reviews and 30 Oral Communications were presented. The speakers came from 11 different European countries, and also from Argentina, Australia, Canada, Japan and the U.S.A. There were also speakers from six Portuguese research institutions, and nine of the speakers were Ph.D. students. The contributions are presented in these proceedings in chronological order. The workshop brought together string theorists, particle physicists, theoretical and observational cosmologists, relativists and observational astrophysicists. It was generally agreed that this inter-disciplinarity was the greatest strength of the workshop, since it provided people coming into this very recent topic from the various different backgrounds with an opportunity to understand each other's language and thereby gain a more solid understanding of the overall picture.

Industrial Furnaces and Methods of Control Sep 30 2022

Memoirs of Mr. Matthias D'Amour May 27 2022

Critical Problems in Physics Mar 25 2022 The past century has seen fantastic advances in physics, from the discovery of the electron, x-rays, and radioactivity, to the era of incredible solid state devices, computers, quarks and leptons, and the standard model. But what of the next? Many scientists think we are on the threshold of an even more exciting new era in which breakthroughs in a startling variety of directions will produce significant changes in our understanding of the natural world. In this book, a group of eminent scientists define and elaborate on these new directions. Ed Witten and Frank Wilczek discuss string theory and the future of particle physics; Donald Perkins describes the search for neutrino oscillations; Alvin Tollestrup reveals dreams of a muon collider at Fermilab to probe the heart of "elementary" particles; and Robert Palmer anticipates a new generation of particle accelerators. Thibault Damour reviews classical gravitation and the relevant new high-precision experiments; Kip Thorne describes the exciting future for gravitational wave astronomy; and Paul Steinhardt examines the recent breakthroughs in observational cosmology and explains what future experiments might reveal. James Langer explores nonequilibrium statistics and relates it to the origins of complexity; Harry Swinney takes an experimentalist's view of the emergence of order in seemingly chaotic systems; and John Hopfield describes an extremely unusual dynamical system--the human brain. Bruce Hillman, M. D., discusses the recent developments in imaging techniques that have brought about outstanding advances in medical diagnostics. T.V. Ramakrishnan looks at high-temperature superconductors, which could eventually revolutionize the solid-state technology on which society is already highly dependent.

Plattsburgh City Directory For... Feb 09 2021

Americanah Jun 15 2021 "En descendant de l'avion à Lagos, j'ai eu l'impression d'avoir cessé d'être noire." Ifemelu quitte le Nigeria pour aller faire ses études à Philadelphie. Elle laisse derrière elle son grand amour, Obinze, éternel admirateur de l'Amérique, qui compte bien la rejoindre. Mais comment rester soi lorsqu'on change de pays, et lorsque la couleur de votre peau prend un sens et une importance que vous ne lui aviez jamais donnés ? De son ton irrévérencieux, Chimamanda Ngozi Adichie fait valser le politiquement correct et nous offre une grande histoire d'amour, parcourant trois continents d'un pas vif et puissant.

Summary: Under Pressure: Confronting the Epidemic of Stress and Anxiety in Girls Nov 20 2021

This book breaks down all the big ideas and pertinent facts in "Under Pressure" so they can be easily and quickly understood. There is also an Action Plan Bonus included that will help you implement the steps fast. Continue reading below to see all that

you get. PLEASE NOTE: This is an unofficial and independent summary & analysis of Under Pressure and is meant to be read as a supplement to Under Pressure. You can find the original book here:

<https://amzn.to/2UbpITa> Research studies confirm that anxiety has skyrocketed in girls since the turn of the century. Why is this? And how can their caregivers help these girls? Clinical psychologist Lisa Damour examines the science of stress and anxiety, then addresses the many aspects of girls' lives where stress hits them: the expectations they face at home, pressure at school, social anxiety among their friends, and on social media. Damour shows us the key steps we can take to protect our daughters from the toxic stress to which both the culture and also we, as parents, unwittingly subject them. Inside this book you can expect: *Time saving chapter summaries *Important facts recap for each chapter's summary *Our overall analysis of the subject book *Discussion questions to get you thinking *An action plan to get you started fast Download your copy today! (Please Note: This summary & analysis was published and written by Personal Growth Publishing. It is NOT affiliated with the original author in any way and it is NOT the original book. You can purchase the original book by visiting this link: <https://amzn.to/2UbpITa>) WARNING: This book has passed copyscape and is plagiarism free. Pillow Talk Aug 30 2022 Home decorating enthusiasts will adore this collection of 16 inspirational pillow embroidery projects, complete with a primer on machine embroidery for those new to sewing, and helpful tips and tricks from industry insiders. From whimsical flower throw pillows and quilted bolsters to ring-bearer cushions and cushy ottomans, these projects deftly illustrate how to combine basic techniques—zipper insertion, welt creation, bias cutting—with embroidery to create gorgeous accents for the home. An accompanying CD-ROM features the designs used in each project as well as bonus patterns.

A System of Mineralogy, Comprising the Most Recent Discoveries Oct 20 2021

Summary of Dr. Lisa Damour's Under Pressure Jan 03 2023 Please note: This is a companion version & not the original book. Sample Book Insights: #1 The field of psychology has a lot to say about how to alleviate stress and anxiety if they do reach toxic levels. And if you suspect that your daughter's uneasiness exceeds the healthy mark, you and your daughter do not need to feel helpless. We'll tackle unhealthy stress and anxiety together. #2 The stress of operating beyond your comfort zone helps you grow. As parents, we should help our daughters understand that stress is a positive and growth-giving part of life, except when it isn't. #3 Stress becomes unhealthy when it exceeds what a person can absorb or benefit from. It is not always easy to prevent calamities, but we can often summon reserves to help our daughter manage the challenges life puts in her path. #4 There are three types of stress: life events, daily hassles, and chronic stress. Any life event that requires adaptation is inherently stressful. Daily hassles are the result of a major stressor, and they can be difficult to deal with.

Einstein, 1905-2005 Aug 18 2021 This book is the fourth in a series of lectures of the Séminaire Poincaré, which is directed towards a large audience of physicists and of mathematicians. The goal of this seminar is to provide up-to-date information about general topics of great interest in physics. Both the theoretical and experimental aspects are covered, with some historical background. Inspired by the Bourbaki seminar in mathematics in its organization, hence nicknamed "Bourbaphi", the Poincaré Seminar is held twice a year at the Institut Henri Poincaré in Paris, with contributions prepared in advance. Particular care is devoted to the pedagogical nature of the presentations so as to fulfill the goal of being readable by a large audience of scientists. This volume contains the seventh such Seminar, held in 2005. It is devoted to Einstein's 1905 papers and their legacy. After a presentation of Einstein's epistemological approach to physics, and the genesis of special relativity, a century perspective is offered. The geometry of relativistic spacetime is explained in detail. Single photon experiments are presented, as a spectacular realization of Einstein's light quanta hypothesis. A previously unpublished lecture by Einstein, which presents an illuminating point of view on statistical physics in 1910, at the dawn of quantum mechanics, is reproduced. The volume ends with an essay on the historical, physical and mathematical aspects of Brownian motion. We hope that the publication of this series will serve the community of physicists and mathematicians at the graduate student or professional level.

101 Tips and Hints for Your Boat Dec 30 2019

Model based estimation of image depth and displacement Aug 06 2020

Einstein, 1905-2005 Jul 17 2021 This book is the fourth in a series of lectures of the Séminaire Poincaré, which is directed towards a large audience of physicists and of mathematicians. The goal of this seminar is to provide up-to-date information about general topics of great interest in physics. Both the theoretical and experimental aspects are covered, with some historical background. Inspired by the Bourbaki seminar in mathematics in its organization, hence nicknamed "Bourbaphi", the Poincaré Seminar is held twice a year at the Institut Henri Poincaré in Paris, with contributions prepared in advance. Particular care is devoted to the pedagogical nature of the presentations so as to fulfill the goal of being readable by a large audience of scientists. This volume contains the seventh such Seminar, held in 2005. It is devoted to Einstein's 1905 papers and their legacy. After a presentation of Einstein's epistemological approach to physics, and the genesis of special relativity, a binary perspective is offered. The geometry of relativistic spacetime is explained in detail. Single photon experiments are presented, as a spectacular realization of Einstein's light quanta hypothesis. A previously unpublished lecture by Einstein, which presents an illuminating point of view on statistical physics in 1910, at the dawn of quantum mechanics, is reproduced. The volume ends with an essay on the historical, physical and mathematical aspects of Brownian motion. We hope that the publication of this series will serve the community of physicists and mathematicians at the graduate student or professional level.

Symmetries in Nature Apr 13 2021 Reflecting the oeuvre of "a man of two cultures: the culture of pure mathematics and the culture of theoretical physics" (in the words of his long time friend and co-author, Kameshwar Wali), this volume is centred around the notion of symmetry and its breaking. Starting with particle physics, the content proceeds to symmetries of matter, defects, and crystals. The mathematics of group extensions, non-linear group action, critical orbits and phase transitions is developed along the way. The symmetry principles and general mathematical tools provide unity in the treatment of different topics. The papers and lecture notes are preceded by a lively biography of Louis Michel and a commentary that relates his selected works both to the physics of his time and to contemporary trends. This book should be of interest to theoretical physicists, chemists, applied mathematicians and historians of science, and is accessible to graduate (and advanced undergraduate) students.

The Emotional Lives of Teenagers Dec 02 2022 NEW YORK TIMES BESTSELLER • An urgently needed guide to help parents understand their teenagers' intense and often fraught emotional lives—and how to support them through this critical developmental stage—from the New York Times bestselling author of *Untangled* and *Under Pressure* In teenagers, powerful emotions come with the territory. And with so many of today's teens contending with academic pressure, social media stress, worries about the future, and concerns about their own mental health, it's easy for them—and their parents—to feel anxious and overwhelmed. But it doesn't have to be that way. Parents who read this book will learn: • what to expect in the normal course of adolescent emotional development and when it's time to worry • why teens (and adults) need to understand that mental health isn't about "feeling good" but about having feelings that fit the moment, even if those feelings are unwanted or painful • strategies for supporting teens who feel at the mercy of their emotions so they can become psychologically aware and skilled at managing their feelings • how to approach common challenges that come with adolescence, such as friction at home, spiking anxiety, risky behavior, navigating friendships and romances, the pull of social media, and many more • the best ways to stay connected to their teens and how to provide the kind of relationship that adolescents need and want With clear, research-informed explanations alongside illuminating, real-life examples, *The Emotional Lives of Teenagers* gives parents the concrete, practical information they need to steady their teens through the bumpy yet transformational journey into adulthood.

Got Quilts? Nov 01 2022 Step-by-step instructions on projects you can make for your home, using unfinished quilts and leftover orphan quilt blocks. Projects include a headboard cover, bedskirt, pillows, draperies, window shades, and a tablecloth.

Under Pressure Mar 05 2023 NEW YORK TIMES BESTSELLER • An urgently needed guide to the alarming increase in anxiety and stress experienced by girls from elementary school through college, from the author of *Untangled* "An invaluable read for anyone who has girls, works with girls, or cares about girls—for everyone!"—Claire Shipman, author of *The Confidence Code* and *The Confidence Code for Girls* Though anxiety has risen among young people overall, studies confirm that it has

skyrocketed in girls. Research finds that the number of girls who said that they often felt nervous, worried, or fearful jumped 55 percent from 2009 to 2014, while the comparable number for adolescent boys has remained unchanged. As a clinical psychologist who specializes in working with girls, Lisa Damour, Ph.D., has witnessed this rising tide of stress and anxiety in her own research, in private practice, and in the all-girls' school where she consults. She knew this had to be the topic of her new book. In the engaging, anecdotal style and reassuring tone that won over thousands of readers of her first book, *Untangled*, Damour starts by addressing the facts about psychological pressure. She explains the surprising and underappreciated value of stress and anxiety: that stress can helpfully stretch us beyond our comfort zones, and anxiety can play a key role in keeping girls safe. When we emphasize the benefits of stress and anxiety, we can help our daughters take them in stride. But no parents want their daughter to suffer from emotional overload, so Damour then turns to the many facets of girls' lives where tension takes hold: their interactions at home, pressures at school, social anxiety among other girls and among boys, and their lives online. As readers move through the layers of girls' lives, they'll learn about the critical steps that adults can take to shield their daughters from the toxic pressures to which our culture—including we, as parents—subjects girls. Readers who know Damour from *Untangled* or the *New York Times*, or from her regular appearances on CBS News, will be drawn to this important new contribution to understanding and supporting today's girls. Praise for *Under Pressure* "Truly a must-read for parents, teachers, coaches, and mentors wanting to help girls along the path to adulthood."—Julie Lythcott-Haims, *New York Times* bestselling author of *How to Raise an Adult*

Decoding Boys Jan 29 2020 "If you're raising a boy, you need this brilliant book. It is clear, wise, and eye-opening." —Lisa Damour, Ph.D., author of *Untangled* When boys enter puberty, they tend to get quiet—or at least quieter than before—and parents often misread their signals. Here's how to navigate their retreat and steer them through this confusing passage, by the bestselling author of *The Care and Keeping of You* series and *Guy Stuff: The Body Book for Boys*. What is my son doing behind his constantly closed door? What's with his curt responses, impulsiveness, newfound obsession with gaming, and . . . that funky smell? As pediatrician and mother of two teenagers Cara Natterson explains, puberty starts in boys long before any visible signs appear, and that causes confusion about their changing temperaments for boys and parents alike. Often, they also grow quieter as they grow taller, which leads to less parent-child communication. But, as Natterson warns in *Decoding Boys*, we respect their increasing "need" for privacy, monosyllabic conversations, and alone time at their peril. Explaining how modern culture mixes badly with male adolescent biology, Natterson offers science, strategies, scripts, and tips for getting it right: • recognizing the first signs of puberty and talking to our sons about the wide range of "normal" through the whole developmental process • why teenagers make irrational decisions even though they look mature—and how to steer them toward better choices • managing video game and screen time, including discussing the unrealistic and dangerous nature of pornography • why boys need emotional and physical contact with parents—and how to give it in ways they'll accept • how to prepare boys to resist both old and new social pressures—drugs, alcohol, vaping, and sexting • teaching consent and sensitivity in the #MeToo culture *Decoding Boys* is a powerful and validating lifeline, a book that will help today's parents keep their sons safe, healthy, and resilient, as well as ensure they will become emotionally secure young men. Praise for *Decoding Boys* "Comforting . . . a common-sensical and gently humorous exploration of male puberty's many trials."—Kirkus Reviews

A system of mineralogy Sep 18 2021

Kennedy Jun 27 2022 « Le vrai politique, c'est celui qui sait garder son idéal tout en perdant ses illusions. » 4 juin 1968, Los Angeles. La primaire du Parti Démocrate vient de s'achever. Alors qu'il attend les résultats du scrutin de Californie, Robert F. Kennedy, sénateur américain, s'entretient avec un journaliste pour parler de la dynastie Kennedy, et plus particulièrement du destin de son frère, le président John Fitzgerald Kennedy, brutalement assassiné en 1963 à Dallas. Par sa jeunesse, son charisme, les moments de l'Histoire qu'il a su incarner et sa fin tragique, JFK fait partie des leaders politiques qui sont entrés dans la légende. Construit en flashes-back successifs, cet album retrace tous les grands épisodes de sa carrière politique, dévoilant la façon dont il a révolutionné l'utilisation de l'image présidentielle (omniprésence dans les médias), mais également son apport à la politique intérieure (lutte contre la ségrégation raciale, la pauvreté...) et extérieure (crises de

Cuba, discours de Berlin) de son pays.

Untangled Apr 06 2023 NEW YORK TIMES BESTSELLER • An award-winning guide to the sometimes erratic and confusing behavior of teenage girls that explains what's going on, prepares parents for what's to come, and lets them know when it's time to worry. Théâtre D'amour Jul 05 2020 This volume of late 16th and early 17th century love emblems—including mythological, allegorical, and even erotic prints—was amassed around 1620 by an unknown lover. These 143 folios are reproduced in their original size (25.3 x 18.5 cm), and are joined by an Introduction and accompanying descriptions by the author. *Shibumi* Sep 06 2020 Nicholaï Hel est l'assassin le plus doué de son époque et l'homme le plus recherché du monde. Son secret réside dans sa détermination à atteindre une forme rare d'excellence personnelle : le shibumi. Après avoir été élevé dans le Japon de l'après-guerre et initié à l'art subtil du Go, il est désormais retiré dans sa forteresse du Pays basque. Il se retrouve alors traqué par une organisation internationale de terreur et d'anéantissement - la Mother Company - et doit se préparer à un ultime affrontement. *Shibumi*, le chef-d'œuvre de Trevanian, est un formidable roman d'espionnage et une critique acerbe de l'Amérique. Avec, toujours, l'intelligence et l'humour noir qui sont la marque de fabrique de cet auteur exceptionnel.

Hold Everything! Jun 03 2020 Sewing projects you can make to hold everything from your glasses to computer to concealed weapons to a sewing machine!

The Confidence Code for Girls Jan 23 2022 New York Times, USA Today, and Wall Street Journal Bestseller! Girls can rule the world—all they need is confidence. This empowering, entertaining guide from the bestselling authors of *The Confidence Code* gives girls the essential yet elusive code to becoming bold, brave, and fearless. Packed with graphic

novel strips; appealing illustrations; fun lists, quizzes, and challenges; and true stories from tons of real girls, *The Confidence Code for Girls* teaches girls to embrace risk, deal with failure, and be their most authentic selves. It's a paradox familiar to parents everywhere: girls are achieving like never before, yet they're consumed with doubt on the inside. Girls worry constantly about how they look, what people think, whether to try out for a sports team or school play, why they aren't getting "perfect" grades, and how many likes and followers they have online. Katty Kay and Claire Shipman use cutting-edge science and research, as well as proven methods of behavioral change, to reach girls just when they need it the most—the tween and teen years. Plus don't miss *Living the Confidence Code*! Packed with photos, graphic novel strips, and engaging interviews, *Living the Confidence Code* proves that no matter who you are, or how old you are, nothing is out of reach when you decide to try.
