Sovereignty and the Law Aug 01 2020 The topic of sovereignty is contentious, and one of enduring interest. In a world of ever increasing economic globalisation, the rise of supranational regulation and the interconnected age of information and communication technology, among many other developments, have challenged the once exclusively held Westphalian model of sovereignty. The distinction between the internal aspect of sovereignty as expressed in terms of ultimate authority in a constitution, and the external aspect involving the relationship between sovereign states has been blurred. This has given rise to contemporary debates that explore the theoretical and practical implications of current challenges to established doctrines.

Evidently no book could encompass the entirety of the contemporary debates on sovereignty. This is a book of essays focusing on sovereignty by a team of leading writers contributing domestic, European and international perspectives. The essays have been written at a time of very great testing of the institutional frameworks at every level: domestic, European, international or global. The book illuminates the enduring strength of sovereignty as a foundational concept and the continuing widespread appeal of sovereignty as an idea.

Comparing Post War Japanese and Finnish Economies and Societies Jun 10 2021 This book compares two countries with striking parallels in economic and political outcomes, yet with some distinct features in terms of institutional structures, relative size, and culture. Therefore, this book forms a fruitful platform for the study of the similarities and differences in the economic and societal development of Japan and Finland. Despite their geographic distance from one another and the aforementioned differences, both countries experienced rather similar economic and societal development patterns after the Second World War. The study of

these societies both individually and through commonalities will provide a unique perspective on the emergence of modern economies and institutions. The book provides comprehensive coverage on issues such as welfare state formation and society, security and military spending, education system, industrial development, international trade, governmental economic policies, energy solutions, and bubbles and their collapse; thus, issues typical for these countries, as well as most modern states, studied from a longitudinal perspective. The book aims to answer a fundamental question in social science: Why do there seem to be common trends and developmental paths among countries differing in size, culture, and economic structure? This book will provide insights for those seeking to decipher how the developments in their own countries came about and where they may be headed to.

Information Security and Privacy Dec 25 2019 This book constitutes the refereed proceedings of the 17th Australasian Conference on Information Security and Privacy, ACISP 2012, held in Wollongong, Australia, in July 2012. The 30 revised full papers presented together with 5 short papers were carefully reviewed and selected from 89 submissions. The papers are organized in topical sections on fundamentals; cryptanalysis; message authentication codes and hash functions; public key cryptography; digital signatures; identity-based and attribute-based cryptography; lattice-based cryptography; lightweight cryptography.

Advances in Global Optimization Mar 27 2020 This proceedings

volume addresses advances in global optimization—a multidisciplinary research field that deals with the analysis, characterization and computation of global minima and/or maxima of nonlinear, non-convex and nonsmooth functions in continuous or discrete forms. The volume contains selected papers from the third biannual World Congress on Global Optimization in Engineering & Science (WCGO), held in the Yellow Mountains, Anhui, China on July 8-12, 2013. The papers fall into eight topical sections: mathematical programming; combinatorial optimization; duality theory; topology optimization; variational inequalities and complementarity problems; numerical optimization; stochastic models and simulation and complex simulation and supply chain analysis.

Global Shock, Risks, and Asian Financial Reform Jan 24 2020

The growth of financial markets has clearly outpaced the development of financial market regulations. With growing complexity in the world of finance, and the resultant higher frequency of financial crises, all eyes have shifted toward the current inad

Protean Supply Chains Oct 15 2021 Features emerging trends that are shaping supply chain operations worldwide as well as impacting the global business landscape Beginning with the assertion that supply chains are an overlooked factor behind anemic economic growth, *Protean Supply Chains: Ten Dynamics of Supply and Demand Alignment* provides a comprehensive overview of the developments occurring in the field of supply chain management. A broad range of topics in facility location, inventory, strategic sourcing, and supply chain coordination are addressed in addition to coverage of major developments within the field. The author's main position is that supply chains must be more than agile or flexible; rather, they must become protean and capable of changing shape in response to a volatile global business landscape. The author, a well-known editor and researcher in the field, presents current real-world examples combined with insights into the impact of recent trends that are expected to affect the global business landscape over the next decade. Highlighting companies with leading-edge supply chains as examples, the book discusses methods to reduce spending, increase revenues, and achieve streamlined productivity in a changing economic climate. The book utilizes further examples from the growth of online retailing and automation in distribution centers, as well as the use of protean supply chains to gain competitive advantages internationally. In addition, the book features the following ten emerging trends, which are shaping supply chain operations worldwide: The rise of regional theaters of supply Global risk management through control towers Customer segmentation Real demand realization Demand swing alignment with production and distribution Omnichannel retailing challenges Customer of one service Sustainability challenges Collaboration vs. competition in the new economy Financial dynamism The book is an ideal reference for professionals and practitioners in operations research, business/management science, applied mathematics, and industrial engineering as well as an appropriate supplement for

undergraduate and graduate-level courses in supply chain management.

Paper Oct 27 2022

The Politics of the Death Penalty in Countries in Transition Jan 18 2022 The increase in the number of countries that have abolished the death penalty since the end of the Second World War shows a steady trend towards worldwide abolition of capital punishment. This book focuses on the political and legal issues raised by the death penalty in "countries in transition", understood as countries that have transitioned or are transitioning from conflict to peace, or from authoritarianism to democracy. In such countries, the politics that surround retaining or abolishing the death penalty are embedded in complex state-building processes. In this context, Madoka Futamura and Nadia Bernaz bring together the work of leading researchers of international law, human rights, transitional justice, and international politics in order to explore the social, political and legal factors that shape decisions on the death penalty, whether this leads to its abolition, reinstatement or perpetuation. Covering a diverse range of transitional processes in Asia, Africa, Latin America, Europe, and the Middle East, *The Politics of the Death Penalty in Countries in Transition* offers a broad evaluation of countries whose death penalty policies have rarely been studied. The book would be useful to human rights researchers and international lawyers, in demonstrating how transition and transformation, 'provide the catalyst for several of interrelated developments of which one is the reduction and elimination of capital punishment'.

The 2012 Forest Report Dec 17 2021

The Business of Social and Environmental Innovation Apr 28 2020 In the face of limited progress toward meeting Millennium Development Goals or addressing climate change and resource degradation, increasing attention turns to harnessing the

entrepreneurial, innovative, managerial and financial capacities of business for improved social and environmental outcomes. A more proactive role for business in sustainable development is especially pertinent in sub-Saharan Africa, which has been plagued by conflict and poverty but shows signs of a brighter future as the world's second-fastest-growing region. The book considers how the socio-economic context influences the objectives of social innovation and even our definition of what we mean by social innovation. Secondly, the book aims to show how social innovation initiatives emerge and fare in context of the limited ability of many African countries to provide public goods and services.

NTSE ULTIMATE Resource Guide for Stage 1 (9 State 2012 Papers + 2 Mock Papers) Apr 01 2023 NTSE ULTIMATE Resource Guide for Stage 1 (9 State 2012 Papers + 2 Mock Papers) provides **FULLY SOLVED PAPERS** of NTSE STAGE 1 of 9 states - Delhi, Andhra Pradesh, Karnataka, Madhya Pradesh, Orissa, Punjab, West Bengal, Rajasthan, Maharashtra. The book is written exclusively for the STSE (Stage 1), State Talent Search Exam which is conducted by the various SCERT's. The book also provides 2 **MOCK TESTS** - separate papers for MAT and SAT - designed exactly on the pattern of the latest NTSE Stage 1 (State Exams) Exam. The Scholastic Aptitude Test (SAT) contains questions from Physics, Chemistry, Biology, Mathematics, History, Geography, Economics and Civics. The solution to each Mock Test is provided at the end of the book. The book will prove to be a **TOP QUALITY MATERIAL** to give finishing touches to the preparation for the **FIRST** stage exam.

Writing Science Dec 05 2020 This book takes an integrated
approach, using the principles of story structure to discuss every
aspect of successful science writing, from the overall structure of a
paper or proposal to individual sections, paragraphs, sentences, and
words. It begins by building core arguments, analyzing why some
stories are engaging and memorable while others are quickly
forgotten, and proceeds to the elements of story structure, showing
how the structures scientists and researchers use in papers and
proposals fit into classical models. The book targets the internal
structure of a paper, explaining how to write clear and professional
sections, paragraphs, and sentences in a way that is clear and
compelling.

The Internet is the most vital scientific, technical, economic and
societal set of infrastructures in existence and in operation today

serving 2.5 billion users. Continuing its developments would secure much of the upcoming innovation and prosperity and it would underpin the sustainable growth in economic values and volumes needed in the future. Future Internet infrastructures research is therefore a must. The Future Internet Assembly (FIA) is a successful conference that brings together participants of over 150 research projects from several distinct yet interrelated areas in the European Union Framework Programme 7 (FP7). The research projects are grouped as follows: the network of the future as infrastructure connecting and orchestrating the future Internet of people, computers, devices, content, clouds and things; cloud computing, Internet of Services and advanced software engineering; the public-private partnership projects on Future Internet; Future Internet Research and Experimentation (FIRE). The 26 full papers included in this volume were selected from 45 submissions. They are organized in topical sections named: software driven networks, virtualization, programmability and autonomic management; computing and networking clouds; internet of things; and enabling technologies and economic incentives.

Advances in Computer Entertainment Jun 30 2020 This book constitutes the refereed conference proceedings of the 9th International Conference on Advances in Computer Entertainment, ACE 2012, held in Kathmandu, Nepal, in November 2012. The 10 full paper and 19 short papers presented together with 5 papers from the special track Arts and Culture and 35 extended abstracts were carefully reviewed and selected from a total of 140 submissions in all categories. The papers cover topics across a wide spectrum of disciplines including computer science, design, arts, sociology, anthropology, psychology, and marketing. Focusing on all areas related to interactive entertainment they aim at stimulating discussion in the development of new and compelling entertainment computing and interactive art concepts and applications.

The Global Competitiveness of Regions Jul 24 2022 The aim of this book is to consider theoretically the notion of the global competitiveness of regions, as well as giving attention as to how such competitiveness may be empirically measured. With this in mind, the book has three specific objectives: first, to place the concept of regional competitiveness within the context of regional economic development theory; second, to present a rationale and method for quantifying the global competitiveness of regions; and, third, to undertake the most geographically widespread analysis of regional competitiveness differences across the globe. With regard to the third goal, the analysis incorporates more than 500 regions across Europe, North and South America, Asia-Pacific, the Middle East, and the so-called BRIC economies of Brazil, Russia, India, and

China. The importance of the concept of competitiveness has increased rapidly in recent years, with the issues surrounding it becoming, at the same time, more empirically refined and theoretically complex. The focus on regions reflects the growing consensus that they are the primary spatial units that compete to attract investment, and it is at the regional level that knowledge is circulated and transferred, resulting in agglomerations, or clusters, of industrial and service sector enterprises. This growing acknowledgement of the region's role as a key spatial unit of organisation has led to attention turning to competitiveness at a more regional level. The book explores the results of the World Competitiveness Index of Regions (WCIR), covering the rankings and results of the 2014 edition. The WCIR provides a tool for analysing the development of a range of regional economies across the globe. It enables an illustration of the changing patterns of regional competitiveness on the international stage to be generated. In fundamental terms, the WCIR aims to produce an integrated and overall benchmark of the knowledge capacity, capability, and sustainability of each region, and the extent to which this knowledge is translated into economic value and transferred into the wealth of the citizens of each region.

Advances in Intelligent Systems Jun 22 2022 2012 International Conference on Environment Science and 2012 International Conference on Computer Science (ICES 2012/ICCS 2012) will be held in Australia, Melbourne, 15-16 March, 2012. Volume 2 contains some topics in intelligent system. There are 51 papers were selected as the regular paper in this volume. It contains the latest developments and reflects the experience of many researchers working in different environments (universities, research centers or even industries), publishing new theories and solving new technological problems. The purpose of volume 2 is interconnection of diverse scientific fields, the cultivation of every possible scientific collaboration, the exchange of views and the promotion of

new research targets as well as the further dissemination, the diffusion of intelligent system, including but not limited to Intelligent System, Neural networks, Machine Learning, Multimedia System and Applications, Speech Processing, Image & video Signal Processing and Computer-Aided Network Design the dispersion. We are sure that the efforts of the authors as well as the reviewers to provide high level contributions will be appreciated by the relevant scientific community. We are convinced that presented volume will be a source of knowledge and inspiration for all academic members, researchers and practitioners working in a field of the topic covered by the book.

Applied Computational Aerodynamics Feb 04 2021 This book covers the application of computational fluid dynamics from low-speed to high-speed flows, especially for use in aerospace applications.
