Consumers Index to Product Evaluations and Information Sources
Jun 02 2020 A Practical Guide to Assay Development and High-Throughput Screening in Drug Discovery
Jan 28 2020 The development of suitable assays, the integration of appropriate technology, and the effective management of the essential infrastructure are all critical to the success of any high-throughput screening (HTS) endeavor. However, few scientists have the multidisciplinary experience needed to control all aspects of an HTS drug discovery project. A P
Popular Science Aug 05 2020 Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Ceiling of Sticks Feb 08 2021 Winner of the Prairie Schooner Book Prize in Poetry, Shane Book's collection, Ceiling of Sticks, is a powerful and unflinching sort of documentary poetics. It bears elegiac witness to the effects of global politics on individual lives. Book's poems carry us to Uganda, Ghana, Mali, Trinidad, and Canada's west coast; from a religious sacrifice in Tarahumara, Mexico, to Book's ailing grandfather's bedside. They bring an intimate vision of

humanity to scenes of inhuman atrocity and suffering; a moment of clarity and empathy to individuals overwhelmed by war or other man-made catastrophes. The attentiveness of the poems and meditative lyrics reveal a careful allegiance to their subjects and a fearless refusal to turn away. Filled with experiences of Africa and Latin America, California and the Caribbean, family and lost love, these poems resonate with the intensity of truth as it is lived and written.

Field-Programmable Logic and Applications. From FPGAs to Computing Paradigm Feb 03 2023 This book constitutes the refereed proceedings of the 8th International Workshop on Field-Programmable Logics and Applications, FPL '98, held in Tallinn, Estonia, in August/September 1998. The 39 revised full papers presented were carefully selected for inclusion in the book from a total of 86 submissions. Also included are 30 refereed high-quality posters. The papers are organized in topical sections on design methods, general aspects, prototyping and simulation, development methods, accelerators, system architectures, hardware/software codesign, system development, algorithms on FPGAs, and applications.

UNIMARC Manual Dec 01 2022 The third edition succeeds the fifth update of second edition. One of the main features has been the adoption of new and revised international standards, notably the International Standard Identifier for Libraries and Related Organizations, the ISBN 13 and the linking ISSN. New fields have been added for recording the Persistent Record Identifier. Uniform Conventional Headings for Legal and Religious texts are now catered for with separate fields. A number of fields have been revised: archival materials, manuscripts and documentation produced by the ISSN International Centre.

The Digital Video Manual Dec 29 2019 With many colour images and easily comprehensible diagrams, The Digital Video Manual provides an essential port of call for anyone looking to make their first video, or take their production to a new level of expertise.

Simulation of Semiconductor Processes and Devices 2004 Sep 17 2021 This volume contains the proceedings of the 10th edition of the International Conference on Simulation of Semiconductor Processes and Devices (SISPAD

2004), held in Munich, Germany, on September 2-4, 2004. The conference program included 7 invited plenary lectures and 82 contributed papers for oral or poster presentation, which were carefully selected out of a total of 151 abstracts submitted from 14 countries around the world. Like the previous meetings, SISPAD 2004 provided a world-wide forum for the presentation and discussion of recent advances and developments in the theoretical description, physical modeling and numerical simulation and analysis of semiconductor fabrication processes, device operation and system performance. The variety of topics covered by the conference contributions reflects the physical effects and technological problems encountered in consequence of the progressively shrinking device dimensions and the ever-growing complexity in device technology.

Integrated Circuit Design: Power and Timing Modeling, Optimization and Simulation Apr 05 2023 This book constitutes the refereed proceedings of the 10th International Workshop on Power and Timing Modeling, Optimization and Simulation, PATMOS 2000, held in Göttingen, Germany in September 2000. The 33 revised full papers presented were carefully reviewed and selected for inclusion in the book. The papers are organized in sections on RTL power modeling, power estimation and optimization, system-level design, transistor level design, asynchronous circuit design, power efficient technologies, design of multimedia processing applications, adiabatic design and arithmetic modules, and analog-digital circuit modeling.
