Trading Is Flow Business Sep 09 2021 *Scalping Is Fun! Part 4: Trading Is Flow Business*

Trading profits are not equal on the 20 trading days of each month as a regular office job probably would. Experience shows that the results are asymmetrical in occurrence. There are days where it runs like clockwork and days on which trading seems to produce only losses. In this fourth installment of the series "Scalping Is Fun!" The Heikin Ashi Trader looks at the right time to trade. Successful traders know in specifics when not to trade. They focus on the times when market conditions are optimal for them. In order of events, the fun turns by itself, then the success follows suit. In this state of "flow" discipline, this is easy to achieve. Fast scalping promotes the rapid close of loss positions and the quick takeaway from accrued profits, also of equal importance. Index 1. Only Trade When it's Fun 2. When Not to Trade 3. Scalping is the fastest way to make money in the stock market. There is hardly a more effective method for increasing a trader's capital. The Heikin Ashi Trader explains why this is so in this four-part series about scalping. In this third book, the Heikin Ashi trader answers the question of how the trading results of a scalper are analyzed and correctly evaluated. Based on the weekly results of a single trader, he examines what factors matter to having long-term success in the stock market. The analysis of the trading journal for 12 weeks allows an inside look at the learning curve of a budding professional. This highly effective scalping strategy applies to short time frames, such as the 1-minute chart, as well as longer periods. You can trade, using this universal method, in equity indices and in the currency markets. Typical instruments are futures, foreign exchange, and CFDs. Content: 1. The Trading Journal as a weapon 2. Scalping is a Business *Making Democracy Fun* Feb 20 2020 Drawing on the tools of game design to fix democracy. Anyone who has ever been to a public hearing or community meeting would agree that participatory democracy can be boring. Hours of repetitive presentations, alternately alarmist or complacent, for or against, accompanied by constant heckling, often with

no clear outcome or decision. Is this the best democracy can offer? In *Making Democracy Fun*, Josh Lerner offers a novel solution for the sad state of our deliberative democracy: the power of good game design. What if public meetings featured competition and collaboration (such as team challenges), clear rules (presented and modeled in multiple ways), measurable progress (such as scores and levels), and engaging sounds and visuals? These game mechanics would make meetings more effective and more enjoyable—even fun. Lerner reports that institutions as diverse as the United Nations, the U.S. Army, and grassroots community groups are already using games and game-like processes to encourage participation. Drawing on more than a decade of practical experience and extensive research, he explains how games have been integrated into a variety of public programs in North and South America. He offers rich stories of game techniques in action, in children's councils, social service programs, and participatory budgeting and planning. With these real-world examples in mind, Lerner describes five kinds of games and twenty-six game mechanics that are especially relevant for democracy. He finds that when governments and organizations use games and design their programs to be more like games, public participation becomes more attractive, effective, and transparent. Game design can make democracy fun—and make it

work.
