What are the implications of the WTO's Agreement on Agriculture for food security in poor countries? Are economic reforms and high growth rates in some countries protecting the well-being of the poor by improving the status of nutrition? Are we measuring hunger adequately? Do we need new tools and indicators? Does women's socio-economic status matter for child-health? Are targeted programmes successful in identifying and helping the truly needy? Despite the scale of human suffering inflicted by malnutrition, the fight against world hunger

has recently been overshadowed by the campaign to end poverty. The emergence of the WTO and the freeing of agricultural trade, for example, have serious implications for hunger and food security in many countries, yet this is an area that is relatively understudied. This book aims to fill this gap by providing a significant collection of essays from mainstream academia and prominent international organizations working for food security. Examining food security across regions, the book tackles food security at three distinct levels—national, household, and individual. Other topics included are: attempts to improve measurement tools; the applications of existing tools for empirical analysis using household data, and; the impact of trade openness on national food security. This is the first English translation of Benedetto Cotrugli's *The Book of the Art of Trade*, a lively account of the life of a Mediterranean merchant in the Early Renaissance, written in 1458. The book is an impassioned defense of the legitimacy of mercantile practices, and includes the first scholarly mention of double-entry bookkeeping. Its four parts focus respectively on trading techniques, from accounting to insurance, the religion of the merchant, his public life, and family matters. Originally handwritten, the book was printed in 1573 in Venice in an abridged and revised version. This new translation makes reference to the new critical edition, based on an earlier manuscript that has only recently been discovered. With scholarly essays placing Cotrugli's work into historical context and highlighting key themes, this volume is an important contribution to our understanding of the origins of management and trade practices. The balancing of competing interests and goals will have momentous consequences for Japan—and the United States—in their quest for economic growth, social harmony, and international clout. Japan and the United States face difficult choices in charting their paths ahead as trading nations. Tokyo has long aimed for greater decisiveness, which would allow it to move away from a fragmented policymaking system favoring the status quo in order to enable meaningful internal reforms and acquire a larger voice in trade negotiations. And Washington confronts an uphill battle in rebuilding a fraying domestic consensus in favor of internationalism essential to sustain its leadership role as a

champion of free trade. In *Dilemmas of a Trading Nation*, Mireya Solís describes how accomplishing these tasks will require the skillful navigation of vexing tradeoffs that emerge from pursuing desirable, but to some extent contradictory goals: economic competitiveness, social legitimacy, and political viability. Trade policy has catapulted front and center to the national conversations taking place in each country about their desired future direction—economic renewal, a relaunched social compact, and projected international influence. *Dilemmas of a Trading Nation* underscores the global consequences of these defining trade dilemmas for Japan and the United States: decisiveness, reform, internationalism. At stake is the ability of these leading economies to upgrade international economic rules and create incentives for emerging economies to converge toward these higher standards. At play is the reaffirmation of a rules-based international order that has been a source of postwar stability, the deepening of a bilateral alliance at the core of America's diplomacy in Asia, and the ability to reassure friends and rivals of the staying power of the United States. In the execution of trade policy today, we are witnessing an international leadership test dominated by domestic governance dilemmas.
