The affair centred around an anonymous letter that contained instructions on how to take over schools with a majority Muslim population by influencing their governing bodies and undermining head teachers. The authenticity of the letter remains hotly disputed, yet its publication generated huge turbulence - not only in Birmingham's schools and communities, but also in both Parliament and the national news. The book offers fresh perspectives based on

unique access to information from within the city, written by respected educationalists who have worked successfully in Birmingham for many years both during the Trojan Horse era and since. It explains what led to the publication of the letter, its profound consequences for education in Birmingham, and how it influenced events in the city since. Crucially the book also opens up an informed discussion around the issues raised during Trojan Horse, such as delivering a well-rounded curriculum suitable for a diverse school community, developing working partnerships in the local area, and boosting the attainment and aspirations of children from disadvantaged backgrounds. Colin shares case studies of school improvement in local and national MATs in tough, multicultural urban environments, and how schools worked to develop pupils' social capital. The Birmingham Book reveals how the Trojan Horse affair was handled by the Department for Education as their academies and free schools policies underwent their first major stress tests. Furthermore, the book provides an up-to-date appraisal of the interrelationship between education in England's schools and the cultural and religious practice of the local communities the schools serve - and of the underachievement levels of the different ethnic groups in Birmingham. Suitable for teachers, school leaders, governors and policymakers. With almost daily reports of failings in school management, what can be done to improve educational outcomes for everyone? Pat Thomson takes on England's muddled education system, highlighting failings caused by the actions of ministers in successive governments. While corrupt actions are taken by some, it is predominantly the corruption of the system that is at fault. She exposes fraudulent and unethical practices, including the skewing of the curriculum and manipulation of results, and argues for an urgent review, leading to a revitalised education system that has the public good at its heart. A plane crashes on a desert island and the only survivors, a group of schoolboys, assemble on the beach and wait to be rescued. By day they inhabit a land of bright fantastic birds and dark blue seas, but at night their dreams are haunted by the image of a terrifying beast. As the boys' delicate sense of order fades, so their childish dreams are transformed into something more primitive, and their behaviour starts to take on a murderous, savage significance. First published in 1954, Lord of the Flies is one of the most celebrated and widely read of modern classics. Now fully revised and updated, this educational edition includes chapter summaries, comprehension questions, discussion points, classroom activities, a biographical profile of Golding, historical context relevant to the novel and an essay on Lord of the Flies by William Golding entitled 'Fable'. Aimed at Key Stage 3 and 4 students, it also includes a section on literary theory for advanced or A-level students. The educational edition encourages original and independent thinking while guiding the student through the text - ideal for use in

the classroom and at home. Did the Thatcher years and their aftermath constitute a revolution or a restoration in education. Do they represent a departure from, or a reinforcement of tradition? Contemporary Debates in Education is a thought-provoking volume which reviews the reforms of the eighties and early nineties, then follow this with an examination of the long-standing issues in education over the last century in order to relate current reforms and changes to their broader historical background, so that those with a general or professional interest in education can better understand the process in which they are involved. Dressed in a t-shirt and shorts, Ralston, a seasoned climber, figured he'd hike for a few hours and then head off to work. 40 miles from the nearest paved road, he found himself on top of an 800-pound boulder. As he slid down and off of the boulder it shifted, trapping his right hand against the canyon wall. No one knew where he was; he had little water; he wasn't dressed correctly; and the boulder wasn't going anywhere. He remained trapped for five days in the canyon: hypothermic at night, de-hydrated and hallucinating by day. Finally, he faced the most terrible decision of his life: braking the bones in his wrist by snapping them against the boulder, he hacked through the skin, and finally succeeded in amputating his right hand and wrist. The ordeal, however, was only beginning. He still faced a 60-foot rappell to freedom, and a walk of several hours back to his car - along the way,

he miraculously met a family of hikers, and with his arms tourniqued, and blood-loss almost critical, they heard above them the whir of helicopter blades; just in time, Aron was rescued and rushed to hospital. Since that day, Aron has had a remarkable recovery. He is back out on the mountains, with an artificial limb; he speaks to select groups on his ordeal and rescue; and amazingly, he is upbeat, positive, and an inspiration to all who meet him. This is the account of those five days, of the years that led up to them, and where he goes from here. It is narrative non-fiction at its most compelling. #1 NATIONAL BESTSELLER.
