Entrepreneurial Ecosystems and the Diffusion of Startups Jan 20 2022

Entrepreneurial Ecosystems and the Diffusion of Startups addresses, for the first time, the emerging notion of entrepreneurial ecosystems. Chapters from leading scholars in the fields of entrepreneurship and strategy explore new ideas and provoke debate in both academia and practice. Covering the emergence, dynamics and management of entrepreneurial ecosystems and offering conceptual tools, experimental evidence and practical examples, this book will be invaluable to those seeking a greater understanding of entrepreneurship and startup strategies, both practitioners and students.

The Design Thinking Playbook Jul 26 2022 A radical shift in perspective to transform your organization to become more innovative The Design Thinking Playbook is an actionable guide to the future of business. By stepping back and questioning the current mindset, the faults of the status quo stand out in stark relief—and this guide gives you the tools and frameworks you need to kick off a digital transformation. Design Thinking is about approaching things differently with a strong user orientation and fast iterations with multidisciplinary teams to solve wicked problems. It is equally applicable to (re-)design products, services, processes, business models, and ecosystems. It inspires radical innovation as a matter of course, and ignites capabilities beyond mere potential. Unmatched as a source of competitive advantage, Design Thinking is the driving force behind those who will lead industries through transformations and evolutions. This book describes how Design Thinking is applied across a variety of industries, enriched with other proven approaches as well as the necessary tools, and the knowledge to use them effectively. Packed with solutions for common challenges including digital transformation, this practical, highly visual discussion shows you how Design Thinking fits into agile methods within management,

innovation, and startups. Explore the digitized future using new design criteria to create real value for the user Foster radical innovation through an inspiring framework for action Gather the right people to build highly-motivated teams Apply Design Thinking, Systems Thinking, Big Data Analytics, and Lean Start-up using new tools and a fresh new perspective Create Minimum Viable Ecosystems (MVEs) for digital processes and services which becomes for example essential in building Blockchain applications Practical frameworks, real-world solutions, and radical innovation wrapped in a whole new outlook give you the power to mindfully lead to new heights. From systems and operations to people, projects, culture, digitalization, and beyond, this invaluable mind shift paves the way for organizations—and individuals—to do great things. When you're ready to give your organization a big step forward, The Design Thinking Playbook is your practical guide to a more innovative future.

A Conceptual Approach to Planning an Environmental Education Curriculum Apr 30 2020

A History of the Ecosystem Concept in Ecology Sep 03 2020 Traces the origin and development of the notion that living things interact with their environment, from vague European and American theories of the late 19th and early 20th centuries, through the coining of the term "ecosystem" in 1935 and its first application, to its domination of the science of ecology in the 1960s and the current state of the art. More history than science, requires no background knowledge. Annotation c. by Book News, Inc., Portland, Or.

The Structure and Dynamics of Human Ecosystems Oct 05 2020 A landmark book that strives to provide both grand theory and practical application, innovatively describing the structure and dynamics of human ecosystems As the world faces ever more complex and demanding environmental and social challenges,

the need for interdisciplinary models and practical guidance becomes acute. The Human Ecosystem Model described in this landmark book provides an innovative response. Broad in scope, detailed in method, at once theoretical and applied, this grand study offers an in-depth understanding of human ecosystems and tools for action. The authors draw from Goethe's Faust, classic anthropology and sociology studies, contemporary ecosystem ecology, Buddhist ethics, and more to create a paradigm-shifting model and a major advance in interdisciplinary ecology.

New Directions in Rhizomatic Learning Sep 27 2022 Drawing on the theories and philosophies of Deleuze and Guattari, this edited collection explores the concept of rhizomatic learning and consolidates recent explorations in theory building and multidisciplinary research to identify new directions in the field. Knowledge transfer is no longer a fixed process. Rhizomatic learning posits that learning is a continuous, dynamic process, making connections, using multiple paths, without beginnings, and ending in a nomadic style. The chapters in this book examine these notions and how they intersect with a contemporary and future global society. Tracking the development of the field from poststructuralist thinking to nomadic pedagogy, this book goes beyond philosophy to examine rhizomatic learning within the real world of education. It highlights innovative methods, frameworks, and controversies, as well as creative and unique approaches to both the theory and practice of rhizomatic learning. Bringing together international contributors to provide new insights into pedagogy for 21st-century learning, this book will be of interest to academics, researchers, and postgraduate students in education and adjacent fields.

Research Anthology on Business Aspects of Cybersecurity Nov 17 2021 Cybersecurity is vital for all businesses, regardless of sector. With constant threats and potential online dangers, businesses must remain aware of the current research and information available to them in order to protect themselves and their employees. Maintaining tight cybersecurity can be difficult for businesses as there are so many moving parts to contend with, but remaining vigilant and having protective measures and

training in place is essential for a successful company. The Research Anthology on Business Aspects of Cybersecurity considers all emerging aspects of cybersecurity in the business sector including frameworks, models, best practices, and emerging areas of interest. This comprehensive reference source is split into three sections with the first discussing audits and risk assessments that businesses can conduct to ensure the security of their systems. The second section covers training and awareness initiatives for staff that promotes a security culture. The final section discusses software and systems that can be used to secure and manage cybersecurity threats. Covering topics such as audit models, security behavior, and insider threats, it is ideal for businesses, business professionals, managers, security analysts, IT specialists, executives, academicians, researchers, computer engineers, graduate students, and practitioners.

Cognitive Mapping for Problem-based and Inquiry Learning Aug 03 2020 This book studies how to improve problem-based and inquiry-based learning by incorporating cognitive maps. Problem-based learning and cognitive mapping are reviewed from the perspective of both learning sciences and cognitive sciences, including the underpinning theories of experiential learning, situated learning, collaborative learning, meaningful learning, externalized representations and visual representations. The result is a comprehensive review and analysis of cognitive mapping-supported problem-based learning, with the topic discussed from cognitive, meta-cognitive, social, and motivational and emotional perspectives. Furthermore, the author presents a theory-driven design, implementation, and analysis of design-based research to improve problem-based learning using cognitive mapping. The book will provide implications for researchers and practitioners of learning sciences, psychology, instructional systems, and cognitive tools.

Circular Economy Apr 10 2021 How can we design circular business models? How can we organize the transition from a linear to a circular economy? And how can we imagine circular futures that help us transform current realities? This book aims to provide answers to these

questions while addressing the challenges and opportunities of the circular economy. The authors reflect on why conventional sustainability models – such as the ‘triple P’ (People, Profit and Planet) or eco-efficiency – have failed in addressing environmental challenges, including climate change, biodiversity loss and pollution. They then move on to explore innovative circular business models, which propose to eliminate environmental damage by radically reforming the system of industrial production. Organizing the transition is a collaborative effort: entrepreneurs, consumers, policymakers, multinationals and intermediaries need to work together to foster the emergence of the circular economy as an institutional field. Together with younger generations of learners and equipped with beyond-human-centred values towards awareness of the material and natural world, novel circular futures can be imagined. Offering points of reference for continued critical discourse and examples of practically applicable sustainability solutions, this book will be of great interest to students, teachers, practitioners and scholars of circular economy.

Artificial Intelligence in Education Dec 07 2020 "

The nature of technology has changed since Artificial Intelligence in Education (AIED) was conceptualised as a research community and Interactive Learning Environments were initially developed. Technology is smaller, more mobile, networked, pervasive and often ubiquitous as well as being provided by the standard desktop PC. This creates the potential for technology supported learning wherever and whenever learners need and want it. However, in order to take advantage of this potential for greater flexibility we need to understand and model learners and the contexts with which they interact in a manner that enables us to design, deploy and evaluate technology to most effectively support learning across multiple locations, subjects and times. The AIED community has much to contribute to this endeavour. This publication contains papers, posters and tutorials from the 2007 Artificial Intelligence in Education conference in Los Angeles, CA, USA. "

What on Earth Jan 08 2021

Concept Mapping and Student Success in a

College-level Environmental Studies Course

Feb 01 2023 Concept mapping is an educational tool that is used to facilitate and demonstrate student comprehension through the use of a visual medium. Because it provides a non-linear, multidimensional way of exploring a topic it is especially appropriate for use in environmental studies courses, where individuals, institutions, and ecosystems interrelate in complex ways. This project looked at the effect of using concept mapping as a reflective and constructive exercise in an environmental analysis course at Lewis and Clark College in Portland, Oregon. A sub-question was whether or not characteristics of certain students, such as "learning style" and background proficiency with the subject matter would affect the degree to which concept mapping proved helpful. Students created bi-weekly concept maps to review lessons, reflect on their growth throughout the course, and present the findings of their final group research projects. A sub-group of students completed a questionnaire after each concept mapping exercise, which asked them the degree to which the exercise helped facilitate the educational goals of the course. Overall, concept mapping proved helpful and moderately challenging to the students. In general, demographics, learning style, and other variables did not predict success with concept mapping or success with the course. One notable exception was that the students who felt more challenged by the concept mapping exercises ultimately did better in the course overall. This indicates that for engaged students, concept mapping has the potential to keep them at the optimal level of intellectual discomfort that ultimately fosters deep learning.

Darwin-Inspired Learning Nov 05 2020 Charles Darwin has been extensively analysed and written about as a scientist, Victorian, father and husband. However, this is the first book to present a carefully thought out pedagogical approach to learning that is centered on Darwin's life and scientific practice. The ways in which Darwin developed his scientific ideas, and their far reaching effects, continue to challenge and provoke contemporary teachers and learners, inspiring them to consider both how scientists work and how individual humans 'read nature'. Darwin-inspired learning, as proposed

in this international collection of essays, is an enquiry-based pedagogy, that takes the professional practice of Charles Darwin as its source. Without seeking to idealise the man, Darwin-inspired learning places importance on:

- active learning
- hands-on enquiry
- critical thinking
- creativity
- argumentation
- interdisciplinarity.

In an increasingly urbanised world, first-hand observations of living plants and animals are becoming rarer. Indeed, some commentators suggest that such encounters are under threat and children are living in a time of 'nature-deficit'. Darwin-inspired learning, with its focus on close observation and hands-on enquiry, seeks to re-engage children and young people with the living world through critical and creative thinking modeled on Darwin's life and science.

Advanced Agent-Based Environmental Management Systems May 31 2020 Multi-agent Systems (MAS) are one of the most exciting research areas in Artificial Intelligence meanwhile Environmental Studies is a research area of strategic interest. Both areas can provide society with solutions for many real applications, in order to use and protect the environment. Human activities imply intervention into nature, but properly managed, these interventions can not be only ecologically sound but also favourable to the sustainable development of civilisation. The encounter between these fields is a new challenge for many researchers of both communities. This book presents a comprehensive reference of state-of-the-art efforts. Specifically, it presents current and future ways in which adaptive information technologies, techniques, protocols and architectures, such as software agent technologies and multi-agent systems, can be used to support the development of real-world agent-based systems in the area of e-Environment.

Using Concept Mapping to Understand Students' Perception about Environmental Conservation Dec 31 2022

Challenges and Innovations in Educational Psychology Teaching and Learning Oct 29 2022 Leading faculty members in educational psychology, who are expert classroom teachers, describe inherent difficulties encountered when teaching different subject matter in educational

psychology to diverse populations of students, including undergraduate teacher candidates, psychology and child development majors, and graduate students in education and psychology. Educational psychology addresses subject matter as diverse as child and adolescent development, motivation, learning theories, student assessment, teacher expertise, and research methods and statistics. Drawing from their years of classroom experience, as well as their expertise in designing and conducting educational research, the contributing authors report their successful instructional efforts and innovations designed to increase student learning and knowledge of the discipline.

Thinking Skills Apr 03 2023 This photocopiable resource provides Thinking Skills activities for each chapter of The New Wider World, Second Edition. Written by members of the Thinking Through Geography team, the activities are designed to integrate easily into your GCSE Geography course to motivate students and improve their performance.

Mapping Ecosystem Services Mar 22 2022 "The new book Mapping Ecosystem Services provides a comprehensive collection of theories, methods and practical applications of ecosystem services (ES) mapping, for the first time bringing together valuable knowledge and techniques from leading international experts in the field." (www.eurekalert.org).

Singapore Lower Secondary Science Critical Study Notes (Yellowreef) Jul 14 2021

- according to latest MOE syllabus
- for express/normal (academic)
- covers secondary 1 and secondary 2 syllabi
- provides the expert guide to lead one through this highly demanding knowledge requirement
- comprehensive, step-by-step study notes
- exact and accurate definitions
- concept maps to enhance learning
- extra information to stretch the student's learning envelope
- buy online at www.yellowreef.com to enjoy attractive discounts
- complete edition eBook available

Books available for other subjects including Physics, Chemistry, Biology, Mathematics, Economics, English

- Primary level, Secondary level, GCE O-level, GCE A-level, iGCSE, Cambridge A-level, Hong Kong DSE
- visit www.yellowreef.com for sample chapters and more

Community culture and the environment : a guide to understanding a sense of place Feb 18 2022

GS SCORE Concept Mapping Workbook Indian Economy: the Ultimate Guide to Cover Concepts through MCQs for Civil Services, State PCS & Other Competitive Examinations May 24 2022 —Public Service Examinations across the Board in India offers immense opportunity for young talent to secure not only employment at prestigious positions but also gives them the chance to serve the nation in various capacities. —These examinations are of a highly diverse nature as they test the candidates on diverse subjects, further spanning multiple dimensions largely the subjects related to Polity, Economy, History, Geography, Science and Technology, environmental sciences and miscellaneous topics like sports, awards and other events of national and international importance. —All of these demand not only to study of these varied subjects but also practice in tackling the questions which are asked in the examination. Highlights of the Book Approach towards the subject —The book introduces you to the subject and the way in which this subject should be approached in order to score maximum. Micro Detailing of the Syllabus—The entire UPSC CSE syllabus has been clubbed into broad themes and each theme will be covered with the help of MCQs. Chronological Arrangement of Theme Based Questions—The various identified themes are arranged chronologically so that the entire Syllabus of a subject is roped in a logical line. Last Minute Concept Revision Sheet—The end of the book contains the summary of important concepts related to the subject which can be used as your effective revision notes. About GS SCORE—GS SCORE has been home to numerous toppers of UPSC's prestigious Civil Services Examination. Learning at GS SCORE is driven by two predominant objectives i.e. excellence and empowerment.

Handbook of Research on Ecosystem-Based Theoretical Models of Learning and Communication Jun 24 2022 ICT and globalization have completely redefined learning and communication. People virtually connect to, collaborate with, and learn from other individuals. Because educational technology has

matured considerably since its inception, there are still many issues in the design of learner-centered environments. The Handbook of Research on Ecosystem-Based Theoretical Models of Learning and Communication is an essential reference source that discusses learning and communication ecosystems and the strategic role of trust at different levels of the information and knowledge society. Featuring research on topics such as global society, life-long learning, and nanotechnology, this book is ideally designed for educators, instructional designers, principals, administrators, professionals, researchers, and students.

Forest Management and Water Resources in the Anthropocene Jan 26 2020 This book is a printed edition of the Special Issue "Forest Management and Water Resources in the Anthropocene" that was published in *Forests*

Understanding Urban Ecosystems Sep 15 2021 Nowhere is the challenge for ecological understanding greater than in cities. This book brings together the biological, physical and social dimensions of urban ecosystem research to show how an understanding of urban ecosystems is vital for urban dwellers to grasp basic ecological science.

Enhancing Communication & Collaboration in Interdisciplinary Research Apr 22 2022 *Enhancing Communication & Collaboration in Interdisciplinary Research*, edited by Michael O'Rourke, Stephen Crowley, Sanford D. Eigenbrode, and J. D. Wulfhorst, is a volume of previously unpublished, state-of-the-art chapters on interdisciplinary communication and collaboration written by leading figures and promising junior scholars in the world of interdisciplinary research, education, and administration. Designed to inform both teaching and research, this innovative book covers the spectrum of interdisciplinary activity, offering a timely emphasis on collaborative interdisciplinary work. The book's four main parts focus on theoretical perspectives, case studies, communication tools, and institutional perspectives, while a final chapter ties together the various strands that emerge in the book and defines trend-lines and future research questions for those conducting work on interdisciplinary communication.

Managing Value Propositions in Service

Ecosystems Jul 02 2020 Julian Boha explores value propositions in ecosystems as they play an important role in communicating how a company aims to provide value to business partners and customers. Value propositions are used in our everyday language, yet the concept remains ambiguous as there is a lack of empirical evidence about value propositions and their formal development process. The author provides a much-needed understanding of value propositions within the context of ecosystems and offers tools to systematically create value propositions and orchestrate ecosystems to foster innovation. Further, this book advances to the current understanding of value propositions and their application in the context of innovative ecosystems.

GS SCORE Concept Mapping Workbook Environment & Ecology: The Ultimate Guide to Cover Concepts through MCQs for Civil Services, State PCS & Other Competitive Examinations Mar 02 2023 —Public Service Examinations across the Board in India offers immense opportunity for young talent to secure not only employment at prestigious positions but also gives them the chance to serve the nation in various capacities. —These examinations are of a highly diverse nature as they test the candidates on diverse subjects, further spanning multiple dimensions largely the subjects related to Polity, Economy, History, Geography, Science and Technology, environmental sciences and miscellaneous topics like sports, awards and other events of national and international importance. —All of this demand not only to study of these varied subjects but also practice in tackling the questions which are asked in the examination. the subject which can be used as your effective revision notes. About GS SCORE—GS SCORE has been home to numerous toppers of UPSC's prestigious Civil Services Examination. Learning at GS SCORE is driven by two predominant objectives i.e. excellence and empowerment.

Fostering Understanding of Complex Systems in Biology Education Aug 27 2022 This book synthesizes a wealth of international research on the critical topic of 'fostering understanding of complex systems in biology education'. Complex systems are prevalent in many scientific fields, and at all scales, from the micro scale of a single cell or molecule to complex systems at the macro scale such as ecosystems. Understanding the complexity of natural systems can be extremely challenging, though crucial for an adequate understanding of what they are and how they work. The term "systems thinking" has become synonymous with developing a coherent understanding of complex biological processes and phenomena. For researchers and educators alike, understanding how students' systems thinking develops is an essential prerequisite to develop and maintain pedagogical scaffolding that facilitates students' ability to fully understand the system's complexity. To that end, this book provides researchers and teachers with key insights from the current research community on how to support learners systems thinking in secondary and higher education. Each chapter in the book elaborates on different theoretical and methodological frameworks pertaining to complexity in biology education and a variety of biological topics are included from genetics, photosynthesis, and the carbon cycle to ecology and climate change. Specific attention is paid to design elements of computer-based learning environments to understand complexity in biology education.

Implementing the Water-Energy-Food-Ecosystems Nexus and Achieving the Sustainable Development Goals Jun 12 2021 *Applied Concept Mapping* May 04 2023 The expanding application of Concept Mapping includes its role in knowledge elicitation, institutional memory preservation, and ideation. With the advent of the CmapTools knowledge modeling software kit, Concept Mapping is being applied with increased frequency and success to

address a variety of problems in the workplace. Supported by business application case studies, *Applied Concept Mapping: Capturing, Analyzing, and Organizing Knowledge* offers an accessible introduction to the theory, methods, and application of Concept Mapping in business and government. The case studies illustrate applications across a range of industries—including engineering, product development, defense, and healthcare. The authors provide access to a free download of CmapTools, courtesy of the Institute for Human and Machine Cognition, to enable readers to create and share their own Concept Maps. Offering examples from the United States, Canada, Australia, Spain, Brazil, Scotland, and The Netherlands, they highlight a global perspective of this dynamic tool. The text is organized into three sections: Practitioners' Views—supplies narratives, guidance, and reviews of applications from career Concept Mappers Recent Case Studies and Results—presents in-depth examinations of specific applications and their results Pushing the Boundaries—explores what's possible and where the boundary conditions lie *Applied Concept Mapping* facilitates the fundamental understanding needed to harness the power of Concept Mapping to develop viable solutions to a virtually unlimited number of real-world problems.

In the Way of Development Mar 10 2021 A collaboration between indigenous leaders, social activists and scholars from a wide range of disciplines, *In the Way of Development* explores the current situation of indigenous peoples enmeshed in the remorseless expansion of the modern economy. The volume assembles a rich diversity of statements, case studies and wider thematic explorations all starting with indigenous peoples as actors, not victims. The accounts come primarily from North America, but include also studies from South America, and the former Soviet Union. *In the Way of Development* shows how the boundaries between indigenous peoples' organizations, civil society, the state, markets, development and the environment are ambiguous and constantly changing. This fact makes local political agency possible, but also, ironically, opens the possibility of undermining it.

Dominant Discourses in Higher Education Oct 17 2021 This book examines the dominant discourses in higher education. From the moment teachers enter higher education, they are met with dominant discourses that are often adopted uncritically, including concepts such as teaching excellence, student voice, and student engagement. Teachers are also met with simplistic binaries such as teaching vs. research, quantitative vs. qualitative research, and constructivists vs. positivists. Kinchin and Gravett suggest that this may present a distorted view, contributing to the disconnect between the aims and observable practice of higher education. Rather than celebrating difference, dominant discourses tend to seek similarities in an attempt to simplify and manage the environment. In this book, the authors share their belief that teaching and learning should be a thoughtful endeavour. Thinking with a breadth of theories, the authors explore the overlaps between different perspectives in order to offer a richer and more inclusive interrogation of the dominant discourses that pervade higher education. Offering methodological approaches to explore these perspectives, the authors bring together academics working in different parts of the university and examine the concept of a 'rich cartography', considering how this can offer meaning within higher education research and practice.

Handbook of Research on Collaborative Learning Using Concept Mapping Nov 29 2022 This new encyclopedia discusses the extraordinary importance of internet technologies, with a particular focus on the Web.

Ecosystem Services May 12 2021 This book draws on a range of interdisciplinary perspectives to provide a framework for translating concepts into ecosystem-related decision making and practice.

Mapping Wilderness Mar 29 2020 This volume gives a comprehensive overview of wilderness mapping, and in doing so covers the conceptual and philosophical foundations, techniques and methodological approaches, and applications at a variety of spatial scales. The Editors have brought together a range of contributors who are both experts in their field and cutting-edge thinkers in the wilderness and spatial mapping domain. Spatial information technology and

mapping science is a rapidly expanding and a developing field and so it is expected to be able to add to this volume in the future. This book provides a record of the "state of the art" and will enable the reader to follow this lead and map his/her own wilderness.

Artificial Intelligence in Education Aug 15

2021 The field of Artificial Intelligence in Education includes research and researchers from many areas of technology and social science. This study aims to open opportunities for the cross-fertilization of information and ideas from researchers in the many fields that make up this interdisciplinary research area.

[A Comprehensive Book on Autism Spectrum Disorders](#) Feb 27 2020

The aim of the book is to serve for clinical, practical, basic and scholarly practices. In twentyfive chapters it covers the most important topics related to Autism Spectrum Disorders in the efficient way and aims to be useful for health professionals in training or clinicians seeking an update.

Different people with autism can have very different symptoms. Autism is considered to be a "spectrum" disorder, a group of disorders with similar features. Some people may experience merely mild disturbances, while the others have very serious symptoms. This book is aimed to be used as a textbook for child and adolescent psychiatry fellowship training and will serve as a reference for practicing psychologists, child and adolescent psychiatrists, general psychiatrists, pediatricians, child neurologists, nurses, social workers and family physicians. A free access to the full-text electronic version of the book via Intech reading platform at <http://www.intechweb.org> is a great bonus.

Handbook of Research on Cyber Crime and Information Privacy Dec 19 2021

In recent years, industries have transitioned into the digital realm, as companies and organizations are adopting certain forms of technology to assist in information storage and efficient methods of production. This dependence has significantly increased the risk of cyber crime and breaches in data security. Fortunately, research in the area of cyber security and information protection is flourishing; however, it is the responsibility of industry professionals to keep pace with the current trends within this

field. The Handbook of Research on Cyber Crime and Information Privacy is a collection of innovative research on the modern methods of crime and misconduct within cyber space. It presents novel solutions to securing and preserving digital information through practical examples and case studies. While highlighting topics including virus detection, surveillance technology, and social networks, this book is ideally designed for cybersecurity professionals, researchers, developers, practitioners, programmers, computer scientists, academicians, security analysts, educators, and students seeking up-to-date research on advanced approaches and developments in cyber security and information protection.

Information Literacy: Moving Toward Sustainability Dec 27 2019

This book constitutes the refereed proceedings of the Third European Conference on Information Literacy, ECIL 2015, held in Tallinn, Estonia, in October 2015. The 61 revised full papers presented were carefully reviewed and selected from 226 submissions. The papers are organized in topical sections on information literacy, environment and sustainability; workplace information literacy and knowledge management; ICT competences and digital literacy; copyright literacy; other literacies; information literacy instruction; teaching and learning information literacy; information literacy, games and gamification; information need, information behavior and use; reading preference: print vs electronic; information literacy in higher education; scholarly competencies; information literacy, libraries and librarians; information literacy in different context.
