For many

researchers, Python is a first-class tool mainly because of its libraries for storing, manipulating, and gaining insight from data. Several resources exist for individual pieces of this data science stack, but only with the Python Data Science Handbook do you get them all—IPython, NumPy, Pandas, Matplotlib, Scikit-Learn, and other related tools. Working scientists and data crunchers familiar with reading and writing Python code will find this comprehensive desk reference ideal for tackling day-to-day issues: manipulating, transforming, and cleaning data; visualizing different

types of data; and using data to build statistical or machine learning models. Quite simply, this is the must-have reference for scientific computing in Python. With this handbook, you'll learn how to use: IPython and Jupyter: provide computational environments for data scientists using Python NumPy: includes the ndarray for efficient storage and manipulation of dense data arrays in Python Pandas: features the DataFrame for efficient storage and manipulation of labeled/columnar data in Python Matplotlib: includes capabilities for a flexible range of

data visualizations in Python Scikit-Learn: for efficient and clean Python implementations of the most important and established machine learning algorithms The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are

countless underpaid and overworked adjuncts, and many more who simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who get the most out of

their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice site The Professor Is In, she has helped countless Ph.D.'s turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D., including: - When, where, and what to publish -

Writing a foolproof grant application - Cultivating references and crafting the perfect CV - Acing the job talk and campus interview - Avoiding the adjunct trap - Making the leap to nonacademic work, when the time is right The Professor Is In addresses all of these issues, and many more. Handbook for Sound Engineers is the most comprehensive reference available for audio engineers, and is a must read for all who work in audio. With contributions from many of the top professionals in the field, including Glen Ballou on interpretation systems, intercoms, assistive listening, and fundamentals

and units of measurement, David Miles Huber on MIDI, Bill Whitlock on audio transformers and preamplifiers, Steve Dove on consoles, DAWs, and computers, Pat Brown on fundamentals, gain structures, and test and measurement, Ray Rayburn on virtual systems, digital interfacing, and preamplifiers, Ken Pohlmann on compact discs, and Dr. Wolfgang Ahnert on computer-aided sound system design and room-acoustical fundamentals for auditoriums and concert halls, the Handbook for Sound Engineers is a must for serious audio and acoustic engineers. The fifth

edition has been updated to reflect changes in the industry, including added emphasis on increasingly prevalent technologies such as software-based recording systems, digital recording using MP3, WAV files, and mobile devices. New chapters, such as Ken Pohlmann's Subjective Methods for Evaluating Sound Quality, S. Benjamin Kanters's Hearing Physiology—Disorders—Conservation, Steve Barbar's Surround Sound for Cinema, Doug Jones's Worship Styles in the Christian Church, sit aside completely revamped staples like Ron Baker and Jack Wrightson's Stadiums and

Outdoor Venues, Pat Brown's Sound System Design, Bob Cordell's Amplifier Design, Hardy Martin's Voice Evacuation/Mass Notification Systems, and Tom Danley and Doug Jones's Loudspeakers. This edition has been honed to bring you the most up-to-date information in the many aspects of audio engineering. Become the applicant Google can't turn down Cracking the Tech Career is the job seeker's guide to landing a coveted position at one of the top tech firms. A follow-up to The Google Resume, this book provides new information on what these companies want, and how to show

them you have what it takes to succeed in the role. Early planners will learn what to study, and established professionals will discover how to make their skillset and experience set them apart from the crowd. Author Gayle Laakmann McDowell worked in engineering at Google, and interviewed over 120 candidates as a member of the hiring committee – in this book, she shares her perspectives on what works and what doesn't, what makes you desirable, and what gets your resume saved or deleted. Apple, Microsoft, and Google are the coveted companies in the current job market. They field

hundreds of resumes every day, and have their pick of the cream of the crop when it comes to selecting new hires. If you think the right alma mater is all it takes, you need to update your thinking. Top companies, especially in the tech sector, are looking for more. This book is the complete guide to becoming the candidate they just cannot turn away. Discover the career paths that run through the top tech firms Learn how to craft the perfect resume and prepare for the interview Find ways to make yourself stand out from the hordes of other applicants Understand what the top companies

are looking for, and how to demonstrate that you're it These companies need certain skillsets, but they also want a great culture fit. Grades aren't everything, experience matters, and a certain type of applicant tends to succeed. Cracking the Tech Career reveals what the hiring committee wants, and shows you how to get it. A unique, fix-it-fast reference for boiler operators, inspectors, maintenance engineers, and technicians. Thoroughly updated to reflect the current ASME Boiler Code. with answers, 150 solved numerical problems, and 410 helpful illustrations. Now in the 5th edition, Cracking the Coding Interview gives you the interview preparation you need to get the top software developer jobs. This book provides: 150 Programming Interview Questions and Solutions: From binary trees to binary search, this list of 150 questions includes the most common and most useful questions in data structures, algorithms, and knowledge based questions. 5 Algorithm Approaches: Stop being blind-sided by tough algorithm questions, and learn these five approaches to

tackle the trickiest problems. Behind the Scenes of the interview processes at Google, Amazon, Microsoft, Facebook, Yahoo, and Apple: Learn what really goes on during your interview day and how decisions get made. Ten Mistakes Candidates Make -- And How to Avoid Them: Don't lose your dream job by making these common mistakes. Learn what many candidates do wrong, and how to avoid these issues. Steps to Prepare for Behavioral and Technical Questions: Stop meandering through an endless set of questions, while missing some of the most important preparation

techniques. Follow these steps to more thoroughly prepare in less time. Author Paul Getty has seen thousands of brilliant founding CEOs present to angel investors, venture capitalists, and institutional investors. And he has seen thousands of them fail in their quest for the money they sincerely believed would lead to entrepreneurial success and riches for all. Again and again, he watched would-be tech titans fail to create a good first impression, deliver poor presentations, tell lengthy stories that put investors to sleep, and fail to address the critical issues sophisticated investors are most eager to hear about. If only they'd

read The Twelve Magic Slides: Insider Secrets for Raising Growth Capital. Getty's slide topics—developed while coaching hundreds of company founders to fundraising success—cover each of the twelve key themes investors want to know about in depth before they part with their hard-earned money: the problem you see, your solution to it, the resulting business opportunity, the amount of money you need to grow the firm, and the potential returns for investors, among others. Getty, managing director of Satwik Capital Advisors in San Jose,

California, shows that properly developing each slide—and the thinking behind it—can get you the investment capital required to vault your company to the next level. But The Twelve Magic Slides is more than a book about how raise money from professional investors. It presents a whole new way of how to think about and develop a successful startup. Regardless, it will show you better ways to accomplish your goals and increase the chances you'll get the green light from investors. Whether you are seeking startup funding from the angel down the street, or trying to convince

investment bankers to help take you public, The Twelve Magic Slides provides a clear step-by-step process that will enable you to: Identify the key elements of the business that must be developed to attract external capital Understand the critical dos and don'ts CEOs must know to sell their story to investors in a quick and efficient manner Create twelve perfect slides and a presentation that secures investor interest from the start and gives them plenty of reasons to write you a check You need to find money to fund your company's growth. Investors need to find entrepreneurs

and ideas they can believe in. The Twelve Magic Slides presents a proven method for attracting funds from angel investors, venture capital firms, private equity firms, and institutional investors. It will give you the knowledge and confidence you need to ask for—and receive—the capital you need to launch or grow a business. A leader in the field of green graphic design explains how to incorporate a series of simple, eco-friendly changes in selecting paper, printing methods, binding, packaging, shipping, and budgeting that can provide increased

profit, creativity, and meaning in any design project, in a volume that includes extensive listings of Web sites, paper suppliers, and other resources. Original. Achieve success in your physics course by making the most of what PHYSICS FOR SCIENTISTS AND ENGINEERS has to offer. From a host of in-text features to a range of outstanding technology resources, you'll have everything you need to understand the natural forces and principles of physics. understand the laws of physics AND succeed in your course! Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. Write a killer CV and land your dream job. It takes an employer just seven seconds to save or reject a job applicant's CV. In this book, James Reed - chairman of REED, Britain's largest recruitment company - offers invaluable and specific advice on what employers want to see in the CVs they receive and how you can stand out from the crowd. Unlike other career development books, the honest

advice presented here has been compiled from one-to-one interviews, surveys and countrywide workshops across REED's network of recruitment consultants. This book is an accessible and enjoyable read, intensely practical and packed with pull-out quotes, layout examples and tips. Find out what future employers are looking for and take the first step to start loving Mondays again. This book has grown out of lesson units that have been used by the author successfully in his English classes for engineering students for over a decade. It is a

continuous instructional and practice workbook that teaches communication skills that are essential in the areas of professional and technical activities. The book has taken into account the problems and requirements of technical students and is an attempt to offer sensible pedagogical solutions based on the recent developments in applied linguistics. "This book looks to cover the differences the new professional will encounter as he takes on his new position overseas". The book not only covers the basic technical translations of the items likely to be

encountered during your work, but also covers what I would call the "unspoken word" These are cultural differences, such as technical phrases, modern work concepts terminology, standard practices. The book takes the student through all stages of construction and explains in detail the principal phases that the student is expected to understand & know in the new Hi tech and fast changing environment. It will be a good reference book which will enable the student to rapidly adapt to their new environment by helping them understand the basic principles, working practices, descriptions etc

which some countries will take for granted. A great aid for the aspiring foreign professional, I only wish it was available when I first came to Spain some 23 years ago! An illustrated highlight reel of more than 100 women in rap who have helped shape the genre and eschewed gender norms in the process The Motherlode highlights more than 100 women who have shaped

the power, scope, and reach of rap music, including pioneers like Roxanne Shanté, game changers like Lauryn Hill and Missy Elliott, and current reigning queens like Nicki Minaj, Cardi B, and Lizzo—as well as everyone who came before, after, and in between. Some of these women were respected but not widely celebrated. Some are impossible not to know. Some of these women have stood on their own; others were forced into templates, compelled to stand beside men in big rap crews. Some have been trapped in a strange critical space between respected MC and object. They are characters,

caricatures, lyricists, at times both feminine and explicit. This book profiles each of these women, their musical and career breakthroughs, and the ways in which they each helped change the culture of rap. This book is written to fulfill students' need to learn Foreign Language for Vocational Skills Training. This book is designed to provide opportunity for the students to develop their English skills more communicatively and meaningfully. It consists of twelve units. It presents reading, speaking and writing practices. Reading practice consists of reading comprehension and vocabulary

exercises related to the topic of the text. In writing practice, some structures and sentence patterns are completed with guided writing exercise. Meanwhile, in speaking practice students are provided with model and example which are presented in various ways. The material has been arranged and graded in accordance with their language levels. Above all, to improve the quality of this textbook, criticism and suggestion for better editions are highly appreciated. Offers advice on how to create letters and resumes that get jobs. This handbook aims to

reduce the anxiety of job seekers and help them make the right moves and meet their career goals. "John Lees is a purveyor of sound, no nonsense career advice which delivers results, whatever your age or status." Carol Lewis, Business

Features Editor, *The Times* It doesn't take months to learn how to write a CV that works, but it does take a few hours. This book is designed to take you through that process quickly, taking some short cuts, encouraging your readers to say one simple word: "yes". Features: Step by step approach to building a CV from scratch Detailed advice on getting bullet points and the profile right Example CVs, including entry level and executive CVs Demystifying of CV formats and styles, including 'hybrid', competency-based and functional CVs Drawing on over 25 years' experience of

training recruiters, John Lees, author of the bestselling *How To Get A Job You'll Love*, is one of the UK's best known career strategists. In *Knockout CV* he shows you how to write CVs and cover letters that convey your strengths quickly and get you into the interview room. "A comprehensive and practical guide to building arelevant, evidence-based CV which will win the recruiter's attention. Looks afresh at the role of your CV, the pitfalls to avoid and shares invaluable recruiter insights." Liz Mason, Associate Director, Alumni Career Services, London Business School, UK "You write a CV for a purpose: to get a job. *Knockout*

CV works backwards from the desired result, analysing each feature of the CV from the perspective of impact on the decision-maker. No frills, no diversions, simply full of practical help." Shirley Anderson, HR Director, Talent and Reward, Pilkington Group Limited "This book is essential reading for anyone considering a career move or applying for another position. First impressions are so important and your CV really does have to stand out from all the rest. This is an excellent, practical guide which I believe will really make the difference to securing that

interview." Christine Gaskell, Chair, Cheshire and Warrington Local Enterprise Partnership and former HR Director, Bentley Motors Ltd "John Lees leads you back to the basic document of so many job-hunting campaigns, and yet again opens your eyes to see the real underlying principles. His clear and authoritative voice brings life back into what is often seen as a routine activity - CV writing - yet is so important in today's hyper-competitive job market. With his clear chapter objectives, insightful exercises (especially the 'CV data bank'), professional insights, and a healthy dose of

humour, John Lees sets the standard for modern CV writing." Matthias Feist, Head of Careers & Business Relations at Regent's University London, UK and Chair of PlaceNet: Placements in Industry Network "John has produced an honest and authentic approach to creating a winning CV which speaks to your strengths, and will make the difference to getting noticed and in front of the selection panel. Yes, you can expect to work some, however John's advice plus your investment in time will produce a great result with the critical bonus of mental and emotional clarity

over your next (right) career move." Angella Clarke-Jervoise, Big 4 Partner Recruiter and International Career Coach Praise for John Lees' careers books: "When I read John's writing, two things happen. First, I feel as if he's standing right there, personally advising me. And second, I always come away thinking over the issue in a new way. It's a rare, but very useful, gift." Sarah Green, Associate Editor, Harvard Business Review "I know first-hand the joy that being in the right career can bring and I commend John Lees for his books and seminars which help other people do just that."

Rosemary Conley CBE "John Lees is the Career Professional's professional; the doyen of careers experts. His books and advice have helped countless numbers of people to enjoy better, more fulfilling careers." successful, well-paid career! For more than 15 years, *The Academic Job Search Handbook* has assisted job seekers in all academic disciplines in their search for faculty positions. The guide includes information on aspects of the search that are common to all levels, with invaluable tips for those seeking their first or second faculty position. This new edition provides updated advice and addresses hot topics in the competitive job market of today, including the challenges faced by dual-career couples, job search issues for pregnant candidates, and

advice on how to deal with gaps in a CV. The chapter on alternatives to academic jobs has been expanded, and sample resumes from individuals seeking nonfaculty positions are included. The book begins with an overview of the hiring process and a timetable for applying for academic positions. It then gives detailed information on application materials, interviewing, negotiating job offers, and starting the new job. Guidance throughout is aimed at all candidates, with frequent reference to the specifics of job searches in scientific and

technical fields as well as those in the humanities and social sciences. Advice on seeking postdoctoral opportunities is also included. Perhaps the most significant contribution is the inclusion of sample vitas. *The Academic Job Search Handbook* describes the organization and content of the vita and includes samples from a variety of fields. In addition to CVs and research statements, new in this edition are a sample interview itinerary, a teaching portfolio, and a sample offer letter. The job search correspondence section has also been updated, and there is current

information on Internet search methods and useful websites. While there is a lot of appreciation for backend and distributed systems challenges, there tends to be less empathy for why mobile development is hard when done at scale. This book collects challenges engineers face when building iOS and Android apps at scale, and common ways to tackle these. By scale, we mean having numbers of users in the millions and being built by large engineering teams. For mobile engineers, this book is a blueprint for modern app engineering approaches. For non-mobile engineers and

managers, it is a resource with which to build empathy and appreciation for the complexity of world-class mobile engineering. The book covers iOS and Android mobile app challenges on these dimensions: Challenges due to the unique nature of mobile applications compared to the web, and to the backend. App complexity challenges. How do you deal with increasingly complicated navigation patterns? What about non-deterministic event combinations? How do you localize across several languages, and how do you scale your automated and

manual tests? Challenges due to large engineering teams. The larger the mobile team, the more challenging it becomes to ensure a consistent architecture. If your company builds multiple apps, how do you balance not rewriting everything from scratch while moving at a fast pace, over waiting on "centralized" teams? Cross-platform approaches. The tooling to build mobile apps keeps changing. New languages, frameworks, and approaches that all promise to address the pain points of mobile engineering keep appearing. But which approach should you choose?

Flutter, React Native, Cordova? Native apps? Reuse business logic written in Kotlin, C#, C++ or other languages? What engineering approaches do "world-class" mobile engineering teams choose in non-functional aspects like code quality, compliance, privacy, compliance, or with experimentation, performance, or app size? This brief, easy-to-use guide to the essentials of technical writing is designed specifically to meet the needs of engineers, focuses on reports, business letters, office memoranda and e-mail, as well as oral presentations using PowerPoint and applying for jobs

"In this definitive guide to the ever-changing modern workplace, Kathryn Minshew and Alexandra Cavoulacos, the co-founders of popular career website TheMuse.com, show how to play the game by the New Rules. The Muse is known for sharp, relevant, and get-to-the-point advice on how to figure out exactly what your values and your skills are and how they best

play out in the marketplace. Now Kathryn and Alex have gathered all of that advice and more in *The New Rules of Work*. Through quick exercises and structured tips, the authors will guide you as you sort through your countless options; communicate who you are and why you are valuable; and stand out from the crowd. *The New Rules of Work* shows how to choose a perfect career path, land the best job, and wake up feeling excited to go to work every day--whether you are starting out in your career, looking to move ahead, navigating a mid-career shift, or anywhere in

between"-- Recruiting successful candidates leads to improved performance, increased customer satisfaction, enhanced organisational reputation, greater staff morale and a positive reflection on those involved in the recruitment process. *The Managing Recruitment Pocketbook* explains how to plan recruitment, attract the right candidates, assess CVs and application forms, get the most out of the interview, use different methods of selection and how to make the job offer. Under 'attracting the right candidates', the pocketbook looks at

advertising methods, using the internet, employing recruitment agencies and recruiting internally. Selection methods addressed include psychometric tests, personality questionnaires, assessment centres, presentations and work sample exercises. The final chapter covers how to pull all the selection information together, references, medicals, handling unsuccessful candidates and making the

eventual offer. Complementing this new title are two other existing pocketbooks, The Interviewer's Pocketbook and The Succeeding At Interviews Pocketbook. Introduction to Product Design and Development for Engineers provides guidelines and best practices for the design, development, and evaluation of engineered products. Created to serve fourth year undergraduate students in Engineering Design

modules with a required project, the text covers the entire product design process and product life-cycle, from the initial concept to the design and development stages, and through to product testing, design documentation, manufacturability, marketing, and sustainability. Reflecting the author's long career as a design engineer, this text will also serve as a practical guide for students working on their capstone design projects.
