A New York Times Best Seller Merging real stories with theory, research, and practice, a

prominent scholar offers a new approach to teaching and learning for every stakeholder in urban education. Drawing on his own experience of feeling undervalued and invisible in classrooms as a young man of color and merging his experiences with more than a decade of teaching and researching in urban America, award-winning educator Christopher Emdin offers a new lens on an approach to teaching and learning in urban schools. For *White Folks Who Teach in the Hood...and the Rest of Y'all Too* is the much-needed antidote to traditional top-down pedagogy and promises to radically reframe the landscape of urban

education for the better. He begins by taking to task the perception of urban youth of color as unteachable, and he challenges educators to embrace and respect each student's culture and to reimagine the classroom as a site where roles are reversed and students become the experts in their own learning. Putting forth his theory of Reality Pedagogy, Emdin provides practical tools to unleash the brilliance and eagerness of youth and educators alike—both of whom have been typecast and stymied by outdated modes of thinking about urban education. With this fresh and engaging new pedagogical

vision, Emdin demonstrates the importance of creating a family structure and building communities within the classroom, using culturally relevant strategies like hip-hop music and call-and-response, and connecting the experiences of urban youth to indigenous populations globally. Merging real stories with theory, research, and practice, Emdin demonstrates how by implementing the “Seven C’s” of reality pedagogy in their own classrooms, urban youth of color benefit from truly transformative education. For White Folks Who Teach in the Hood...and the Rest of Y’all Too has been featured in Mother Jones, Education Week,

"More than three million high-school students take five million Advanced Placement exams each May, yet remarkably little is known about how this sixty-year-old, privately-run program, has become one of U.S. education's greatest successes. From its mid-century origin as a tiny option for privileged kids from posh schools, AP has also emerged as a booster rocket into college for hundreds of thousands of disadvantaged youngsters. It challenges smart kids, affects school ratings, affords rewarding classroom

challenges to great teachers, tunes up entire schools, and draws vast support from philanthropists, education reformers and policymakers. AP stands as America's foremost source of college-level academics for high school pupils. Praised for its rigor and integrity, more than 22,000 schools now offer some-or many-of its thirty-eight subjects, from Latin to calculus, art to computer science. But challenges abound today, as AP faces stiffening competition (especially dual credit), curriculum wars, charges of elitism, misgivings by elite schools and universities, and the arduous work of infusing rigor into

schools that lack it and academic success into young people unaccustomed to it. In today's polarized climate, can Advanced Placement maintain its lofty standards and overcome the hostility, politics and despair that have sunk so many other bold education ventures? Advanced Placement: The Unsung Success Story of American Education is a unique account-richly documented and thoroughly readable-of the AP program in all its strengths and travails, written by two of America's most respected education analysts"-- Barron's AP Microeconomics/Macroeconomics with 4 Practice Tests provides an in-depth preparation for both AP

Economics exams through detailed review of all test topics. The College Board has announced that there are May 2021 test dates available are May 3-7 and May 10-14, 2021. The book includes: Two full-length practice tests (one in Microeconomics and one in Macroeconomics) with all test questions answered and explained Two diagnostic tests at the beginning of each section BONUS ONLINE PRACTICE TESTS: Students who purchase this book will also get access to two additional full-length online AP Microeconomics/Macroeconomics tests with all questions answered and explained. These online exams can be easily

accessed by smartphone, tablet, or computer. Discover the importance of economics in today's news and even everyday personal life as this book's unique, issues-oriented approach delves into engaging areas of interest.

Advanced Placement Macroeconomics is the go-to guide for helping high school teachers to prepare their students for the AP Macroeconomics Exam administered by the College Board. It is designed to provide a basic framework around which you can design an AP Macroeconomics course that best meets the needs of your students. The Teacher

Resource Manual provides unit overviews, lesson plan objectives, Teacher Alerts, Bell Ringer activities to jump-start each class, visuals, and answers to the student activities. The lessons include instructional activities that are not in the Student Resource Manual. By dividing the Macroeconomics and Microeconomics Teacher Resource Manuals in two and compartmentalizing various elements such as student activities solutions and sample multiple-choice question answer keys, the materials provide a more intuitive structure and easier navigation of content. When it's crucial crunch time and your Advanced Placement® exam is just around the corner, you need REA's Crash Course® for AP® Macroeconomics! About Our Author: Jason Welker teaches economics to nearly 100 students from 40 countries each year. Jason writes a blog for Economics students around

the world which can be read at www.welkerswikinomics.com. He has also led workshops on technology in the Economics classroom at AP® Summer Institutes and at the National Center for Economics Education conference in Washington, D.C. He has recently completed a textbook for the IB Economics curriculum, and is constantly developing and making available many other resources for Econ students through his website. His latest venture, Macroeconomics Crash Course, provides students with a powerful resource for use in preparation for their AP® exams. As two veteran teachers who have taught thousands of

students, Joe Clement and Matt Miles have seen firsthand how damaging technology overuse and misuse has been to our students. Rather than becoming better problem solvers, kids look to Google to answer their questions for them. Rather than deepening students' intellectual curiosity, educational technology is too often cumbersome and distracting, causing needless frustration and greatly extending homework time. Rather than becoming the great equalizer, electronic devices are widening the achievement gap. On a mission to educate and empower parents, Clement and Miles provide many real-world

examples and cite multiple studies showing how technology use has created a wide range of cognitive and social deficits in our young people. They lift the veil on what's really going on at school: teachers who are powerless to curb cell phone distractions; zoned-out kids who act helpless and are unfocused, unprepared, and antisocial; administrators who are too-easily swayed by the pro-tech "science" sponsored by corporate technology purveyors. They provide action steps parents can take to demand change and make a compelling case for simpler, smarter, more effective forms of teaching and learning. FTCE

In the Great Recession of 2007-2010, Americans watched their retirement savings erode and the value of their homes decline while the unemployment rate increased and GDP sank. New demands emerged for unprecedented government intervention into the economy. While these changes have a dramatic impact on society at large, they also have serious implications for the content and teaching of economics. Teaching Economics in a Time of Unprecedented Change is a one-stop collection that helps pre- and in-service social studies teachers to foster an

understanding of classic content as well as recent economic developments. Part I offers clear and teachable overviews of the nature of today's complex economic crisis and the corollary changes in teaching economics that flow from revising and updating long-held economic assumptions. Part II provides both detailed best practices for teaching economics in the social studies classroom and frameworks for teaching economics within different contexts including personal finance, entrepreneurship, and history. Part III concludes with effective strategies for teaching at the elementary and secondary school levels based

on current research on economic education. From advice on what every economics teacher should know, to tips for best education practices, to investigations into what research tells us about teaching economics, this collection provides a wealth of contextual background and teaching ideas for today's economics and social studies educators.
