Tiny But Mighty Feb 09 2021 *A New York Times Bestseller* #1 National Bestseller Indie Bestseller From Kitten Lady, the professional kitten rescuer, humane educator, animal advocate, and owner of the popular Instagram @kittenxlady comes the definitive book on saving the most vulnerable—and

adorable—feline population: newborn kittens. Hannah Shaw, better known as Kitten Lady, has dedicated her life to saving the tiniest felines, but one doesn't have to be a professional kitten rescuer to change—and save—lives. In *Tiny but Mighty*, Hannah not only outlines the dangers newborn kittens face and how she combats them, but how you can help every step of the way, from fighting feline overpopulation on the streets to fostering unweaned kittens, from combating illness to combating compassion fatigue, from finding a vet to finding the purrfect forever home. Filled with information on animal welfare, instructional guides, and personal rescue stories of kittens like Chloe, Tidbit, Hank, and Badger—not to mention hundreds of adorable kitten photos—*Tiny but Mighty* is the must-have kitten book for cat lovers, current-and-future rescuers, foster parents, activists, and advocates.

Total Cat Mojo Oct 08 2020 This comprehensive cat care guide from the star of the hit Animal Planet show "My Cat from Hell," Jackson Galaxy, shows us how to eliminate feline behavioral problems by understanding cats' instinctive behavior. *Cat Mojo* is the confidence that cats exhibit when they are at ease in their environment and in touch with their natural instincts—to hunt, catch, kill, eat, groom, and sleep. Problems such as litter box avoidance and aggression arise when cats lack this confidence. Jackson Galaxy's number one piece of advice to his clients is to help their cats harness their mojo. This book is his most comprehensive guide yet to cat behavior and basic cat care, rooted in understanding cats better. From getting kittens off to the right start socially, to taking care of cats in their senior years, and everything in between, this book addresses the head-to-toe physical and emotional needs of cats—whether related to grooming, nutrition, play, or stress-free trips to the vet.

Vaccination: Examining the Facts Mar 13 2021 Each title in the Contemporary Debates series examines the veracity of controversial claims or beliefs surrounding a major political/cultural issue in the United States. They do so to give readers a clear and unbiased understanding of current issues by informing them about falsehoods, half-truths, and misconceptions—and confirming the factual validity of other assertions—that have gained traction in America’s political and cultural discourse. This latest addition to the series is the first reference work on vaccines written through the lens of the Covid-19 pandemic. It asks—and answers—questions raised by the pandemic, such as how vaccines work, what causes side effects, and how Covid-19 vaccines were developed so quickly. It also addresses broader questions, such as how to protect vaccine supply chains and how to prevent public health issues from being politicized. In addition to correcting or clarifying well-known misinformation and misunderstandings about vaccines (such as false claims that they have been linked to autism), this book also provides up-to-date research on ways to counter disinformation and decrease vaccine hesitancy.

Expert Crystal Rector, raised in a feline-loving family, has studied cats since early childhood. Spending her spare time with the many barn cats on the farm where she was raised, she dreamed for years that one day she would photograph them for a living, but instead found herself working in various roles within the veterinary industry for a collective ten years. Opportunities to take care of veterinary client animals laid the foundation for what would eventually become her full-time business in the Phoenix, Arizona area as Crystal the Pet Nanny. Although she takes care of all kinds of animals, Crystal is a feline specialist and has an exceptional affinity for cats, with particular interest in behavior and enrichment. This interest led her to earn the Diploma of Distinction in Feline Behavior and Psychology from the Centre of Excellence. She shares her life with her husband Sean, who keeps her from becoming a crazy cat collector, her dog Stella, a fish she calls “Fishy Friend”, and her beautiful cat Josie – who is queen of all she surveys. HowExpert publishes quick 'how to' guides on all topics from A to Z by everyday experts.

A fully searchable enhanced eBook version is included with print purchase, allowing access to all of the text and figures on a variety of digital devices. More than 150 internationally recognized experts contribute chapters on topics in their field of specialty. Clear and logical organization of chapters provides a solid basis for an approach to diseases caused by specific pathogens, with the first part of the book including sections on diagnostic approaches, treatments (including recommended antimicrobial drug doses), and prevention. Specific pathogens are addressed in the second part of the book, using a structured approach that includes

etiology/epidemiology (relevance to wildlife animal hosts, role of the environment), clinical and laboratory findings, treatment, prevention, and public health implications. Case examples illustrate principles and highlight how the material can be applied. More than 800 clinical images, maps, life cycles, and photomicrographs assist with accurate understanding of epidemiology, pathogenesis, diagnosis of disease, and disease prevention. Visually appealing maps and life-cycle drawings enhance your comprehension and retention of the material. Convenient drug dosage tables in each chapter provide complete prescribing information; chapters on antimicrobial drugs in the first part of the book summarize pharmacokinetics, indications, contraindications, handling and administration guidelines; and dosage recommendations are made for antivirals, antibacterials, antifungals, antiprotozoals, and antiparasitic drugs. The book emphasizes approaches to optimize antimicrobial stewardship. Clinical Problems section helps you understand what infectious diseases should be considered in animals seen with clinical signs relating to different organ systems. Suggested readings and references are listed in each chapter, facilitating further research and study. Fully searchable enhanced eBook version is included with print purchase, allowing access to all of the text and figures on a variety of digital devices.

Vaccines for Veterinarians E-Book Oct 20 2021 Both a theoretical text and a practical handbook, *Vaccines for Veterinarians* is the first of its kind to bring the basic science of animal vaccination and the practical details of vaccine use together in one single volume. From the first chapter on the history of vaccination and the triumph of rinderpest eradication to the last chapter on the rapidly emerging field of cancer vaccines, this book offers a truly comprehensive grounding in established and emerging vaccines for both major and minor species. Specific topics include viral vectored vaccines, DNA-plasmid vaccines, RNA vaccines, reverse vaccinology, the complexities of adjuvant use, vaccine failures and adverse events, vaccine production and regulation, robotic vaccination machines, contraceptive and production-enhancing vaccines, and so much more. At a time when resistance to human vaccination is receiving much publicity, this evidence-based book is the

ideal counter to ill-informed speculation — serving as a timely reminder that vaccination is essential for the control of infectious diseases in animals. Well-respected and experienced veterinary author, Ian Tizard, provides expert guidance on the topic of vaccinations and immunology in veterinary medicine. Expert Consult site offers an online version of the book, making it easy to search the entire book electronically. The latest information on viral vectored vaccines keeps you up-to-date on the topic as well as the properties and relative advantages of currently used vectors in animal vaccines. Survey of vaccine responses covers the different mechanisms by which the immune system responds to different types of vaccines. Inclusion of the latest vaccine technologies discusses the advantages and disadvantages of DNA-plasmid vaccines, RNA vaccines, and more. Coverage of adverse events and hypersensitivities includes the best ways to treat them and report them. Coverage of passive immunization discusses the growing use of therapeutic monoclonal antibodies in veterinary medicine. Coverage of immunotherapy includes recent improvements and new products in both active and passive immunotherapy against animal cancers.
