INSTAGRAM? This app suddenly took the world by storm and it's easy to see why. First of all, it's super easy to use: you don't have to be a genius of technology to be able to use it and take advantage of its features to your advantage. Secondly, society has slowly transformed us into individuals obsessed with sharing the images we like and the images of ourselves - we have even added a new word in our common use: "SELFIE". Take a look around, when you are in a public place, you would see how many people are glued to their phone, completely lost in awareness of what is happening around them. It has become part of our life that without it, we feel like we can't function perfectly. Social media refers to platforms that facilitate the sharing of information, interests and career ideas via networks and virtual communities. All social media platforms are interactive, which means that the user is given the opportunity to interact with the platform by publishing their content, images, modifying the content and even deleting it. Instagram is one of the hottest social media platforms in the world right now and for good reason. It offers many unique opportunities for companies to grow their audiences, stand in front of potential customers and start making sales through the Internet. If you are running a company or if you are planning to start one, using Instagram to your advantage is necessary if you want to create maximum growth in your business in the 2020-2021

period. Instagram has always been a visual narrative social media platform since it started filling with beautiful photographs and people sharing their stories through images. Over the past two years, Instagram has expanded to include stories, live videos and now IGTV that can all be incorporated into your branding and disclosure strategies. As you will learn in this book, the more ways you generate interaction with your audience via Instagram, the more followers you get and the greater your traction on this platform.
