Experienced economics editors discuss navigating the world of scholarly journals, with details on submission, reviews, acceptance, rejection, and editorial policy. Editors of academic journals are often the top scholars in their fields. They are charged with managing the flow of hundreds of manuscripts each year—from submission to review to rejection or acceptance—all while continuing their own scholarly pursuits. Tenure decisions often turn on who has published what in which journals, but editors can accept only a fraction of the papers submitted. In this book, past and present editors of economics journals discuss navigating the world of academic journals. Their contributions offer essential reading for anyone who has ever submitted a paper, served as a referee or associate editor, edited a journal—or read an article and wondered why it was published. The editors describe their experiences at journals that range from the *American Economic Review* to the *Journal of Sports Economics*. The issues they examine include late referee reports, slow resubmission of manuscripts, and plagiarism—as well as the difficulties of “herding cats” and the benefits of husband-wife editorial partnerships. They consider the role of the editor, as gatekeeper or developer of content; and they advise authors to write more carefully and clearly, to include citations that locate their articles in the context of the existing literature, and to update their work after it has been submitted and rejected elsewhere. The chapters also offer a timely, insider's perspective on the general effectiveness of the system of academic journals in economics. Contributors Richard V. Adkisson, Richard G. Anderson, William A. Barnett, Suzanne R.

Plagiarism is a pervasive issue, but it can occur innocently enough. A student researcher may copy and paste some content or facts between files, and forget to rephrase the information. A simple oversight can have far-reaching, legal ramifications in today's world that sends messages to the world within seconds. This volume helps readers understand and navigate through the issues relating to plagiarism. Is plagiarism the same as copyright violation? Is the surge in plagiarism the result of a growing, dishonest society?

Will emphasizing personal integrity prevent plagiarism? These questions and others are answered through this collection of compelling essays. Plagiarism is a problem with far-reaching consequences for the sciences. However, even today 's best software-based systems can only reliably identify copy & paste plagiarism. Disguised plagiarism forms, including paraphrased text, cross-language plagiarism, as well as structural and idea plagiarism often remain undetected. This weakness of current systems results in a large percentage of scientific plagiarism going undetected. Bela Gipp provides an overview of the state-of-the art in plagiarism detection and an analysis of why these approaches fail to detect disguised plagiarism forms. The author proposes Citation-based Plagiarism Detection to address this shortcoming. Unlike character-based approaches, this approach does not rely on text comparisons alone, but analyzes citation patterns within documents to form a language-independent "semantic fingerprint" for similarity assessment. The practicability of Citation-based Plagiarism Detection was proven by its capability to identify so-far non-machine detectable plagiarism in scientific publications.
