*Manual on Use of Self-Propelled Modular
Transporters to Remove and Replace Bridges May
21 2022 The use of self-propelled modular
transporters (SPMTs) for bridge moves was the
top implementation recommendation of the 2004
Prefabricated Bridge Elements and Systems
International Scan sponsored by the Federal
Highway Administration (FHWA), the American*

Association of State Highway and Transportation Officials (AASHTO), and the Transportation Research Board's National Cooperative Highway Research Program. Prefabrication of bridges offsite under more controlled conditions followed by rapid installation onsite can achieve quality installations in significantly less time than the months or years typically required for conventional bridge construction. The use of SPMTs in combination with prefabrication should be considered for all bridge replacement projects in locations with high traffic volumes. The purpose of the scan was to learn how other countries use prefabricated bridge components to minimize traffic disruption, improve work zone safety, reduce environmental impact, improve constructability, enhance quality, and lower life-cycle costs. The scan team learned that European countries frequently use SPMTs to lift and drive bridges to their final location in just minutes. SPMTs are computer-controlled platform vehicles that can move bridge systems weighing up to several thousand tons with precision to within a fraction of an inch. The prefabrication of bridges offsite under controlled conditions followed by rapid installation onsite can achieve quality installations with traffic impacts of minutes to a

few hours compared to the months typically required for conventional onsite bridge construction. The significantly reduced onsite construction time when using SPMTs to move prefabricated bridge superstructures, for example, is due to the collapse of the sequential processes of conventional onsite bridge construction to just one step: moving the prefabricated superstructure from the staging area to its final position. This technology should be considered for all bridge replacement projects where reduced onsite construction time is a priority. The manual provides details from project conception to completion for using SPMTs to remove or install a bridge. It describes equipment, lists benefits and costs, and identifies criteria to determine when this technology is appropriate. It also addresses planning-related issues such as traffic considerations and site requirements. Design issues discussed include temporary shoring and prefabrication requirements, allowable temporary stresses and deflections during the move, and possible design efficiencies because of offsite prefabrication. Contracting issues covered include staging area requirements and contracting strategies for reduced onsite construction time. Using this

manual in combination with the FHWA decisionmaking framework and analysis of delayrelated user costs should provide the guidance that bridge owners and other bridge professionals need to understand the technology, determine whether using SPMTs will benefit a specific bridge project, and develop contract documents that incorporate the technology.

Journal Journey from Ego to Discover— • How To Recognize Ego Processes • How To Remove Ego Processes • How To Replace Ego Processes • How To Journal for Freedom from Ego • 32 Charts Available to Help You Journal to Freedom • This book is about how to journal to improve counseling outcomes, gains, and results. • The journaling methods described in this book can be used with any counseling theory. • However, this book is designed to be used by people in counseling who work to reduce and eliminate their ego. • Such persons will have become aware that removing the underlying factors that cause and maintain problems means removing the ego. • Specifically, this book is best suited for those using Mind Your Ego or Rational Emotive Behavior Therapy (REBT) to reduce and remove their ego from their lives. 15 Questions to Repeatedly Ask Yourself • This journaling system is based on your following and processing 15 Questions related to the nature of self and ego. • Included are

explanations and examples of the 15 Questions and how to practice them. • The bulk of your journaling practice will be recording your understanding and application of these 15 Questions. • In using the system, you will emphasize some questions more than others, and which questions you emphasize will vary and change at different times. • You may also find yourself rewriting, adapting, adjusting, and modifying the questions to suit your particular issues and needs. More on Ego Creation • This book also includes information on scripting and how scripting is used to form ego identities. • The chapter after scripting covers ways that we maintain our ego identities. • Further chapters help with the three processes of recognizing, removing, and replacing ego identities. • Some discussion follows those chapters on the nature of positive ego and spiritual pride. • Finally, there is more information in the Appendixes on such topics as the 3Rs, defense mechanisms, and basic fundamental skills. Check with Your Counselor • Consult with your counselor to see if you and your counseling can benefit from the use of this book. • Your counselor may have an approach not mentioned that is entirely compatible with this book, or your counselor may

perceive this book as a distraction or a hindrance to the work you are currently engaged in.

Companion to Mind Your Ego • You can consider this book a companion piece to Mind Your Ego by Kevin Everett FitzMaurice. • Mind Your Ego

provides a system with specific plans to Recognize, Remove, and Replace (3Rs) your ego.

• This book provides a system to journal your progress in recognizing, removing, and replacing your ego. • The more you reduce the ego in your life, the more you will reduce negative stress, unneeded problems, and ego-created problems and conflicts in your life.

Release, Remove, Replace Jul 31 2020 What no longer serves us, must be released for something greater. Holding on blocks our life's desires, because we can't see the future with cloudy vision. Distractions are clouding our vision, so we must release and remove those things. Once we do this, we can replace the old with our new desires. Journaling is our way of creating the life we deserve and it feels magical when it all unfolds.
