"... brilliant, well-researched, and highly informative biography ..., a much-needed work to clear the air still befouled by misunderstanding and prejudice". Mani Shankar Aiyar, Former minister, Govt. of India "An authentic biography of an enlightened, secular, grassroot Muslim leader by his son, the closest associate in his journey of life. It provides insight into the hectic political activities and deep churning in Muslim polity of north India during his time...." Sakina Yusuf Khan, Senior Journalist, former Deputy Editor, The Speaking Tree, The Times of India "Wings of Destiny does justice to the life and political activities of Ziaur Rahman Ansari Sahib. We were ministerial colleagues in Rajiv Gandhi's government. I congratulate the author for writing this gripping biography of so eminent a Congress leader." K. Natwar Singh, former External Affairs Minister, Govt. of India "A son's befitting tribute - Ziaur Rahman Ansari was an outstanding community leader, firmly rooted in his Islamic beliefs and unflinching loyalty towards the Indian National Congress. Fasih clears lot of fog from the controversies that dodged Ansari's otherwise remarkable and inspirational life." Rasheed Kidwai, Senior Journalist and Author "I had the good fortune of working with Ziaur Rehman Ansari saheb when he was minister of state in the ministry of shipping and transport, and I was a joint secretary in the same

ministry. He was a thorough gentleman and a competent administrator. He felt sorry when he learned that I was planning to quit the service and tried to persuade me from doing so. But fate had willed otherwise. I am happy that the author has put together his life and times in this very readable book.”

Yashwant Sinha, former minister for Finance, Govt. of India

Microemulsions are known for their versatile properties widely utilized in fundamental research and industrial applications. They are thermodynamically stable mixtures structured on a colloidal length scale with an amphiphilic film separating water- and oil-rich domains. However, recent studies claim the existence of “surfactant-free microemulsions,” which exhibit structures on a molecular length scale. By means of systematic phase behavior and scattering experiments, this dissertation provides deep insights into the pathway from simple solutions to weakly and strongly structured microemulsions. With bulk-contrast SANS, the scattering behavior of a simple solution system made of water, cyclohexane, 1- and 2-propanol was found to be dominated by critical composition fluctuations (Ornstein-Zernike). Further analysis of critical phenomena revealed the critical exponent doubling that follows the scaling law $\gamma \sim “2” \nu$. On the other hand, weak scattering signals described with a new model were detected in the film-contrast SANS data due to the nearby tricritical point (TCP). After crossing the TCP, the formation of well-defined amphiphilic films was demonstrated by increasing the amphiphilicity of the amphiphile. Subsequently, the influence of modifications of the amphiphilic film by adding novel diblock polymers was studied. As a result, enhanced efficiency and strengthened

structural ordering were achieved in typical alkane microemulsions and novel CO₂ microemulsions. Finally, the properties of industry-relevant microemulsions were investigated in two application-oriented projects. One project focused on the phase behavior and the microstructure of polyol-rich CO₂ microemulsions, which can be used for the polyurethane (PU) foam production with cell sizes of a few micrometers. The other project focused on the formulation of optimum microemulsions stabilized by highly efficient extended surfactants. The experimental parameters from phase behavior studies helped determine the coefficients of the HLD equation, which can serve as a prediction tool for tackling a wide variety of formulation problems. Above all, this doctoral dissertation elucidated the pathway toward structured microemulsions and demonstrated versatile aspects of microemulsions' applications. This book is about Iranian boundaries at a time when crisis of various nature are occurring around Iran, especially in Iraq and Afghanistan, with immediate effect on the Iranian borderlands and substantial effect of Iran's relations with her neighbours. Furthermore, issues like the legal regime of the Caspian Sea and the UAE claims on the Iranian-owned and Iranian-held islands of Tunbs and Abu Musa in the Persian Gulf create a situation in Iran's neighbourhood, which influence her foreign relations and engage the country in matters of international importance. Occurrence of all these issues on and around the boundaries of Iran and a thorough study of the unexplored foundation and evolution of these issues within the framework of the study of the Iranian boundaries make this book timely, special, original, and important. Using e-business technologies to

manage supply chains increases the efficiency and performance of logistics, production, distribution and other related activities. E-Business and Supply Chain Integration explains how a number of tools can be integrated to produce an e-supply chain, with the overall aim of achieving higher productivity. This essential book examines supply chain theories along with real life cases and examples from industry to illustrate how e-business can enhance supply chain integration and highlights the negative outcomes when it is neglected and poorly managed. Dr Ozlem Bak and a team of expert contributors from practice and academia assess the impact of e-business on numerous different sectors, such as automotive, healthcare, logistics, higher education, and professional services. E-Business and Supply Chain Integration explains the strategic implications of new technologies and provides guidance on effective supply chains in e-businesses. This volume provides a critical and comprehensive assessment of the most recent research and opinion from across the globe for anyone practising in nano-allied fields or wishing to enter the nano-world. This text is designed to present a comprehensive and state-of-the-art approach to the current and future status of POEM. Sections address preliminary issues faced by surgeons and gastroenterologists who are interested in implementing this procedure into their treatment armamentarium. These areas include the evolution of the technique, training and credentialing, as well as tools and platforms commonly used for POEM. Subsequent chapters focus on specific disease processes, and future applications of the technique. Written by experts in POEM, Per Oral Endoscopic

Myotomy (POEM) addresses patient selection, pre-operative considerations, technique, and avoiding complications. A brief editorial review of the existing literature addressing the particular topic follows in each section. The text concludes with chapters on emerging and future applications. Extensive endoscopic images and illustrations make this an interactive text for General Surgeons, Surgical Endoscopists, Gastroenterologists, and associated subspecialists. The book is about history of the Baloch conflict with Iran and Pakistan. The work describes and analyzes, from the very beginning, the protracted and bloody struggle of the Baloch against Iran and Pakistan. It is an attempt to answer some of the pertinent questions regarding the background and contextual factors of this long-drawn conflict. The book analyzes the strength and weaknesses of opposing parties in the conflict, and it discusses the role of regional and international interest groups. It is also an overview of the problems facing the Baloch national struggle in both countries and prospects for the success of the Baloch resistance in near future. The Baloch National Struggle in Pakistan discusses the relevance of the principle of the right of self-determination in the context of rising trends towards ethnic nationalism in Afro-Asian countries. The book deals with the emerging conflict of the Baloch with Pakistan and Iran. It also discusses the geopolitical and geostrategic repercussions of any re-demarcations of the boundaries of Pakistan and Iran on the region and long-term policies of world powers. The book gives an insight into the political psychology and cultural traits of the Baloch struggle for safeguarding their historic personality, political sovereignty, and their

national and cultural survival in Iran and Pakistan. Questo volume raccoglie gli atti del convegno nazionale dell'Associazione Italiana Alexander von Humboldt, tenutosi presso il Centro italo-tedesco per il dialogo europeo Villa Vigoni, (Lovenò di Menaggio) dall'11 al 14 aprile 2019. Il convegno, dal titolo Kosmos nel XXI Secolo, dedicato alla celebrazione dei 250 anni dalla nascita di Alexander von Humboldt, si è proposto come una rivisitazione in chiave attuale dell'ultimo lavoro di Humboldt e suo testamento spirituale Kosmos - Entwurf einer physischen Weltbeschreibung. Partendo dalla immagine integrata e coerente del cosmo proposta da Humboldt, il convegno si è delineato come una vivace occasione di dibattito interdisciplinare su questioni di interesse globale e di grande attualità. Temi inerenti al fabbisogno energetico, alla biodiversità, ai viaggi, alla comunicazione, alle migrazioni, alla poesia, alla storia e alla geografia sono stati affrontati con interesse e spirito costruttivo tra discipline scientifiche e umanistiche nel suggestivo contesto di Villa Vigoni e del lago di Como. Il convegno, sostenuto dalla fondazione tedesca Alexander von Humboldt, è stato aperto e concluso dai rappresentanti istituzionali della Repubblica Federale di Germania ed ha avuto una ampia partecipazione nazionale ed internazionale. Dieser Sammelband enthält die Beiträge zur nationalen Konferenz der italienischen Alexander von Humboldt Gesellschaft, die vom 11. bis 14. April 2019 im Deutsch-Italienischen Zentrum für Europäischen Dialog Villa Vigoni in Lovenò di Menaggio (Como) stattfand. Die Konferenz mit dem Titel Kosmos im XXI. Jahrhundert widmete sich der 250 Jahr-Feier des Geburtstags Alexander von Humboldts und bot somit einen

aktuellen Blick auf Humboldts letztes Werk und sein geistiges Erbe: Kosmos - Entwurf einer physischen Weltbeschreibung. Ausgehend von Humboldts Bild des Kosmos, bot die Konferenz eine lebendige Gelegenheit für eine interdisziplinäre Debatte über Fragen von globalem und aktuellem Interesse. Fragen der Energienachfrage, Biodiversität, Reisen, Kommunikation und Migration, Poesie und Geschichte sowie Geographie wurden behandelt und in einem interessanten und konstruktiven Vergleich zwischen den Disziplinen im wissenschaftlich und humanistisch Kontext von Villa Vigoni diskutiert. Die Konferenz, unterstützt von der Alexander von Humboldt Stiftung, wurde von den institutionellen Vertretern der Bundesrepublik Deutschland eröffnet und hatte eine große nationale sowie internationale Beteiligung. This book presents a review of the existing literature on natural mycotoxins to create a comprehensive reference for mycotoxin levels. Each entry includes contamination, concentration rate, mostly mean mycotoxin concentration of organs (human and animal) and country of origin of the sample. Due to the serious spoilage and health issues the presence of mycotoxins can cause, it is imperative that corresponding scientists, health institutions and the food and feed industries have a more qualified understanding of mycotoxins in living things. To this end, Natural Mycotoxin Contamination in Humans and Animals provides an excellent resource. The present book complements the series of the author's previous books, Mycotoxins in Feedstuffs and Mycotoxins in Foodstuffs, in that it is a review of the literature to create a comprehensive reference for mycotoxin levels. As with Mycotoxins and their Metabolites in Humans

and Animals, the focus remains the same, but the scope now covers natural mycotoxins only.

Comprehensive reference of natural mycotoxin levels in humans and animals Easy-to-use database of mycotoxins Each entry is comprehensive These proceedings represent the work of researchers participating in the 6th International Conference on Innovation and Entrepreneurship (ICIE 2018) which is being co-hosted by Georgetown University and George Washington University and is being held at The University of the District of Columbia (UDC) on 5-6 March 2018. Dr. Yasin Aatir (Full Name: Muhammad Yasin Sheikh) is a medical graduate from Dow Medical College Karachi, Pakistan. Besides being an internationally renowned Gastroenterologist and Hepatologist, he is a well-known poet of Urdu Language. This book, entitled "Ishq Waseelah" is Dr. Yasin Aatir's first collection of poetry. The book has about 100 ghazals selected from his literary work over the last thirty years. Dr. Yasin Aatir has enjoyed the company of many renowned poets, such as John Ailia, Ahmed Faraz, Parveen Shakir, Mohsin Bhopali, Obaidullah Aleem, Saleem Kausar and Jamal Ahsani. He participated in several local and international Mushaera held over time in various cities in the United States. This book examines educational semiotics and the representation of knowledge in school science. It discusses the strategic integration of animation in science education. It explores how learning through the creation of science animations takes place, as well as how animation can be used in assessing student's science learning. Science education animations are ubiquitous in a variety of different online sites, including perhaps the most popularly accessed

YouTube site, and are also routinely included as digital augmentations to science textbooks. They are popular with students and teachers and are a prominent feature of contemporary science teaching. The proliferation of various kinds of science animations and the ready accessibility of sophisticated resources for creating them have emphasized the importance of research into various areas: the nature of the semiotic construction of knowledge in the animation design, the development of critical interpretation of available animations, the strategic selection and use of animations to optimize student learning, student creation of science animations, and using animation in assessing student science learning. This book brings together new developments in these research agendas to further multidisciplinary perspectives on research to enhance the design and pedagogic use of animation in school science education. Chapter 1 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com. The Most Authentic Source Of Information On Higher Education In India The Handbook Of Universities, Deemed Universities, Colleges, Private Universities And Prominent Educational & Research Institutions Provides Much Needed Information On Degree And Diploma Awarding Universities And Institutions Of National Importance That Impart General, Technical And Professional Education In India. Although Another Directory Of Similar Nature Is Available In The Market, The Distinct Feature Of The Present Handbook, That Makes It One Of Its Kind, Is That It Also Includes Entries And Details Of The Private Universities Functioning Across The Country. In This Handbook, The Universities Have Been Listed In An Alphabetical Order.

This facilitates easy location of their names. In addition to the brief history of these universities, the present handbook provides the names of their vice-chancellor, professors and readers as well as their faculties and departments. It also acquaints the readers with the various courses of studies offered by each university. It is hoped that the handbook in its present form, will prove immensely helpful to the aspiring students in choosing the best educational institution for their career enhancement. In addition, it will also prove very useful for the publishers in mailing their publicity materials. Even the suppliers of equipment and services required by these educational institutions will find it highly valuable.

An essential introduction to global health in the modern world

Foundations for Global Health Practice offers a comprehensive introduction to global health with a focus on ethical engagement and participatory approaches. With a multi-sectoral perspective grounded in Sustainable Development Goals, the text prepares students for engagement in health care and public health and goes beyond traditional global health texts to include chapters on mental health, agriculture and nutrition, water and sanitation, and climate change. In addition to presenting core concepts, the book outlines principles for practice that enable students and faculty to plan and prepare for fieldwork in global health. The book also offers perspectives from global health practitioners from a range of disciplinary and geographic perspectives. Exercises, readings, discussion guides and information about global health competencies and careers facilitate personal discernment and enable students to systematically develop their own professional goals

and strategies for enriching, respectful, and ethical global health engagement. Understand the essential concepts, systems, and principles of global health Engage in up-to-date discussion of global health challenges and solutions Learn practical skills for engagement in health care and beyond Explore individual values and what it means to be an agent for change Prevention, cooperation, equity, and social justice are the central themes of global health, a field that emphasizes the interdisciplinary, cross-sector, and cross-boundary nature of health care on a global scale. As the world becomes ever smaller and society becomes more and more interconnected, the broad view becomes as critical as the granular nature of practice. Foundations for Global Health Practice provides a complete and highly relevant introduction to this rich and rewarding field. Sponsoring Sufism argues that governments are sponsoring Sufism not only because they see it as an 'apolitical' movement that won't challenge their existing authority, but also that ties to Sufi orders gives them religious credibility, something they seek as they face the rise of Islamist parties. Technological innovations in the banking sector have provided numerous benefits to customers and banks alike; however, the use of e-banking increases vulnerability to system attacks and threats, making effective security measures more vital than ever. Online Banking Security Measures and Data Protection is an authoritative reference source for the latest scholarly material on the challenges presented by the implementation of e-banking in contemporary financial systems. Presenting emerging techniques to secure these systems against potential threats and highlighting theoretical foundations and real-world

case studies, this book is ideally designed for professionals, practitioners, upper-level students, and technology developers interested in the latest developments in e-banking security. This volume is the outcome of an international cooperation between 73 scientists, experts, and practitioners from many countries, disciplines, and professional areas. As a part of a series of CERES publications, the volume attempts to contribute to the scientific debate about the food-biodiversity-climate nexus by developing a comprehensive region-specific and broader global understanding of the linkages between these areas, especially in the context of Global South. Instead of providing only modern science-based solutions for the nexus related challenges, the volume covers case studies that present mixed solutions, offering the use of traditional ecological knowledge in combination with modern science for both resilience and sustainability. This is increasingly instrumental in shaping the needed response options regarding the economic, social, and environmental future of the world. Based on a multi-regional and cross-sectoral analysis, the approach consists of: assessing the different natural and anthropogenic factors currently affecting ecosystems and their services, especially the impacts of climate change; highlighting the different linkages between the state of biodiversity and food systems in many contexts and scales; and exploring the various response mechanisms to effectively manage the implications of such linkages. Most chapters provide inputs for future relevant research and policy agendas. A study of the changes that have taken place in the various sectors of the economy and the factors that currently influence economic development and policy

in Saudi Arabia. The effects of the changes in oil revenues on the economy and the Kingdom's development strategy are discussed. The International Conference on Emerging Trends in Artificial Intelligence and Smart Systems (Theetas-2022) has organized by The Computer Society of India, Jabalpur Chapter and Department of Computer Science, AKS University, Satna. Artificial Intelligence has created a revolution in every aspect of human life. Techniques like machine learning, deep learning, natural language processing, robotics are applied in various domains to ease the human life. Recent years have witnessed tremendous growth of Artificial Intelligence techniques & its revolutionary applications in the emerging smart city and various automation applications.

THEETAS-2022 will provide a global forum for sharing knowledge, research, and recent innovations in the field of Artificial Intelligence, Smart Systems, Machine Learning, Big Data, etc. This Conference will focus on the quality work and key experts who provide an opportunity in bringing up innovative ideas. The conference theme is specific & concise in terms to the development in the field of Artificial Intelligence & Smart Systems. This unique book focuses on environmental degradation in Asian countries including land degradation and soil erosion. The land degradation covers assessing environmental degradation using geospatial technology, land use land cover mapping, environmental and anthropogenic degradation, assessment of land degradation vulnerability, evaluation of the impact of earthquake and the environmental control of the sand dunes. It also addresses the soil degradation and environmental pollution and presents several case studies such as

tectonic activity and erosion, assessment of aircraft sound, soil degradation assessment for the arid territories, soil pollution, waste engine oil contamination, soil degradation, soil erosion modelling, land use and land cover change and its effect on soil erosion changes. Additionally, the book discusses the impact of climate change, and human activities including urban environmental quality, air pollution and the impact of armed conflict on the environment. Moreover, topics such as vegetation degradation including forest changes, hydrological and agricultural drought are presented. The book includes authors and scientists from Egypt, Iraq, Iran, India, Mongolia, United Arab Emirates, Uzbekistan, Republic of Kazakhstan, USA, Turkey, South Africa, Italy, China, Malaysia, Poland and Russia. Graduate students, researchers, engineers, policy planners, policymakers and stockholders could benefit from the information and the knowledge in this book. This book is the first volume to explore, in breadth and in depth, the field of mental health in Qatar. The development of mental health services and the support of mental health research are currently priority areas in the strategic vision of this country. Bringing together the voices of experts in the field working in service of this vision, this volume covers everything from the history of mental health systems, administrative and academic growth and challenges, and the treatment of all ages and special populations, to mental health challenges at schools and in the workplace. Within each section, contributors drawn from across the range of mental health disciplines in Qatar discuss the developments and the challenges faced in this rapidly developing country. The book will appeal to practitioners,

researchers, administrators, academics, students, and the general reader both within Qatar and beyond. Balochistan is a large mountainous desert region in southwestern Asia that is rich in natural resources and has been a geopolitically crucial location since the dawn of civilization. **The Longest March: Balochistans Struggle for Human Rights and Self-Determination** provides a fresh perspective and detailed analysis of Balochistans rich history, culture, and the Baloch peoples struggle for liberation. The team at Balochi TV Online exposes the social deprivations and human rights abuses inflicted upon the Baloch people by the occupying states. Formerly its own sovereign country, for the past seventy years, Balochistan has been occupied by Pakistan and Iran. Ever since the occupation of Balochistan began, the Baloch people have been subjected to a systematic campaign of enforced disappearances, extrajudicial killings, and violent military operations. Despite the Baloch peoples efforts to raise awareness of the human rights abuses in Balochistan on the world stage, the international community has thus far failed to respond. Since 2015, the Balochi TV Online team has tirelessly worked to document and broadcast these atrocities. Complete proceedings of the 5th International Conference on IS Management and Evaluation - Shaanxi, China Published by Academic Conferences and Publishing International Limited Economic aid is one of the cornerstones of the Egyptian-American relationship, and plays a significant role in promoting US policy objectives in the Middle East. Focusing on the latter half of Hosni Mubarak's rule, Dina Jadallah argues that, through its aid policy, the US has attempted to use a reforming and democratising narrative to transform Egypt into a

stable "market democracy" that would be aligned with US interests in the region. This aim has been pursued in conjunction with one that promoted a comprehensive "warm peace" with Israel. By highlighting the opposition within Egypt to US aid, Jadallah analyses the key issues that came to the fore during the 2010/11 protests in the country and led to the downfall of Mubarak. Extending her analysis into the post-revolutionary period, the author provides interviews with regime insiders and prominent critics, inside state institutions and outside, who actively challenged the regime. This enables her to assess the different perceptions of US aid both under Mubarak and in the current political situation, contributing to an incisive analysis of modern Egypt and its relations with its superpower ally in the region.

Rohit Shetty Indian Literary Industry has come up with many authors who have received both national and international acclaim but amidst this, poetry has been sidelined and publishers do not publish poetry stating the lack of market, and as a result many talented writers or I must say poets fail to get their books out or get their poems published. First Step Publishing realises this situation and has come up with a collection of poems from poets across India, poets coming from all walks of life, Doctors, Engineers, Bankers, Students, Homemakers, Previously published poets, many to be published for the first time. Minds@Work is an annual book by First Step Publishing. Minds@Work 2 had no topic or content to be printed till I had a casual discussion with one of the entrants over coffee and realised that an anthology of poems can be done for this edition, so an online campaign was started calling in for entries. We were overwhelmed with the kind of response we received

and had a tough time in selecting poets as every entry deserves to be a part of Minds@Work2. I would like to thank the entire team of First Step Publishing for making a casual talk a working reality and also Design Fishing for the beautiful cover and our associates, Speak Out Newspaper for Branding and Promotions and First Step Corp for designing and developing our Android App. In the end my love and warm regards to all the readers Contents. Drawing on Marxist-feminist theory, this book examines women's resistance to, and subversion of, patriarchal authority, as represented in Kuwaiti women's fiction. It demonstrates that Kuwaiti/Arabian Gulf women are not as submissive as commonly (mis)represented in academia and the media. The use of Electronic Health Records (EHR)/Electronic Medical Records (EMR) data is becoming more prevalent for research. However, analysis of this type of data has many unique complications due to how they are collected, processed and types of questions that can be answered. This book covers many important topics related to using EHR/EMR data for research including data extraction, cleaning, processing, analysis, inference, and predictions based on many years of practical experience of the authors. The book carefully evaluates and compares the standard statistical models and approaches with those of machine learning and deep learning methods and reports the unbiased comparison results for these methods in predicting clinical outcomes based on the EHR data. Key Features: Written based on hands-on experience of contributors from multidisciplinary EHR research projects, which include methods and approaches from statistics, computing, informatics, data science and

clinical/epidemiological domains. Documents the detailed experience on EHR data extraction, cleaning and preparation Provides a broad view of statistical approaches and machine learning prediction models to deal with the challenges and limitations of EHR data. Considers the complete cycle of EHR data analysis. The use of EHR/EMR analysis requires close collaborations between statisticians, informaticians, data scientists and clinical/epidemiological investigators. This book reflects that multidisciplinary perspective.

Comprehensive guide to management of psoriasis covering numerous associated conditions. In depth discussion on investigation techniques and diagnosis. Each topic summarised with 'key points to remember' section. The author explores the role of journalism in Egypt in effecting and promoting the development of modern Arabic literature from its inception in the mid-nineteenth century to the present day. Remapping the literary scene in Egypt over recent decades, Kendall focuses on the independent, frequently dissident, journals that were the real hotbed of innovative literary activity and which made a lasting impact by propelling Arabic literature into the post-modern era. Media and Politics in Kurdistan studies the relationship between the media and politics in the Kurdistan Region of Iraq (KRI). KRI is approached as a case study, as an example of the struggle between authoritarian and democratization efforts at the same time. The book contributes towards understanding the dynamics of the media systems in the KRI and attempts to participate in the theoretical discussion of media and politics in this region. The research outcomes show which parts of the press, how many of them and for what length of time the press in the KRI has been

owned/controlled by political parties. This book also studies the system of political parties and particularly as related to the press. Bioinformatics for Everyone provides a brief overview on currently used technologies in the field of bioinformatics—interpreted as the application of information science to biology—including various online and offline bioinformatics tools and softwares. The book presents valuable knowledge in a simplified way to help students and researchers easily apply bioinformatics tools and approaches to their research and lab routines. Several protocols and case studies that can be reproduced by readers to suit their needs are also included. Explains the most relevant bioinformatics tools available in a didactic manner so that readers can easily apply them to their research Includes several protocols that can be used in different types of research work or in lab routines Discusses upcoming technologies and their impact on biological/biomedical sciences The skills, creativity, and research developed through higher education are major factors in any society’s success in creating jobs and advancing prosperity. Universities and colleges play a vital role in expanding opportunity and promoting social justice. The papers in this book reflect the main objective of a conference held in June 2007 at Ahlia
