Thompson/Strickland is the strategic management market leader by a wide margin. The eleventh, or alternate, edition of the book contains exactly the same text as the 10th edition but includes all new cases. With so many business schools offering a strategic management course every term, the case collection in any one edition "wears out" after a few terms. The strong desire of adopters for fresh cases, together with welcome and much needed growth in the supply of first-rate cases being developed each year makes it necessary for us to institute a short case revision cycle and provide a second collection of cases to choose from. The 10th edition, with all its various components, will be available throughout the life cycle of the 11th edition. The second edition of the book is richer in contents with updated concepts on strategic management. The entire text is restructured and fine-tuned to meet the needs of the students pursuing MCom/MBA/PGDBA and identical courses. The book, now divided into four parts, is focused on providing the readers broad perspectives on formulation of strategy, its processes, implementation as well as evaluation so as to assess its effectiveness. The book brings into fore the learning that a strategy is good if it passes the test of feasibility, acceptability and suitability. Now, the text incorporates 44 live cases of successful, reputable organizations, which have excelled as a result of application of strategic planning/strategic thinking in formulation and implementation of their strategies. Besides, references have been made of the practices in 65 successful global companies while discussing the concepts and practices. NEW TO THE SECOND EDITION Beginning with an overview of strategic management, the text analyzes important topics such as • Environmental macro- and micro-factors of the organization, which underline success of an enterprise • What develops sustainable competitive advantage in organizations • Eight implementation techniques which are helpful in

successful implementation of strategies • Evaluation of strategy and GE-McKinsey matrix on measurement of organizational success • Role and traits of strategic leadership for successful implementation of strategy in face of uncertain, turbulent and complex global market • Learning from the case study on Mobil company This case book clearly answers the need for a customized, modular approach in the case portion of today's policy and strategy course at the undergraduate or MBA level. Rather than using individually selected cases, individualized custom-case books, or settling for outdated information, instructors can turn to this casebook for a full complement of the most up-to-date strategic management cases. Because the main text and casebook are separated, the case book is updated frequently, ensuring coverage of recent developments. To reflect the trends in today's business environment, Digman offers a strong representation of computer and technology-related cases. The subject of Strategy is extremely complex and perhaps can be taught only through the use of Cases. Unfortunately, most of the available cases in Strategic Management tend to be extremely long, which test more the patience rather than the intellectual rigour. This book thus fulfills the void in the literature by offering a bouquet of cases that are designed not only to test the operational understanding but the conceptual and intellectual discipline that the reader must inculcate to be a successful strategist. The book contains 24 cases, ranging from mammoth public sector organisations like SBI and SAIL to global corporations like Cray and Apple, as also the sublimely interesting episodes in the like of Phoolan Devi and Princess Diana. All the cases are extremely readable, and are designed to introduce the different aspects of Strategic Management to the reader. The book is a must read for students, strategists as well as practicing managers. "In today's economy, gaining and sustaining a competitive advantage is harder than ever. Most business schools use case studies in their courses. However, these are typically based on past cases and assigned to students to solve. This book describes a new approach for teaching with case studies, which was developed and applied successfully at TUM School of Management. In this approach, student teams write and solve their own case study on a topic concerning current and future businesses. A case can thus be on their own startup or a strategic decision of existing companies. During the course, the students receive intensive coaching while selecting and developing the case topic by the course advisors as well as feedback by industry experts and executives for whom the case is actually a burning question. The authors

present 17 cases covering strategic questions  
for startups and technology companies such as

Deutsche Post, BMW, Ryanair, Lufthansa,  
Stadtwerke München, Fielmann, adidas,

Siemens, Caribou Biosciences, eon, Airbus,
