The stories we read as children are the ones that stay with us the longest, and from the nineteenth century until the 1950s stories about schools held a particular fascination. Many will remember the goings-on at such earnest establishments as Tom Brown's Rugby, St Dominic's, Greyfriars, the Chalet School, Malory Towers and Linbury Court. In the second part of the twentieth century, with more liberal social attitudes and the advent of secondary education for all, these moral tales lost their appeal and the school story very nearly died out. More recently, however, a new generation of compromised schoolboy and schoolgirl heroes - Pennington, Tyke Tiler, Harry Potter and Millie Roads - have given it a new and challenging relevance. Focusing mainly on novels written for young people, From Morality to Mayhem charts the fall and rise of the school story, from the grim accounts of Victorian times to the magic and mayhem of our own age. In doing so it considers how fictional schools not only reflect but sometimes influence real life. This captivating study will appeal to those interested in children's literature and education, both students and the general reader, taking us on a not altogether comfortable trip down memory lane. Schooldays at St Clare's are never dull for twins Pat and Isabel O'Sullivan in Enid Blyton's much-loved boarding school series. In book six, Pat breaks her arm and misses the first weeks of term. Will Pat be upset when new girl Amanda becomes Isabel's new best friend? Expect more mischief at St Clare's! Between 1941 and 1946, Enid Blyton wrote six novels set at St Clare's. A novel about the fate of candor, goodwill, and the utopian spirit in a world where technology and surveillance are weaponizing human relationships One autumn night, as a grad student named Matthew is walking home from the subway, a handsome skateboarder catches his eye. Leif, a poet as well as a skater, invites Matthew to take part in an experiment with tarot cards. It's easier to know what's in other people's minds than most people realize, Leif and his friends claim. Do they believe in telepathy? Can they actually do it? Instead of writing his dissertation, Matthew soon finds himself falling for Leif and entangled with his friends, who are as idealistic as the Occupy encampment they like to visit. When the group runs afoul of a government contractor, an avalanche of news coverage, internet outrage, and legal repercussions overwhelms them. Elspeth and Raleigh, two of Leif's oldest friends, will see their relationship tested by the strain of criminal charges. Chris and Julia, who drifted into the group more recently, will have their loyalties questioned. Diana, a hardheaded sociologist, will need to find a way to stand with her friends without compromising her skepticism. And Matthew, entranced by the man at the center of it all, will have to decide what he owes Leif and how much he's willing to give. All six will be forced to reckon with the catch-22s of transparency and the insidious natures of power and privilege. Overthrow is about the aftermath of idealism--about what happens after new technologies have begun to change the boundaries that we imagine around ourselves. Caleb Crain has captured with astonishing sensitivity, acuity, and grace the unease and ambiguity that threaten our contemporary lives, and has written a beautiful novel about the redemptive possibilities of love and friendship. We know that trauma can leave syndromes in its wake. But can the anticipation of violence be a form of violence as well? Tense Future argues that it can—that twentieth-century war technologies and practices, particularly the aerial bombing of population centers, introduced non-combatants to a coercive and traumatizing expectation. During wartime, civilians braced for the next raid; during peacetime they braced for the next war. The pre-traumatic stress they experienced permeates the century's public debates and cultural works. In a series of groundbreaking readings, Saint-Amour illustrates how air war prophets theorized the wounding power of anticipation, how archive theory changed course in war's shadow, and how speculative fiction conjured visions of a civilizational collapse that would end literacy itself. And in this book's central chapters, he shows us how Ford Madox Ford, Robert Musil, James Joyce, Virginia Woolf, and other interwar modernist writers faced the memory of one war and the prospect of another, some by pitting their fictions' encyclopedic scale and formal turbulence against total war, others by conceding war's inevitability while refusing to long for a politically regressive peace. Total war: a conflict that exempts no one, disregarding any difference between soldier and civilian. Tense Future forever alters our understanding of the concept of total war by tracing its emergence during the First World War, its incubation in air power theory between the wars, and above all its profound partiality. For total war, during most of the twentieth century, meant conflict between imperial nation states; it did not include the violence those states routinely visited on colonial subjects during peacetime. Tacking back and forth between metropole and colony, between world war and police action, Saint-Amour describes the interwar refashioning of a world system of violence-production, one that remains largely intact in our own moment of perpetual interwar. WITH A NEW INTRODUCTION FROM NEW YORK TIMES BEST-SELLING AUTHOR TAYARI JONES "How can a novel's social criticism be so unflinching and clear, yet its plot moves like a house on fire? I am tempted to describe Petry as a magician for the many ways that The Street amazes, but this description cheapens her talent . . . Petry is a gifted artist." —Tayari Jones, from the Introduction The Street follows the spirited Lutie Johnson, a newly single mother whose efforts to claim a share of the American Dream for herself and her young son meet frustration at every turn in 1940s Harlem. Opening a fresh perspective on the realities and challenges of black, female, working-class life, The Street became the first novel by an African American woman to sell more than a million copies. Julie Campoli showcases twelve vibrant North American neighborhoods where residents can live comfortably without a car. By identifying the policies and amenities that foster such streetscapes, Campoli teaches urban developers, decision makers, and students how to create similar communities and help to mitigate climate change. The final book of the Bible, Revelation prophesies the ultimate judgement of mankind in a series of allegorical visions, grisly images and numerological predictions. According to these, empires will fall, the "Beast" will be destroyed and Christ will rule a new Jerusalem. With an introduction by Will Self. Hearing

Joseph Bobik offers a translation of Aquinas's De Principiis Naturae (circa 1252) and De Mixtione Elementorum (1273) accompanied by a continuous commentary, followed by two essays: "Elements in the Composition of Physical Substances" and "The Elements in Aquinas and the Elements Today." The Principles of Nature introduces the reader to the basic Aristotelian principles such as matter and form, the four causes so fundamental to Aquinas's philosophy. On Mixture of the Elements examines the question of how the four elements (earth, air, fire, and water) remain within the physical things composed from them.
