The Trainer's Guide to Training Most new trainers and presenters know all they need to know about their chosen subject. Unfortunately, few of them actually know how to present what they know. For more than a decade, Robert Jolles's *How to Run Seminars and Workshops* has taught tens of thousands of people how to sell, teach, stand up, and deliver an effective training session on almost any subject in almost any setting. This new Third Edition updates this classic guide for anyone who has to get up and move an audience. Just as he did in the book's previous editions, Jolles—former head of Xerox's world-renowned "train the trainer" program—shares proven, effective techniques for winning over an audience, holding their interest, conveying important information, and moving that audience to take action! For seasoned pros, this is an invaluable tool for becoming a world-class seminar and workshop leader. For novices, it's a step-by-step self-teaching guide that provides the confidence and the techniques speakers need to survive and thrive in front of an audience. Packed with straightforward, trustworthy advice, this reliable resource covers all the bases for today's professional trainers and speakers, including research and preparation, questioning techniques, pacing, visual aids, evaluation and support, feedback, and more: Creating your own seminar business Recognizing different personalities and types of behavior Training groups with diverse needs On-site preparations Maintaining the audience's interest The latest technology and visual aids Giving feedback and coaching Presenting your best self to the audience Developing a training staff And, most important, how to sell your message Trusted by thousands of professional trainers for the latest tactics and practices in seminar and workshop leadership, *How to Run Seminars and Workshops, Third Edition* is the ultimate guide for anyone who makes a living sharing what they know with others. Need to run a workshop? Your attendees are trusting you with their time and attention. What are you giving them in return? Most workshops don't work. They fail to deliver real results and they fail to keep the audience energetic and engaged. They're stressful to run and painful to attend. Designing and running a brilliant workshop is easier than you think. It's not about flashy showmanship or natural charisma. Instead, it's about following a set of clear, simple rules for structuring and arranging the day. Discover and use key design principles such as: Naturally refresh and maintain the audience's attention and energy by alternating the "teaching format" (e.g. lecture, small group discussion, hands-on practice) every 20 minutes and making strategic use of good breaks Dramatically improve your educational impact by choosing an exercise which is properly matched to the type of knowledge/skill/wisdom currently being taught Save dozens of hours by beginning your design process with a simple "skeleton" of Learning Outcomes and timings rather than jumping straight into slides and materials Finish on time, every time, by intentionally designing flexible "schedule springs" into your session, allowing you to seamlessly adjust to delays and bad luck, and to ensure that everyone learns what they came for without running late The first half of the book covers everything you'll need to know about designing and refining the session itself. With a good design in hand, teaching a brilliant workshop goes from arduous to nearly automatic. The second half of the book shifts from ahead-of-time design to day-of facilitation. Learn the essential facilitation needed to solve unexpected problems and run a smooth, stress-free workshop: Reliable tools and tactics for crowd control, recovering attention, and shifting between tasks (without feeling like you're fighting against your audience) Clear guidance for picking the best room setup, and also improving a "bad" room to make the most of it Spotting and problem-solving the six major types of "difficult" attendees who are being either accidentally or intentionally disruptive (including the most common issue of bringing a hostile expert onto your side) Checklists and reminders of what to bring, what to do, and when to do it, in order to ensure that nothing gets forgotten, overlooked, or lost At no point in the book will we ask you to "put on a big smile" or "project confidence". That's fluffy BS which doesn't work. Instead, we'll give you clear, concrete tools for managing a crowd and seamlessly guiding everyone to an effective outcome. Why we're the right authors to help you succeed Over the last 15 years, we've designed and run a huge number of successful workshops (and a few major flops) covering every type of audience: executives, undergrads, MBAs, disadvantaged youths, busy professionals, and more. We've designed everything from 20-minute teasers to 3-month intensives, in locations ranging from Costa Rica and Qatar to London and Berlin. We've taught for companies like HP and Deloitte and for universities like Oxford and NYU. We've built workshops for every price point, from free upskilling (paid for by the state or employer) through to \$4000-per-seat premium events. We've taught casual sessions, with beer in hand and flip-flop on foot, through to formal, posh affairs with glitzy venues and high-end catering. In every case, no matter where it was located or who it was for, the process outlined in these pages worked. Perhaps most importantly, we can teach you how to do this. We've trained up teachers from scratch who are now billing upwards of \$5000 per day and getting invited back to teach again and again. This stuff isn't complicated. You can learn it!
