Minimal Surfaces Apr 03 2020 This book contains recent results from a group focusing on minimal surfaces in the Moscow State University seminar on modern geometrical methods, headed by A. V. Bolsinov, A. T. Fomenko, and V. V. Trofimov. The papers collected here fall into three areas: one-dimensional minimal graphs on Riemannian surfaces and the Steiner problem, two-dimensional minimal surfaces and surfaces of constant mean curvature in three-dimensional Euclidean space, and multidimensional globally minimal and harmonic surfaces in Riemannian manifolds. The volume opens with an exposition of several important problems in the modern theory of minimal surfaces that will be of interest to newcomers to the field. Prepared with attention to clarity and accessibility, these papers will appeal to mathematicians, physicists, and other researchers interested in the application of geometrical methods to specific problems.

Theory Groups and the Study of Language in North America May 17 2021 Based on extensive archival research, interviews, and participant observation over the course of two decades, Theory Groups in the Study of Language in North America provides a detailed social history of traditions and “revolutionary” challenges to traditions within North American linguistics, especially within 20th-century anthropological linguistics. After showing substantial differences between Bloomfield's and neo-Bloomfieldian theorizing, Murray shows that early transformational-generative work on syntax grew out of neo-Bloomfieldian structuralism, and was promoted by neo-Bloomfieldian gatekeepers, in particular longtime Language editor Bernard Bloch. The central case studies of the book contrast the (increasingly) “revolutionary rhetoric” of transformational-generative grammarians with rhetorics of continuity emitted by two linguistic anthropology groupings that began simultaneously with TGG in the late-1950s, the ethnography of communication and ethnoscience. The history of linguistics in North America provides a continuum from isolated scholars to successful groups dominating entire disciplines. Although focused on groupings — both “invisible colleges” and readily visible institutions — Murray discusses those writing about language in society who were not participants in “theory groups” or “schools” both before and after the three central case studies. He provides a theory of social bases for claiming to be making “scientific revolution” in contrast to building on sound “traditions”, and suggests non-cognitive reasons for success in the often rhetorically violent contention of perspectives about language in North America during the last century and a half. The book includes appendices explaining the methodology used, an extensive bibliography, and an index.
