Making the Right Choice Feb 06 2023 Making the Right Choice unravels the entangled relationship between marriage, morality, and the desire for modernity as it plays out in the context of middle-class status concerns and aspirations for upward social mobility within the Sinhala-Buddhist community in urban Sri Lanka. By focusing on individual life-histories spanning three generations, the book illuminates how narratives about a gendered self and narratives about modernity are mutually constituted and intrinsically tied to notions of agency. The book uncovers how "becoming modern" in urban Sri Lanka, rather than causing inter-generational conflict, is a collective aspiration realized through the efforts of bringing up educated and independent women capable of making "right" choices. The consequence of this collective investment is a feminist conundrum: agency does not denote the right to choose, but the duty to make the "right" choice; hence agency is experienced not as a sense of "freedom," but rather as a burden of responsibility.

Raphael to Renoir Sep 20 2021 "The works from the Bonna Collection are illustrated in color, and whenever possible, at their actual sizes. They are arranged chronologically by the artist's date of birth and are grouped according to the main artistic schools. This volume is introduced by an interview with Jean Bonna by George Goldner. Each drawing is then described in an entry, many of which have comparative illustrations that shed further light on individual works."--BOOK JACKET.

Medical Miracles Jan 31 2020 Making saints : miracles, medicine, and evidence since 1588 -- The supplicants and their saints -- The miracles : diseases, corpses, and other wonders -- Doctors and medical knowledge in the canonization process -- Healing as drama : gestures of invocation and the context of cure -- Conclusion : religion, medicine, and miracles.

Hindiyya, Mystic and Criminal, 1720-1798 Mar 03 2020 In this compelling narrative, Bernard Heyberger relates the fascinating history of Hindiyya 'Ujaymi, a highly charismatic eighteenth-century mystic of sinister repute. Heyberger makes a careful study of Hindiyya's life from earliest childhood, with a detailed picture of her formative years in the eighteenth century Christian community of Aleppo, the domestic reality of which is little known, exploring the influences she would have experienced. He leads us through her spiritual development under the direction of the Jesuits, her determination to found a new religious order, and the tragic history of its collapse in a welter of paranoia and persecution. Heyberger also reveals the tensions and complex rivalries at play around Hindiyya between Rome, the Jesuits, and Eastern tribes, which were also beset by feuds and alliances. He makes extensive use of a wide variety of sources, from Hindiyya's own writings to reports from her confessors and Roman inquisitors, to shed light upon the Hindiyya affair. 'Hindiyya, Mystic and Criminal' relates the history of a woman of inflexible power of will and great charisma, who managed to move beyond the circumscribed world of her girlhood and realise what she believed to be her destiny. It will be of great interest to anyone seeking a deeper understanding of an affair which has been long obscured by contradictory reports, or to those interested in eighteenth-century Maronite Christianity and its complex interactions with the authority of Rome.

The Michigan Bar Journal Dec 12 2020

The Oxford Handbook of International Cultural Heritage Law Oct 22 2021 This Handbook provides a cutting edge study of the fast developing field of international law on the protection of cultural heritage by taking stock of the recent developments and of the core concepts and current challenges. The legal protection of cultural heritage has come under renewed focus from the international community and states since the 1990s. This is evidenced by the adoption of a range of international instruments. Countries are also enacting cultural heritage legislation or overhauling existing laws within their own national territory. Contributions address the protection of immovable and movable, tangible and intangible cultural heritage in peacetime and in the event of armed conflict as well as the interaction between specific regimes of cultural heritage protection with other fields of international law, including international criminal law, human rights and humanitarian law, environmental law, international trade, investments, and intellectual property. The last part of the Handbook covers diverse regional systems of heritage protection.

The Aspiring Adept Aug 20 2021 The Aspiring Adept presents a provocative new view of Robert Boyle (1627-1691), one of the leading figures of the Scientific Revolution, by revealing for the first time his avid and lifelong pursuit of alchemy. Boyle has traditionally been considered, along with Newton, a founder of modern science because of his mechanical philosophy and his experimentation with the air-pump and other early scientific apparatus. However, Lawrence Principe shows that his alchemical quest--hidden first by Boyle's own codes and secrecy, and later suppressed or ignored--positions him more accurately in the intellectual and cultural crossroads of the seventeenth century. Principe radically reinterprets Boyle's most famous work, The Sceptical Chymist, to show that it criticizes not alchemists, as has been thought, but "unphilosophical" pharmacists and textbook writers. He then shows Boyle's unambiguous enthusiasm for alchemy in his "lost" Dialogue on the Transmutation and Melioration of Metals, now reconstructed from scattered fragments and presented here in full for the first time. Intriguingly, Boyle believed that the goal of his quest, the Philosopher's Stone, could not only transmute base metals into gold, but could also attract angels. Alchemy could thus act both as a source of knowledge and as a defense against the growing tide of atheism that tormented him. In seeking to integrate the seemingly contradictory facets of Boyle's work, Principe also illuminates how alchemy and other "unscientific" pursuits had a far greater impact on early modern science than has previously been thought.

Assessing Genetic Risks May 05 2020 Raising hopes for disease treatment and prevention, but also the specter of discrimination and "designer genes," genetic testing is potentially one of the most socially explosive developments of our time. This book presents a current assessment of this rapidly evolving field, offering principles for actions and research and recommendations on key issues in genetic testing and screening. Advantages of early genetic knowledge are balanced with issues associated with such knowledge: availability of treatment, privacy and discrimination, personal decision-making, public health objectives, cost, and more. Among the important issues covered: Quality control in genetic testing. Appropriate roles for public agencies, private health practitioners, and laboratories. Value-neutral education and counseling for persons considering testing. Use of test results in insurance, employment, and other settings.

The Baldwin genealogy from 1500 to 1881 Sep 08 2020

Saturnalia Apr 03 2020 It is December 1681, and the words of Mr. Baggot, the tithingman, terrify young William. William is living a strange double life. By day he is a printer's apprentice living in a white man's house. By night, he is Weetasket of the Narraganset tribe who must risk Baggot's wrath to search for his lost brother. Then comes the winter celebration of the Saturnalia-the ancient Roman holiday on which masters and slaves trade roles. Will William's secrets be revealed? And what dark deeds of others will be brought to light on this fateful night?

Mendelian Inheritance in Man Jan 01 2020 The twelfth edition of this classic reference work includes: - More than 2,000 new entries - A total of more than 9,000 entries - New features and enhancement of the familiar old features - Mapping information on more than 4,000 genes of known function - Information on specific point mutations responsible for more than 700 genetic disorders or neoplasms Mendelian Inheritance in Man (MIM) is a genetic knowledgebase that serves clinical medicine and biomedical research, including the Human Genome Project. It aims to be comprehensive (not only complete, but also collated, integrated, and interpreted), authoritative (not only accurate but also sound in its interpretations and judgements), and timely (not only up-to-date but also historically dimensioned). From a review of the eleventh edition, Reproductive Toxicology: "Even the convenience of computer-based forms of MIM cannot eliminate the need for MIM in book form. The preface provides a wonderful synopsis of human genetics. The information contained in this text serves as a concise review for those with a genetics background." From a review of the tenth edition, New England Journal of Medicine: " [Victor McKusick] has been for all these years the shepherd of the development of the field of clinical genetics]. Perhaps his most important pragmatic achievement has been the 10 editions of Mendelian Inheritance in Man, which rapidly became and has remained the principal source of information on inherited diseases for all clinical geneticists. "In addition to the erudite entries in the books, the references given with each description represent a magnificent bibliography of clinical genetics. With McKusick's leadership and continued interest in gene mapping, the book also rep-resents an important compen-dium of the location of genes on specific chromosomes. "The book is a magnificent security blanket for the clinical geneticist and should be in the libraries not only of these specialists, but also of all others who see patients with diseases that have genetic components."

The Huntington Family in America Jan 13 2021

Handbook of Culture and Consumer Behavior Mar 27 2022 Research on the influence of culture on consumer decision-making and consumption behavior has witnessed tremendous growth in the last decade. With increasing globalization, managers are becoming increasingly aware that operating in multiple markets is crucial for firms' survival and growth. As the world's growth engine shifts from Europe and North America to Asia and Latin America, it has become apparent that an inward-looking and domestic focus strategy will not be sustainable in the long run. And success in foreign markets requires marketers to understand not just what consumers in these markets need but also how they think, behave, consume, and purchase. Numerous studies have documented cultural differences in values and beliefs, motivational orientations, emotions, self-regulation, and information-processing styles, and the effects of these cultural variations on consumer behavior such as brand evaluation, materialism, and impulsive consumption. In this volume, experts from a variety of disciplines and perspectives trace the historical development of culture research in consumer psychology and examine the theoretical underpinnings that account for these findings and the current state of the field. Collectively, the chapters provide a forum for researchers to engage in thoughtful debates and stimulating conversations and offer directions for future research.

Degenerative Diseases of the Retina Mar 15 2021 In 1984, we organized a two-day symposium on retinal degenerations as part of the biennial meeting of the VI International Society for Eye Research, held in Alicante, Spain. The success of this first meeting led to the second held, two years later in Sendai, Japan, organized as a satellite of the VII ISER. We were fortunate that these meetings began at a time of vigorous research activity in the area of retinal degenerations, thanks to the financial support of the Retinitis Pigmentosa Foundation and the strong encouragement of its scientific director, Dr. Alan Lattes. Significant advances were made so that every two years scientists were eager to meet to share their findings. The programs included presentations by both basic and clinical researchers with ample time for informal discussions in a relaxed atmosphere. Many investigators met for the first time at these symposia and a number of fruitful collaborations were established. This book contains the proceedings of the VI International Symposium on Retinal Degenerations held November 6-10, 1994, in Jerusalem. As with the other meetings, some new areas were covered. One session was devoted to apoptosis, an important process involved in cell death in inherited retinal degenerations. Another session was on invertebrate photoreceptors, where numerous mutations have now been identified that lead to altered function or degeneration of the retina. All participants were invited to submit chapters and most complied. We thank

them for their contributions.

[Pastor John Corbly](#) Apr 08 2023 John Corbally immigrated to America in 1747 as the Baptist religion opposed the King's Anglicanism. He became a lay minister, but persecution drove him to the Pennsylvania frontier. Ordained, he ministered until his death founding many Baptist churches and was known as "The ablest Baptist minister of his time in the Pennsylvania frontier." This is not a retelling of previously printed material; it represents over forty years of meticulous research. Previously unknown information describes the bogus painting of him, his birthplace, his true first wife, exact locations where he lived in Virginia and Pennsylvania, his long-lost treatise on The Believer's Defense of Baptism, his involvement in the Ketocin and Redstone Baptist Associations, his involvement in the Whiskey Insurrection from the government's point of view, the Corbly Massacre as described in his and his daughter's letters, and many other previously unknown facts. This book is purchased at the lowest cost through Lulu.com.

Debrett's Peerage and Baronetage 2019 Apr 15 2021 Debrett's Peerage & Baronetage is the only up-to-date printed reference guide to the United Kingdom's titled families: the hereditary peers, life peers and peeresses, and baronets, and their descendants who form the fascinating tapestry of the peerage. This is the first ebook edition of Debrett's Peerage & Baronetage, and it also contains information relating to: The Royal Family Coats of Arms Principal British Commonwealth Orders Courtesy titles Forms of address Extinct, dormant, abeyant and disclaimed titles. Special features for this anniversary edition include: The Roll of Honour, 1920: a list of the 3,150 people whose names appeared in the volume who were killed in action or died as a result of injuries sustained during the First World War. A number of specially commissioned articles, including an account of John Debrett's life and the early history of Debrett's Peerage and Baronetage, a history of the royal dukedoms, and an in-depth feature exploring the implications of modern legislation and mores on the ancient traditions of succession.

Consanguinity in Context May 17 2021 An essential guide to this major contemporary issue, Consanguinity in Context is a uniquely comprehensive account of intra-familial marriage. Detailed information on past and present religious, social and legal practices and prohibitions is presented as a backdrop to the preferences and beliefs of the 1100+ million people in consanguineous unions. Chapters on population genetics, and the role of consanguinity in reproductive behaviour and genetic variation, set the scene for critical analyses of the influence of consanguinity on health in the early years of life. The discussion on consanguinity and disorders of adulthood is the first review of its kind and is particularly relevant given the ageing of the global population. Incest is treated as a separate issue, with historical and present-day examples examined. The final three chapters deal in detail with practical issues, including genetic testing, education and counselling, national and international legislation and imperatives, and the future of consanguineous marriage worldwide.

Carter Cousins, 1681-1989 May 09 2023 James Carter was born about 1670 probably in England. He was a Quaker and married Susannah Griffith about 1700 in Pennsylvania. They had eight children. Information on several lines of their descendants are included in this volume. Descendants now live throughout the United States.

Childhood in a Sri Lankan Village Feb 23 2022 Like toddlers all over the world, Sri Lankan children go through a period that in the U.S. is referred to as the "terrible twos." Yet once they reach elementary school age, they appear uncannily passive, compliant, and undemanding compared to their Western counterparts. Clearly, these children have undergone some process of socialization, but what? Over ten years ago, anthropologist Bambi Chapin traveled to a rural Sri Lankan village to begin answering this question, getting to know the toddlers in the village, then returning to track their development over the course of the following decade. Childhood in a Sri Lankan Village offers an intimate look at how these children, raised on the tenets of Buddhism, are trained to set aside selfish desires for the good of their families and the community. Chapin reveals how this cultural conditioning is carried out through small everyday practices, including eating and sleeping arrangements, yet she also explores how the village's attitudes and customs continue to evolve with each new generation. Combining penetrating psychological insights with a rigorous observation of larger social structures, Chapin enables us to see the world through the eyes of Sri Lankan children searching for a place within their families and communities. Childhood in a Sri Lankan Village offers a fresh, global perspective on child development and the transmission of culture.

Cousin Bette Jul 07 2020 Cousin Bette (1846), long considered Balzac's last great novel, is a key work in his Comedie humaine. Grounded in a meticulous documentation of contemporary France, this tale is set in the prosperous Paris of Louis-Phillipe and details a jealous woman's campaign of persecution against her own family. This new translation has an introduction by David Bellos which sets this work in its social, historical, and literary context.

Arranged Marriage May 29 2022 Arranged Marriage: The Politics of Tradition, Resistance, and Change shows how arranged marriage practices have been undergoing transformation as a result of global and other processes such as the revolution of digital technology, democratization of transnational mobility, or shifting significance of patriarchal power structures. The ethnographically informed chapters not only highlight how the gendered and intergenerational politics of agency, autonomy, choice, consent, and intimacy work in the contexts of partner choice and management of marriage, but also point out that arranged marriages are increasingly varied and they can be reshaped, reinvented, and reinterpreted flexibly in response to individual, family, religious, class, ethnic and other desires, needs, and constraints. The authors convincingly demonstrate that a nuanced investigation of the reasons, complex dynamics, and consequences of arranged marriages offers a refreshing analytical lens that can significantly contribute to a deeper understanding of other phenomena such as globalization, modernization, international migration as well as patriarchal value regimes, intergenerational power imbalances, and gendered subordination and vulnerability of women.

Comprehensive Toxicology Oct 10 2020 An explosive increase in the knowledge of the effects of chemical and physical agents on biological systems has led to an increased understanding of normal cellular functions and the consequences of their perturbations. The 14-volume Second Edition of Comprehensive Toxicology has been revised and updated to reflect new advances in toxicology research, including content by some of the leading researchers in the field. It remains the premier resource for toxicologists in academia, medicine, and corporations. Comprehensive Toxicology Second Edition provides a unique organ-systems structure that allows the user to explore the toxic effects of various substances on each human system, aiding in providing diagnoses and proving essential in situations where the toxic substance is unknown but its effects on a system are obvious. Comprehensive Toxicology Second Edition is the most complete and valuable toxicology work available to researchers today. Contents updated and revised to reflect developments in toxicology research Organized with a unique organ-system approach Features full color throughout Available electronically on sciencedirect.com, as well as in a limited-edition print version

Wiley World Jun 29 2022

A Field of One's Own Jun 05 2020 This is the first major study of gender and property in South Asia. In a pioneering and comprehensive analysis Bina Agarwal argues that the single most important economic factor affecting women's situation is the gender gap in command over property. In rural South Asia, the most significant form of property is arable land, a critical determinant of economic well-being, social status, and empowerment. But few women own land; fewer control it. Drawing on a vast range of interdisciplinary sources and her own field research, and tracing regional variations across five countries, the author investigates the complex barriers to women's land ownership and control, and how they might be overcome. The book makes significant and original contributions to theory and policy concerning land reforms, 'bargaining' and gender relations, women's status, and the nature of resistance.

Diet and Health Nov 22 2021 Diet and Health examines the many complex issues concerning diet and its role in increasing or decreasing the risk of chronic disease. It proposes dietary recommendations for reducing the risk of the major diseases and causes of death today: atherosclerotic cardiovascular diseases (including heart attack and stroke), cancer, high blood pressure, obesity, osteoporosis, diabetes mellitus, liver disease, and dental caries.

SARS, MERS and other Viral Lung Infections Jun 17 2021 Viral respiratory tract infections are important and common causes of morbidity and mortality worldwide. In the past two decades, several novel viral respiratory infections have emerged with epidemic potential that threaten global health security. This Monograph aims to provide an up-to-date and comprehensive overview of severe acute respiratory syndrome, Middle East respiratory syndrome and other viral respiratory infections, including seasonal influenza, avian influenza, respiratory syncytial virus and human rhinovirus, through six chapters written by authoritative experts from around the globe.
