***Lightning Sealed* Apr 18 2022 "No matter what his words conveyed, Theo would leave me soon. It was just a matter of time." The Fray is calling Theo. Every day, the voices get louder. Every minute, he gets pulled closer. Every second, their love is tested. Their life is a constant question of who they can trust and who they can't. Sanctum, Theo's brother and enemy, stalks them like a predator, waiting for his chance to pounce. Theo will leave Colby soon to do what he, as the Eidolon, was born to do. He can't deny the yearning in his heart to go, but he can't find it in his heart to leave. Colby will be left with a decision. She can wither like the mates of Eidolon before her or she can go after the Synod, the women who murdered her grandmother, while Theo is gone. With Theo missing and Colby desperate, Sanctum is only too eager to fill in... *Lightning Sealed* is Book Two in the Lucent Series.**

**Lightning Kissed May 19 2022 Colby Evans can leap from one country to the next in a heartbeat. She can see every sunset in every time zone in the same day. She can travel across the world in a flash. She defies gravity and physics with every breath she takes. She's tested her abilities and found them limitless. She is the lightning. She is Lucent. And nothing can stop her. Except him. Theodore Ramsey isn't supposed to be able to flash like Colby. The power of travel is passed on from mother to daughter in their people. Except once in**

every hundred generations. Theo is the one. He can flash like Colby. And it makes him a target to their enemies and to himself. His abilities change everything he knows about life and throws his future into an uncertain tangent. In fact, the only thing certain in his life is the love he feels for Colby. Their love defies time and space and has been the only constant thing in their lives since childhood. But even their infallible love will be stretched to its limits. She will risk her life to protect him. But he will risk everything to protect them all.

**Lightning Kissed** is the first book in **The Lucent Series** by **Lila Felix**.

**Kitten Clone** Jul 21 2022 Douglas Coupland, one of the world's biggest cultural brains, takes an inside look at the global company that keeps us connected, and wonders what all that connectivity is doing to our brains and our sense of ourselves as humans. The incomparable Douglas Coupland reports from inside the corporate offices and science labs of Alcatel-Lucent, a globally influential business whose work is largely unknown to consumers. "Were it to vanish tomorrow," he writes, "our modern world would grind to a halt. The Internet would implode—your Internet would implode." Although his examination of the company is playful and fascinating in its own right, Coupland's account is driven by his thoughtful reflections on the larger cultural and sociological significance of the transformative information technology Alcatel works on: fiber wire, microprocessors, the Internet and mobile technologies. And by a larger meditation about what the Internet is doing to us as it relentlessly colonizes the planet—and our brains. Like Coupland's best work, **Kitten Clone** is a wildly entertaining yet penetrating encounter with the technological and cultural forces that surround us. And also a surprising and unique exploration of a possible future.

*Optical Illusions* Feb 28 2023 When Lucent Technologies was spun off from AT&T in 1996, the new company was full of promise. An old-line manufacturer, it quickly became a sizzling hot stock thanks to the emergence of the Internet and the build-up of telecommunications. The stock market was soaring, and Lucent flew with it. Within a few short years it became the sixth-largest corporation in America and the most widely held stock in the country. Yet only months later, Lucent was gasping for life, victim of the greatest stock-market bubble in history. *Optical Illusions* is the story of a financially sound company steeped in world-class talent, dominant in one of the fastest-growing industries, that in the space of two years found itself downgraded to a junk-bond credit rating, under investigation by the SEC for its accounting practices, the value of its stock reduced to the price of a cup of coffee. Lisa Endlich tells the fascinating tale of the company that epitomized the misfortunes of the telecom industry, leaving investors and employees shocked and confused. In writing this book Endlich had access to more than a hundred people who played a role in the drama, as well as previously sealed courtroom documents. She explains how the conflicting styles of CEOs Henry Schacht and Rich McGinn contributed to Lucent's woes, and she shows how the loss of skilled executives such as Carly Fiorina hurt the company at a crucial moment. When it was all over, Schacht -- Lucent's first CEO, who was later brought back to right the listing ship -- acknowledged that Lucent had allowed itself to be swept up in the market mania, distorting its corporate values in the

**process. Although the stock-market mania of the late 1990s is remembered as "the Internet craze" or "the dot-com madness," as Optical Illusions shows, the damage was more widespread and lasting. In fighting for its survival, Lucent laid off more than 70 percent of its employees, wrecking retirees' savings and investors' portfolios alike.**

**Versatile Routing and Services with BGP Mar 17 2022 Design a robust BGP control plane within a secure, scalable network for smoother services A robust Border Gateway Protocol setup is vital to ensuring reliable connectivity, an essential capability for any organization. The Internet has become a necessary, always-on service in homes and businesses, and BGP is the protocol that keeps communication flowing. But BGP also has become crucial to delivery of intra-domain business services. But the network is only as reliable as BGP, so service enablement depends upon making BGP more stable, reliable, and service-rich. Alcatel-Lucent Service Router Operating System is engineered to bear the load of the most demanding networks. The system features support for Symmetric Multiprocessing and unprecedented depth of advanced routing features, all within a single OS that's supported across the entire Alcatel-Lucent IP/MPLS router portfolio. Versatile Routing and Services with BGP provides guidance toward implementation of BGP within SR-OS, and details the use and control of each feature. The book provides in-depth coverage of topics such as: BGP/MPLS IP-VPN, VPLS, VPWS Labeled Unicast IPv4, reconvergence, and multicast Security, graceful restart and error handling IPv6 PE (6PE) and IPv6 extensions to BGP/MPLS IP-VPN A look at forthcoming features such as Ethernet VPN Basic BGP competency is assumed, but the book is accessible even to those with zero familiarity with Alcatel-Lucent's SR-OS. It underscores the idea that BGP is more than just service enablement, and can also be used for infrastructure layer transport - but both layers must be solid,**

scalable, and able to quickly reconverge. Versatile Routing and Services with BGP demonstrates the creation of a robust BGP control plane within a secure network, allowing the delivery of flawless, uninterrupted service.
