This thesis documents the measurement of lifetime, width, mass, and couplings to two electroweak bosons of the recently-discovered Higgs boson using data from the CMS experiment at the Large Hadron Collider. Both on-shell (at the mass of around 125 GeV) and off-shell (above 200 GeV) Higgs boson production is studied and an excess of off-shell production with significance above two standard deviations is observed for the first time. The latter is a qualitative new way to study the Higgs field, responsible for generation of mass of all the known elementary particles. In addition, phenomenological tools have been developed with the Monte Carlo event generator and matrix element techniques for an optional analysis of LHC data. Optimization of the CMS data with careful alignment of the silicon tracker is also presented. "The Galleon's Gold; or, Frank Reade, Jr.'s Deep Sea Search" by Luis Senarens. Published by Good Press. The integration of accounting and the economics of information developed by Joel S. Demski and those he inspired has revolutionized accounting thought. This volume collects papers on accounting theory in honor of Professor Demski. The book also contains an extensive review of Professor Demski ' s own contributions to the theory of accounting over the past four decades.

"Denis McQuail's *Mass Communication Theory* is not just a seminal text in the study of media and society - it is a benchmark for understanding and appreciating the long and winding road people and their media have taken to get us here." - Mark Deuze, Indiana University and Leiden University

"This is a unique work tested by time and generations of students around the world - North, South, East and West." - Kaarle Nordenstreng, University of Tampere

"McQuail's *Mass Communication Theory* continues to be the clearest and best introduction to this sprawling field." - Anders Hansen, University of Leicester

With over 125,000 copies sold, *Mass Communication Theory* has been the benchmark for studying media and communication for more than 25 years. It remains the most authoritative and comprehensive introduction to the field and offers unmatched coverage of the research literature. It covers everything a student needs to know of the diverse forms of mass communication today, including television, radio, newspapers, film, music, the internet and other forms of new media. Denis McQuail shows that more than ever, theories of mass communication matter for the broader understanding of society and culture.

Unmatched in coverage and used across the globe, this book includes: Explorations of new media, globalization, work, economy, governance, policy, media audiences and effects New boxed case studies on key research publications, to familiarize students with the critical research texts in the field Definitions, examples, and

illustrations throughout to bring abstract concepts to life. McQuail's Mass Communication Theory is the indispensable resource no student of media and communication studies can afford to be without. Everyone has a story to tell, and I selected to tell my story through my blog formerly called: Monday Morning Bluees, which is an acronym for "Believe Life Uses Everyone and Everything Spiritually." I have endured many hurts, mistakes, lessons, pains, failures, heartbreaks, disappointments, hardships, and struggles throughout my life, but I have also been on the receiving end of countless success stories, miracles, breakthroughs, victories, accomplishments, awards, accolades, and other blessings. I have come to accept that life is filled with polarities, and I came to this time-space reality to experience All of life including both its ups and its downs, (mostly ups). I am learning that I gain strength and momentum when I go through uncomfortable situations, circumstances, and experiences. Reflecting on my life's story allows me an opportunity to release and heal my past. I now have a greater appreciation for where I have been, a warm acceptance and peace for where I am presently; and a clearer perspective on where I am going. My intention for this work is to shed light on issues that many females face and provide comfort in knowing that we are not alone on this journey I call Life. It has been said that M\*A\*S\*H was a show set in the 1950s which reflected the shifting values of the 1970s and early 1980s. Hawkeye Pierce, Radar O'Reilly, Trapper John McIntyre, Sherman Potter, Margaret (Hot Lips) Houlihan, B.J. Hunnicutt, Frank Burns, Charles Emerson Winchester, Max Klinger--these and the many other characters who populated the MASH 4077 used the Korean War as a backdrop to comment on many of the social issues of their day. Using a unique blend of comedy and drama, the show's first three seasons (1972-1975) focused on the anti-Vietnam War

sentiment that consumed much of America. As Vietnam ended, M\*A\*S\*H moved on to concentrate on other contemporary issues--the women's movement, the rise of the religious right in American politics, the new narcissism that marked the early 1980s, the heightened awareness of underage or excessive alcohol use, and the increased emphasis on family in American life. How the series presented these issues and its success in doing so are the subjects of this critical study. An episode listing--brief plot outline, casts and credits, air dates, and titles--is also provided. This pictorial biography by a Pulitzer Prize-winning historian presents Ulysses S. Grant in new and fascinating ways. A beautiful volume, essential for the library of any Civil War buff, this book offers a wealth of images that illuminate the man and his times in a way that words alone cannot. This book is the first of its kind to systematically analyze and apply Lim Chong Yah's S-Curve Hypothesis to the various facets of economic growth and economic transition. By augmenting the mathematical and economical sophistication of the hypothesis, this book extends the S-Curve hypothesis to provide further insight into economic growth and transition. It also utilizes a construction of a stochastic growth model to provide the microeconomic foundation for the S-Curve hypothesis. This model resolves the puzzle of why some developing countries experience economic take-off, while others do not. The book analyzes and extends discussion on the S-Curve, and also applies the S-Curve hypothesis to predict long-term growth in Japan and Singapore. It serves as an excellent resource for people interested in Lim's growth theory. Initially developed by Savoia-Marchetti as a transport, the aircraft had evolved into a dedicated medium bomber by the time the S.79-I made its combat debut in the Spanish Civil War in 1936. During World War 2, it became Italy's most successful bomber, and the most produced, with around 1370 built between 1936 and early

1944. Although initially hampered by poor tactics, the S.79 bomber crews nonetheless scored sunk a number of Allied vessels, and provided a constant threat to Allied sailors in the Mediterranean in the early stages of the war. In East Africa and the Red Sea the Sparvieri were the most modern bombers in-theatre, proving a challenge to RAF and SAAF biplane fighters. Using specially commissioned full-colour artwork, first-hand accounts and historic photographs, this volume chronicles the history of the S.79's war in the Mediterranean, North African, Balkan, and East African theatres.

The S corporation is the most popular entity for closely-held businesses, but the rules that regulate S corporations and make it a popular choice are complex, confusing and changing. CCH's popular S Corporation Taxation offers an in-depth and comprehensive analysis to S corporation taxation and uses extensive examples to illustrate both simple and complex situations. In areas where authorities do not provide clear guidance, the author constructs plausible courses of action, with appropriate analysis. Published annually, S Corporation Taxation focuses on the rules of Subchapter S of the Internal Revenue Code and integrates these rules with other portions of the tax law that can have substantial impact on S corporations and their shareholders. At the end of each chapter are pertinent checklists,

worksheets and sample election letters to help apply the concepts discussed to the reader's actual work. Are you "High Style" or "Boho," or maybe "Happy Modern" or "Trad with a Twist"?
