This manual provides an extensive overview of the importance and use of Romance languages in the media, both in a diachronic and synchronic perspective. Its chapters discuss language in television and the new media, the language of advertising, or special cases such as translation platforms or subtitling. Separate chapters are dedicated to minority languages and smaller varieties such as Galician and Picard, and to methodological approaches such as linguistic discourse analysis and writing process research. First multi-year cumulation covers six years: 1965-70. “ O objetivo deste livro é fornecer um guia acessível, abrangente e claro para a avaliação de impacto. O material, desde a motivação da avaliação de impacto até as vantagens de diferentes metodologias, cálculos de poder estatístico e de custos, é explicado de forma muito clara e a cobertura é impressionante. Este livro se tornará um guia muito consultado e utilizado e afetará a formulação de políticas para os próximos anos. †? Orazio Attanasio, Professor de Economia, University College London; Diretor, Centro de Avaliação de Políticas de Desenvolvimento, Instituto de Estudos Fiscais, Reino Unido “ Este é um recurso valioso para quem procura realizar avaliações de impacto no mundo em desenvolvimento, abrangendo os aspectos conceituais e práticos envolvidos, ilustrados com exemplos de prática recente. †?

Michael Kremer, Professor de Sociedades em Desenvolvimento, Departamento de Economia, Universidade de Harvard, Estados Unidos “ Os ingredientes principais para boas avaliações públicas são (a) metodologias apropriadas; (b) a capacidade de resolver problemas práticos, tais como coletar de dados, trabalhar com orçamentos baixos, e escrever relatório final; e (c) governos responsáveis. Este livro não apenas descreve metodologias técnicas sólidas para medir o impacto de programas públicos, mas também fornece vários exemplos e nos leva ao mundo real da implementação de avaliações, desde o convencimento dos formuladores de políticas até a divulgação dos resultados. Se mais profissionais e formuladores de políticas lessem este manual, teríamos melhores políticas e resultados em muitos países. Se os governos melhorarem a prestação de contas, o impacto deste manual será ainda maior.†? Gonzalo Hernández Licona, Secretário Executivo, Conselho Nacional de Avaliação de Políticas de Desenvolvimento Social (CONEVAL), México “ Eu recomendo este livro como um guia claro e acessível para as questões desafiadoras, práticas e técnicas, enfrentadas na elaboração de avaliações de impacto. Ele se baseia em material que tem sido testado em workshops em todo o mundo e deve se mostrar igualmente útil aos profissionais, formuladores de políticas e avaliadores.†? Nick York, Chefe do Departamento de Avaliação, Departamento para o Desenvolvimento Internacional, Reino Unido “ O conhecimento é um dos bens mais valiosos para compreender a natureza complexa do processo de desenvolvimento. A avaliação de impacto pode contribuir para preencher a lacuna entre intuição e evidências, para melhor informar a formulação de políticas. Este livro, um dos resultados tangíveis do Fundo Estratégico de Avaliação de Impacto, equipa os profissionais de desenvolvimento humano com ferramentas de ponta para produzir evidências sobre quais políticas funcionam e por quê. Visto que ele aumenta a nossa capacidade de alcançar resultados, esperamos que faça uma grande diferença na prática do desenvolvimento.†? Soraya Rodríguez Ramos, Secretária de Estado para a Cooperação Internacional, Espanha

Developing and maintaining a disciplined management system provides any organization with a blueprint for exceptional performance and success. Indeed, for larger multinational corporations, a management system is a critical component for sustainable growth and performance management. In this book, the authors discuss a series of fundamentals for creating an operationally excellent management system (OEMS). The book also examines the business performance impact of an OEMS across leading gas and oil organizations, such as Exxon Mobil, BP, Suncor, and Chevron. In 7 Fundamentals of an Operationally Excellent Management System, the authors discuss each fundamental in detail and provide the supporting training and workshop materials that are essential for integrating these fundamentals into the business processes of the organization. The seven fundamentals identified by the authors provide a sequential approach for developing and executing an OEMS across any organization. Integrating sound organizational and business practices with personnel and process safety management principles, the book is an invaluable resource for organizations seeking operational discipline and excellence. Well-supported with graphics and practical examples, the book provides a simple pathway for an organization to evolve its management system into an OEMS designed to reduce workplace incidents and improve business performance on a sustainable basis. The management system principles discussed in the book are intended for the business leader who is motivated to transition his or her organization from ordinary, through best in class, to an organization of world-class stature and performance. During the last 50 years, there have been significant advances in the understanding of the relationship between diet and health. In particular, we now have an appreciation of the role of nutrition in the development of cardiovascular diseases. Since fall 2006: a new, revised edition of Unidroit Principles in Practice, featuring approximately 120-130 cases. The UNIDROIT Principles of International Commercial Contracts, published in 1994, were an entirely new approach to international contract law. Prepared by a group of eminent experts from around the world as a “restatement” of international commercial contract law, the Principles are not a binding instrument but are referred to in many legal matters. They are widely recognized now as a balanced set of rules designed for use throughout the world irrespective of the legal traditions and the economic and political conditions of the countries in which they are applied. A forma com que os indivíduos estabelecem suas relações com o mundo tem mudado constantemente. As Novas Mídias e as Tecnologias da Informação e Comunicação (TIC) proporcionam maneiras diferenciadas no que diz respeito às práticas destes indivíduos, sejam essas em momentos de lazer, de estudo ou de trabalho. Os ambientes virtuais, através das mídias interativas, possibilitam a conexão de diferentes áreas do conhecimento e a convergência dos meios na potencialização dos mais variados campos, especialmente a partir da internet. Hoje em dia não basta apenas a disposição de plataformas como forma de repositório de conteúdos. A interatividade é o ponto chave nesta

nova era, focando, principalmente, a participação ativa dos usuários. Esta conexão entre professores e alunos, entre produtores e usuários das mídias inaugura um tempo em que a imersão e a participação são essenciais na geração das informações e na construção do conhecimento. Considerando este cenário, os capítulos que compõem este eBook trazem reflexões importantes para o momento atual em que a convergência das mídias e as novas tecnologias têm gerado desafios antes impensados, tanto para o campo da comunicação quanto para o da educação. A superação nas diversas áreas em que se refletem acerca de formatos diferenciados para que se estabeleçam novas práticas sociais e culturais é uma constante não somente para os profissionais em formação, mas para os usuários ávidos por novidades e na expectativa por serem inseridos neste mundo cada vez mais tecnológico, interativo e participativo. É nesse sentido que esta obra apresenta em suas páginas estudos e análises que vão além da fronteira do tradicional, incentivando ações inovadoras a partir dos dispositivos tecnológicos com os quais somos todos os dias confrontados. This book argues that we are living in an era of deep mutation, and the anthropocentric model no longer fits our way of living and behaving on Earth. Climate change is upsetting our relationship with nature and the environment, while artificial intelligence scenarios undermine the foundations of human life. As the pressure to re-align based on new modes of living and consuming increases, the first priority should be to address the way we imagine, design, produce and construct our built environment. The highly original book explores how the relation between design technology and material cultures can underpin and drive this change. It discusses the need for a new “material balance” to develop our design practice, not only from an energy and environmental perspective, but also from a physiological, cultural and semantic one, in order to re-balance the impact of material design on society. This publication is an excellent guide to understanding in detail the theoretical framing of several crucial topics in material balance design, from computational knitting to material agency, and from new acoustic ecology to future façade technologies, bio-based design and ultimately non-anthropocentric habitats, offering insights into preferable future scenarios. This book addresses the urgent need for a large and systematic analysis of current interdisciplinary (ID) research and practice. It demonstrates how ID is essentially a cognitive phenomenon, something different from the frivolous and inconsequential attempt of trying to overcome the disciplinary competencies and exigencies. By ID, the authors show that it is a manifestation of the transversal rationality that underlies current scientific activity. It is the very progress of specialized disciplines that requires interdisciplinary new research practices and new forms of articulation between domains, something that has a strong impact on the traditional disciplinary structure of scientific and educational institutions. Divided into two parts, the book presents a conceptual framework as well as several case studies on ID practices. The book aims at covering three main themes. It contributes to the stabilization of ID meaning and characterizes the main ID theorizations which have been proposed until now. It builds an innovative and broad understanding of the several ID determinations as an essentially cognitive phenomenon and of its institutional implications at the level of disciplinary structures and curricular organization. Finally, it distinguishes and maps the diversity of ID procedures and practices which are being used and tested by contemporary scientific and educational institutions. This book is addressed to philosophers, scientists and every one interested in science production and reproduction, including science teaching. O livro é resultado do trabalhos de profissionais que atuam em diferentes áreas do patrimônio cultural nas Américas e Península Ibérica, movidos por interesses, trajetórias e contextos distintos, que se entrelaçam em momentos e encerram causas comuns e consensos, dos quais destaca-se o valor central que é o compartilhamento de suas experiências,

práticas e conhecimentos; a compreensão comum de que a preservação e a valorização do patrimônio cultural pressupõem aprender e avançar juntos, solidariamente; e a percepção, que se transforma em responsabilidade, do quanto toda a humanidade pode ser afetada a partir da perda de um bem ou de uma manifestação cultural local. A segunda edição do livro Avaliação de Impacto na Prática é uma introdução completa e acessível ao mundo das avaliações de impacto para os formuladores de políticas públicas e os profissionais do desenvolvimento. Publicado pela primeira vez em 2001, este livro tem sido usado amplamente pelas comunidades acadêmicas e do desenvolvimento. Incorpora exemplos da vida real para apresentar guias práticos para o desenho e implementação das avaliações de impacto. Os leitores poderão obter conhecimentos sólidos sobre avaliação de impacto e as melhores formas de utilizá-la para elaborar políticas e programas baseados em evidências rigorosas. A versão atualizada abrange as técnicas mais inovadoras de avaliação de programas e inclui conselhos práticos, assim como um conjunto ampliado de exemplos e estudos de caso provenientes de problemáticas de desenvolvimento recentes. Inclui também um novo material sobre a ética da pesquisa e indica instituições e associações para realizar avaliações de impacto. O livro está dividido em quatro seções: na primeira parte, analisa-se o que avaliar e por quê; a segunda parte apresenta os principais métodos de avaliação de impacto; a terceira parte aborda o tema de como administrar as avaliações de impacto; e a quarta parte analisa a etapa de amostragem das avaliações de impacto e a coleta de dados. O livro contém links para material instrucional complementar disponível on-line, incluindo um caso aplicado, assim como perguntas e respostas. A segunda edição atualizada será um recurso valioso para a comunidade internacional do desenvolvimento, universidades e formuladores de políticas públicas que precisam contar com melhores evidências sobre o que funciona para o desenvolvimento.

D\_TEX presents itself as a starting point at a crossroads of ideas and debates around the complex universe of Textile Design in all its forms, manifestations and dimensions. The textile universe, allied to mankind since its beginnings, is increasingly far from being an area of exhausted possibilities, each moment proposing important innovations that need a presentation, discussion and maturation space that is comprehensive and above all inter- and transdisciplinary. Presently, the disciplinary areas where the textile area is present are increasing and important, such as fashion, home textiles, technical clothing and accessories, but also construction and health, among others, and can provide new possibilities and different disciplinary areas and allowing the production of new knowledge. D\_TEX proposes to join the thinking of design, with technologies, tradition, techniques, and related areas, in a single space where ideas are combined with the technique and with the projectual and research capacity, thus providing for the creation of concepts, opinions, associations of ideas, links and connections that allow the conception of ideas, products and services. The interdisciplinary nature of design is a reality that fully reaches the textile material in its essence and its practical application, through the synergy and contamination by the different interventions that make up the multidisciplinary teams of research. The generic theme of D\_TEX Textile Design Conference 2017, held at Lisbon School of Architecture of the University of Lisbon, Portugal on November 2-4, 2017, is Design the Future, starting from the crossroads of ideas and debates, a new starting point for the exploration of textile materials, their identities and innovations in all their dimensions. This book proposes an integrated model of treatment for Personality Disorders (PDs) that goes beyond outdated categorical diagnoses, aiming to treat the general factors underlying the pathology of personality. The authors emphasize the development of metacognitive functions and the integration of procedures and techniques of different psychotherapies. The book addresses the treatment of complex cases that present with multiform psychopathological features, outlining

clinical interventions that focus on structures of personal meaning, metacognition and interpersonal processes. In addition, this book: Provides an overview of pre-treatment phase procedures such as assessment interviews Explains the Metacognitive Interpersonal Therapy (MIT) approach and summarizes MIT clinical guidelines Outlines pharmacological treatment for patients with PDs Includes checklists and other useful resources for therapists evaluating their adherence to the treatment method Complex Cases of Personality Disorders: Metacognitive and Interpersonal Therapy is both an insightful reexamining of the theoretical underpinnings of personality disorder treatment and a practical resource for clinicians. This book presents the outcomes of recent endeavors that will contribute to significant advances in the areas of communication design, fashion design, interior design and product design, music and musicology, as well as overlapping areas. Gathering the proceedings of the 7th EIMAD conference, held on May 14–15, 2020, and organized by the School of Applied Arts, Campus da Talagueira, in Castelo Branco, Portugal, it proposes new theoretical perspectives and practical research directions in design and music, while also discussing teaching practices and some areas of intersection. It addresses strategies for communication and culture in a global, digital world, that take into account key individual and societal needs. Includes various departmental reports and reports of commissions. Cf. Gregory. Serial publications of foreign governments, 1815-1931. Este livro explora o papel dos materiais e da fabricação no design de produtos, dando ênfase particular ao modo como a materialidade de um objeto (do que ele é feito e como é feito) pode ser manipulada para criar estética e funcionalidade de um produto. Seus autores se preocuparam igualmente com questões relacionadas à viabilidade de produção e à sustentabilidade de um sistema. Os métodos apresentados aqui são apoiados por cerca de 100 perfis de materiais e processos de fabricação que dão ênfase aos atributos mais relevantes para o design de produtos. Includes subject section, name section, and 1968-1970, technical reports. The nEU-Med project is part of the Horizon 2020 programme, in the ERC Advanced project category. It began in October 2015 and will be concluded in October 2020. The University of Siena is the host institution of the project. The project is focussed upon two Tuscan riverine corridors leading from the Gulf of Follonica in the Tyrrhenian Sea to the Colline Metallifere. It aims to document and analyze the form and timeframe of economic growth in this part of the Mediterranean, which took place between the 7th and the 12thc. Central to this is an understanding of the processes of change in human settlements, in the natural and farming landscapes in relation to the exploitation of resources, and in the implementation of differing political strategies. This volume brings together the research presented at the first nEU-Med workshop, held in Siena on 11-12 April, 2017. The aim of the workshop was to draw up an initial survey of research and related work on the project, one and a half years after its inception. The project is composed of several research units. Each unit covers an aspect of the interdisciplinary research underpinning the nEU-Med project, each with their own methodology. For this first volume of results, it was decided not to give an account of all the work carried out within all the units, but to select those lines of investigation which, at the end of the first year and a half, have made it possible to articulate and develop an interdisciplinary research strategy. This book discusses the constraints on biological control ranging from the difficulty of convincing growers that they should infest their crops artificially to the effect of cultural techniques.
