Growth miracles typically have been studied at the country level. In *The Making of Miracles in Indian States*, internationally-renowned economists Arvind Panagariya and M. Govinda Rao bring together a team of six leading scholars to break from that tradition and study three growth miracles in India at the level of the state: Andhra Pradesh, Bihar, and Gujarat. These are three large and diverse states in India: Gujarat has the third-highest per-capita income among the largest eighteen states, Bihar is the poorest, and Andhra Pradesh falls in the middle. Despite vast differences among the states, all three have grown at rates exceeding 8% for an entire decade in the twenty-first century. Each section of this three-part book offers a historical perspective on the state's development and the specific factors that improved its economic fortunes. The three case studies are backed by extensive quantitative documentation. They demonstrate the critical role that leadership, translated into improved policies and implementation, plays in stimulating growth and development. *The Making of Miracles in Indian States* is

**STRIVE FOR EXCELLENCE, SUCCESS WILL FOLLOW**

Success eludes those who do not strive for it; however, what makes one strive for it varies. What started with a mere thought would transform into a leading and most-loved Asian Indian grocery store, he had never thought so. Be it his emotion or his love for his country, Mr. Mafat Vitthalbhai Patel set upon to provide it to all and today his brand is a favourite among all Asians, spreading the love throughout the USA. Ever since it was first written into the new nation's Constitution in 1950, achieving universal elementary education has proved an elusive goal for India. Caroline Dyer's book looks at the failure of the Operation Blackboard scheme to establish a minimum norm of essential facilities in primary schools but argues that, in spite of its failure, the scheme has been rich in important policy lessons. She considers two in particular. First, that the prevailing view of implementation is deeply flawed – the evidence shows it is

something straightforward, following on automatically from the policy blueprint. The second is that teachers are central to meaningful educational change and must understand the hows and whys of changes if they are to implement them. The lessons she draws are of service to policy-makers and administrators in all educational contexts. Colloquial Gujarati provides a step-by-step course in Gujarati as it is written and spoken today.
