Rhetoric Across Borders Jun 24 2022 Rhetoric Across Borders features a select representation of 27 essays and excerpts from the "In Conversation" panels at the Rhetoric Society of America's 2014 conference on "Border Rhetorics."

Did Ancient Chinese Explore America Mar 29 2020 A Chinese classic, the Shan Hai Jing, reportedly from 2000 BC claimed travels to the ends of the earth. However, today many, while accepting the antiquity of this account, believe it was just mythology. But was it? Testing the hypothesis that the Shan Hai Jing described actual surveys of North America, Charlotte Harris Rees, author of books about early Chinese exploration, followed an alleged 1100 mile Chinese trek along the eastern slope of the US Rocky Mountains. The Chinese account should have been easy to disprove. In the travelogue Did Ancient Chinese Explore America? Rees candidly shares her initial doubts then her search and discoveries. She weaves together history, subtle humor, academic studies, and many photographs to tell a compelling story.

Assembling California Sep 03 2020 At various times in a span of fifteen years, John McPhee made geological field surveys in the company of Eldridge Moores, a tectonicist at the University of California at Davis. The result of these trips is Assembling California, a cross-section in human and geologic time, from Donner Pass in the Sierra Nevada through the golden foothills of the Mother Lode and across the Great Central Valley to the wine country of the Coast Ranges, the rock of San Francisco, and the San Andreas family of faults. The two disparate time scales occasionally intersect—in the gold disruptions of the nineteenth century no less than in the earthquakes of the twentieth—and always with relevance to a newly understood geologic history in which half a dozen large and separate pieces of country are seen to have drifted in from far and near to coalesce as California. McPhee and Moores also journeyed to remote mountains of Arizona and to Cyprus and northern Greece, where rock of the deep-ocean floor has been transported into continental settings, as it has in California. Global in scope and a delight to read, Assembling California is a sweeping narrative of maps in motion, of evolving and dissolving lands.

Wine Marketing Online Aug 15 2021 If it seems like small wine businesses are getting crowded out of a vibrant US wine market by retail chains, entrenched distributors, and established brands, there's good news for little guys. There's a reason why these massive companies spend a fortune acting "small." In the new, wired realm of marketing and customer relations, the qualities that make small businesses distinctive, like personalized service, deep product knowledge and authentic interest, matter more than ever. Wine marketing consultant Bruce McGechan answers the question of how to put those built-in attributes in front of all those online customers with his new book Wine Marketing Online: Discover the secrets that successful wine businesses use to market their wines online; Learn how to increase your credibility and be seen as an expert by your local customers; Generate Traffic to your website using Google; Convert that traffic into sales through fine-tuned

content and a positive user shopping experience; Utilize social media to effectively engage with new and existing customers on your blog, Facebook, and Twitter; Ride the coming wave of mobile websites, apps, advertising and location based services like Foursquare and Yelp; Analyze your wine eCommerce software options; 'Finally' turn one-off orders into repeat loyal customers; and last but not least share your enthusiasm for wine and really enjoy your business. Wine Marketing Online includes a winery internet marketing and brand plan, wine store internet marketing plan, wine store financial model and wine competitor and customer research.

Coastal Marshes Apr 30 2020 Coastal Marshes was first published in 1988. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. The coastal regions of the United States form a highly diversified environment. In addition to sandy beaches and rocky shorelines, there are lagoons, rivers, estuaries, and marshes. The last are a dominant features of many coastal areas and serve as a transition between sea and uplands. Coastal marshes have been a zone for human development, attractive to industrial and residential building because they provide water frontage. But the public is becoming aware of the great value of these wetlands to fisheries and wildlife and to the local economy that depends on them. This book describes coastal marshes in terms of form, function, ecology, wildlife value, and management. Robert H. Chabreck's emphasis is on the marshes of the northern coast of the Gulf of Mexico (there are 5,500 square miles of marshland in Louisiana alone), but he also deals with marshes on the Atlantic and Pacific coasts. Plant and animal communities are each given a chapter, and the book concludes with considerations of future uses and needs. The author provides references, a glossary, and a list of scientific names, along with numerous illustrations, including a section of color photographs. For thirty years, Robert H. Chabreck has been engaged in research and management of coastal marshes and has often served as a consultant in wetland ecology. He is a professor of wildlife at Louisiana State University.

Tending the Wild Jul 14 2021 "This is a highly significant—one might argue revolutionary—book. It, and the author's previous research, has the potential to completely change the way western land managers relate to the land and the resources they are trying to regulate. Even more, it has the power to influence the way that all of us approach Nature and will reinforce the importance of Native Americans and the sophistication of their knowledge."—Nancy J. Turner, University of Victoria "Tending the Wild is an enormously rich and highly readable text on the remarkably diverse land management techniques practiced by California Indians over millennia. This book serves as an invaluable resource as we strive to conserve California's enormous cultural and biotic heritage in the new century. A triumph!"—Michael H. Horn, California State University Fullerton "Tending the Wild supports the little know fact that Indian groups in California historically practiced a kind of "environmental bonsai" through their centuries long management activities. Kat Anderson's work is timely and will make an important contribution toward a better understanding of the historic ecologies of North America."—Greg Cajete, University of New Mexico

The Deep Web / The Cards Foretell May 24 2022 First there were cards, tarot, playing cards, fortunes told and fortunes made and lost. Came the deep web and sometimes... just sometimes... more than fortunes were made and lost. The cards told their own stories of death and destruction, of found love and lost love, the deep web draws in those who would explore the darkest limits of their imagination, often resulting in death and destruction. Thirteen's authors took on the challenge and produced the startling stories you will discover in this special double feature. Read on, take a walk on this particular wild side of life...

Colonial Rosary Oct 05 2020 California would be a different place today without the imprint of Spanish culture and the legacy of Indian civilization. The colonial Spanish missions that

dot the coast and foothills between Sonoma and San Diego are relics of a past that transformed California's landscape and its people. In a spare and accessible style, Colonial Rosary looks at the complexity of California's Indian civilization and the social effects of missionary control. While oppressive institutions lasted in California for almost eighty years under the tight reins of royal Spain, the Catholic Church, and the government of Mexico, letters and government documents reveal the missionaries' genuine concern for the Indian communities they oversaw for their health, spiritual upbringing, and material needs. With its balanced attention to the variety of sources on the mission period, Colonial Rosary illuminates ongoing debates over the role of the Franciscan missions in the settlement of California. By sharing the missions' stories of tragedy and triumph, author Alison Lake underlines the importance of preserving these vestiges of California's prestatehood period. An illustrated tour of the missions as well as a sensitive record of their impact on California history and culture, Colonial Rosary brings the story of the Spanish missions of California alive.

The Wine Lover's Guide to Auctions Nov 29 2022 From America to Zanzibar, the popularity of wine has skyrocketed in recent years. While millions of people have come to appreciate wine's taste, a growing number of collectors also recognize it as a sound investment. For these savvy individuals, as well as top chefs and wine aficionados, the wine auction has become an important place to find superior wines. Now, renowned wine auctioneer Ursula Hermacinski has written The Wine Lover's Guide to Auctions to explain how wine auctions really work so that you, too, can become a successful player. The guide begins by exploring the history of wine auctions. It then provides information on wine basics and details the auction process—for buyers and sellers. Rounding out the book are helpful hints for starting

or expanding your wine collection, choosing the best auction house for your needs, and organizing your own wine tasting.

Field Guide to Manzanitas Jul 02 2020 Manzanita's center of biodiversity is in the California Floristic Province, where they are the "rock stars" of woody shrub diversity. The Entrepreneurial Librarian Dec 31 2022 The old image of an entrepreneur as a scrappy, independent risk-taker has been replaced by the reality of individuals incorporating innovative ideas in more traditional settings. This collection of essays illustrates how librarians are infusing entrepreneurial principles in a variety of arenas, including public, private, academic, and special libraries. It chronicles how entrepreneurial librarians are flourishing in the digital age, advocating social change, responding to patron demands, designing new services, and developing exciting fundraising programs. Applying new business models to traditional services, they eagerly embrace entrepreneurship in response to patrons' demands, funding declines, changing resource formats, and other challenges. By documenting the current state of entrepreneurship in libraries, this volume upends the public image of librarians as ill-suited to risky or creative ventures and places them instead on the cutting edge of innovations in the field.
