Principles of Program Design: Problem-Solving with JavaScript 05 2020 From the respected instructor and author Paul Addison, PRINCIPLES OF PROGRAM DESIGN: PROBLEM SOLVING WITH JAVASCRIPT gives your students the fundamental concepts of good program design, illustrated and reinforced by hands-on examples using JavaScript. Why JavaScript? It illustrates the programming concepts explained in the book, requires no special editor or compiler, and runs in any browser. Little or no experience needed because the emphasis is on learning by doing. There are example coding exercises throughout every chapter, varying in length and representing simple to complex problems. Students are encouraged to think in terms of logical steps needed to solve a problem and can take these skills with

any programming language in the future. To help reinforce concepts for students, each chapter has a chapter summary, review questions, hands-on activities, and a running case study that students build on in each chapter. Memory and Technology 10 2021 How is technology changing the way we remember? This book explores the interplay of memory stored

brain (internal memory) and outside of the brain (external memory), providing a thorough interdisciplinary review of the current literature, including relevant theoretical frameworks from across a variety of disciplines in the sciences, arts, and humanities. It also presents the findings of a novel empirical data set, based on a comprehensive survey on the shifting interplay of internal and external memory in the 21st century. Results show a growing symbiosis between the two forms of memory in our everyday lives. The book presents a new theoretical framework for understanding the interplay of internal and external memory, and their complementary strengths. It concludes with a guide to important dimensions, questions, and methods for future research. *Memory and Technology* will be of interest to researchers, professors, and students across the disciplines of psychology, philosophy, library and information science, human factors, media and cultural studies, anthropology and archaeology, photography, and cognitive rehabilitation, as well as anyone interested in how technology is affecting human memory.

_____ "This is a novel book, with interesting and valuable data on an important, meaningful topic, as well as a gathering of multidisciplinary interdisciplinary ideas...The research is accurately represented and included. As a teaching tool, I can envision graduate seminars in different disciplines drawing on the material as the basis for teaching and discussions." Dr. A. Henkel, Fairfield University "This book documents the achievements of a vibrant scientific project – you feel the enthusiasm of the authors for their research. The organization of the manuscript introduces the reader into a comparatively new field the same way as pioneering authors have approached it." Prof. Dr. Wolfgang Schönplug, Freie Universität Berlin
