Robert A. Heinlein: In Dialogue with His Century, Volume 2 Jan 28 2023 Robert A. Heinlein: In Dialogue with his Century: 1948-1988 The Man Who Learned Better: The real-life story of Robert A. Heinlein in the second volume of the authorized biography by William H. Patterson! Robert A. Heinlein (1907–1988) is generally considered the greatest American science fiction writer of the twentieth

century. His most famous and widely influential works include the Future History series (stories and novels collected in *The Past Through Tomorrow* and continued in later novels), *Starship Troopers*, *Stranger in a Strange Land*, and *The Moon is a Harsh Mistress*—all published in the years covered by this volume. He was a friend of admirals, bestselling writers, and artists; became committed to defending the United States during the Cold War; and was on the advisory committee that helped Ronald Reagan create the Star Wars Strategic Defense Initiative in the 1980s. Heinlein was also devoted to space flight and humanity's future in space, and he was a commanding presence to all around him in his lifetime. Given his desire for privacy in the later decades of his life, the revelations in this biography make for riveting reading. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Extreme Asia Jul 22 2022 From Japanese horror to South Korean revenge thrillers, and from the new Hong Kong crime film to Thailand's boundary-breaking ghost stories, Western audiences have been stunned by a boom in challenging cult cinema from East Asia over the last decade. But how did this cycle of 'Extreme' Asian films gain such notoriety? How did distribution companies, journalists, critics and censors contribute to the rise of a new genre of forbidden foreign cinema? *Extreme Asia: The Rise of Cult Cinema from the Far East* charts the history of the recent cult Asian film invasion, covering a five-year period and focusing on the

activities of the distribution company Tartan Films and their incredibly influential Asia Extreme brand. Through a series of case studies of individual releases and other exhibition events, this book examines strategies of film promotion and consumption in the context of differing theories about horror cinema, movie marketing, reception studies, and Orientalism. Covering the rise and fall of the Asia Extreme label, and the enduring legacy of an unforgettable wave of cult cinema, this is a comprehensive study of a film movement that has provoked passion and outrage in equal measure.

Japan Apr 18 2022 From the revered classics of Akira Kurosawa to the modern marvels of Takeshi Kitano, the films that have emerged from Japan represent a national cinema that has gained worldwide admiration and appreciation. The Directory of World Cinema: Japan provides an insight into the cinema of Japan through reviews of significant titles and case studies of leading directors, alongside explorations of the cultural and industrial origins of key genres. As the inaugural volume of an ambitious new series from Intellect documenting world cinema, the directory aims to play a part in moving intelligent, scholarly criticism beyond the academy by building a forum for the study of film that relies on a disciplined theoretical base. It takes the form of an A-Z collection of reviews, longer essays, and research

resources, accompanied by fifty full-color film stills highlighting significant films and players. The cinematic lineage of samurai warriors, yakuza enforcers, and atomic monsters take their place alongside the politically charged works of the Japanese New Wave, making this a truly comprehensive volume.

American Cars, 1973-1980 Jan 16 2022 The 1973 oil crisis forced the American automotive industry into a period of dramatic change, marked by stiff foreign competition, tougher product regulations and suddenly altered consumer demand. With gas prices soaring and the economy in a veritable tailspin, muscle cars and the massive "need-for-speed" engines of the late '60s were out, and fuel efficient compacts were in. By 1980, American manufacturers were churning out some of the most feature laden, yet smallest and most fuel efficient cars they had ever built. This exhaustive reference work details every model from each of the major American manufacturers from model years 1973 through 1980, including various "captive imports" (e.g. Dodge's Colt, built by Mitsubishi.) Within each model year, it reports on each manufacturer's significant news and details every model offered: its specifications, powertrain offerings, prices, standard features, major options, and production figures, among other facts. The work is heavily illustrated with approximately 1,300 photographs.
