**American Cinema/American Culture** Jun 14 2021 "This book introduces the reader to basic issues related to the phenomenon of American cinema. It looks at American film history from the 1890s through the spring of 2020, but it does not always explore this history in a purely chronological way. In fact, it is not (strictly speaking) a history. Rather, it is a cultural history, which focuses more on topics and issues than on what happened when. It begins with a profile of classical Hollywood cinema as a unique economic, industrial, aesthetic, and cultural institution. It considers the experience of moviegoing; the nature of Hollywood storytelling; and the roles played by the studio system, the star system, and film genres in the creation of a body of work that functions not only as entertainment but as a portrait of the relationship between an American national identity and an industrialized mass culture that has slowly evolved over the past century. This book assumes that the reader has little or no formal training in film history, theory, or aesthetics. It presents fairly basic concepts in such a way as to encourage discussion, not so much of individual films, but of films in general. For this reason, the book concentrates on large groupings of films-on genres, topics, and periods of film history. This textbook differs from the more traditional histories of the cinema for certain specific and important reasons. Over the past fifty years, the field of film study has undergone a tremendous transformation. This change has been spearheaded by the work of a new generation of scholars who challenge the traditional way in which film history has been written and taught. Introduction to Film courses that, fifty years ago, taught film as art, drew heavily upon the approaches of New Criticism. Contemporary film courses now teach film not only as art but also as

film, and they attempt to situate film as an art form within a larger industrial, economic, social, and cultural context. They rely heavily on cultural studies, new historicism, psychoanalysis, and other contemporary critical disciplines. Film history texts have changed over the years as well. In the past, histories consisted of simple, chronological accounts of who-did-what and what-happened-when, and of the stories of great men (sic) and their achievements, and of straightforward accounts of the influence of technology and economics on the course of a history that unfolds in a linear fashion up to the present. More recently, film scholars have begun to rewrite these traditional histories, creating what Thomas Elsaesser refers to as "the New Film History." At its best, this history is driven by a sophisticated, theoretically informed revisionism. It simply refuses to accept the easy answers to basic historical questions that had been offered up by past historians. With the initial publication of *American Cinema/American Culture* in 1994, the methods and discoveries of "the New Film History," were applied to an introductory level text surveying the history of the American cinema"--

*Culture and Psychology* Mar 04 2023 CULTURE AND PSYCHOLOGY, 6th Edition illustrates how and why culture influences mental processes and behaviors in humans, and is relevant for anyone interacting with people from different cultures. Incorporating current research that highlights the relationship between culture and psychology, the authors' use a cross-cultural framework that gives students the tools necessary for evaluating many psychological processes and principles from a cultural perspective. In addition, the text encourages students to question traditionally held beliefs and theories and their relevance to different cultural groups today, and to apply what they learn to their own lives. Media and Society Dec 29 2019 Media and Society is an established textbook, popular worldwide for its insightful and accessible essays from leading international academics on the most pertinent issues in the media field today. With this updated edition, David Hesmondhalgh joins James Curran and a team of leading international scholars to speak to current issues relating to media and gender, media and democracy, sociology of news, the global internet, the political impact of the media, popular culture, the effects of digitisation on media industries, media and emotion, and other vital topics. The media are in a state of ferment, and are undergoing far-reaching change. The sixth edition tries to make sense of the media's transformation, and its wider implications. Purely descriptive accounts date fast, so the emphasis has been on identifying the central issues and problems arising from media change, and on evaluating its wider consequences. What is judged to be the staple elements of the field has evolved over time, as well as becoming more international in orientation. Yet the overriding aim of the book - to be useful to students - has remained constant. This text is an essential resource for all media, communication and film studies students who want to broaden their knowledge and understanding of how the media operates and affects society across the globe.

Chinese History and Culture Oct 07 2020 The recipient of the Kluge Prize for lifetime achievement in the humanities and the Tang Prize for "revolutionary research" in Sinology, Ying-shih Yü is a premier scholar of Chinese studies. Chinese History and Culture volumes 1 and 2 bring his extraordinary oeuvre to English-speaking readers. Spanning two thousand years of social, intellectual, and political change, the essays in these volumes investigate two central questions through all aspects of Chinese life: what core values sustained this ancient civilization through centuries of upheaval, and in what ways did these values survive in modern times? From Yü Ying-shih's perspective, the Dao, or the Way, constitutes the inner core of Chinese civilization. His work explores the unique dynamics

between Chinese intellectuals' discourse on the Dao, or moral principles for a symbolized ideal world order, and their criticism of contemporary reality throughout Chinese history. Volume 1 of Chinese History and Culture explores how the Dao was reformulated, expanded, defended, and preserved by Chinese intellectuals up to the seventeenth century, guiding them through history's darkest turns. Essays incorporate the evolving conception of the soul and the afterlife in pre- and post-Buddhist China, the significance of eating practices and social etiquette, the move toward greater individualism, the rise of the Neo-Daoist movement, the spread of Confucian ethics, and the growth of merchant culture and capitalism. A true panorama of Chinese culture's continuities and transition, Yü Ying-shih's two-volume Chinese History and Culture gives readers of all backgrounds a unique education in the meaning of Chinese civilization.

*Culture and Politics* Oct 19 2021 This concise, accessible text presents an overview of the relevance of culture for politics. Culture figures prominently in the theories of the great classics such as Marx, Durkheim and Weber. Recently, the cultural approach to politics has developed quickly, and the concept of political culture has played a role in these developments, particularly given the emergence of large-scale survey research into political value orientations. Seeking to outline this rapid development, the book is divided into three sections: Section I of the book discusses the relevance of cultural perspectives to political analysis including discussion of the most significant

concepts and methods. Section II looks at the core elements of political culture - tradition, ethnicity and religion. Section III examines emerging research avenues and opportunities including social capital, value orientations in the postmodern world, newer formulations of political culture such as gender and sexuality and the influence of the environment. Drawing on a wealth of examples and a comprehensive analysis of comparative data, this textbook is essential reading for all students of political culture, research methods, political sociology and comparative politics.
