Plastic Surgery Oral Board Prep Jun 05 2020 A unique resource for passing the rigorous American Board of Plastic Surgery oral board exam Passing the plastic surgery board examinations necessitates meeting extremely demanding criteria. Certification from the ABPS is the gold standard – a significant milestone requiring intensive study, passing the written exam, and the highly challenging two-day oral board component. procedures are encompassed throughout 22 chapters, enabling readers to synthesize knowledge and articulate it efficiently and effectively. Key Highlights Nearly 400 Q&A mirror the type and sequencing of questions on the oral board exam Reconstruction topics include skin cancer, facial defects and trauma, back and trunk, traumatic hand injuries, lower extremity wounds, cleft lip and palate, and craniosynostosis syndromes Aesthetic and elective surgery chapters cover the aging face, breast, body and trunk, and hand Current recommendations for management of coexisting medical conditions such as thromboembolism prophylaxis and perioperative management of cardiac disease This is an invaluable board study resource for plastic surgery residents and surgeons preparing for the oral board exam. Foundational Papers in Oculoplastics Jul 19 2021 Modern oculofacial plastic surgery as a field is quite young, with the majority of the literature and leaders in the field developing since the 1950s. As such, the body of literature is quite small compared to other fields. Currently, there is no unified source where readers can learn about the core manuscripts that drive clinical decision-making and influence thought. This book gathers over 50 foundational studies in the oculoplastics field and provides commentary on each study. Discussion of each study includes the abstract, in-depth commentary on the strengths, limitations, and implications of each paper, and guidance for further reading on the topic with a brief review. A short remark by an author from the paper will provide additional color commentary on the inspirations and challenges involved in conceiving and conducting the study. Foundational Papers in Oculoplastics is relevant for anyone who is interested in oculoplastics (ophthalmologists, oncologists, plastic surgeons, etc.) and provides a nice overview of the field with interesting personal anecdotes from those who helped establish it.
