East Anglia - the jewel in the crown of British birding. The counties of Norfolk, Suffolk and Cambridgeshire represent the most popular region for birders and naturalists to visit in the British Isles, whether to see wintering flocks of geese and waders, rare vagrants, scarce breeding birds such as cranes and bitterns, or just to soak up the countryside, be it fen, broad, coastal dune, breckland, heath or down. This new book by David Callahan is the definitive guide to the birding highlights of the region. It contains a comprehensive review of all the major sites, and many lesser-known ones, with maps, notes on access, and information on target species and when to visit. Where to Watch Birds in East Anglia is indispensable for any birder heading to this bird-rich corner of England. Excerpt from *Old Houses and Village Buildings in East Anglia, Norfolk, Suffolk, and Essex* While care has been taken to select for illustration the most pleasing and usually unfamiliar subjects, this book makes no pretence at being in any way exhaustive. My endeavour has been to give representative examples of all types of small buildings - other than ecclesiastical - which were erected between the latter part of the fifteenth century and the early years of the eighteenth. The plans of these old buildings - altered and adapted as they have been from time to time - are, as a rule, inconvenient according to modern requirements. It is from the external treatment and in other respects that there is so much to be learnt, and consequently it has not been thought necessary to give many plans in the pages following. It is a pleasure to put on record that owners or tenants of every kind of house have, without exception, shown the greatest kindness and courtesy in readily giving permission for photographing, sketching, and even for measuring. I am glad to have this opportunity of thanking them one and all. I wish also to express my obligations to Mr. Alan Binning, (royal Academy Gold Medallist and Travelling Student, 1911), for the use of his three pencil sketches of King's Lynn and Norwich, and for allowing me the use of the originals of Figs. 61, 62, 63, 67, 68, 70 and 71. My thanks are due to Mr. W. Whympers, for kindly photographing Bentley Hall (figs. 18 and 19) for me, and to Mr. Edwin Gunn. A guide to many medieval historical places of interest in Norfolk and Suffolk, first published in 1930. This is the 7th edition of the *Hidden Place of Anglia*, one of the *Hidden Places* most popular titles and will be printed in full colour. The East Anglian counties offer plenty for the visitor to explore in real *Hidden Places* country. Norfolk is famous for the Norfolk Broads but has a rich and interesting past, gentle hills as well as expansive horizons, delightful pastoral scenes, a beautiful coastline rich in wildlife and many interesting hidden places to visit. Suffolk was made famous by the brush of John Constable and is blessed with incomparable rural beauty, which encompasses wide-open spaces broken by gentle hills and tidal rivers meandering from a coastline teeming with birdlife. Essex contains England's oldest recorded town (Colchester) has a strong maritime tradition, pretty villages, a coastline with attractive estuaries and a rich history going back to Roman times. Cambridgeshire is famous for its ancient university and being the birthplace of Oliver Cromwell and Samuel Pepys but offers a wealth of peaceful and attractive countryside with many towns and villages steeped in history, which are truly "hidden places." The book is packed with information and coloured photographs covering the more secluded and little known venues for food, accommodation and places of interest as well as the more enduring attractions of the region. They came prominently into notice during the Wars of the Roses, the Reformation, and the Cromwellian period. They thus shared in the disputes, struggles, fortunes, and sufferings of the party whose cause they espoused. Norfolk and Suffolk have far more places of Christian worship than any other English county with the exception of Lincolnshire. Their pre-conquest origin and location can often be revealed by careful examination of William I's great survey. However, when confronted with the mass of data presented, the Domesday text can appear ambiguous or contradictory to the historian. In this book the author has painstakingly arranged the data into tables to provide a unique research tool for those interested in the existence of a place of worship during the Anglo-Saxon period. It is meant as a handbook to assist investigation into the location and distribution of the churches recorded within the document. In addition to presenting data for each church, the author further encourages the reader to engage in his/her own research into a locality by providing a model study of one particular area of Suffolk: the half-hundreds of Lothingland and Mutford. He also investigates the valuation of church land-endowments, parishes with round-tower buildings and the presence of freewomen as land-holders, examining their potential role as founders of churches or as encouragers of other people to establish them. He proposes that, in contrast with Norfolk, Suffolk had certain high-born women who were influential in the communities they controlled and a greater number of lower-status ones who were nevertheless a significant social feature.
