How to Pass MRCP PACES in 8 Weeks Nov 29 2022 Have you ever wondered why some candidates effortlessly clear MRCP PACES on their first attempt whilst others struggle? How can you harness the power of Parkinson's Law and many other practical concepts to pass MRCP PACES in just eight weeks? And what is the PACES Triangle? The answers to all these questions and more are in *How to Pass MRCP PACES in 8 Weeks*. In this concise guide, Dr Rory Chan takes you through all the non-clinical aspects you need to consider when tackling MRCP PACES. Although numerous great books exist to help you learn clinical information, this is the very first book to our knowledge that provides PACES-specific strategy and is a must-read prior to one of the most important exams of your medical career. We estimate that after reading this guide, you'll certainly increase your chances of passing MRCP PACES by at least 30%.

OSCE Stations for Medical Finals Oct 29 2022 This second new OSCE title delivers another set of up to date popular cases encountered on the wards and in the exams. *OSCE Stations for Medical Finals Book 2: Scenarios* is created to reflect current exam topics, each scenario is subdivided into 4 to 6 related tasks. The reader is guided through stations covering: history taking, clinical signs, data interpretation, and clinical therapeutics. By working methodically through the tasks the authors hope to promote the application and utilisation of knowledge and skills, asking candidates to think and act on the clinical information they have gathered. As the stations and tasks are linked, the candidate starts at station 1, and moves through each of the subsequent stations in the given order. Mirroring the real world, each task would be performed on the same patient.

The MRCP PACES Handbook Feb 01 2023 MRCP PACES is a challenging examination requiring in-depth clinical knowledge, excellent clinical skills and the ability to present each case concisely and coherently. This revision guide helps candidates achieve these aims; it is compact enough for bedside use and sufficiently comprehensive for self-study. The new edition follows the structure of the current PACES exam and has an expanded section on Station 5. As well as a wealth of up-to-date questions for practice, it includes extensive new clinical information on new therapies and details of the latest investigations and management options. Each chapter has been reviewed by senior clinicians within the specialty.

- Presents all seven stations in one book
- Provides practical hints and tips for success at each station
- Presents much more comprehensive information in a compact and accessible format than other books
- Provides evidence-based information, guidelines and questions mapping onto the latest examination format. This book teaches the candidate not

only how to pass the PACES exam, leading the reader through each case and exactly what is expected of them, but also provides a succinct yet detailed clinical handbook for support on medical wards.

50 Studies Every Internist Should Know Jul 26 2022 50 Studies Every Internist Should Know presents key studies that shape today's practice of internal medicine. Selected using a rigorous methodology, the studies cover topics including: preventative medicine, endocrinology, hematology and oncology, musculoskeletal diseases, nephrology, gastroenterology, infectious diseases, cardiology, pulmonology, geriatrics and palliative care, and mental health. For each study, a concise summary is presented with an emphasis on the results and limitations of the study, and its implications for practice. An illustrative clinical case concludes each review, followed by brief information on other relevant studies. This book is a must-read for health care professionals and anyone who wants to learn more about the data behind clinical practice.

Epidemiology Dec 27 2019 This popular book is written by the award-winning teacher, Dr. Leon Gordis of the Bloomberg School of Public Health at Johns Hopkins University. He introduces the basic principles and concepts of epidemiology in clear, concise writing and his inimitable style. This book provides an understanding of the key concepts in the following 3 fully updated sections: Section I: The Epidemiologic Approach to Disease and Intervention; Section II: Using Epidemiology to Identify the Causes of Disease; Section III: Applying Epidemiology to Evaluation and Policy. Clear, practical graphs and charts, cartoons, and review questions with answers reinforce the text and aid in comprehension. Utilizes new full-color format to enhance readability and clarity. Provides new and updated figures, references and concept examples to keep you absolutely current - new information has been added on Registration of Clinical Trials, Case-Cohort Design, Case-Crossover Design, and Sources and Impact of Uncertainty (disease topics include: Obesity, Asthma, Thyroid Cancer, Helicobacter Pylori and gastric/duodenal ulcer and gastric cancer, Mammography for women in their forties) - expanded topics include Person-time. Please note: electronic rights were not granted for several images in this product. Introduces both the underlying concepts as well as the practical uses of epidemiology in public health and in clinical practice. Systemizes learning and review with study questions in each section and an answer key and index. Illustrates textual information with clear and informative full-color illustrations, many created by the author and tested in the classroom.

MRCP Facts Dec 19 2021 1000+ high yield facts for the MRCP & Acute Medicine SCE "Finally a resource that takes into consideration the time-pressures of long shifts & the sheer volume of knowledge that is required for these post-graduate exams" - Dr. Isabel Walters (Cheshire, UK) "Your work really helped me with the MRCP Part 2 written exam & I'm happy to let you know that I managed to pass it on my first attempt" - Dr. Joel George (Belgaum, India) The purpose of this book is crystal clear: to help you pass your

exams through productive and efficient learning. It breaks up your revision into manageable chunks so that it does not feel daunting, tedious or impractical. In fact, if you spend just 1 minute immersed in its text, you will learn a thing or two. You don't even have to start at the beginning, you can start anywhere you like! Now although these exams are separate entities, they build upon each other with increasing relevance to clinical practice. For example you need MRCP Part 1 knowledge to pass MRCP Part 2. You need MRCP Part 2 knowledge to pass PACES & the Acute Medicine SCE. This book provides such scope and addresses an array of topics across the many syllabi. It functions as a hybrid between an MCQ book and a textbook, presenting these topics as high yield facts. Each fact is in the form of a question to mirror the exams. However, unlike MCQ books, you don't have to annoyingly jump to the back to read the answer. The answer is right under the question. There are many benefits to this approach: By touching on a variety of different topics, it helps identify your deficiencies and builds upon your strengths. It focuses on boosting your memory through strategies like spaced repetition and active recall e.g. you will quickly find that it brings to light information that you previously learnt but may have forgotten. The facts are presented like a random generator to train your brain to quickly transition from one specialty to another. Many of them have clinical context to aid with learning through association e.g. it is easier to remember the management of a condition when you have seen or treated someone with it, rather than cramming the NICE guidelines. Finally it's worth mentioning that this book is not just for those doing exams. It facilitates lifelong learning. If you dip into it every so often, you'll find yourself developing as a better physician and providing a higher standard of care for your patients. Unlike the vast majority of doctors who forget everything that was once learnt, you will be an exception by keeping your knowledge alive with this book. About the author Dr. Muzzammil Ali is the founder of the Instagram page @mrcpfacts. He is currently a registrar in the United Kingdom and is training in 2 different specialties: Acute Medicine & Intensive Care Medicine. This career choice means that he has had to do many exams. So far, he has completed the MRCP Part 1, Part 2, PACES and the Acute Medicine SCE, all in his first sitting. He is currently in the process of preparing for the FFICM exams in the near future. His passion for education has translated in him being the Education Lead for the Intensive Care Unit at the Queen Elizabeth Hospital Birmingham, one of the largest tertiary hospitals in the UK. Through his revision, he faced 3 main challenges: Having little time and energy to revise. Having to remember lots of information and quickly transition from one specialty to another. The lack of dedicated resources to revise for the Acute Medicine SCE. He wrote this book with the hope that it will help to address these challenges, and make revision manageable, enjoyable and ultimately successful! He wishes you all the best of luck in your exams!

Mrcp Paces Clinical Pearls Nov 05 2020 MRCP PACES is widely regarded as the most challenging hurdle to obtaining membership to the Royal College of Physicians. Passing the exam requires more than knowledge alone and many incredibly talented doctors fail every year due to various factors. The most common failure point is scoring poorly on the 'physical signs' strand of the exam. This book is designed to be a complete yet concise guide to the MRCP PACES examination and will guide you through the stations in a systematic way to help you score top marks in the exam. This book does not replace examining patients to elicit signs, and omitting this step in your preparation is a sure way to fail! This book will also be useful for medical students doing their OSCE's who are keen to get an edge over their peers, though the level of detail will be greater than required. This book will cover the key aspects of the exam including: (1) The exam format (2) Examination routines (3) Common and important cases represented in the PACES exam (4) Key physical findings (5) Presentation techniques for the different stations (6) Useful skills to narrow the differential diagnosis from the end of the bed. It is the book we wish we had when we sat the MRCP PACES exam!

Essential Revision Notes in Medicine for Students Aug 27 2022 Designed to help medical students through their exams. On Rounds: 1000 Internal Medicine Pearls Jul 02 2020 Clinical judgment is a critical aspect – perhaps the most critical aspect – of efficient, accurate, and cost-effective patient care. Focusing on essential clinical skills, *On Rounds: 1000 Internal Medicine Pearls* helps clinicians in training and in practice to identify the critical findings that will simplify complex clinical problems and lead to an accurate diagnosis. One thousand easy-to-remember clinical aphorisms, or “pearls,” help you distinguish the important findings from the incidental, pointing out the distinctive features amidst the mass of data that is accumulated in the evaluation of a sick patient, and leading to the development of mature clinical judgment. Go “on rounds” with one of the most respected educators in internal medicine and learn from his nearly 50 years of clinical experience. Focus on the areas that are often a source of confusion for students, trainees, and even seasoned practitioners. Learn each pearl in a relevant clinical context, with tables, clinical images, and physiology information, where appropriate. Recognize “black pearls:” statements that, although widely believed, are demonstrably false. Improve your clinical judgment skills whether you’re a resident or an experienced clinician. Carry these pocket-sized pearls with you for quick reference.

Neuro-Ophthalmology Jan 08 2021 Neuro-ophthalmology is a field of medicine that touches on every subspecialty in neurology, but has an undeserved reputation as a branch of knowledge that is difficult to learn and practice. Many neurologists and ophthalmologists do not receive sufficient exposure to neuro-ophthalmology during their residencies, and are uncomfortable diagnosing and treating patients with neuro-ophthalmic problems. Authored by neuro-ophthalmologists whose careers span three generations in the field, *Neuro-Ophthalmology* helps clinicians evaluate and manage patients with neuro-ophthalmic problems. This "curb-side consult" approach is divided into five sections: afferent (visual) disorders; efferent (eye movement) disorders; eyelid disorders; pupil disorders; and

combination syndromes. Based on the most current scholarly evidence and filled with practical advice, *Neuro-Ophthalmology* provides the answers to "what do I do now?"

Medicine for MRCP Jun 24 2022 *Medicine for MRCP* provides a comprehensive review of the material that you need to pass the MRCP Parts 1 and 2 written papers. The twenty-seven chapters mapped out to the RCP syllabus, cover all areas from molecular medicine and genetics, through to medical law and ethics. Written by specialist contributors and educational experts, the content is carefully crafted to build your understanding for both papers. Each chapter begins with the basic science required for Part 1, before covering clinical medicine for Part 1, Part 2 and the PACES examinations. To ensure effective revision, material is presented in short sections with bullet lists, tables, and boxes. Over 150 drawings and photos illustrate key principles and clinical topics making them easier to retain. References to evidence-based protocols and directions to further reading allow for deeper understanding. Candidates can review their progress via the 180 end-of chapter self-assessment questions. Drawing on the authors' expertise, *Medicine for MRCP* is the ideal companion for the MRCP as well as a useful reference guide for practicing medical doctors.

OSCEs for Medical Finals Sep 27 2022 OSCEs for Medical Finals has been written by doctors from a variety of specialties with extensive experience of medical education and of organising and examining OSCEs. The book and website package consists of the most common OSCE scenarios encountered in medical finals, together with checklists, similar to OSCE mark schemes, that cover all of the key learning points students need to succeed.

Each topic checklist contains comprehensive exam-focussed advice on how to maximise performance together with a range of 'insider's tips' on OSCE strategy and common OSCE pitfalls. Designed to provide enough coverage for those students who want to gain as many marks as possible in their OSCEs, and not just a book which will ensure students 'scrape a pass', the book is fully supported by a companion website at

www.wiley.com/go/khan/osces, containing: OSCE checklists from the book A survey of doctors and students of which OSCEs have a high chance of appearing in finals in each UK medical school

PACES for the MRCP Mar 22 2022 This title is written for MRCP candidates preparing for PACES exam in UK and rest of world. Clinical examinations in the OSCE style of marked stations are daunting for all students, whether undergraduates or MRCP candidates. The recent introduction of the 5-station PACES (Progressive Assessment of Clinical Examination Skills) exam inspired a great deal of apprehension, so the appearance of the first edition of Hall's PACES for MRCP was greatly welcomed by candidates and became an immediate success. This new edition builds on the book's reputation. It provides, in one colourful and attractive volume, complete coverage of all the most common medical cases that will be covered in PACES and similar exams. A one-volume text giving candidates complete preparation for the PACES exam within one portable volume 250 cases organised into the 5 stations of the PACES exam - respiratory and abdominal system, history taking, cardiovascular and nervous system, communication and ethics and skin, locomotion, eyes and endocrine systems Engaging question-and-answer approach at the end of each case - excellent preparation for the exam Boxed tips highlight vital information - helps identify what is most important to remember Produced in full colour throughout Colour coding for each station Many more illustrations added - now over 300 clinical photographs and line drawings in colour Many more cases added, bringing the number up to 250 - 50 per station History-taking and communication skills stations now revised so that they exactly mimic the requirements of the exam
