*Corporate Social Responsibility: Critiques, Policies and Strategies (Vol. 1)* Aug 27 2020 Corporate Social Responsibility as an analytical tool can be used in the field of Business Management to facilitate different business practices from both an ethical angle and a utilitarian perspective. Business managers should try to entrench networks of trust, loyalty and cooperation within and without their organizations. This also makes good business sense in terms of rational choice theory. Good business is also about establishing customer-friendly images in a manner that highlights values such as reliability, trustworthiness, quality, economy and durability. These values evolve over time and are underpinned by a sustained relationship of confidence. So specific products more often than not become identified with brand names either for niche or for broadbased markets. Brand equity and positioning so generally depend upon the successful merchandizing of products and their images. The problematique of this edited anthology is structured around the polemic of civil societal institutions (networks and embeddedness) and democratic governance (inclusive growth and participatory development) among other critical areas of social scientific research. This line of theoretical research is expected to contribute new knowledge and facilitate innovative research to better understand the interactions and interplay between actors and their institutions. This anthology would benefit corporate managers, business leaders, management researchers / students, social scientists and the general reader.

**DSA e compiti a casa** Feb 13 2022 Quello dei compiti è, per ogni studente, un momento tutt'altro che atteso o piacevole... se poi l'alunno in questione presenta un Disturbo Specifico dell'Apprendimento, le attività scolastiche da svolgere a casa possono risultare ancora più faticose e frustranti. Per questo, l'individuazione di una strategia efficace che renda lo studio, tanto per i genitori quanto per i figli, non un'incombenza stressante ma un lavoro proficuo e vantaggioso, diventa di fondamentale importanza. Partendo dall'analisi parallela delle tipologie di compito da svolgere, delle difficoltà individuali e delle modalità di supporto che è possibile fornire, DSA e compiti a casa mira alla costruzione di un progetto di studio personalizzato per ogni studente, che consenta non solo di affrontare il lavoro a casa più serenamente ma anche di farne un'ulteriore occasione di apprendimento. Accompagnandosi alle testimonianze e ai racconti di chi in prima persona ha vissuto e superato le ricadute che un disturbo specifico di apprendimento può avere sul rendimento scolastico, il volume si rivolge a studenti, genitori, insegnanti e educatori, e in generale a chiunque si occupi di supportare e seguire a casa i nostri ragazzi nello svolgimento dei compiti. Il testo affronta le seguenti tematiche: - DSA e compiti: una miscela esplosiva? - Dalla diagnosi ai compiti passando per il Piano Didattico Personalizzato -

SOS compiti: carta d'identità dell'homework tutor - DSA e studio - DSA e compiti scritti - Gli esami non finiscono mai! (ovvero: DSA e preparazione agli esami) - I compiti non vanno in vacanza (ovvero: DSA e compiti delle vacanze).

**Taming the Wild Text: Literacy Strategies for Today's Reader** Feb 19 2020 This professional resource equips K-12 students with the skills they need to be critical readers in the 21st century. Today's reader is reading across multiple genres, on phones and tablets, with text in hand, and also online, and this helpful book provides educators with techniques on how to teach students to read on every platform and in every genre, to struggle with text, and to break through to new ideas when reading text. It focuses on the habits that students must form in order to gain the confidence to access all texts across all platforms. Each chapter is devoted to developing the five habits for successful reading: reading closely, widely, critically, deeply, and purposefully. Grounded in the latest research, the easy-to-implement strategies and instructional methods will help students cultivate strong reading skills in the 21st century classroom.

**Inclusion Strategies That Work!** Dec 31 2020 The go-to book for including ALL learners in educational success! Teaching students with diverse needs require educators to employ empathy, responsiveness, and patience. This book has long been the indispensable resource for K-12 teachers as they confidently form lesson plans and strategies for inclusion. In this new edition, Toby J. Karten's data-driven methods are updated with the latest research and policy developments. The book's content includes: Updated information on ADA, IDEA, writing IEPs, transitional services, classifications, RTI, metacognitive strategies, and links to the Common Core Tips for working with families and making them an integral part of the inclusive team An overview of special education legislative terminology Interactive online forms for planning, documentation, and collaboration

**Workers, Neighbors, and Citizens** Nov 29 2020 Workers, Neighbors, and Citizens examines the mobilization of workers and the urban poor in Mexico City from the eve of the 1910 revolution through the early 1920s, producing for the first time a nuanced illumination of groups that have long been discounted by historians. John Lear addresses a basic paradox: During one of the great social upheavals of the twentieth century, urban workers and masses had a limited military role, yet they emerged from the revolution with considerable combativeness and a new significance in the power structure. Lear identifies a significant and largely underestimated tradition of resistance and independent organization among working people that resulted in part from the changes in the structure of class and community in Mexico City during the last decades of Porfirio Diaz's rule (1876-1910). This tradition of resistance helped to join skilled workers and the urban poor as they embraced organizational opportunities and faced crises in wages and access to food and housing as the revolution escalated. Emblematic of these ties was the role of women in political agitation, street mobilizations, strikes, and riots. Lear suggests that the prominence of labor after the revolution was neither a product of opportunism nor one of revolutionary consciousness, but rather the result of the ongoing organizational efforts and cultural transformations of working people that coincided with the revolution.

**Multi-Platform Advertising Strategies in the Global Marketplace** Mar 14 2022 In today's multi-platform ecosystem, marketers rely on advertisements that can be accessed across multiple digital platforms to enhance audience engagement and outreach. Advertisers are exploring the global impacts of social and mobile media as part of this integrated approach. Multi-Platform Advertising Strategies in the Global Marketplace examines the international diffusion of multi-platform advertising communication practices in an

increasingly globalized economy. Featuring coverage on relevant areas including cross-media, digital marketing, and consumer behavior, this extensive publication is suitable for researchers, marketers, advertisers, and business professionals interested in the global impacts of multi-platform media on the advertising industry.

**Imperatives and Directive Strategies** May 16 2022 Imperatives and directive strategies have intrigued both formalists and functionalists. They continue to search for the answers to questions like “what are the semantics of the imperative?”, “how is it used (in the world’s languages)?” and “which factors determine the choice between imperatives and other directive strategies?”. This volume takes a broadly functional-typological perspective and contributes to the literature in several respects. It presents new data from a variety of languages, some of which have not been studied in depth before. It exemplifies the benefits of traditional methodologies as well as the potential of more innovative ones. In addition, the volume sheds new light on the imperative as a typological notion, its meaning and uses and its interaction with other grammatical categories. It also offers new insights into the relation between different directive strategies within and across languages and into the (dis)similarities between equivalent directive strategies in a language family.

**Techniques for Noise Robustness in Automatic Speech Recognition** Feb 25 2023 Automatic speech recognition (ASR) systems are finding increasing use in everyday life. Many of the commonplace environments where the systems are used are noisy, for example users calling up a voice search system from a busy cafeteria or a street. This can result in degraded speech recordings and adversely affect the performance of speech recognition systems. As the use of ASR systems increases, knowledge of the state-of-the-art in techniques to deal with such problems becomes critical to system and application engineers and researchers who work with or on ASR technologies. This book presents a comprehensive survey of the state-of-the-art in techniques used to improve the robustness of speech recognition systems to these degrading external influences. Key features: Reviews all the main noise robust ASR approaches, including signal separation, voice activity detection, robust feature extraction, model compensation and adaptation, missing data techniques and recognition of reverberant speech. Acts as a timely exposition of the topic in light of more widespread use in the future of ASR technology in challenging environments. Addresses robustness issues and signal degradation which are both key requirements for practitioners of ASR. Includes contributions from top ASR researchers from leading research units in the field

**Exploring Discourse Strategies in Social and Cognitive Interaction** Sep 20 2022 This volume offers readers interested in Discourse Analysis and/or Socio-Cognitive models of language a closer view of the relationship between

discourse, cognition and society by disclosing how the cognitive mechanisms of discourse processing depend on shared knowledge and situated cognition. An inter- and multidisciplinary approach is proposed that combines theories and methodologies coming from Conceptual Metaphor Theory, Multimodal Metaphor Theory, Critical Discourse Analysis, Narratology, Systemic Functional Linguistics, Appraisal Theory, together with the most recent developments of Socio-Cognitive Linguistics, for the analysis of real communicative events, which range from TV reality shows, commercials, digital stories or political debates, to technical texts, architectural memorials, newspapers and autobiographical narratives. Still, several key notions are recurrent in all contributions - embodiment, multimodality, conceptual integration, metaphor, and creativity- as the fundamental constituents of discourse processing. It is only through this wide-ranging epistemological and empirical approach that the complexity of discourse strategies in real contexts, i.e. human communication, can be fully comprehended, and that discourse analysis and cognitive linguistics can be brought closer together.

**ASIAN Countries' Strategies towards the European Union in an Inter-regionalist Context** Dec 19 2019 This is the first book on Asian countries' strategies towards the EU. Since the introduction of Common Foreign and Security Policy in 1993 and the publication of the EU's first strategic document on Asia one year later, hundreds of books and journal articles have been dedicated to the study of the EU policies towards Asia as a whole, or to individual Asian countries. However, very few of these researchers ever intended to explore the strategies of Asian countries, and Asian leaders' mindsets, vis-à-vis the EU. Quite often, the policies of Asian countries towards the EU were simply interpreted as responses to the EU's actions in Asia. Having been passive players for decades, Asian countries are now increasingly willing to participate in the formulation of regional and global orders, for which they need to articulate their own strategies and the world needs to better understand their mindsets. In the past two years, in the framework of EU Centres in Asia-Pacific, some top Asian scholars on EU-Asian relations were brought together to debate the strategies of individual Asian countries towards the EU, and evaluate the EU's actions in the region. In their eyes, the EU was interpreted as a normative power, a security player, a civilian promoter and a health-care supplier. Together, they aimed to establish some common rules for explaining Asian countries' strategies towards the EU after in-depth study of the actions of individual countries in their bilateral relations with the EU. This book is therefore indispensable to any efforts to understand Asian leaders' mindset in the EU-Asian relations and their strategies towards the EU in the twenty-first century.

**Barbarians to Bureaucrats: Corporate Life Cycle Strategies** Jun 24 2020 "One day your sluggish company will taken to the sound of a beating drum and the sight of a competitor approaching at ramming speed. On deck will be a jut-jawed Barbarian....He will hardly blink as his target is ripped asunder, sending

Aristocrats, Bureaucrats and their unfortunate shipmates to their corporate death....So goes Mr. Miller's tale, from which we can all profit." The Wall Street Journal Barbarians to Bureaucrats presents a brilliant new solution to a stubborn old business problem: how to halt a company's descent into wasteful, stifling bureaucracy. Lawrence M. Miller, a management consultant for such corporate giants as Xerox and 3M, argues that corporations, like civilizations, have a natural life cycle, and that by identifying the stage your company is in, and the leaders associated with it, you can avert decline and continue to thrive. Every company begins with the compelling new vision of a Prophet and the aggressive leadership of an iron-willed Barbarian, who implements the Prophet's ideas. New techniques and expansions are pushed through by the Builder and the Explorer, but the growth spawned by these managers can easily stagnate when the Administrator sacrifices innovation to order, and the Bureaucrat imposes tight control. And just as in civilizations, the rule of the Aristocrat, out of touch with those who do the real work, invites rebellion -- from employees, customers, and stockholders. It will take the Synergist, a business leader who balances creativity with order, to restore vitality and insure future growth. Executives from major corporations have already put the powerful insights of Barbarians to Bureaucrats into practice to regenerate their own companies. Now you can use this brilliant, lucid, and dazzlingly original book to put your company -- and your career -- back on track.

**Go-to-Market Strategies for Women Entrepreneurs** Aug 07 2021 This collection brings together leading scholars and practitioners with a variety of interests as related to women entrepreneurs. Taking a unique scholarly-practice approach, Crittenden builds an enticing story around several key variables that influence go-to-market strategies for women entrepreneurs.

**Handbook of Research on Strategies and Interventions to Mitigate COVID-19 Impact on SMEs** Mar 02 2021 The COVID-19 pandemic has affected every aspect of the modern world, and its impact is felt by all. The pandemic particularly has had a large impact on businesses as they were forced to close, supply chains were disrupted, and new health and safety precautions were adopted. As such, many businesses, especially small businesses, were faced with losses they could not afford. Governments and stakeholders across the world have thus needed to formulate various strategies and interventions to mitigate the negative consequences of the COVID-19 pandemic, particularly as they relate to small- and medium-sized enterprises (SMEs). The Handbook of Research on Strategies and Interventions to Mitigate COVID-19 Impact on SMEs is a comprehensive reference source that encapsulates the overall effect of COVID-19 on SMEs and a variety of strategies to overcome the negative effects and create more sustainable policies and organizations moving forward. The book offers a thorough overview of interventions and tactics to help organizations, entrepreneurs, and institutions of higher learning overcome the negative impact of COVID-19 while preparing policies for a more effective post-pandemic world. Covering

topics that include sustainable practices for development, interventions to lessen the impact of COVID-19, and psychological resilience for SME employees, this book is ideal for entrepreneurs, managers, executives, small businesses, family firms, academicians, scholar-practitioners, policymakers, researchers, and students.

**Political Strategies and Social Movements in Latin America** Sep 27 2020 This book investigates how social movements form their political strategies in their quest for social change and -when they shift from one strategy to another- why and how that happens. The author creates a model which distinguishes between two different roads to social change: one that passes through the seizure of state power and one that avoids any relationship with the state. Comparing the cases of two Latin American social movements, the Zapatistas in Mexico and the Bolivian Cocaleros, the volume argues that strategic choices are often decided upon through similar mechanisms. Ideal for a scholarly and non-specialist audience interested in Mexican and Bolivian politics, revolutions, and Latin American and social movement studies.

**Strategies for Survival at SIBIKWA 1988 - 2021** Feb 01 2021 This book provides an engaging and contextualised insight into a South African township-based arts centre that has survived the vicissitudes of steady militarisation in townships during some of the worst years of apartheid as well as the exhilaration of a new democratic policy while attempting to circumnavigate different policies and funding dispensations. Sibikwa provides arts centres across the world and especially those in decolonising countries with strategies for survival in tumultuous times. This multi-disciplinary book maps and co-ordinates wider historical, political, and social contextual concerns and events with matters specific to a community-based east of Johannesburg and provides an exploration and analysis by experts of authentic theatre-making and performance, dance, indigenous music, arts in education and NGO governance. It has contemporary significance and raises important questions regarding inclusivity and transformation, the function and future of arts centres, community-based applied arts practices, creativity, and international partnerships. This study will be of great interest to students and scholars in theatre and performance, indigenous music, dance, and South African history.

**Match Your Strategies for Brilliant Performance (UUM Press)** Mar 22 2020 What can the Match Your Strategies for Brilliant Performance book do for you? You can use the secrets in this book to become an effective strategic thinker, practitioner and scholar. The book can help you to understand the right strategic match and tackle the really important challenges you face in developing strategies and putting them into action. If you are ambitious, you can use the great strategic message in this book to achieve brilliant performance and shape your organization's future. The book has its own strategic advantage. It is easy to read without dumbing down its strategic idea. It is simple to use but is still based on a core set of intelligent strategic foundations to deliver success in a competitive world. Spanning seven chapters, the book covers topics such as an introduction, theory, perspective and approach, organizational performance, competitive strategy, market orientation, excellent strategic match model and strategic message for decision-makers. The book presents contents in an accessible manner, accompanied by local and global examples and scenarios. Each chapter starts and ends with strategic quotes and summary. The book can help students who are studying strategy as part of a course or degree. It is also useful for practitioners and general readers who seek essential knowledge on strategic management.

**Vector Biology, Ecology and Control** Dec 11 2021 Mir S. Mulla joined the faculty of the Entomology Department at the University of California, Riverside in 1956, only two years after the Riverside campus was established as an independent campus within the University of California system. Prior to his appointment, Mir received his B.S. from Cornell University and then moved to the University of California, Berkeley to pursue his graduate studies. His Ph.D. from Berkeley, awarded in 1955, completed his formal American education which was the purpose of his immigration from his native Kandahar in Afghanistan. In his over 50 years at Riverside, Mir has made an incalculable impact on vector biology both within the United States and in developing countries throughout the world. Within Southern California, Mir's basic and applied research led to the rapid and sustainable control of mosquitoes and eye gnats in the Coachella Valley and so directly enabled this region to grow to the thriving, large community it is today. In 2006 his efforts in facilitating the development of the low desert of southern California were recognized through the dedication of the Mir S. Mulla Biological Control Facility by the Coachella Valley Mosquito and Vector Control District. His success has been so profound that it remains somewhat cryptic to the many who now reside in, visit, and enjoy, this region of California, oblivious to the insect problems that severely restrained development until Mir and his students first applied their expertise many decades ago.

**Energy Design Strategies for Retrofitting** Jun 05 2021 Providing a coherent and realistic

vision of the implications of the energy issue in the future development of our cities; places emphasis on the links between very specific and technical topics and the most challenging issues concerning energy savings and the transition to a low carbon society. A great part of the built environment in most European cities consists of buildings dating from 60s to early 90s, for residential purposes: this stock clearly presents several problems related to its functional layout, as well as its energy/thermal behaviour. Applying sustainable and energy savings principles to retrofitting interventions on the stock above is one of the most urgent challenges to be met in the very near future. Giving some examples and case studies, this book investigates retrofitting interventions in terms of energy balance: from design strategies to choice of materials and components; from market trends analysis to economical assessment, from the targeted energy performance to the energy investments needed for achieving it. The reader will benefit from the real life experiences and related results described in this book and acquire all the tools for a constructive evaluation of the different options available to him/her, when faced with retrofitting interventions, thanks to a global view of all the issues involved.

**Language Alternation Strategies in Multilingual Settings** Jan 24 2023 This book is one of the first systematic studies to describe the linguistic repertoire and the communicative strategies adopted by Ghanaian immigrants in Italy. The linguistic repertoire of the Ghanaian community in Bergamo (Northern Italy) is described with a special focus on the different codes composing it. The author analyzes the role that each code plays in expressing the community members' ethnic and linguistic identity, and the speakers' attitudes towards each code. She draws on the results of qualitative analysis - adopting both a macro-sociolinguistic and a micro-sociolinguistic perspective - of a database of face-to-face interactions and of formal interviews involving a selected group of Ghanaian immigrants.

**Vector-Borne Diseases** Jan 20 2020 Vector-borne infectious diseases, such as malaria, dengue fever, yellow fever, and plague, cause a significant fraction of the global infectious disease burden; indeed, nearly half of the world's population is infected with at least one type of vector-borne pathogen (CIESIN, 2007; WHO, 2004a). Vector-borne plant and animal diseases, including several newly recognized pathogens, reduce agricultural productivity and disrupt ecosystems throughout the world. These diseases profoundly restrict socioeconomic status and development in countries with the highest rates of infection, many of which are located in the tropics and subtropics. Although this workshop summary provides an account of the individual presentations, it also reflects an important aspect of the Forum philosophy. The workshop functions as a dialogue among representatives from different sectors and allows them to present their beliefs about which areas may merit further attention. These proceedings summarize only the statements of participants in the workshop and are not intended to be an exhaustive exploration of the subject matter or a representation of consensus evaluation.

[Implementation Strategies of Business Model Innovations within Established Firms](#) Jun 17 2022 This paper aims to expand and improve strategies used by established companies for the implementation of new business models. Existing literature in this field is highly fragmented. Therefore it is difficult for practitioners and researchers to get an understanding. This research connected a comprehensive literature review with empirical insights from case studies to enhance the academic know-how in this field. This combination aimed to lead to a better understanding and should make the theory more applicable. Consequently, the goal was to facilitate business model implementation in order to be more often used by practitioners as innovation tool. The findings from the research disclosed that all analyzed companies used often the same core strategies in their transition process. These strategies were used implicitly and advanced the companies' implementation process significantly. The results identified parallels between the literature and the case studies, which permitted a more generalized explanation of the insights and supported the study's external validity. *Alternative Leadership Strategies in the Prehispanic Southwest* Oct 29 2020 In considerations of societal change, the application of classic evolutionary schemes to prehistoric southwestern peoples has always been problematic for scholars. Because recent theoretical developments point toward more variation in the scale, hierarchy, and degree of centralization of complex societies, this book takes a fresh look at southwestern prehistory with these new ideas in mind. This is the first book-length work to apply new theories of social organization and leadership strategies to the prehispanic Southwest. It examines leadership strategies in a number of

archaeological contexts—from Chaco Canyon to Casas Grandes, from Hohokam to Zuni—to show striking differences in the way that leadership was constructed across the region. These case studies provide ample evidence for alternative models of leadership in middle-range societies. By illustrating complementary approaches in the study of political organization, they offer new insight into power and inequality. They also provide important models of how today's archaeologists are linking data to theory, providing a basis for comparative analysis with other regions. **Applied Language Learning** Nov 10 2021 **Integrated Marketing Communications, Strategies, and Tactical Operations in Sports Organizations** May 04 2021 As with any business, economic, financial, and marketing management for sports organizations is critical for attracting, retaining, and engaging fans. Unlike typical businesses, the sports industry is inconsistent, highly emotional with a strong personal nature, and operates in various markets where organizations compete and cooperate at the same time. Thus, traditional management techniques are not always appropriate for these organizations. *Integrated Marketing Communications, Strategies, and Tactical Operations in Sports Organizations* provides expert insight into the latest trends, strategies, and tactics that can be used in the sports industry to build foundations for successful commercialization. The content within this publication covers city marketing, social media interactions, and atmospheric influence and is designed for managers, marketers, business and industry professionals, stakeholders, academicians, researchers, and students. **Handbook of Research on Transmedia Storytelling, Audience Engagement, and Business Strategies** Apr 03 2021 As media evolves with technological improvement,

communication changes alongside it. In particular, storytelling and narrative structure have adapted to the new digital landscape, allowing creators to weave immersive and enticing experiences that captivate viewers. These experiences have great potential in marketing and advertising, but the medium's methods are so young that their potential and effectiveness is not yet fully understood. *Handbook of Research on Transmedia Storytelling, Audience Engagement, and Business Strategies* is a collection of innovative research that explores transmedia storytelling and digital marketing strategies in relation to audience engagement. Highlighting a wide range of topics including promotion strategies, business models, and prosumers and influencers, this book is ideally designed for digital creators, advertisers, marketers, consumer analysts, media professionals, entrepreneurs, managers, executives, researchers, academicians, and students.

The volume contains 18 contributions from senior and junior scholars covering core issues within the theoretical investigation of the architecture and the mechanisms of the faculty of language, with particular emphasis on the computational component. They all pursue a comparative approach, investigating and comparing different languages and dialects or comparing different modes of acquisition, as in Adriana Belletti's work, to whom the volume is dedicated. The papers in the first part (by Chomsky, Rizzi, Bianchi & Chesi, Cinque, Costa, Calabrese) deal with theoretical issues such as labeling, the cartography of structures and the locality of derivations in a broad sense. The papers in the second part (by Haegeman & Lohndal, Delfitto & Fiorin, Cruschina, Lahousse, Di Domenico and Contemori, Dal Pozzo & Matteini) concentrate on the realization of structure relative to discourse, particularly on topic and focus positions in the vP periphery, and on referential dependencies. The third part collects papers (by Cardinaletti & Volpato, Friedmann, Yachini & Szterman, Snyder & Hyams, Hamann & Tuller, Cecchetto & Donati, Grewendorf & Poletto) that specifically target intervention effects in relative clauses as apparent in different structures, different languages, and different populations.

*Discount Business Strategy* Apr 15 2022 What people are saying about *Discount Business Strategy*: "Michael Andersen and Flemming Poufelt provide a provocative discussion of the rapidly growing role of discounters across numerous industries: how they operate; how they create uniqueness; and how they can destroy value for incumbents. Understanding the specific moves and tools that the authors analyze will be valuable for attackers and incumbents alike." —Adrian J. Slywotzky, Director, Mercer Management Consulting USA "This book is very timely, dealing with today's most critical strategic issue: how to provide more value to the consumer through aggressive discounting. Those players in manufacturing

and distribution who master this will be the winners; many established firms will fall by the wayside. A similar set of issues are facing many nations today - Europe vs. Asia!" —Peter Lorange, President, IMD, Switzerland

"Andersen and Poufelt have researched one of the most important themes in today's business world - how fundamentally new business models have wiped out establishments not with new products or technologies, but by creating new rules for conventional industries. Read this book and learn how to recognize the disruption of your industry before it is too late!" —Sigurd Liljenfeldt, Senior Partner, Monitor Group, France

"This book asks if a firm can have its cake and eat it too - that is, maintain high quality at low prices. My favourite example and shopping place is big box Costco. Ikea is another. A must read for a broad audience concerned about corporate survival!"

—Professor Larry E. Greiner, Marshall School of Business, University of Southern California, USA

The aspiration to adopt the right strategy still prevails over the business world. But is there a single 'best' strategy for a company? Can an organization create sustainable competitive advantage from an 'off-the-peg' strategy? And are most companies likely to craft a strategy that genuinely creates uncontested market space and makes the competition irrelevant? The answer to all these questions is probably 'No'. And the rising tide of companies like Dell, CostCo, Skype and Linux means that asking them at all may soon be futile. While strategists have foundered in old paradigms, a new breed of competitors has emerged. Value destroyers. Old-style thinking understood value destruction when it was confined to an industry and driven by a new product or technology. But what are the implications when the destruction stems from a new way of thinking - from a strategy that simultaneously creates value? The implications are enormous. Every company in every industry is potentially at risk. This risk - or opportunity - is precisely the reason for this book and its focus on exploring why and how some companies have bridged the gap between differentiator and cost leader strategies to emerge as winners in hypercompetitive markets, and what this entails in terms of value destruction and creation. Discounting organizations are here to stay - are you?

Handbook of Research on Communication Strategies for Taboo Topics Nov 22 2022 Social norms are valuable because they help us to understand guidelines for appropriate and ethical behavior. However, as part of that process, cultures develop taboo behaviors and topics for group members to avoid. Failure to discuss important topics, such as sex, drug use, or interpersonal violence, can lead to unwanted or unintended negative outcomes. Improving communication about forbidden topics may lead to positive social and health outcomes, but we must first develop the communication and coping skills to handle these difficult conversations. The Handbook of Research on Communication Strategies for Taboo Topics seeks both quantitative and qualitative research to provide empirical evidence of the negative social and health outcomes of avoiding taboo conversations and provides communication and coping strategies for dealing with difficult topics. Covering a range of issues such as grief and forgiveness, this major reference work is ideal for academicians, practitioners, researchers, counselors, sociologists, professionals, instructors, and students.
