Trees and Their Environment Oct 07 2020 A compilation of previously published CEU (continuing education unit) articles from 1993 to the present.

Tree Risk Assessment Manual Mar 12 2021 "The practice and process of assessing trees for risk is detailed in ISA's Tree Risk Assessment Manual. This new manual is a valuable tool for both the expert and novice risk assessor, and will quickly become one of the most referenced resources on your bookshelf. As the companion publication for the Tree Risk Assessment Qualification course, the manual highlights the critical steps in the risk assessment process - from site analysis to risk evaluation and communicating risk to clients (and everything in between). This publication can be used as a resource to study for the qualification course, as a step-by-step guide to conducting a tree risk assessment, and as a desktop reference for writing reports. A Basic Tree Risk Assessment Form is included, along with a list of common wood decay fungi, and a useful glossary of risk assessment terms."--Publisher description

The Practical Science of Planting Trees Sep 17 2021 "Since 1943, the International Society of Arboriculture has been publishing books that have documented changes in tree planting practices over the decades. This comprehensive volume is an up-to-date synthesis of the research devoted to planting urban trees. Anyone interested in planting trees - arborists, landscape professionals, students, researchers, and avid gardeners - will find this book to be an invaluable resource with an extensive reference list of scientific literature. Designed to help readers understand and implement the appropriate practices vital to planting a tree, it offers guidance to improve success and establish healthy trees that will last a lifetime."--Pub. desc.
