*This book provides practitioners with a basic understanding of strategy and the process of strategic management. Using academic foundations and best practices from business life, the authors present the most important strategy tools and how they interact. The book gives a concise overview over the focal areas and considerations of strategy in practice. It enables managers to analyze and interpret business information with regard to the underlying strategic notions. A hands-on introduction to strategic management by leading marketing authority Philip Kotler, top management consultancy founder Roland Berger, and strategy expert Nils Bickhoff. This is the 13th edition of 'Marketing Management' which preserves the strengths of previous editions while introducing new material and structure to further enhance learning. This book is about marketing and marketing strategy planning. At its essence, marketing strategy planning is about figuring out how to do a superior job of satisfying customers. This author team takes that point of view seriously and believes in practicing what they preach. Instructors and students can trust that this new edition of Essentials of Marketing 13e- and all of the other teaching and learning materials that accompany it - will satisfy every instructor and students' needs. Building on Pioneering Strengths This author team pioneered an innovative structure— using the “four Ps” with a managerial approach—for the introductory marketing course. It quickly became one of the most widely used business textbooks ever published because it organized the best ideas about marketing so that readers could both understand and apply them. The unifying focus of these ideas is on how to make the marketing decisions that a manager must make in deciding what customers to target and how best to meet their needs. Over many editions of Basic Marketing*

and *Essentials of Marketing*, there have been constant changes in marketing management and the marketing environment. Some of the changes have been dramatic, and others have been subtle. As a result, the authors have made ongoing changes to the text to reflect marketing's best practices and ideas. What's different about *Essentials of Marketing*? The success of this franchise is not the result of a single strength—or one long-lasting innovation. Other text books have adopted the four Ps framework and the Perreault author team has continuously improved the book. The text's four Ps framework, managerial orientation, and strategy planning focus have proven to be foundational pillars that are remarkably robust for supporting new developments in the field and innovations in the text and package. *Essentials of Marketing* teaches students analytical abilities and how-to-do-it skills that prepare them for success. The author team has deliberately included a variety of examples, explanations, frameworks, models, classification systems, cases, and "how-to-do-it" techniques that relate to our overall framework for marketing strategy planning. Similarly, the *Marketing Plan Coach* on the text website helps students see how to create marketing plans. Taken together, these items speed the development of "marketing sense" and enable the student to analyze marketing situations and develop marketing plans in a confident and meaningful way. They are practical and they work. As opposed to many other marketing text books, the authors emphasize careful integration of special topics. Some textbooks treat "special" topics—like relationship marketing, international marketing, services marketing, marketing and the Internet, marketing for nonprofit organizations, marketing ethics, social issues, and business-to-business marketing—in separate chapters. The authors deliberately avoid doing that because they are convinced that treating such topics separately leads to an unfortunate compartmentalization of ideas. The comprehensive package of materials gives instructors the flexibility to teach marketing their way- or for the student, the ability to learn marketing their way. Business to business markets are considerably more challenging than consumer markets and as such demand a more specific skillset from marketers. Buyers, with a responsibility to their company and specialist product knowledge, are more demanding than the average consumer. Given that the products themselves may be highly complex, this often requires a sophisticated buyer to understand them. Increasingly, B2B relationships are conducted within a global context. However all textbooks are region-specific despite this growing move towards global business relationships - except this one. This textbook takes a global viewpoint, with the help of an international author team and cases from across the globe. Other unique features of this insightful study include: placement of B2B in a strategic marketing setting; full discussion of strategy in a global setting including hypercompetition; full chapter on ethics and CSR early in the text; and detailed review of global B2B services marketing, trade shows, and market research. This new edition has been fully revised and updated with a full set of brand new case studies and features expanded sections on digital issues, CRM, and social media as well as personal selling. More selective, shorter, and easier to read than other B2B textbooks, this is ideal for introduction to B2B and shorter courses. Yet, it is comprehensive enough to cover all the aspects of B2B

marketing any marketer needs, be they students or practitioners looking to improve their knowledge. A thorough update to a best-selling text emphasizing how marketing solves a wide range of health care problems There has been an unmet need for a health care marketing text that focuses on solving real-world health care problems. The all new second edition of Strategic Marketing for Health Care Organizations meets this need by using an innovative approach supported by the authors' deep academic, health management, and medical experience. Kotler, Stevens, and Shalowitz begin by establishing a foundation of marketing management principles. A stepwise approach is used to guide readers through the application of these marketing concepts to a physician marketing plan. The value of using environmental analysis to detect health care market opportunities and threats then follows. Readers are shown how secondary and primary marketing research is used to analyze environmental forces affecting a wide range of health care market participants. The heart of the book demonstrates how health management problems are solved using marketing tools and the latest available market data and information. Since the health care market is broad, heterogenous, and interconnected, it is important to have a comprehensive perspective. Individual chapters cover marketing for consumers, physicians, hospitals, health tech companies, biopharma companies, and social cause marketing - with strategies in this last chapter very relevant to the Covid-19 pandemic. Today's headlines report cities going bankrupt, states running large deficits, and nations stuck in high debt and stagnation. Philip Kotler, Donald Haider, and Irving Rein argue that thousands of "places" -- cities, states, and nations -- are in crisis, and can no longer rely on national industrial policies, such as federal matching funds, as a promise of jobs and protection. When trouble strikes, places resort to various palliatives such as chasing grants from state or federal sources, bidding for smokestack industries, or building convention centers and exotic attractions. The authors show instead that places must, like any market-driven business, become attractive "products" by improving their industrial base and communicating their special qualities more effectively to their target markets. From studies of cities and nations throughout the world, Kotler, Haider, and Rein offer a systematic analysis of why so many places have fallen on hard times, and make recommendations on what can be done to revitalize a place's economy. They show how "place wars" -- battles for Japanese factories, government projects, Olympic Games, baseball team franchises, convention business, and other economic prizes -- are often misguided and end in wasted money and effort. The hidden key to vigorous economic development, the authors argue, is strategic marketing of places by rebuilding infrastructure, creating a skilled labor force, stimulating local business entrepreneurship and expansion, developing strong public/private partnerships, identifying and attracting "place compatible" companies and industries, creating distinctive local attractions, building a service-friendly culture, and promoting these advantages effectively. Strategic marketing of places requires a deep understanding of how "place buyers" -- tourists, new residents, factories, corporate headquarters, investors -- make their place decisions. With this understanding, "place sellers" --

economic development agencies, tourist promotion agencies, mayor's offices -- can take the necessary steps to compete aggressively for place buyers. This straightforward guide for effectively marketing places will be the framework for economic development in the 1990s and beyond.
