One night Casey seeks refuge from a snowstorm in an abandoned farmhouse and stumbles upon his nearly frozen, unconscious science teacher, Mr. Deverell. Casey attempts to revive his teacher and searches the house for something to make a fire. In the attic he makes a frightening discovery — an office filled with computers, a printer, and racist posters and flyers! Soon the RCMP and Casey's hacker brother, Hank, get involved in the mystery, but it's Casey who leads the investigation into a warped world where hate is marketed on the Internet and innocent people are preyed on by bigots and bullies. In Old Bones, while helping with a real dinosaur dig at the world-famous Royal Tyrrell Museum, Casey finds a piece of dinosaur tooth. Excited, he spends all afternoon looking for the rest of the tooth, but all he ends up getting is a nasty sunburn. Lying in his hotel room that night, trying to recover, he sees and hears two men in a nearby room planning a robbery of precious artifacts from the Tyrrell. As the summer comes to an end, Casey and his friend Mandy decide to relax and take a bicycle jaunt north of Drumheller. But on the road

they accidentally meet up with the conspirators and soon find themselves in a grim situation. Casey has to use all his ingenuity and skills to escape so he can try to help thwart the planned heist. Can he do it? Includes Hate Cell Old Bones Popular Science gives our readers the information and tools to improve their technology and their world. When Ford launched the Mustang, it created an automotive revolution. Award-winning designer and stylist Gale Halderman was at the epicenter of the action at Ford, and, in fact, his initial design sketch formed the basis of the new Mustang. He reveals his involvement in the project as well as telling the entire story of the design and development of the Mustang. Authors and Mustang enthusiasts James Dinsmore and James Halderman go beyond the front doors at Ford into the design center, testing grounds, and Ford facilities to get the real, unvarnished story. Gale Halderman offers a unique behind-the-scenes perspective and firsthand account of the inception, design, development, and production of the original Mustang. With stinging losses from the Edsel fresh in minds at Ford, the Mustang project was an uphill battle from day one. Lee Iacocca and his assembled team had a herculean task to convince Henry Ford II to take a risk on a new concept of automobile, but with the help of Hal Sperlich's detailed market research, the project received the green light. Henry Ford II made it clear that jobs were on the line, including Iacocca's, if it failed. The process of taking a car from sketch to clay model to prototype to preproduction and finally finished model is

retraced in insightful detail. During the process, many fascinating experimental cars, such as the Mustang I two-seater, Mustang II prototype, Mustang Allegro, and Shorty, were built. But eventually the Mustang, based on the existing Ford Falcon, received the nod for final production. In a gala event, it was unveiled at the 1964 World's Fair in New York. The Mustang received public accolades and critical acclaim, and soon it became a runaway hit. After the initial success, Ford designers and Gale Halderman designed and developed the first fastback Mustangs to compliment the coupes. The classic Mustang muscle cars to follow, including the GT, Mach 1, and others, are profiled as well. The Mustang changed automotive history and ushered in the pony car era as a nimble, powerful, and elegantly styled sports coupe. But it could so easily have stumbled and wound up on the scrap pile of failed new projects. This is the remarkable and dramatic story of how the Mustang came to life, the demanding design and development process, and, ultimately, the triumph of the iconic American car. With a built in GoPro camera mount and the special CRAWL safety feature, the Toyota Tacoma is the perfect truck for off-road fun! Its attractive styling and Safety Sense P system make it a top choice for city driving, too. Young readers can gear up for an exciting ride with this high-interest read.
