Contextualization in the New Testament Mar 04 2022 Winner of a 2006 Christianity Today Book Award! Honored as one of the "Fifteen Outstanding Books of 2005 for Mission Studies" by International Bulletin of Missionary Research From Cairo to Calcutta, from Cochabamba to Columbus, Christians are engaged in a conversation about how to speak and live the gospel in today's traditional, modern and emergent cultures. The technical term for their efforts is contextualization. Missionary theorists have pondered and written on it at length. More and more, those who do theology in the West are also trying to discover new ways of communicating and embodying the gospel for an emerging postmodern culture. But few have considered in depth how the early church contextualized the gospel. And yet the New Testament provides numerous examples. As both a crosscultural missionary and a New Testament scholar, Dean Flemming is well equipped to examine how the early church contextualized the gospel and to draw out lessons for today. By carefully sifting the New Testament evidence, Flemming uncovers the patterns and parameters of a Paul or Mark or John as they spoke the Word on target, and he brings these to bear on our contemporary missiological task. Rich in insights and conversant with frontline thinking, this is a book that will revitalize the conversation and refresh our speaking and living the gospel in today's cultures, whether in traditional, modern or emergent contexts.

Organization Development and Change Sep 29 2021

Seven Turning Points Nov 12 2022 As nonprofit organizations mature and grow, their staffs and programs expand, their operations and dynamics become more complex, and the climate they operate in changes and presents new challenges. If they are to move to a new level of effectiveness, they must periodically adjust their leadership, management, structure, governance, and operating style to fit their changed circumstances. Author Susan Gross calls these adjustments ""turning points."" The author's forty years of work with nonprofit organizations has shown that turning points are most likely to arise at seven predictable times in a group's life. Recognizing these turning points and taking action can ease the adjustments necessary as your organization pivots in a new direction. The seven turning points are: 1) When a loose, family style of operating leads to disorganization and a lack of professionalism or accountability; 2) When the management needs of an organization outstrip its executive director's management skills; 3) When a founding volunteer board hires its first executive director but finds it hard to delegate and adjust to a less involved role; 4) When opportunistic, unplanned growth results in an absence of focus and priorities and spreads an organization too thin; 5) When strong central direction becomes micromanagement, top-down control, and over-dependency on the leader 6) When decentralization goes too far, splitting the organization into autonomous units that have little or no connection, coherence, or coordination; and 7) When a longtime, cherished executive director must prepare to step down. This lively text includes charts, illustrations, and an engaging graphic design to help readers assess the state of their organizations and decide what changes to make.

Leadership in Organizations Jul 20 2023 This book is about leadership in organizations. The primary focus is on managerial leadership, as opposed to parliamentary leadership, leadership of social movements, or informal leadership in peer groups. The Strategic Management of Health Care Organizations Jan 02 2022 A structured strategic management approach is what's needed to tackle the revolutionary change the health care system has been experiencing. Today, health care organizations have almost universally embraced the strategic perspective first developed in the business sector and now have developed strategic management processes that are uniquely their own. Health care leaders have found that strategic thinking, planning, and managing strategic momentum are essential for coping with the dynamics of the health care industry. Strategic Management has become the single clearest manifestation of effective leadership of health care organizations. The 7th edition of this leading text has been revised and updated to include a greater focus on the global analysis of industry and competition; and analysis of the internal environment. It provides guidance on strategic planning, analysis of the health services environment (both internal and external) and lessons on implementation. It also looks at organizational capability, sustainability, CSR and the sources of organizational inertia and competency traps.

Images of Organization Sep 10 2022 Since its first publication over twenty years ago, Images of Organization has become a classic in the canon of management literature. The book is based on a very simple premise—that all theories of organization and management are based on implicit images or metaphors that stretch our imagination in a way that can create powerful insights, but at the risk of distortion. Gareth Morgan provides a rich and comprehensive resource for exploring the complexity of modern organizations internationally, translating leading-edge theory into leading-edge practice.

Designing and Using Organizational Surveys May 18 2023 The survey process is a highly complex and situationally dependent one, in need of careful management. If poorly designed and administered, surveys can create disappointment and even disaster. Little has been written so far for those responsible for designing and implementing surveys in organizations. These authors have drawn on their extensive consulting experience to develop a concise, pragmatic, seven-step model covering the entire process, from initiation, to final evaluation, to making the results meaningful to the future of the organization. They pay special attention to the political and human sensitivities concerned and show how to overcome the many potential barriers to a successful outcome.

Untold Stories in Organizations May 14 2020 The field of organizational storytelling research is productive, vibrant and diverse. Over three decades we have come to understand how organizations are not only full of stories but also how stories are actively making, sustaining and changing organizations. This edited collection contributes to this body of work by paying specific attention to stories that are neglected, edited out, unintentionally omitted or deliberately left silent. Despite the fact that such stories are not voiced they have a role to play in organizational analysis. The chapters in this volume variously explore how certain realities become excluded or silenced. The stories that remain below the audible range in organizations offer researchers an access to study political practices which marginalise certain organisational realities whilst promoting others. This volume offers a further contribution by paying heed to silence and the processes of silencing. These silences influence the choice of issues on organisational agendas, the choice of audience(s) to which these discourses are addressed and the ways of addressing them. In exploring these relatively understudied terrains, Untold Stories in Organizations comprises an important contribution to the organizational storytelling space, opening paths for new trajectories in storytelling research.
