This edited volume collects current research by academics

and practitioners on playful citizen participation through digital media technologies. This book addresses the relationship of citizenship and public management in Europe. After fifteen years of State reform, it is time for an overall discussion of the theoretical and empirical impact and limits of New Public Management, as one of the latest re-orientations in public administration, on the practice of citizenship. All the authors have pointed out the tension between a focus on improvement of state bureaucracies, on the one hand, and the involvement of citizens in the co-production of policies on the other. They point to a fundamental change that is taking place: the importance of state apparatuses for the development and sustainability of viable societies is being de-emphasised and special attention to "governance" is now taking over the central place, that for so long has been occupied by attention to "government". Through the co-production of public policies by citizens and public authorities working together, a new civil society is emerging. This book highlights the fact that the re-invention of the citizen is of crucial importance to public administrative practice, as well as to the various public administration disciplines in Europe. Media Literacy and the Emerging Citizen is about enhancing engagement in a digital media culture and the models that educators, parents and policy makers can utilize to place media-savvy youth into positions of purpose, responsibility and power. Two specific challenges are at the core of this book's argument that media literacy is the path toward more active and robust civic engagement in the 21st century: How can

media literacy enable core competencies for value-driven, diverse and robust digital media use? How can media literacy enable a more civic-minded participatory culture? These challenges are great, but they need to be examined in their entirety if media literacy is to begin to address the opportunities they present for democracy, participation and discourse in a digital media age. By presenting information that places media literacy at the center of what it means to be an engaged citizen, educators and policy makers will understand why media literacy must be integrated into formal and informal education systems before it's too late. At a time of escalating conflict between states and NGOs engaged in migrant search and rescue operations across the Mediterranean, this book explores the emerging trend of citizen-led forms of helping others at the borders of Europe. In recent years, Europe's borders have become new sites of intervention for traditional humanitarian actors and governmental agencies, but also, increasingly, for volunteer and activist initiatives led by "ordinary" citizens. This book sets out to interrogate the shifting relationship between humanitarianism, the securitization of border and migration regimes, and citizenship. Critically examining the "do it yourself" character of refugee aid practices performed by non-professionals coming together to help in informal and spontaneous manners, the volume considers the extent to which these new humanitarian practices challenge established conceptualisations of membership, belonging, and active citizenship. Drawing on case studies from countries around Europe including Greece, Turkey, Italy,

France and Russia, this collection constitutes an innovative and theoretically engaged attempt to bring the field of humanitarian studies into dialogue with studies of grassroots refugee aid and, more explicitly, with political forms of solidarity with migrants and refugees which fall between aid and activism. This book is key reading for advanced students and researchers of humanitarian aid, European migration and refugees, and citizen-led activism. Turning to the potent idea of political theology to recover the strange mix of political and religious thinking during the Renaissance, this bracing study reveals in the works of Shakespeare and his sources the figure of the citizen-saint, who represents at once divine messenger and civil servant, both norm and exception. Embodied by such diverse personages as Antigone, Paul, Barabbas, Shylock, Othello, Caliban, Isabella, and Samson, the citizen-saint is a sacrificial figure: a model of moral and aesthetic extremity who inspires new regimes of citizenship with his or her death and martyrdom. Among the many questions Julia Reinhard Lupton attempts to answer under the rubric of the citizen-saint are: how did states of emergency, acts of sovereign exception, and Messianic anticipations lead to new forms of religious and political law? What styles of universality were implied by the abject state of the pure creature, at sea in a creation abandoned by its creator? And how did circumcision operate as both a marker of ethnicity and a means of conversion and civic naturalization? Written with clarity and grace, *Citizen-Saints* will be of enormous interest to students of English literature,

religion, and early modern culture. Since 9/11, national governments in the global North have struggled to govern populations and manage cross-border traffic without building new barriers to trade. What does citizenship mean in an era of heightened tension between global capitalism and the nation-state? Building on Foucault's concept of biopolitics and an examination of national border and detention policies, Rygiel argues that citizenship is becoming a globalizing regime to govern mobility. The new regime is deepening boundaries based on race, class, and gender, and causing Western nations to embrace a more technocratic, depoliticized understanding of citizenship. Educating for citizenship was the original mission of American schools, but for decades that knowledge—also known as civics education—has been in decline, as schools have shifted focus to college and career, STEM, and raising reading and math scores. But over the last few years, spurred on by political polarization and a steep decline in public understanding, civics education is seeing a nationwide resurgence, as school leaders, educators, and parents recognize the urgency of teaching young people how America works—especially young people who have been marginalized from the political system. But this isn't your grandmother's civics. The "new" civics has been updated and re-tooled for the phone-addicted, multi-cultural, globalized twenty-first century kid. From combatting "fake news" with fact checking in Silicon Valley, to reviving elementary school social studies in Nashville, to learning civic activism in Oklahoma City, journalist Holly Korbey

documents the grassroots revival happening across the country. Along the way, she provides an essential guidebook for educators, school leaders and caregivers of all types who want to educate a new generation of engaged citizens at a critical time in American democracy.

Americans' relationship to the federal government is paradoxical. Polls show that public opinion regarding the government has plummeted to all-time lows, with only one in five saying they trust the government or believe that it operates in their interest. Yet, at the same time, more Americans than ever benefit from some form of government social provision. Political scientist Suzanne Mettler calls this growing gulf between people's perceptions of government and the actual role it plays in their lives the "government-citizen disconnect." In *The Government-Citizen Disconnect*, she explores the rise of this phenomenon and its implications for policymaking and politics. Drawing from original survey data which probed Americans' experiences of 21 federal social policies -- such as food stamps, Social Security, Medicaid, and the home mortgage interest deduction -- Mettler shows that 96 percent of adults have received benefits from at least one of them, and that the average person has utilized five. Overall usage rates transcend social, economic, and political divisions, and most Americans report positive experiences of their policy experiences. However, the fact that they have benefited from these policies has little positive effect on people's attitudes toward government. Mettler finds that shared identities and group affiliations, as well as ideological

forces, are more powerful and consistent influences. In particular, those who oppose welfare tend to extrapolate their unfavorable views of it to government in general. Deep antipathy toward the government has emerged as the result of a conservative movement that has waged a war on social welfare policies for over forty years, even as economic inequality and benefit use have increased. Mettler finds that voting patterns exacerbate the government-citizen disconnect, as those holding positive views of federal programs and supporting expanded benefits have lower rates of political participation than those holding more hostile views of the government. As a result, the loudest political voice belongs to those who have benefited from policies but who give government little credit for their economic well-being, seeing their success more as a matter of their own deservingness. This contributes to the election of politicians who advocate cutting federal social programs. According to Mettler, the government-citizen disconnect frays the bonds of representative government and democracy. *The Government-Citizen Disconnect* illuminates a paradox that increasingly shapes American politics. Mettler's examination of hostility toward government at a time when most Americans will at some point rely on the social benefits it provides helps us better understand the roots of today's fractious political climate. American democracy is informed by the 18th century's most cutting edge thinking on society, economics, and government. We've learned some things in the intervening 230 years about self interest, social behaviors, and how the

world works. Now, authors Eric Liu and Nick Hanauer argue that some fundamental assumptions about citizenship, society, economics, and government need updating. For many years the dominant metaphor for understanding markets and government has been the machine. Liu and Hanauer view democracy not as a machine, but as a garden. A successful garden functions according to the inexorable tendencies of nature, but it also requires goals, regular tending, and an understanding of connected ecosystems. The latest ideas from science, social science, and economics—the cutting-edge ideas of today—generate these simple but revolutionary ideas: True self interest is mutual interest. (Society, it turns out, is an ecosystem that is healthiest when we take care of the whole.) Society becomes how we behave. (The model of citizenship depends on contagious behavior, hence positive behavior begets positive behavior.) We're all better off when we're all better off. (The economy is not an efficient machine. It's an effective garden that need tending. Adjust the definition of wealth to society creating solutions for all.) Government should be about the big what and the little how. (Government should establish the ideas and the goals, and then let the people find the solutions of how to make it happen.) Freedom is responsibility. (True freedom is not about living some variant of libertarianism but rather an active cooperation a part of a big whole society; freedom costs a little freedom.) The Gardens of Democracy is an optimistic, provocative, and timely summons to improve our role as citizens in a democratic society. A fascinating study

of the contribution of ordinary men and women to Spain's democratic transition of the 1970s. Radcliff argues that participants in neighbourhood and other associations experimented with new practices of civic participation that put pressure on the authoritarian state and made the building blocks of a future democratic citizenship. White contends that Western democracies face novel challenges demanding our reexamination of the role of citizens. He argues that the intense focus in the past three decades on finding general principles of justice for diversity-rich societies needs to be complemented by an exploration of an ethos to adequately sustain any such principles. This book provides a clear and comprehensive introduction to the developments which have brought about a new, global wave of inclusiveness and democracy. From Brazil to Bangladesh, a new form of participatory politics is springing up. Featuring contributions detailing how such movements have worked in Latin America, Europe and Africa, the book analyzes the impact they have had on the democratic process. By opening up the political sphere in this way, the authors contend, these grassroots movements truly have created "spaces for change."

* Finalist for the National Book Award in Poetry * * Winner of the National Book Critics Circle Award in Poetry * Finalist for the National Book Critics Circle Award in Criticism * Winner of the NAACP Image Award * Winner of the L.A. Times Book Prize * Winner of the PEN Open Book Award * ONE OF THE BEST BOOKS OF THE YEAR: The New Yorker, Boston Globe, The Atlantic, BuzzFeed, NPR. Los Angeles Times,

Publishers Weekly, Slate, Time Out New York, Vulture, Refinery 29, and many more . . . A provocative meditation on race, Claudia Rankine's long-awaited follow up to her groundbreaking book *Don't Let Me Be Lonely: An American Lyric*. Claudia Rankine's bold new book recounts mounting racial aggressions in ongoing encounters in twenty-first-century daily life and in the media. Some of these encounters are slights, seeming slips of the tongue, and some are intentional offensives in the classroom, at the supermarket, at home, on the tennis court with Serena Williams and the soccer field with Zinedine Zidane, online, on TV-everywhere, all the time. The accumulative stresses come to bear on a person's ability to speak, perform, and stay alive. Our addressability is tied to the state of our belonging, Rankine argues, as are our assumptions and expectations of citizenship. In essay, image, and poetry, *Citizen* is a powerful testament to the individual and collective effects of racism in our contemporary, often named "post-race" society.

Eighteenth-century Spanish women were not idle bystanders during one of Europe's most dynamic eras. As Theresa Ann Smith skillfully demonstrates in this lively and absorbing book, Spanish intellectuals, calling for Spain to modernize its political, social, and economic institutions, brought the question of women's place to the forefront, as did women themselves. In explaining how both discourse and women's actions worked together to define women's roles in the nation, *The Emerging Female Citizen* not only illustrates the rising visibility of women, but also reveals the complex processes

that led to women's relatively swift exit from most public institutions in the early 1800s. As artists, writers, and reformers, Spanish women took up pens, joined academies and economic societies, formed tertulias—similar to French salons—and became active in the burgeoning public discourse of Enlightenment. In analyzing the meaning of women's presence in diverse centers of Enlightenment, Smith offers a new interpretation of the dynamics among political discourse, social action, and gender ideologies.

Mobilizing for Democracy is an in-depth study into how ordinary citizens and their organizations mobilize to deepen democracy. Featuring a collection of new empirical case studies from Angola, Bangladesh, Brazil, India, Kenya, Nigeria and South Africa, this important new book illustrates how forms of political mobilization, such as protests, social participation, activism, litigation and lobbying, engage with the formal institutions of representative democracy in ways that are core to the development of democratic politics. No other volume has brought together examples from such a broad Southern spectrum and covering such a diversity of actors: rural and urban dwellers, transnational activists, religious groups, politicians and social leaders. The cases illuminate the crucial contribution that citizen mobilization makes to democratization and the building of state institutions, and reflect the uneasy relationship between citizens and the institutions that are designed to foster their political participation. Examines, through an analysis of seven high school newspapers, the evolution of civic and political participation among young people in the United

States since 1965. A social anxiety currently pervades the political classes of the western world, arising from the perception that young people have become disaffected with liberal democratic politics. Voter turnout among 18-25 year olds continues to be lower than other age groups and they are less likely to join political parties. This is not, however, proof that young people are not interested in politics per se but is evidence that they are becoming politically socialized within a new media environment. This shift poses a significant challenge to politicians who increasingly have to respond to a technologically mediated lifestyle politics that celebrates lifestyle diversity, personal disclosure and celebrity. This book explores alternative approaches for engaging and understanding young people's political activity and looks at the adoption of information and ICTs as a means to facilitate the active engagement of young people in democratic societies. *Young Citizens in a Digital Age* presents new research and the first comprehensive analysis of ICTs, citizenship and young people from an international group of leading scholars. It is an important book for students and researchers of citizenship and ICTs within the fields of sociology, politics, social policy and communication studies among others. This edited book constitutes the first detailed attempt at a comparative international analysis of the transformations that are currently affecting the composition of the Israel Defense Forces (IDF) and their place in Israeli society. Focusing primarily on deviations from the traditional norm of universal military service, the book compares the emergence of a

new type of "citizen army" in Israel with the formats that have in recent decades become evident in other western democracies. In addition, these essays correct the conventional tendency to concentrate almost exclusively on the influences stimulating military institutional change in the West, and thereby to overlook the equally important factors that retard its momentum. By contrast, this volume deliberately highlights the brakes as well as the accelerators in current processes, thereby presenting a far more faithful picture of their complexity. This book will be of much interest to students of Israeli politics, military studies, Middle Eastern politics, security studies and IR in general. Stuart Cohen is a senior research associate of the BESA (Begin-Sadat) Center for Strategic Studies and also teaches political studies at Bar-Ilan University, Israel. His most recent book is *Israel and its Army: From Cohesion to Confusion* (Routledge, 2008). This study of the political significance of theories of tragedy and ordinary language uses of "tragedy" offers a fresh perspective on democracy in contemporary times. As the need for sustainable development practices around the world continues to grow, it has become imperative for citizens to become actively engaged in the global transition. By evaluating data collected from various global programs, researchers are able to identify strategies and challenges in implementing civic engagement initiatives. *Analyzing the Role of Citizen Science in Modern Research* focuses on analyzing data on current initiatives and best practices in citizen engagement and education programs across various disciplines.

Highlighting emergent research and application techniques within citizen science initiatives, this publication appeals to academicians, researchers, policy makers, government officials, technology developers, advanced-level students and program developers interested in launching or improving citizen science programs across the globe. Often working under severely restricted academic and social conditions, the Latvian scholar Joel Weinberg has made a unique and important contribution to biblical studies. Influenced by Soviet work in ancient Near Eastern history, Weinberg's distinctive approach is in dialogue with scholarship in both Eastern and Western European traditions. This translation brings together seven essays originally published in Russian, then translated and expanded by Weinberg into German. The essays form the basis of what was originally Weinberg's dissertation. Publication of these essays in English will not only allow students and scholars easier access to Weinberg's thought, but will allow scholars to evaluate the studies together, and thus facilitate the current dialogue on the Babylonian exile, and the postexilic period. It has become a common complaint among academics and community leaders that citizens today are not what they used to be. Nowhere is this decline seen to be more troubling than when the focus is on young Americans. Compared to the youth of past generations, today's young adults, so the story goes, spend too much time watching television, playing video games, and surfing the Internet. As a result, American democracy is in trouble. The Evolving Citizen challenges this decline

thesis and argues instead that democratic engagement has not gotten worse—it has simply changed. Through an analysis of seven high school newspapers from 1965 to 2010, this book shows that young people today, according to what they have to say for themselves, are just as enmeshed in civic and political life as the adolescents who came before them. American youth remain good citizens concerned about their communities and hopeful that they can help make a difference. But as *The Evolving Citizen* demonstrates, today's youth understand and perform their roles as citizens differently because the world they live in has changed remarkably over the last half century. Journalism is in the middle of sweeping changes in its relationships with the communities it serves, and the audiences for news and public affairs it seeks to address. Changes in technology have blurred the lines between professionals and citizens, partisan and objective bystanders, particularly in the emerging public zones of the blogosphere. This volume examines these changes and the new concepts needed to understand them in the days and years ahead. With contributions from up-and-coming scholars, this collection identifies key issues and paves the way for further research on the role of journalism in today's world. It will appeal to scholars, researchers, and advanced students in journalism, communication, and media studies, and will also be of interest to those in public affairs, political science, and government. Why do so many Americans fail to participate in their communities' affairs? What role should the citizenry play in our political system? In addressing

these concerns, this revised and updated text evaluates the dilemma of participation, civility, and stability at a time when civic indifference is a national problem. In addition to outlining the sources of this indifference, *The New Citizenship* suggests ways in which Americans can conquer their apathy toward government. In this fourth edition, author and Dilemmas in American Politics series editor Craig A. Rimmerman provides new material on ACORN, the 2008 presidential election, the Obama presidency, and the impact of these recent events for college students and their conceptions of participation and citizenship. *The New Public Service: Serving, not Steering* provides a framework for the many voices calling for the reaffirmation of democratic values, citizenship, and service in the public interest. It is organized around a set of seven core principles: (1) serve citizens, not customers; (2) seek the public interest; (3) value citizenship and public service above entrepreneurship; (4) think strategically, act democratically; (5) recognize that accountability isn't simple; (6) serve, rather than steer; and (7) value people, not just productivity. *The New Public Service* asks us to think carefully and critically about what public service is, why it is important, and what values ought to guide what we do and how we do it. It celebrates what is distinctive, important, and meaningful about public service and considers how we might better live up to those ideals and values. The revised fourth edition includes a new chapter that examines how the role and significance of these New Public Service values have expanded in practice and

research over the past 15 years. Although the debate about governance will surely continue for many years, this compact, clearly written volume both provides an important framework for a public service based on citizen discourse and the public interest and demonstrates how these values have been put into practice. It is essential reading for students and serious practitioners in public administration and public policy. Today, individuals and societies of the digital age are no longer constrained by conventional contexts, narratives, settings, and status; they are surrounded and guided by digital tools and applications leading to a digital revolution. That digital revolution changed the individual along with living styles and cultural and social relations among people. Moreover, these revolutionary changes and the increasing capabilities of smart devices have brought today's people a new kind of public sphere with questionable freedoms but also restraints in its digital dimensions. Now, it is possible to talk about the digital dimension and equivalence of all the concepts that are both individually and socially constructed in a new digital world. The Handbook of Research on Digital Citizenship and Management During Crises covers many different components engaged with digital world responsibilities. The authors assess the position, status, and reactions of the new citizen against future catastrophes. Covering topics such as epistemic divide, internet addiction, and new media technologies, this text serves as a cutting-edge resource for researchers, scholars, lawmakers, trainers, instructional designers,

university libraries, professors, students, and academicians. "Examines, through an analysis of seven high school newspapers, the evolution of civic and political participation among young people in the United States since 1965"--Provided by publisher. This is the first authoritative reference work to map the multifaceted and vibrant site of citizen media research and practice, incorporating insights from across a wide range of scholarly areas. Citizen media is a fast-evolving terrain that cuts across a variety of disciplines. It explores the physical artefacts, digital content, performative interventions, practices and discursive expressions of affective sociality that ordinary citizens produce as they participate in public life to effect aesthetic or socio-political change. The seventy-seven entries featured in this pioneering resource provide a rigorous overview of extant scholarship, deliver a robust critique of key research themes and anticipate new directions for research on a variety of topics. Cross-references and recommended reading suggestions are included at the end of each entry to allow scholars from different disciplinary backgrounds to identify relevant connections across diverse areas of citizen media scholarship and explore further avenues of research. Featuring contributions by leading scholars and supported by an international panel of consultant editors, the Encyclopedia is essential reading for undergraduate and postgraduate students as well as researchers in media studies, social movement studies, performance studies, political science and a variety of other disciplines across the humanities and social sciences. It will

also be of interest to non-academics involved in activist movements and those working to effect change in various areas of social life. Supporting children and young people to participate safely, effectively, critically and responsibly in a world filled with social media and digital technologies is a priority for educators the world over. Most young people in Europe today were born and have grown up in the digital era. Education authorities have the duty to ensure that these digital citizens are fully aware of the norms of appropriate behaviour when using constantly evolving technology and participating in digital life. Despite worldwide efforts to address such issues, there is a clear need for education authorities to take the lead on digital citizenship education and integrate it into school curricula. In 2016, the Education Department of the Council of Europe began work to develop new policy orientations and strategies to help educators face these new challenges and to empower young people by helping them to acquire the competences they need to participate actively and responsibly in digital society. This volume, the first in a Digital Citizenship Education series, reviews the existing academic and policy literature on digital citizenship education, highlighting definitions, actors and stakeholders, competence frameworks, practices, emerging trends and challenges. The inclusion of a wide selection of sources is intended to ensure sufficient coverage of what is an emergent topic that has yet to gain a strong foothold in either education or academic literature, but has received wider policy attention. Media Literacy and the Emerging

Citizen is about enhancing engagement in a digital media culture and the models that educators, parents and policy makers can utilize to place media-savvy youth into positions of purpose, responsibility and power. Two specific challenges are at the core of this book's argument that media literacy is the path toward more active and robust civic engagement in the 21st century: How can media literacy enable core competencies for value-driven, diverse and robust digital media use? How can media literacy enable a more civic-minded participatory culture? These challenges are great, but they need to be examined in their entirety if media literacy is to begin to address the opportunities they present for democracy, participation and discourse in a digital media age. By presenting information that places media literacy at the center of what it means to be an engaged citizen, educators and policy makers will understand why media literacy must be integrated into formal and informal education systems before it's too late

"Cultivating Citizens rethinks the aesthetics and politics of regionalism in the United States during the 1930s and 1940s. During this period, painters Grant Wood, Thomas Hart Benton, and John Steuart Curry formed a loose alliance as American Regionalists. Some lauded their depictions of the rural landscape and hardworking inhabitants of America's midwestern heartland. Others deemed Regionalist painting dangerous, regarding its easily understood realism as a vehicle for jingoism, chauvinism, and even fascism. Cultivating Citizens shifts the terms of this ongoing debate over subject matter and style by

considering heretofore neglected Regionalist programs of art education and concepts of artistic labor."--Provided by publisher. Insurgent citizenships have arisen in cities around the world. This book examines the insurgence of democratic citizenship in the urban peripheries of São Paulo, Brazil, its entanglement with entrenched systems of inequality, and its contradiction in violence. James Holston argues that for two centuries Brazilians have practiced a type of citizenship all too common among nation-states--one that is universally inclusive in national membership and massively inequalitarian in distributing rights and in its legalization of social differences. But since the 1970s, he shows, residents of Brazil's urban peripheries have formulated a new citizenship that is destabilizing the old. Their mobilizations have developed not primarily through struggles of labor but through those of the city--particularly illegal residence, house building, and land conflict. Yet precisely as Brazilians democratized urban space and achieved political democracy, violence, injustice, and impunity increased dramatically. Based on comparative, ethnographic, and historical research, *Insurgent Citizenship* reveals why the insurgent and the entrenched remain dangerously conjoined as new kinds of citizens expand democracy even as new forms of violence and exclusion erode it. Rather than view this paradox as evidence of democratic failure and urban chaos, *Insurgent Citizenship* argues that contradictory realizations of citizenship characterize all democracies--emerging and established. Focusing on processes of city- and citizen-

making now prevalent globally, it develops new approaches for understanding the contemporary course of democratic citizenship in societies of vastly different cultures and histories. This book provides a clear and comprehensive introduction to the developments which have brought about a new, global wave of inclusiveness and democracy. From Brazil to Bangladesh, a new form of participatory politics is springing up. Featuring contributions detailing how such movements have worked in Latin America, Europe and Africa, the book analyzes the impact they have had on the democratic process. By opening up the political sphere in this way, the authors contend, these grassroots movements truly have created "spaces for change." Emerging Digital Citizenship Regimes: Postpandemic Technopolitical Democracies explores how increasing digitalisation in post-COVID-19 urban environments is rescaling nation-states in Europe resulting in new emerging digital citizenship regimes, trends, aftermaths, emancipations, and future research avenues.
