Fungi From Different Substrates Dec 08 2020 The book is comprised of more than a dozen chapters on fungi from different substrates including fossilized leaves. It discusses association of fungi occurring on important plants, some animals, and saprophytic substrates. Besides the taxonomic information, some ecological aspects like distribution and substrate/host preferences are discussed. The book also reviews the myxomycete.

Modeling and Simulation May 01 2020 Contributed papers presented at a seminar held at the Indian Institute of Technology, Madras during December 7-8, 2004.

A Modern Playbook of Digital Transformation Mar 23 2022 In order for successful business transformation to occur, there's an inner transformation that must happen. The innumerable professional forces that tug pell-mell from every imaginable quarter, need to be organized and personal demons exorcized or at least managed. This book takes you through the transformative journey of Dillon, the presumptive head of Digital in one of the world's largest footwear manufacturers, his private and professional struggle and victory. This modern parable answers the quintessential question: What makes a leader great? Read the step-by-step digital transformation execution plan, complete with tools, artefacts, lessons, pitfalls to avoid and best practices from the industry. If you've ever wished for a book that didn't shy away from delving into the 'how' of the execution journey, and while doing so took you on an enjoyable roller coaster ride, look no further. Grab this!

All India Civil List Oct 18 2021

Ultraviolet Spectroscopy And Uv Lasers Apr 11 2021 This volume presents a complete and thorough examination of advances in the instrumentation, evaluation, and implementation of UV technology for reliable and efficient data acquisition and analysis. It provides real-world applications in expanding fields such as chemical physics, plasma science, photolithography, laser spectroscopy, astronomy and atmospheric science.

Homocysteine Metabolism in Health and Disease Jul 27 2022 This book comprehensively reviews the association of homocysteine metabolism with the etiology of various human disorders. The well-defined chapters embedded the central and peripheral effects of homocysteine metabolism intricately related with cardiovascular, neurodegenerative, metabolic, and autoimmune disorders. Further, it discusses the mechanisms of perturbation of cellular proteostasis by elevated homocysteine levels and provides a comprehensive account of pathophysiological consequences and clinical implications of homocysteine-containing proteins. The book also reviews association of genetic variants of homocysteine metabolic genes with type 2 diabetes mellitus and obesity. It also describes the molecular mechanism of hyperhomocysteinemia in the negative/feedback regulation of neural stem cell proliferation and alterations in DNA methylation. Taken together, it summarizes the mechanisms of hyper homocysteinemia-induced endothelial dysfunction and physiological functions of hydrogen sulfide as the protective agent.

SOCRATES Feb 07 2021 This issue of SOCRATES has been divided into four sections. The first section of this issue is Language & Literature- Persian, which contains an article authored by Nazia Jafri. In this paper, hidden corners and unfamiliar life and priceless works of Hussain Quli Mastan, who was the the first Iranian photo-journalist, has been introduced. The second section of this issue if Language and Literature-English. Paper authored by Dr. P. Saravanakumar studies the use of a mask in Girish Karnad's play "Tughlaq." Tughlaq is the most complex and complicated of Girish Karnad's works. Paper authored by R. Kaliyaperumal highlights the Science and Technology in Dan Brown's Digital Fortress. Paper authored by Vincent P discusses Black Community Voice Echoes on Eradicate of Identity in Toni Morrison's Novel Home. While exploring the twenty-first-century work Home we find the voices, which indicates the voice of the colonised people. A deep study of this novel exposes the events and happenings at the time of colonisation. It also exposes their emotions and feelings. The third section of this issue is Philosophy. Paper authored by Giuseppe Gagliano intends to identify several key concepts that emerge from an analysis of Aron's acclaimed work on the role played by Marxist-Leninist ideology in the development of the 20th-century philosophic thought. Paper authored by Rocco Angelo Astore is an argument in favor of the Universal health care. The fourth section of this issue is Politics, Law and Governance. Paper authored by Dr. Galyna Fesenko and Dr. Tetiana Fesenko aims to outline the role of e-democracy within the setting of the Eastern Partnership program. The article provides the comparative review of E-Government progress in six EaP countries in 2009 – 2016. Paper authored by Dr. Surendra Misra is related to Governance, Good Governance and development of different sectors in India. Paper authored by Dr. Sanjay Kumar Dwivedi focuses on the E-Governance initiatives that have changed the life style of rural citizens and in which the citizens derive benefit through direct transactions with the services provided by the union and the provincial governments. The paper also highlights the variety of constraints in implementing the E-governance projects in rural areas.

Fungi Aug 16 2021 The book deals with the application of fungi and the strategic management of some plant pathogens. It covers fungal bioactive metabolites, with emphasis on those secondary metabolites that are produced by various endophytes, their pharmaceutical and agricultural uses, regulation of the metabolites, mycotoxins, nutritional value of mushrooms, prospecting of thermophilic and wood-rotting fungi, and fungi as myconano factories. Strategies for the management of some plant pathogenic fungi of rice and soybean have also been dealt with. Updated information for all these aspects has been presented and discussed in different chapters.

Florida's Climate Aug 28 2022 Florida's climate has been and continues to be one of its most important assets. It has enabled the growth of many major industries, including tourism and agriculture, which now rank at the top of Florida's diverse economic activities. Our state's climate enables its native ecosystems to flourish and attract citizens from around the world. The dependencies of Florida's society and ecosystems on climate are widely recognized and generally taken for granted. However, we now know that climate around the world is changing. Questions arise about whether or not Florida's climate is changing, how rapidly these changes might occur, and how Florida may adapt to anticipated changes and help mitigate the rates of change. This book provides a thorough review of the current state of research on Florida's climate, including physical climate benchmarks; climate prediction, projection, and attribution; and the impacts of climate and climate change on the people and natural resources of Florida. The editors have gathered more than 90 researchers at universities across the state and beyond to address important topics such as sea level rise, water resources, and how climate affects various sectors, including energy, agriculture, forestry, tourism, and insurance. This volume offers accessible, accurate information for students, policymakers, and the general public. About the Editors: Eric P. Chassignet is a professor in the Department of Earth, Ocean and Atmospheric Science and director of the Center for Ocean-Atmospheric Prediction Studies at Florida State University. James W. Jones is a distinguished professor emeritus in the Department of Agricultural and Biological Engineering at the University of Florida. Vasubandhu Misra is an associate professor in the Department of Earth, Ocean and Atmospheric Science and the Center for Ocean-Atmospheric Prediction Studies at Florida State University. Jayantha Obeysekera is the chief modeler at the South Florida Water Management District. About the Florida Climate Institute: The Florida Climate Institute (FCI) is a multi-disciplinary network of scientists working to achieve a better understanding of climate variability and change. The FCI has ten member universities - Florida Agricultural and Mechanical University (FAMU); Florida Atlantic University (FAU); the Florida Institute of Technology (FIT); Florida International University (FIU); Florida State University (FSU); Nova Southeastern University (NSU); the University of Central Florida (UCF); the University of Florida (UF); the University of Miami (UM); and the University of South Florida (USF). doi:10.17125/fci2017

28 Days of Sunshine Sep 28 2022 As a young journalist and mother, Andria Stones goes to drop her daughter Sarah at school when they meet with an accident that kills Sarah. The immense grief and trauma result in the complete breakdown of Andria's life. The fact that she might be getting a divorce from her husband Patrick adds to her predicament. She goes to the countryside center, "Sunshine Hills," to recuperate. Will the woman who has lost her love, her child and her job be able to recover? Will her past have a bearing on her present and future? Will she find love again? What will be the end of her stay over there? A beautiful description of love, nature, hope, struggle and will, with an evident conflict of emotions and harsh realities will answer these and many other questions as you connect with Andria and the other Sunshiners in 28 Days of Sunshine.

Entrepreneurship and Private Enterprises in Economic Development in Rural India Mar 11 2021 This book encapsulates the potential and opportunities within Rural India, particularly the small enterprises and the private sector. The papers and essays that are covered here include start-up scenarios, SMEs, farm economics, entrepreneurship and enterprise policy aspects, sustainable development goals(SDGs) and rural economy, to mention a few. There are also sector specific studies on handicraft and Chikankari embroidery enterprises, women entrepreneurs of Kashmir valley and tribal entrepreneurship. Rural tourism, skill development and digital marketing are some other areas that are covered. The crux of this book is that rural enterprises and business ventures are quickly getting transformed, modernized and evolving to the needs of the global market and customers. As they grow, they contribute in the fight to poverty, creating green jobs and acting as a cultural link of real India to the world. The book consists of 19 research articles/studies by an eclectic set of authors from across India. The book also contains select case studies of rural enterprises, agro-farm business ventures and some of the emerging digital platforms and agro-tech startups. #startupModels#entrepreneurship #RuralEnterprises #Innovation #WomenEnterprises #MicroEnterprises #TribalEntrepreneurship #Agri-Entrepreneurship #SDGs#artisans#handicrafts#weavers#potters #agrobusinesses #employment#digitaltransformation #digitalmarketing #E-commerce #globalvaluechains #ruralstartups #agrotechstartups

Sixty Shades of Generalized Continua Jan 01 2023 In this book, well-known scientists discuss modern aspects of generalized continua, in order to better understand modern materials and advanced structures. They possess complicated internal structure, and it requires the development of new approaches to model such structures and new effects caused by it. This book combines fundamental contributions in honor of Victor Eremeyev and his 60th birthday.

Advances in Heterocyclic Chemistry Jul 15 2021 Established in 1960, *Advances in Heterocyclic Chemistry* is the definitive serial in the area-one of great importance to organic chemists, polymer chemists, and many biological scientists. Written by established authorities in the field, the comprehensive reviews combine descriptive chemistry and mechanistic insight and yield an understanding of how the chemistry drives the properties.

Intramolecular Charge Transfer Mar 03 2023 Bridging the gap between the multitude of advanced research articles and the knowledge newcomers to the field are looking for, this is a timely and comprehensive monograph covering the interdisciplinary topic of intramolecular charge transfer (ICT). The book not only covers the fundamentals and physico-chemical background of the ICT process, but also places a special emphasis on the latest experimental and theoretical studies that have been undertaken to understand this process and discusses key technological applications. After outlining the discovery of ICT molecules, the authors go on to discuss several important substance classes. They present the latest techniques for studying the underlying processes and show the interplay between charge transfer and the surrounding medium. Examples taken from nonlinear optics, viscosity and polarity sensors, and organic electronics testify to the vast range of applications. The result is a unique information source for experimentalists as well as theoreticians, from postgraduate students to researchers.

Graphene, Ge/III-V, and Emerging Materials for Post-CMOS Applications 2 Jun 25 2022 This issue of ECS Transactions addresses the fundamental material science, characterization, modeling and applications of Graphene, Ge-III-V and Emerging materials designed for alternatives technologies to replace CMOS.

Dielectrics in Nanosystems -and- Graphene, Ge/III-V, Nanowires and Emerging Materials for Post-CMOS Applications 3 Dec 20 2021 This issue of ECS Transactions will cover the following topics in (a) Graphene Material Properties, Preparation, Synthesis and Growth; (b) Metrology and Characterization of Graphene; (c) Graphene Devices and Integration; (d) Graphene Transport and mobility enhancement; (e) Thermal Behavior of Graphene and Graphene Based Devices; (f) Ge & III-V devices for CMOS mobility enhancement; (g) III.V Heterostructures on Si substrates; (h) Nano-wires devices and modeling; (i) Simulation of devices based on Ge, III-V, nano-wires and Graphene; (j) Nanotechnology applications in information technology, biotechnology and renewable energy (k) Beyond CMOS device structures and properties of semiconductor nano-devices such as nanowires; (l) Nanosystem fabrication and processing; (m) nanostructures in chemical and biological sensing system for healthcare and security; and (n) Characterization of nanosystems; (f) Nanosystem modeling.

Unreal Engine: Game Development from A to Z Nov 30 2022 Develop fantastic games and solve common development problems with Unreal Engine 4 About This Book Investigate the big world of Unreal Engine, computer graphics rendering and Material editor to implement in your games Construct a top-notch game by using the assets offered by Unreal Engine, thereby reducing the time to download, create assets on your own. Understand when and why to use different features and functionalities of Unreal Engine 4 to create your own games Learn to use Unreal 4 by making a first person puzzle game, Blockmania, for Android. Who This Book Is For This path is ideal for those who have a strong interest in game development and some development experience. An intermediate understanding of C++ is recommended. What You Will Learn Explore the Unreal Engine 4 editor controls and learn how to use the editor to create a room in a game level Get clued up about working with Slate, Unreal's UI solution through the UMG Editor Put together your own content and materials to build cutscenes and learn how to light scenes effectively Get tips and tricks on how to create environments using terrain for outdoor areas and a workflow for interiors as well using brushes Explore the ways to package your game for Android Devices and porting it to the Google Playstore Know inside out about creating materials, and applying them to assets for better performance Understand the differences between BSP and static meshes to make objects interactive In Detail Unreal Engine technology powers hundreds of games. This Learning Path will help you create great 2D and 3D games that are distributed across multiple platforms. The first module, Learning Unreal Engine Game Development, starts with small, simple game ideas and playable projects. It starts by showing you the basics in the context of an individual game level. Then, you'll learn how to add details such as actors, animation, effects, and so on to the game. This module aims to equip you with the confidence and skills to design and build your own games using Unreal Engine 4. By the end of this module, you will be able to put into practise your own content.After getting familiar with Unreal Engine's core concepts, it's time that you dive into the field of game development. In this second module, Unreal Engine Game Development Cookbook we show you how to solve development problems using Unreal Engine, which you can work through as you build your own unique project. Every recipe provides step-by-step instructions, with explanations of how these features work, and alternative approaches and research materials so you can learn even more. You will start by building out levels for your game, followed by recipes to help you create environments, place meshes, and implement your characters. By the end of this module, you will see how to create a health bar and main menu, and then get your game ready to be deployed and published.The final step is to create your very own game that will keep mobile users hooked. This is what you'll be learning in our third module, Learning Unreal Engine Android Game Development,Once you get the hang of things, you will start developing our game, wherein you will graduate from movement and character control to AI and spawning. Once you've created your application, you will learn how to port and publish your game to the Google Play Store. With this course, you will be inspired to come up with your own great ideas for your future game development projects. Style and approach A practical collection of bestselling Packt titles, this Learning Path aims to help you skill up with Unreal Engine by curating some of our best titles into an essential, sequential collection.

Contemporary Chemical Approaches for Green and Sustainable Drugs Jan 09 2021 Contemporary Chemical Approaches for Green and Sustainable Drugs provides readers with the knowledge they need to integrate sustainable approaches into their work. Sections cover different aspects of green and sustainable drug development from design to disposal, including computer-aided drug design, green resourcing of drugs and drug candidates, an overview of the health concerns of pharmaceutical pollution, and a survey of potential chemical methods for its reduction. Drawing together the knowledge of a global team of experts, this book provides an inclusive overview of the chemical tools and approaches available for minimizing the negative environmental impact of current and newly developed drugs. This will be a useful guide for all academic and industrial researchers across green and sustainable chemistry, medicinal chemistry, environmental chemistry and pharmaceutical science. Provides an integrative overview of the environmental risks of drugs and drug by products to support chemists in pre-emptively addressing these issues Highlights the advantages of computer-aided drug design, green and sustainable sourcing, and novel methods for the production of safer, more effective drugs Presents individual chapters written by renowned experts with diverse backgrounds Reflects research in practice through selected case studies and extensive state-of-the-art reference sections to serve as a starting point in the design of any specialized environmentally-conscious medicinal chemistry project

Science and Technology of Dielectrics for Active and Passive Devices May 25 2022 The papers included in this issue of ECS Transactions were originally presented in the symposium ¿Science and Technology of Dielectrics for Active and Passive Devices¿, held during the PRiME 2008 joint international meeting of The Electrochemical Society and The Electrochemical Society of Japan, with the technical cosponsorship of the Japan Society of Applied Physics, the Korean Electrochemical Society, the Electrochemistry Division of the Royal Australian Chemical Institute, and the Chinese Society of Electrochemistry. This meeting was held in Honolulu, Hawaii, from October 12 to 17, 2008.

Xi Jinping's 'Chinese Dream' Jul 03 2020 Singh analyses the influence of Xi's 'Chinese Dream' on China's foreign relations and security postures. Xi Jinping's rise has led to a paradigm shift in many aspects of China's domestic and international politics. A key element of this has been the ideological vision shorthanded as the 'Chinese Dream', combining elements of nationalism, Confucian ideology, and economic expansionism. Singh evaluates the various changes in China's nominally

communist ideology in the post-Mao era, with an emphasis on the implications for China's economic and security relations with other countries. He particularly focusses on China's approach to South Asia and the Indian Ocean Region, key elements of China's strategy. An insightful guide to understanding the direction of China's foreign and security policy, and especially its impact on India-China relations.

Network-on-Chip Security and Privacy Dec 28 2019 This book provides comprehensive coverage of Network-on-Chip (NoC) security vulnerabilities and state-of-the-art countermeasures, with contributions from System-on-Chip (SoC) designers, academic researchers and hardware security experts. Readers will gain a clear understanding of the existing security solutions for on-chip communication architectures and how they can be utilized effectively to design secure and trustworthy systems.

Delivery Systems for Tuberculosis Prevention and Treatment Apr 23 2022 Provides a review of novel pharmaceutical approaches for Tuberculosis drugs Presents a novel perspective on tuberculosis prevention and treatment Considers the nature of disease, immunological responses, vaccine and drug delivery, disposition and response Multidisciplinary appeal, with contributions from microbiology, immunology, molecular biology, pharmaceuticals, pharmacokinetics, chemical and mechanical engineering

Global Positioning System May 05 2023 The second edition of this widely praised book offers a comprehensive introduction to GPS: the system, signals, receivers, measurements, and algorithms for estimation of position, velocity, and time. It is intended as a textbook for a senior- or graduate-level engineering course and a self-study guide for practicing engineers. The book is divided into four parts. Part I introduces the basic framework for a global navigation satellite system, including coordinate frames, time references, and satellite orbits, and provides an overview of GPS, GLONASS, and Galileo. Part II describes the fruits of GPS: estimation of position, velocity, and time. Part III discusses the ingenious structure of the GPS signals. Part IV introduces the signal processing steps required to extract the necessary measurements from these signals, and explores the challenges posed by signal blockage and RFI.

Computational and Experimental Simulations in Engineering Oct 06 2020 This book gathers the latest advances, innovations, and applications in the field of computational engineering, as presented by leading international researchers and engineers at the 24th International Conference on Computational & Experimental Engineering and Sciences (ICCES), held in Tokyo, Japan on March 25-28, 2019. ICCES covers all aspects of applied sciences and engineering: theoretical, analytical, computational, and experimental studies and solutions of problems in the physical, chemical, biological, mechanical, electrical, and mathematical sciences. As such, the book discusses highly diverse topics, including composites; bioengineering & biomechanics; geotechnical engineering; offshore & arctic engineering; multi-scale & multi-physics fluid engineering; structural integrity & longevity; materials design & simulation; and computer modeling methods in engineering. The contributions, which were selected by means of a rigorous international peer-review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaborations.

Microbial Pentose Utilization Sep 16 2021 Microbial utilization of the inexhaustible lignocellulosic biomass for the production of industrial chemicals, liquid fuels, protein-rich feed and food, and preparation of cellulose polymers, is an attractive approach to help meet energy and food demands. Whilst biomass has served as substrate in microbial processes for the production of alcoholic beverages for a long time, it is only recently that broader applications of this material have been envisaged. Hemicellulose-derived sugars have many potential uses in the production of industrial chemicals and solvents. Considerable developments have been made, not only in the improvement of yeast and recombinant bacterial strains, but also in the bioprocessing of these organisms during the last two decades. Although the volume of information available on microbial pentose utilization is increasing, the available literature is mostly scattered. A comprehensive account of recent advances in pentose based bioprocesses is provided along with suggestions for future research. An indispensable volume for graduate students of microbiology, biochemistry, biotechnology and biochemical engineering. The needs of industrial microbiologists, environmental scientists and researchers in the area of carbohydrate utilization and metabolism are also catered for. Industrial organizations involved in developing processes for ethanol and other products from non-conventional sources will also find this volume beneficial.
