Welcome Canadian author, Ingrid Johnsrude Ingrid's principal area of investigation is the neural basis of understanding speech, and she leads experiments examining how utterances are transformed into acoustic signals and then into meaning via a variety of cognitive processes. The hallmarks of this

remarkably successful text are its emphasis on the importance of critical thinking, its inclusive approach to culture, gender and ethnicity, and its balanced integration of the best of the new scientific research in psychology. Well-known for its pioneering focus on the development of critical thinking skills crucial to students' success in college or university and in later life, *Psychology* is also highly regarded for the liveliness, warmth, and clarity of its writing. It is a text that students enjoy reading. Now in its third Canadian edition, *Psychology* gain smoothly

integrates gender, culture, and ethnicity throughout the text, providing a comprehensive and current introduction to the field.

MyPsychLab with Pearson eText -- Valuepack Access Card -- for Psychology: From Inquiry to Understanding, Third Canadian Edition Rev. ed. of: Foundations of psychiatric mental health nursing / [edited by] Elizabeth M. Varcarolis, Margaret Jordan Halter. 6th ed. c2010. Comer and Gould's Psychology Around Us demonstrates the many-often surprising, always fascinating- intersections of psychology with students' day-to-day lives. Every chapter includes sections on human development, brain function, individual differences and abnormal

psychology that occur in that area. These "cut-across" sections highlight how the different fields of psychology are connected to each other and how they connect to everyday life. Every chapter begins with a vignette that shows the power of psychology in understanding a whole range of human behavior. This theme is reinforced throughout the chapter in boxed readings and margin notes that celebrate the extraordinary processes that make the everyday possible and make psychology both meaningful and relevant. The text presents psychology as a unified field the

understanding of which flows from connecting its multiple subfields and reinforces the fact that psychology is a science with all that this implies (research methodology, cutting edge studies, the application of critical thinking).
